633	E Kirk	NA	NA	DS10	<p>Removing Walsgrave site and introducing Lodge Farm as a direct replacement, delivering only 825 homes within the plan period, 15 miles from Coventry, and its job opportunities and instead in a remote jobless location on the south side of Rugby means the borough will fail in its obligations under the MOU. Warwick District Council recently submitted plan for examination, failing to directly deal with their obligation to provide for Coventry's overspill. As a result the examination was paused and the plan sent back to Warwick, causing at least a 1 year delay in the adoption of the plan. As a direct result Warwick allocated green belt sites near Coventry. Does not deal directly with the Council's obligation under the MOU unless it reallocates the Walsgrave site and removes Lodge Farm from the plan. Site is located in parish of Grandborough. Parish Council conducted a survey in relation to its neighbourhood plan where 87% of respondent households were against the proposal. NPPF requires evidence base and sustainability assessment of sites to be available as part of the Council's decision making process. Lodge Farm was substituted for Walsgrave early in 2016 when no sustainability appraisal was</p>	Remove Lodge Farm DS10 from plan.	<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.</p>

					available. Delivering flawed sustainability after making the decision to include Lodge Farm as preferred option begs question as to whether the assessment was created to support the decision, especially when so much of evidence base is missing.		
634	C J Whittacker	NA	NA	DS10	<p>Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry. Proposes revised SA scorings for SA1, SA2, SA3, SA4, SA6, SA7, SA8, SA11, SA12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at surrounding nearby settlements; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

					Farmland not brownfield.		<p>Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

739	Steven Seager	NA	NA	DS10	DS10 contradicts NPPF Paragraph 112 as it proposes to needlessly allocate agricultural land.	Remove DS10	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
740	Michael Judge MBE	NA	NA	DS10	I conflicts with paragraph 112 of the national policy framework as it needlessly takes agricultural land	Remove DS10	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
741	Pat Judge	NA	NA	DS10	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncoded proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

					cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. A more focused delivery strategy would make better use of existing infrastructure.		greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.
741	Patricia Judge	NA	NA	DS10	Conflicts with NPPF Paragraph 112 as it needlessly takes agricultural land	Abolish DS10	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

753	Clive Hancock	NA	NA	DS10	Lodge Farm originally to be provided in the Coventry area outside Walsgrave. Increase in traffic		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
758	Sarah Valerkou	NA	NA	DS10	Objection to DS10 as the Sustainability Assessment for DS10 lacks evidence, detail and was produced after the decision to include DS10 was made which is unsound; developing a Sustainability Assessment after including DS10 suggests the evidence is being stretched to support the inclusion of DS10; lack of evidence concerning Ecology, highways deliverability, no conclusive transport assessment, missing Phase 1 Ecology Assessment, no utilities assessment i.e. sewer capacity/treatment etc., no landscape assessment, no consideration on Heritage or Archaeology, no site investigation, no agricultural land classification report, absence of a flood risk assessment, an extremely immature Master Plan/Development Framework.		The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
758	Sarah Valerkou	NA	NA	DS10	<p>It has not been demonstrated that the sub-market housing areas can absorb the housing provided by DS10 over the plan period which will impact housing delivery and land supply; no evidence the 12,700 homes proposed for South West and South East of Rugby can be supported can be absorbed by the housing sub-market areas, existing slow delivery rates are due to a lack of demand; E.g. Rugby Mast site is only served by 3 different developers and is anticipated to deliver well below the 6,000 projections; RBC needs to bring forward the delivery of the SUE within the first 5 years of the Plan yet the delivery of the SUE in this timeframe is not supported by the evidence in the Local Plan; RBC needs to present firm evidence that the SUE can be delivered and the housing market areas can absorb the project rate of housing delivery.</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
764	Michael Tylour	NA	NA	DS10	<p>The proposed development at Lodge Farm is unsustainable. Blue Boar Farm where the A45 meets Lawford Lane provides a suitable alternative site. The site is greenbelt although this may be negotiable. Site is no longer greenbelt due to nearby industrial and residential development. This would re-balance growth around Rugby, allow for better traffic flow, shoppers can use the bypass to access the town centre, nearby sewage works and electricity substation could be enlarged, nearby farmers may be willing to sell their land.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>
764	Michael Tylour	NA	NA	DS10	<p>Respondent received correspondence from Cllr Timms, who has confirmed land in question is included in a Warwickshire County Council mineral plan consultation. The land would be better as housing-sand and gravel extraction would be detrimental to neighbouring amenity. Once the land is excavated, backfilling the site with rubbish would cause environmental health issues and the land would have little agricultural use for years. Lodge Farm is unsustainable and will cause issues with traffic congestion and strains on services.</p>	<p>Remove land at Heath Lane from the greenbelt and use for residential development</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

764	Michael Taylor	NA	NA	DS10	DS10 conflicts with NPPF Paragraph 112 with regards utilising agricultural land for residential development unnecessarily	Remove DS10	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
765	Lucy Ennis	NA	NA	DS10	<p>Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period.</p> <p>Proposes revised SA scorings for SA14, SA12, SA4 and SA2 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at surrounding nearby settlements; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will necessitate the use of the private car to access services, leisure and cultural facilities; and there is no certainty over the delivery of onsite GP and commercial space.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

771	Stewart Wright	NA	NA	DS10	<p>Concern of loss of countryside and STA does not extend southwards along the A45 as far as the proposed Lodge Farm allocation. The area of the network to be assessed should extend into Daventry District to include the villages that are located in this area and also account for employment areas located in Daventry town. Plan makes no assurance infrastructure needs can met to support growth. RBC failed duty with NCC and DDC. Believe highway work proposed by WCC will not improve the current problems at the Dunchurch crossroads. The traffic congestion currently being experienced by the village will only be multiplied. Residents within Dunchurch already suffer from lorries, etc. Crossroads already well known for air pollution - concern of health. No evidence that increasing the supply of allocations in the way proposed will actually increase delivery. Need to accelerate existing infrastructure. Recognise need to boost supply of housing re NPPF. However, plan does not justify greenfield sites of 1500 homes in countryside. No justification given in MoU as to why RBC are proposing to build 2800 dwellings from Coventry's housing allocation.</p>	<p>A detailed expert assessment of all aspects of the Heritage and Natural Environment is necessary before DS10 is included in Local Plan. RBC should remove Lodge Farm from the Local Plan. Redo evidence and be subject to fresh public consultation.</p>	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.</p>
771	Stewart Wright	NA	NA	DS10	<p>Re: SHMA - concerns over impartiality of consultants and that</p>		<p>No change required. The justification of Coventry City's unmet housing need is</p>

804	Wendy Collings	NA	NA	DS10	<p>The proposed development contravenes NPPF paragraphs NPPF 30, 34, 37, 95, 120, 123, 124. The recent closure of the Western Relief road for works lead to a huge increase in traffic through Dunchurch with congestion along Daventry Road, London Road and Southam Road- Lodge Farm would increase air and noise pollution as well as vibrations which risk damaging historical properties. The proposed development also contravenes NPPF paragraphs: NPPF ref 17, 58, 126,129,132-138, 126. The character of Dunchurch will change due to alterations needed to the crossroads- the statue of John Scott was erected in 1887, the Alehouses were founded in 1663 and rebuilt in 1818 (now Grade II listed). Historical significance relating to the Gunpowder plot. Surrounding villages and Daventry will be affected by excessive traffic. The consultation period should be extended. NPPF 30, 34, 37: No new schools are proposed yet local schools are at capacity so children in Dunchurch are no longer permitted to go to Ashlawn School. NPPF ref: 57, 58, 69, 70, 73, 74, 93-104, 109, 114-119,112: The proposed development would exacerbate flood risk.</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. 					regeneration; and there is no certainty over the delivery of onsite GP and commercial space.		
851	Jeff Lewington	NA	NA	DS10	<p>Concerned for future of Dunchurch as an independent village and the environmental destruction of areas that should be valued for their natural habitats. Have evidence of observed species on this site that should be protected under Wildlife and Countryside Act 1981. Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncoded proposals. Dunchurch crossroads is particular area of concern for traffic congestion and impacts of industrial development near to A45/M45 junction. Additional traffic would be contrary to NPPF para.30 and 124 on traffic congestion and air quality.</p>	Plan should be rejected in its entirety.	<p>No change required. Sites have been appraised on a consistent basis utilising Phase 1 Habitat survey. Further detailed Ecological reports will be submitted as part of any future applications. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing</p>

DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
855	Bernard Sutton	NA	NA	DS10	<p>DS10 main point is that it has two bus stops on the A45. The service stopped Dec 2016 making both Willoughby and Onley villages cut off and private cars are the only means of transport unless those who can afford expensive taxis can go into Rugby or their local health care. Commercially operated service run for 6 months (Braunstone-Rugby via Onley Park) will end Dec 16 stagecoach have advised that the service isn't commercially viable. Alternative services are away from the site therefore the promotion of the two bus stops is ludicrous. School children attending schools in Rugby get a taxi to and from free of charge. When the bus service was available it cost parents around £700 per year. The section of the A45 where the site is located is extremely busy and very dangerous sign was put up in 2010 about the number of accidents and casualties. Since 2010 there has been more accidents and casualties. Since Oct 2016 there have been 21 additional accidents and a further 3 accidents that I am aware of resulting in the closure of the a45 on two occasions from Grandborough turn to Dunchurch resulting in traffic via Grandborough village to Dunchurch as no access is available to the M45.</p>		<p>No change required. Policy DS10 will require the development to have public transport with the site developers having experience of delivering such services for a similarly located site. The viability of the scheme would be enhanced by the development of the site and providing benefits to surrounding settlements. WCC Highways have not stated that the presence of the high crash route would prevent development of DS10.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
855	Bernard Sutton	NA	NA	DS10	<p>No flood risk assessment has been undertaken for DS10. Heavy rain fall in Leam Valley in March 2016 and pictures display flooding off the prison drive just off the A45 which is located opposite to Lodge Farm. Process of Draycote Water when the reservoir is at bursting point the reservoir unloads water over the fields, this in turn raises the Rainsbrook stream which causes flooding. Shocked that RBC have not completed a flood assessment of the Leam Valley area which is already known to the environment agency. Disregarding existing and future parishioners who's houses will become flooded.</p>		<p>The selection of sites was informed by a consistent evidence base which included a Strategic Flood Risk Assessment. A site specific FRA will be submitted as part of the planning application process to demonstrate compliance with Local Plan policies SDC5 and SDC6. The EA and LFRA have not stated that a FRA is required to support the Plan.</p>
855	Bernard Sutton	NA	NA	DS10	<p>Complaint concerning the lack of information that has not been available to the public even after a 2nd round of consultation concerning the highways report. Unable to come to a valid conclusion and provide any written comments when the information is still lacking the vital traffic assessment report. All informal should be available at the start of the consultation period.</p>		<p>No change required. The STA June 2017 was an update to the STA that supported the Publication Draft. The STA June 2017 supports the allocations and strategic mitigations for the Local Plan.</p>

897	Christopher Mills	NA	NA	DS10	STA: Does not fully account for the transport impact from Lodge Farm allocation. Given proximity to M1 and with regard to other developments, area of assessment should be extended. RBC failed in duty of care to co-operate with officers from Daventry District Council and Northamptonshire Council.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
898	TWC Millington	NA	NA	DS10	Population projections have been treated as forecasts within the SHMA- contrary to government policy; does not take into account impact of Brexit; consultants GL Hearn not impartial as they have acted on behalf of developers; proposed use of greenfield sites above acceptable levels; housing and employment needs of neighbouring authorities need to be considered when it is appropriate to do so- no information as to why Coventry cannot accommodate the 2,800 dwellings; concern raised in relation to air pollution and subsequent effect on quality of life- which could still be a problem after the South West Link Road has been opened; concern in relation to coalescence between Dunchurch and Rugby; DS8 unsound as it is contrary to NPPF Paragraph 30 (congestion) and 124 (air quality); area covered by STA	Remove DS8; Local Plan needs revising	Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous

					employment opportunities in the area; site will not promote urban regeneration; and there is no certainty over the delivery of onsite GP and commercial space.		GP and commercial space.
904	Harry Turncock-Rogers	NA	NA	DS10	<p>Accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period.</p> <p>Walsgrave Hill Farm site would provide a more sustainable site to meet housing overflow from Coventry. The decision to remove this proposed allocation is contrary to the argument that additional allocations are necessary or justified.</p>		<p>The NPPF states a plan period of 15 is preferable, not a requirement. The growth proposed for allocation within the plan exceeds the plan period. The approach taken to determining the residual housing need and annual targets ensures deliverable growth across the plan period. It is also an acceptable approach, in particular within the HMA. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. 					public transport; the site will necessitate the use of the private car to access jobs retail ,services, leisure and cultural facilities impacting on congestion and air quality; limited employment opportunities in the area; site will not promote urban regeneration; and there is no certainty over the delivery of onsite GP and commercial space.		
928	Brian Williams	NA	NA	DS10	A village in the open countryside will have a big impact on the environment, wildlife and the surrounding villages. It will not be sustainable with no transport assessment also surface water, foul and sewage to be disposed of how will this be met. Will be new school built and Doctors surgery. Which hospital do you go to, police for the area Rugby police station is not functional for night time cover. Consideration has not be given to the impact of more tragic on the roads mainly the A45 which is a high risk accident route especially at the junction of Long down Lane onto the A45. More traffic into Dunchurch which is already suffering from pollution. There are plenty of sites in and around Rugby to be built on such as Walsgrave, Coventry speedway, old nursery etc.	The plan is unsound as it does not directly deal with the Council's obligations under the MoU with Coventry unless it re allocated Walsgrave site and removes lodge farm.	All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.

966	Erica Milwain	NA	NA	DS10	<p>Walsgrave Hill Farm would be more suited to development as it is close to nearby employment sites and other facilities thus reducing the need for car journeys. As no new facilities are proposed there would be increased traffic into Dunchurch to use local facilities- compounding existing traffic congestion and pollution problems, contravening paragraphs 30, 34, 37, 75, 95, 120 and 124 of the NPPF. Developing agricultural land is contrary to NPPF paragraph 112</p>	Remove DS10 in favour of Walsgrave Hill Farm	<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
969	Kathryn Harris	NA	NA	DS10	<p>DS10 is unsound as there are not enough secondary schools in the area; children in the DS10 area already do not get their first choice of schools. The site will also lead to a huge increase in traffic and congestion, including at Dunchurch, which will lead to higher levels of air pollution. There is no safe cycle path from the M45 slip road into Dunchurch. People travelling from Lodge Farm will have to go out of their way to use new link road bypass around Dunchurch so undoubtedly will take shorter route through crossroads. DS10 does not enhance the vitality of Rugby town centre nor promote sustainable transport therefore it does not comply with NPPF.</p>	Remove Lodge Farm and replace with Walsgrave site	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 989	P M Freemen	NA	NA	DS10	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS8 - needlessly takes agricultural land and is contrary to NPPF para.112. 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. Journeys to and from the location</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

1011	Pauline Cooke	NA	NA	DS10	<p>The proposal is a threat to open spaces, NPPF Para 58,69, 70.73 and 74. Threat to Landscape Para 109. Threat to Agricultural land para 112, would damage mammals , invertebrates, birds and plants para 114 to 119. The proposal would result in excessive car journeys para 30,34,37 and 95. The proposal is without community support para 52 and would destroy the character of existing settlements17 and 58 and would increase the threat of flooding. Walsgrave hill is a more likely location</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. No change required. Sites have been appraised on a consistent basis utilising Phase 1 Habitat survey. Further detailed Ecological reports will be submitted as part of any future applications. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.</p>

1019	Dr J R Ponsford	NA	NA	DS10	<p>UK currently depends on imports for some 40% of its food. Any increase in population must increase this dependency disproportionately as cultivable land is lost. Twice last century country narrowly escaped starvation as a result of blockaded food supplies. World is hardly safer now that Aleppo's suffering now vastly exceeds Guernica's provided just one instance. Cannot be assumed otherwise that adequate, affordable access to food imports will continue indefinitely as population growth elsewhere</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Comments noted although not considered to affect soundness of plan.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>increases completion for worlds food output. Food importing countries will be most at risk once demand exceeds supply. Ever intensive agriculture here and abroad will hasten mass extinction of other species. Human environment, whether in overcrowded cities, flooded houses on flood plains, remaining but overcrowded countryside, or never ending traffic jams, will lose many of its current pleasures, and increase risk of disaffection and strife. Global temperature rise. If rational and equitable efforts to achieve a peaceful reduction to a genuinely sustainable population size were successful, and if climate change can be halted, a very much higher standard of living for all of humanity and a continuing and advancing future could ensue.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1020	Margaret & Michael Reynolds	NA	NA	DS10	<p>The draft plan does not set out how many houses are to be built from the beginning of 2016 to 2031. Policy DS3.1 to DS3.5 lists a total of 13,400 dwellings with some already allocated for development with planning permission. The amount of houses has an enormous negative impact for all existing residents regarding quality of life, amenities and traffic congestion. There is no mention of the cost, timings for new roads. Car parking plans are inadequate, Bus routes are unreliable and inconvenient and cycling anywhere is a distinctly risky undertaking.</p>		<p>The Housing Background paper and appendix 2 (Housing trajectory) of the Local Plan. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.</p>

1025	Wendy Cox	NA	NA	DS10	Comments objecting to the Sustainability scoring; Site is unsustainable location and will necessitate private car usage; limited public transport use; site is remote with no connection to main urban areas. Site would impact landscape and affect open areas; no distinctiveness of area; site lacks definition, and would be open to infill and expansion.		The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.
1025	Wendy Cox	NA	NA	DS10	Objections other than regarding sustainability scoring: Lack of local support and the site is located in the Parish of Grandborough; Grandborough Parish Council conducted a survey in relation to its neighbourhood plan, where 87% of the respondent households were against the proposal.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1025	Wendy Cox	NA	NA	DS10	<p>Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is needed when it is outside the development strategy and no evidence that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA9 with the reasoning covering the following: Site will have a negative impact by using a green field site loosing resources from the local environment; increased consumption of building materials, then fossil fuels; no public transport and additional traffic</p>		<p>No change required. 1035	Andrew & Clare Grant	NA	NA	DS10	Development would change the nature of the area, destroy countryside, no existing infrastructure in the forms of schools, doctor's surgeries etc. Upper Leam Valley should be retained as a rural haven. A more appropriate site should be found.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.
1037	J Charles & Lucy M Thompson	NA	NA	DS10	Proposed location will affect the area in a profound way. Traffic Congestion, destroys the character of the settlements a threat to open spaces and landscapes and a threat to agricultural land.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

1040	Kerri L Wing	NA	NA	DS10	<p>I object to the proposal of the Lodge Farm Garden Village development we will be subject to lorries passing up and down the lane which roads are not equipped for. Most households have 2 cars and this will increase traffic immensely. Not that anyone qualified would come. Dunchurch suffers from bottleneck effect at peak times and additional traffic will only exabborate this. It seems only executive housing will be built with high prices. There won't be any new jobs. Flooding will only worsen</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

1058	Jason Robert Tysoe	NA	NA	DS10	I Object to Lodge Farm, It is in open countryside, site should be near employment, no public service infrastructure, NHS and local schools already under pressure, High flood risk area.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.

1083	Jeremy Stocker	NA	NA	DS10	<p>Council is planning for a gross over-supply of housing sites. Though it is prudent to plan on some sites not being fully developed, it is also true that actual demand (as opposed to forecast demand) will dictate the rate of completions where planning consent already exists. The Lodge Farm site is simply not required. Unmet need from Coventry was proposed to be met to the west of the Borough this was dropped for Lodge Farm which will increase traffic. Lodge Farm located in the Leam Valley and will impact on flooding on surrounding settlements. Great Crested Newts present in Leam Valley survey required. STA does not cover south of the Borough and Daventry therefore no mitigations in place bar two roundabouts which will increase congestion. Settlement is on productive agricultural land remote from services. Allocation of the site is counter to its own development strategy and national policy. Remote from employment and facilities with the public transport improvements not contained in the IDP. Sets out SA1-18 why the SA objectives will not be met or be degraded. Sets out nappy para that the proposal does not meet</p>		<p>The housing target is not a minimum because it is based on need. . The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

1083	Jeremy Wright MP	Member of Parliament for Kenilworth and Southam	NA	DS10	<p>Requests consultation period to be extended as the inclusion of Lodge Farm is a significant change over the original plan consulted on, local people feel there have been given insufficient time to comment and given the substantial amount of documentation the statutory 6 week consultation period is insufficient (representation dated prior to further consultation). Concern about the proposal for Lodge Farm, with 1,700 signatures and 1,000 letters of objection at the time of writing, the scale of the development would affect the rural character of the area, concern about the sustainability of the location, flood risk, poor local services and infrastructure, road safety concerns around the A45, no secondary school and GP provision and poor access to Rugby Town Centre and Railway Station. The proposed development would generate significant vehicle movements to access services, further exacerbating Dunchurch's existing congestion issues and making Willoughby and Grandborough 'rat runs'. WCCH need to undertake a full assessment before the idea is advanced any further.</p>	DS10 should be removed	<p>Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016</p>

1087	O M Palmer	NA	NA	DS10	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is needed when it is outside the development strategy and no evidence that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at the surrounding nearby settlements; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry; site will be a burden to existing services and additional traffic will impact walking and cycling and safety.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.</p>

The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

1152	Dennis Edwin Neville	NA	NA	DS10	Further burden on rural facilities, through increased traffic, limited GP and school places, already stretched services such as policing and fire and a negative impact on the entrance and exit of the A45, further delays in Ambulance and Fire response times due to increased traffic The number of affordable homes will create an exclusive area and is remote from business and social opportunities. Will increase the need to use private vehicles, bus service is non-existent.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.

1158	Ben Vessey	NA	NA	DS10	<p>It will ruin the village and will cause a major flood.</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

1166	Jeremy Wright MP	NA	NA	DS10	<p>Recognise the urgent need for local plan to be in place to avoid the Borough being susceptible to speculative planning applications and piecemeal development. However concerned about proposal to build 1,500 homes in open countryside which would change dramatically the area around Grandborough and Willoughby from an extremely rural environment. Concerned about the sustainability of the area as a site for major development regarding flooding, availability of local services, and lack of infrastructure including high speed broadband. Also a need for secondary school places as this area is on edge of catchment area for Rugby's secondary schools. No mention of primary healthcare and site is also poorly located for access to Rugby town centre and railway station. There will be considerable increases in traffic movements in the area and residents likely to access Rugby via Dunchurch which has considerable problems with traffic congestion. Justified concerns about safety of the A45 in the vicinity of Willoughby and a fear that local villages will suffer from roads through these being used as rat runs to Leamington and further afield. Expect WCC to carry out full review of traffic impacts on this site in local</p>	<p>Do not believe the Lodge Farm site is a viable site for inclusion in local plan and should be removed</p>	<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

The site is considered capable of meeting its policy requirements.
1247	Cllr Crane	NA	NA	DS10	Serious concerns around whether Policy DS10 is sustainable and deliverable on the grounds set out below. In addition, the site has been allocated with a lack of public consultation and involvement which is contrary to the garden village principles STA - does not fully assess the impact of Lodge Farm,	It is requested that Lodge Farm (policy DS10) be removed from the Local Plan. If, subject to provision of evidence to justify the OAN figures, a further 1,500 homes are required to be allocated	Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>STA based out on an out of date model not recognising Toll Bar island and Leicester road developments, does not cover journeys to the south of Rugby where DS10 is located meaning journeys to Daventry, Leamington and Southam through local villages, M1, A5, M6 and M40 have not been assessed by the model, the full impact of the proposed development cannot be known as it is highly likely that local villages such as Grandborough, Willoughby, Flecked (and others) would be used as “rat runs” by traffic from Lodge Farm. The STA highlights that increasing traffic at Dunchurch cross roads is highly undesirable and recommends that development at Lodge Farm should not take place until the South West Spine Road has been completed (2026-2031). Even with the spine road in place the STA concludes additional highway mitigations are required in the PM. Dunchurch crossroads is already functioning at capacity and there are minimal adjustments which can be made to the existing junction due to constraints of listed buildings and monuments so it is not clear what, if any effect, such additional highway mitigation measures could realistically achieve. In addition, the Dunchurch cross roads are in an Air Quality Management Area where the</p>	<p>in the plan period then the site known as “land south of Walsgrave Hill Farm” (included at page 20 of the December 2015 Preferred Option Draft Local Plan) should be reinstated to the Local Plan to replace DS10. The site for 1,500 houses on the Coventry Urban Edge “Land South of Walsgrave Hill Farm” which was proposed in the previous draft Local Plan, whilst situated on greenbelt land, was justified for inclusion on the basis that it met the unmet housing need of Coventry City. In addition, the Walsgrave site offers a more sustainable alternative than DS10 (Lodge Farm) as it is close to existing infrastructure (M6, A46 and key employment sites) and also to Coventry City itself and to Coventry hospital. The Walsgrave site was removed from this latest draft of the local plan by Rugby Borough</p>	<p>the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. 1341	Elaine James	NA	NA	DS10	DS10 contradicts NPPF paragraph 112 and is unsustainable. No provision provided for schooling, emergency services, highways provision through Dunchurch, increased traffic on a high risk crash route, increased noise and air pollution,	Remove DS10	All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.
1342	Elizabeth & Clive Woolf	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry. Proposes revised SA scorings for SA1, SA2, SA3, SA4, SA6, SA7, SA8, SA11, SA12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at surrounding nearby settlements; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.

The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	Letter received along with large number of questionnaires (30) completed by residents of Dunchurch.		Comments noted - No changes required

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	Main concerns for residents are the levels of pollution within Dunchurch which are already at dangerously high and illegal level without adding additional heavy lorry traffic created during construction and the additional traffic that will be generated once the properties are occupied.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	Amount of traffic travelling through Dunchurch is also a concern as the Dun Cow junction is already operating over capacity with traffic regularly queuing at peak times on Rugby Road back to Cock Robin Island and on Southam Road beyond Toft Hill. Any additional traffic is not an acceptable option.		The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following a decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). The delivery of the South West spine road is a necessary infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggest that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	Residents are concerned that both the Borough and County Council accept their obligations clearly stated in the emerging Local Plan that development resulting in significant negative impacts on health and wellbeing of people in area because of pollution, noise or vibration caused by traffic generation will not be permitted unless effective mitigation can be achieved. Measures should take account of the cumulative impact of development proposed. Also concerns that existing services within the village will not be able to support the increase in local population without significant support from developers.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. All service providers have been consulted with and no change is required
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	Need to comply with NPPF regarding boosting the supply of housing is recognised, however plan does not justify why provision needs to be made on a greenfield site in a location outside of its development strategy to locate 1500 dwellings from Coventry's housing allocation. Bearing in mind no justification has been given in the MOU as to why Rugby Borough Council are proposing to build 2800 dwellings in total from Coventry's housing allocation.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The approach taken to determining the residual housing need and annual targets ensures deliverable growth across the plan period. It is also an acceptable approach, in particular within the HMA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	In draft plan additional housing required by Coventry was to be met by development at Walsgrave. In reality the Green Belt has already been compromised in this area as it is surrounded by the brownfield sites of Ansty Park and Rolls Royce.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	<p>No explanation is given as to what analysis has been undertaken to explore how delivery on existing permissions/allocations could be accelerated, by measures such as early delivery of infrastructure. More focussed delivery strategy would make better use of existing infrastructure and require less new infrastructure, and would therefore have a higher chance of delivery than the more 'dispersed' approach that is being suggested. No evidence that increasing supply of allocations in the way proposed will actually increase delivery.</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

							has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.
1395	Lindsay Foster	Dunchurch Parish Council	NA	DS10	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS10 - it is accepted there is a need to comply</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggest that the road will not be shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. A more focused delivery strategy would make better use of existing infrastructure.</p>		
1399	Dr Jo Reed Johnson	Pailton Parish Council	NA	DS10	<p>DS10 - Again this will have a great impact on the very small neighbouring villages and hamlets, together with traffic into Dunchurch and through the narrow lanes to Southam. These housing numbers could be better placed close to Braunstone, so that all traffic movements have to access the A45 only. Also believe greater thought and firm policy be put in place to protect Conservation Areas and Listed Buildings.</p>		<p>Site has been considered to be the most suitable option and relevant Highways work has been undertaken or is being carried out. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No change.</p>
1402	Jayne Warman	Napton Parish Council	NA	DS10	<p>Publication draft not prepared in accordance with public law because RBC voted to proceed to the Publication Draft without having first considered the responses made to its first consultation.</p>		<p>Responses to Preferred Option were considered prior to Publication Draft with any amendments considered necessary included. No change.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1402	Jayne Warman	Napton Parish Council	NA	DS10	(a) A reasonable and better alternative which has not been considered by the LPA is accelerating the development of the Rugby Radio Masts site, thus avoiding the need to bring forward new development proposals in the countryside;		Planning cannot influence rate of construction and therefore this is not an option. No change.
1402	Jayne Warman	Napton Parish Council	NA	DS10	(b), proposed Local Plan breaches NPPF Para 37 which aims to minimise unnecessary car journeys by providing for a balance of land use within an area. So called garden village at Lodge Farm will have few employment opportunities for residents and lack secondary school. Consequently many unnecessary car trips generated contributing to climate change. Contrary to NPPF 57. Lodge Farm will destroy rural nature of surroundings. Para 109 NPPF aims to protect and enhance valued landscapes. Napton (on Hill), values prospect to North over mainly undeveloped Leam Valley, strongly opposes urbanisation in this area.	Plan should be improved by withdrawing policy DS10 and making necessary consequence changes to policy DS3 etc.	Comments noted however infrastructure needs etc. considered achievable and that the site is suitable for allocation.

1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA3 Promotion of the health of the population: Revised to significant negative and justifies a - - score. Additional traffic through Dunchurch, South to Daventry and through surrounding villages will significantly increase air pollution. Dunchurch intersection already designated AQMA. Healthcare facilities not accessible within walking distance further promoting use of private transport.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA4 (Provide affordable and decent housing): Revised to minor negative and justifies a - score. Anticipated high cost of infrastructure and the projected delivery of only 840 houses in the plan period will result in negligible or no affordable housing. No affordable housing provision by plan stage is provided in the consultation documents enclosed. Remoteness of site will significantly reduce practicality for unemployed or lower income families to live there due to the lack of public transport and limited access to private transport, as well as additional cost of travel to facilities. Executive style housing will further limit social integration.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA6 (Provide strong and stable local economy): Revised to: significate effect and justifies a - - score.. Limited employment opportunism exist in area and little opportunity on site. Residents forced to drive to employment areas. Traffic to employment onto A45 substantially increased with consequent impact on surrounding villages up to M1 J18, Daventry, and North into Coventry and beyond.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA7 (Promote vitality and viability of town centre): Revised to minor negative impact and justifies a - score. Traffic congestion into Rugby from the site will discourage residents from shopping and trading in the town. Residents as they currently do in surrounding villages will choose the trading centres on the outskirts of Coventry, in Daventry, Fosse Park Leicester ciao the A45 thus depriving the town of revenue and increases the shopping miles by car.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA8(Promote regeneration of urban areas): Revised to significant negative and justifies a - - score. Site is completely isolated from urban area so fails this test. Anticipated high cost of infrastructure and projected delivery of only 840 houses in the plan period will result in negligible or no affordable housing. See response to SA7 above.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA11 (Reduce the Borough's contribution to climate change): private vehicle access to facilities will significantly impact on air quality. No plan for delivery of improved public transport and very limited bus service. Community services and facilities in surrounding villages are extremely limited and no plan for effective delivery for 800 houses in the plan period. This site could operate as a self-contained domain Rural Settlement within the plan period as alleged.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	SA15 (Promote a sustainable Transport Network): Revised to significant negative effect justifies a - - score. STA only extends to Rugby Town, DIRFT and a limited number of villages. Fails to make any assessment of impact from the proposed development site., so no satisfactory assessment and flawed scoring. Model does not extend southwards as far as proposed Lodge Farm allocation. Does not include potential rat runs. Area assessed should be extended and take into account employment areas in Daventry. Relationship of prospective residents with other areas should be fully explored. Not established that proposed spine road will mitigate impact on traffic on villages south of Dunchurch and through to Daventry.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
1404	Mike Thomas	Willoughby Parish Council	NA	DS10	Accepted that need for plan to comply with NPPF to boost supply of housing. RBC have already granted planning permissions which would largely satisfy their allocation. Objections to the inclusion of DS10 includes absence of any assessment of why provision needs to be made on a greenfield site. Plan acknowledges significant supply of housing from existing permissions/allocations, but does not explain why delivery of existing allocation and infrastructure		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from

1430	Andrew Morgan	Place Partnership	Warwickshire Police (WP) and West Mercia Police (WMP)	DS10	<p>The scale and type of development proposed by Policy DS10 will necessitate the delivery of infrastructure to support police service delivery to the site. As it does not reference this, WP and WMP consider Policy DS10 to be ineffective and inconsistent with national policy as currently drafted. It should also be borne in mind at this juncture that 'infrastructure' is not a narrowly defined term as Policy DS10 appears to imply, as the definition in the Planning Act 2008 provides a non-exhaustive list to the extent that there is no difficulty in the proposition that police (incassate offices) can be required by policy in Local Plans. The acceptance of emergency services requirements is accepted in the IDP and should be reflected in DS10.</p>	<p>To resolve all of the concerns of WP and WMP expressed in these representations, it is requested that Policy DS10 include the following additional bullet point:</p> <ul style="list-style-type: none"> • Provision of police infrastructure, as set out in the IDP. <p>It should be noted that the IDP, which is already the subject of partnership work between WP, WMP and the Council, envisages further work taking place to identify precisely the infrastructure required and the contributions required as a result. Amending Policy DS10 as requested will provide the necessary framework to enable this work to continue in conjunction with the developers.</p>	<p>Change made to the IDP with the infrastructure requirements set out by the respondents contained within the modified IDP (LP54.140). Specific change to policy as stated not considered necessary to ensure the soundness of the Plan.</p>

1438	Bill Blincoe	Coventry & Warwickshire Local Enterprise Partnership (LEP)	NA	DS10	<p>Doubts that Lodge Farm new settlement represents a sustainable development option and will not contribute effectively to meet needs of the HMA. Also concerned by evidence of its deliverability and absence of accompanying employment allocation to deliver balanced growth. Aware that Lodge Farm site is outside Green Belt, however given the need for both sub regional employment and housing growth over plan period and beyond then strong and compelling case to release Green Belt for allocation at Ansty/Walsgrave. Comparative exercise needed looking at merits of range of strategic options and testing sustainability and infrastructure requirements. Previously suggestion that development on edge of Coventry cannot make early contribution to meeting housing or employment growth due to delays in provision of highways infrastructure - further information now suggests this may be inaccurate. Evidence based exercise needs to be carried out to demonstrate that alternatives to preferred strategy have been fully considered and evaluated - LEP be happy to participate along with other necessary agencies to help demonstrate soundness of the plan.</p>		<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary. The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016. Therefore to allocate further land at the Walsgrave would not be in accordance with the CW Employment Land MoU and it will also increase the housing numbers for the HMA. Further to this uncertainty still remains over the access arrangement for the site and there are heritage issues for the site.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1439	Tom James	NA	NA	DS10	<p>The plan does not justify why provision needs to be made on a greenfield site in a location outside of its development strategy. The plan does not explain what analysis has been undertaken to explore how delivery on existing permissions/allocations could be accelerated. The STA that has been prepared to inform the Local Plan does not fully account for transport impact arising from the proposed Lodge Farm allocation. Goes in the Daventry District and Daventry itself within paragraph 4.71. Officers from Daventry District Council, Northamptonshire Highways and Education, Rugby Borough Council and Warwickshire Highways and Education met with regard to this allocation and as part of the Duty to Co-operate. Further to this comments were provided to Rugby Borough Council from Daventry District Council and Northamptonshire Council requesting changes to the scope of the Transport Assessment and suggested that a gravity model be used instead so that wider highway impacts from the site could be understood. The Infrastructure Delivery Plan states that new 2FE primary school provision will be delivered in phase 2 of the Local Plan. Daventry District Council</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>support the early provision of primary school places as this would hopefully reduce the impact on schooling in Daventry District and reduce impact on local infrastructure through additional journeys to and from local schools. Sustainability Appraisal DDC question some of the scoring assigned to each sustainability objective for policy DS10. In respect of objective 2, a score of ‘++’ is considered to be too positive given that the proposed allocation would not include any provision of leisure or cultural opportunities and although there is a policy requirement for public transport links within policy DS10, this requirement is not listed in the Infrastructure Delivery Plan and there is no evidence that such provision would be delivered. Objective 6 is assigned a score of ‘+’ which is considered to be too positive as no employment provision is proposed as part of the allocation and there is no employment area within walking distance. Further to this, although there is a policy requirement for public transport links to surrounding villages, Rugby and Daventry within policy DS10, there is no requirement for any public transport links to employment opportunities at DIRFT and this requirement is not listed in the</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Infrastructure Delivery Plan. There is no evidence that such provision would be delivered.</p> <p>Objective 8 is scored as a ‘-’ and it is considered that this should be ‘- -’ as the proposed allocation will not support the regeneration of urban areas due to its greenfield location that is isolated from existing urban areas. Objective 11 is scored as a ‘+’ however given there are no employment opportunities on site and limited public transport provision to employment areas Objective 14 is score ‘++’ however given the limited nature of the strategic transport assessment it is not clear what impact the proposed allocation would have on all surrounding roads .The Strategic Transport Assessment should be revisited and the transport impact of the DS10 Lodge Farm allocation should be remodelled to include any transport impact on roads outside of Warwickshire and into the North of Daventry District, towards Daventry and the M1. The results of this modelling will enable assessment to be made of the impact that the Lodge Farm allocation would have on the amenity of Daventry District residents particularly given that the draft Local Plan itself acknowledges the proximity of the site to rural villages in the Daventry District and</p>

1460	(No Name)	Grandborough Parish Council	NA	DS10	<p>Summary: The more realistic SA scoring outlined above clearly demonstrates that this is not an appropriate site for a development of this nature. Furthermore if the development were to be allowed it will be classified as a MRS and would provide a core for further development outside the site boundaries. Indeed further land north of the A45, adjacent to the site, but running from M45 bridge over the A45 eastwards has been offered for development and apparently accepted by RBC as potentially suitable. Question figure of 1500, developers would be looking for more so higher figure more realistic. Had the proposal been for land adjacent to the A45 but to the West of Dunchurch and Coventry it might have more validity, since such a location would provide easy access to A45, M45, Western Relief road, new spine road and reasonably wide routes to the South. Or even better, the original Walsgrave site adjacent to Coventry (whose housing shortfall we are required to assist with), and with excellent infrastructure already largely in place.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. 1472	David B Smith	NA	NA	DS10	Once traffic calming measures are put in place in Clifton motorists would (hopefully) wish to avoid the route through Clifton to go shopping or to join the motorway network as M6 J1 and would prefer to travel along the Link Road and Butlers Leap to Leicester Road if that option was made available. The problem will become more acute once the Lodge Farm development comes on stream.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.
1484	D Miller	NA	NA	DS10	Current development already approved add to destruction of the village and cause more congestion. Environment already significantly altered with increased pollution including light, noise, fumes and a significant reduction in local wildlife by destruction of habitats. Reduction in bird and other species. Proposed plan will destroy more of the remaining habitats. Density will completely swamp communities of Bilton and Woodside with particular detrimental effect on Lime Tree Avenue, Alwyn Road and whole of Dunchurch. Use of agricultural land for such purposes not in keeping with National objectives nor		DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the

1677	Linda Beech	NA	NA	DS10	<p>The strategic location for housing should be rethought and located next to employment areas and with easy access to primary highway routes such as Ansty Park. This would be a much more appropriate location for DS8 and DS10 and provide the Coventry overspill requirement at the same time. Considered that the housing numbers in SHMA are seriously over estimated. They are out of date, pre-dating Brexit and exaggerated. Risks diverting developers away from Radio Station site and being counterproductive in delivering housing numbers for the Borough.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>

1722	Jim Rowley	NA	NA	DS10	<p>Lodge Farm Garden Village is simply an opportunistic attempt to secure development value for land in the open countryside. It has no planning merit, and is not sustainable. It has not been accepted under the Government's 'Garden Village' scheme. The site previously proposed at Walsgrave scores better in planning terms.</p>	<p>Policy DS10 should be deleted from plan</p>	<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption,</p>

1723	Jo Martin	NA	NA	DS10	Object to Lodge Farm proposals based on the following: detrimental impact on rural area due to adverse noise, traffic and light pollution; lack of senior schooling provision in Rugby; no evidence provided on extra safety and security needed if development so close to Onley Prison; little or no provision of public transport; increased traffic on A45 which is a high accident route; and, the contrived construction of a 'village' is not how communities are established and develop.	This type of development should be built to the north of Rugby where similar modern housing estates already exist and development would blend in better visually.	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).
1772	Steven Anthony	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. 1774	Adrian Jackson	NA	NA	DS10	<p>Disagrees with the SA scoring for Lodge Farm objectives 1-18 setting out reasoning why and revised scoring. Also sets out various conflicts of DS10 and the NPPF. Sufficient housing already in Rugby, in plan or development, brownfield development first, site is too far away from Coventry increasing car use and pollution, loss of valuable farmland when other sites such as the Rugby Radio Station could be developed, loss of habitat to wildlife, risk of flooding removing natural permeability of the land, new services and sewage treatment works will be required when and how will they be funded, road network does not have capacity for additional traffic, shops in Rugby are able to cope with total numbers proposed, no support by communities, no local employment opportunities for the residents to work in, local services will be swamped, question housing numbers, not in keeping with local communities and landscape, loss of countryside and air quality, congestion and noise pollution.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. 1831	Elizabeth Woolfe	NA	NA	DS10	<p>Object to the Sustainability Assessment Framework Scores. SA1- Reduce Poverty: The proposed community would be isolated, the high cost of infrastructure would result in negligible affordable housing, the increase in executive style housing would increase social exclusion, the burden on limited rural facilities will increase disadvantage, SA2- Access to services, leisure and culture: No deliverable plan for services, leisure and culture. No facilities provided and leisure or culture and requirement for public transport links is not supported in the Infrastructure Delivery Plan. Access to facilities in neighbouring areas will be by car, proposed site for a GP surgery lacks funding to deliver it. SA3- Health: Additional traffic will increase air pollution, health facilities are not within walking distance. SA4- Affordable and decent housing: High cost of infrastructure and projected delivery of only 840 houses within the plan period will result in negligible affordable housing, no affordable housing provision provided in consultation documents, lack of public transport and facilities will limit the ability of low income families to live at Lodge Farm. SA6- Local economy: Residents will be forced to commute outside</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption,</p>

					<p>Lodge Farm for employment increasing traffic in surrounding villages. SA7- Town Centre: Traffic congestion from the site will discourage residents from visiting the town centre and will consequently shop in neighbouring towns. SA8- Promoting regeneration: Site is isolated so does not assist urban regeneration, SA11- Climate Change: Increased traffic, no public transport provision and site incapable of operating as a self-contained rural settlement. SA12- Flood Risk: No FRA details provided despite potential for rainwater runoff. SA14- Sustainable Transport Network: Strategic Transport Assessment unsatisfactory as only covers Rugby Town not development site. RBC have already granted permission which would largely satisfy the housing requirement. Insufficient justification for Lodge Farm</p>		<p>junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

1849	Philip Jolley	NA	NA	DS10	<p>STA only includes Rugby Town, DIRFT and limited number of villages and fails to assess traffic impact from proposed development so no satisfactory assessment has been made; Rugby Wide Area S-Paramus micro-simulation model used does not extend southwards along the A45 as far as the proposed Lodge Farm allocation, does not include potential 'rat runs' through surrounding villages along Long down Road/The Ridgeway/Willoughby/Grandborough/Flecked etc. Given the proximity of the site to the A5, M1, J18 and J16, M40 and M6 the area assessed should extend to Daventry, and all villages in the area and taking account employment areas in Daventry; no evidence proposed spine road will mitigate traffic impacts on villages south of Dunchurch through to Daventry; complaint regarding lack of information provided after 2nd round of consultation in relation to highways report, RBC has rushed the local plan in an unprofessional manner,</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

1849	Phillip and Sara Jolley	NA	NA	DS10	RBC have not undertaken a Flood Risk Assessment for DS10. Flash floods occur in the Nene, Cherwell and Leam valleys causing floods in Flecked, Saw bridge, Wolfhampcote, Willoughby and Grandborough. If heavy rain affects the Rainsbrook Valley the Leam can flood affecting Onley, Grandborough, Kites Hardwick, Marton, Hunningham and Leamington Spa. Severn Trent release water from Draycote Water when the reservoir is bursting-exacerbating water levels causing a backup from the River Leam and River Rainsbrook.		DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
1850	P S K Gossant	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry. Proposes revised SA scorings for SA1, SA2, SA3, SA4, SA6, SA7, SA8, SA11, SA12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. 1851	Paul Meigh	NA	NA	DS10	<p>Strongly opposed to the inclusion of this scheme in the draft plan, particularly in regards to its impact on the local environment, the disregard for building in rural open countryside and the fact that it is fundamentally an unsustainable proposal, especially considering there are better options available (i.e. Walsgrave). Consultation period inadequate, Site will be reliant on the private car to access jobs and services, negative impact on cycling& health, recommended timing of the Lodge Farm site as set out in the STA is ignored with the interim works at Dunchurch crossroads not being modelled or consideration been had to the historic environment, STA model area is not sufficient with it not considering impacts on surrounding villages and Daventry DC; impact on additional flooding in Leam Valley, site is not sustainably located with it not being adjacent to the urban area, impact on traffic on surrounding villages, Rugby will not be meeting its Duty by placing housing 15 miles away from Coventry, no evidence that the housing market can meet the need or target, existing permissions should be brought forward and no demonstrate that the site will increase supply. Cost of</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable</p>

1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS10	<p>This allocation, in preference to the allocation at Walsgrave Hill Farm, etc., is inappropriate. It is not a good sustainable location and is not a Garden Village site that has been identified in the recent Government announcement. Achieving what is suggested by way of a direct high quality public transport link between the site and the surrounding villages of Rugby and Daventry will be difficult to achieve and certainly when viewed in the context of the needs of Rugby and Coventry this is an inappropriate location for housing growth. It is not linked to major employment and other facilities as would be available in the site which we are promoting.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS10	<p>Regard should be had of the fact that we believe this site has not achieved Garden Village status in the recent announcement. Evidence of the local community and other support to this scheme should be made clear and evidence delivered as part of the Plan review process.</p>		<p>DS10 is proposed as a new Main Rural Settlement. The Local Plan seeks to allocate the majority new housing of sites to the urban area but as demonstrated through the SHLAA there is limited capacity.</p>

The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

							has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.
2150	Michelle Simpson-Gallego	Pegasus Group	Lioncourt Homes	DS10	DS10 indicates a capacity for 1,500 dwellings, however 825 dwellings are identified in the Draft Housing Trajectory. Given the infrastructure required, concern 825 dwellings cannot be delivered within the plan period. Significant local opposition to the proposal is also recognised.	The policy should clarify the number of dwellings to be delivered within the plan period.	The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.
2160	Ross White	NA	NA	DS10	Past few months whenever I have had conversations with people from Barby, Onley, Grandborough, Willoughby, Flecked, Saw bridge and Woolscott no one has spoken in favour of the plan or even seen any positives in it.		Comment noted. However, no action recommended.

2172	Robert Anstruther	NA	NA	DS10	<p>G. L. Hearn cannot be considered as impartial or objective therefore this assessment is unsound. Govt guidance states consultants should be independent. G L Hearne acted on behalf of developers for 600 homes in SW Rugby.</p> <p>Population projections treated as forecasts within SHMA which is contrary to government policy, no attention given to future economic conditions including Brexit. SHMA opted for high level of housing need despite high level of uncertainty. SHMA aiming for high level of housing despite uncertainty about future and naïve to links between people and jobs resulting in poor judgements with regard to commuting. Should not have taken unmet need from CCC no clear explanation in MoU</p> <p>IDP vague in respect of infrastructure, no costs, whilst assuming developers will pay. Targets almost impossible to deliver.</p>	Delete DS8	<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period</p>

?	C A Hallam	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified.</p>		<p>No change required. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. 109 & 305	Amber Collings	NA	NA	DS10	<p>Extra air pollution in Dunchurch, already existing traffic congestion in Dunchurch and Rugby, safety concerns in the village due to narrow footpaths and increase in traffic, many historic houses in Dunchurch which will be affected by vibration from increased traffic, degradation of the stone work from pollution. Question the need to build so many houses and industrial units in this area as I am aware of units being vacant and the jobs in the area could not sustain a housing development of this scale. The industrial units proposed would lead to extra-large vehicles using the village – the units (if required) would be better placed around the DIRFT site, the A5 area or Magna Park all with better infrastructure and with the already agreed housing, a good resource of labour.</p>		<p>No change required. The STA identifies the strategic transport mitigations to support the plan with the South West spine road reducing flows through the Dunchurch crossroads. Further, local highway mitigations will be identified through planning applications for sites. The allocations of employment site she allocation of employment sites are required to ensure that the Council's locally identified employment target can be met.</p>
1083 or 1512	Dr J Stocker	NA	NA	DS10	<p>Object. Counter to local and national policy and not required to meet identified housing needs. Draft plan does not meet the NPPF key test in that it is not positively prepared, justified, effective or consistent with national policy. Excess requirement</p>		<p>The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1083 or 1512	Dr J Stocker	NA	NA	DS10	Lodge Farm lies within the Leam Valley, an area with a high water table and subject to regular flooding. Building development of the proposed size can only deflect water onto neighbouring land and watercourses, exacerbating existing problems. Additionally, Great Crested Newts, a protected species, are endemic to the Leam Valley so a specialist survey of the Lodge Farm site will be required.		DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
1083 or 1512	Dr J Stocker	NA	NA	DS10	Of total, 2,200 already provided by March 2016 leaving a further 10,200. Sites for 9346 already have planning permission - over 91% of the requirement - yet the Council only anticipates 5636 (60%) will be completed within the next 15 years. Two conclusions from this - there is insufficient demand to warrant completion of this number and thus the Council's target is excessive, or that the Council intends to develop additional sites without fully exploiting those which already have planning consent, which is illogical.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. The Housing Trajectory is based on an assessment of average build rates taking into account developer capacity and any identified site constraints.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1083 or 1512	Dr J Stocker	NA	NA	DS10	Wrong development 'Garden Village' is a planning euphemism for a housing estate even if, like most large housing estates, it contains (as yet undefined and not guaranteed) local facilities. The Council proposes to place this housing estate on currently productive agricultural land, unconnected to any existing settlement or facilities, despite the Local Plan itself stating that it "...will not generally allow for new-build housing to be provided outside the limits of any defined settlement..."		Lodge Farm is proposed as a new Main Rural Settlement. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
1083 or 1512	Dr J Stocker	NA	NA	DS10	The Local Plan places development of rural villages above that of the countryside in its Settlement Hierarchy, yet it eschews development of existing villages in favour of an entire housing estate in the open countryside. This is clearly at variance with both local and national policies.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The development strategy is to focus the majority of development within the Rugby Urban Area, then Main Rural Settlements. The new Main Rural Settlement at Lodge Farm will enable housing delivery to meet the Councils obligation to have a 5 year land supply.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1083 or 1512	Dr J Stocker	NA	NA	DS10	The Plan notes that “Countryside locations...are generally unsuitable for development ...The only anticipated variations to this approach will be the exceptional delivery of housing to meet a specifically identified housing need...intrinsically appropriate to a countryside setting.” The Lodge Farm proposal is meant to meet Coventry’s housing needs, which have nothing to do with a ‘countryside setting’. The Council is proposing to act in a manner directly counter to its own (and national) policy.		The Walsgrave Hill Farm site is no longer proposed for development as Lodge Farm represents a deliverable site outside of the green belt, thus exceptional circumstances for greenbelt release cannot be demonstrated. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1083 or 1512	Dr J Stocker	NA	NA	DS10	The size of the proposed ‘Garden Village’ (a future Main Rural Settlement) is governed, not by housing need, but the “...amount of development necessary to ensure the viable delivery of the levels of infrastructure required...” This is a circular argument: A new village is required so that it’s big enough to be a new village.		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.

1083 or 1512	Dr J Stocker	NA	NA	DS10	<p>Key tests The inclusion of Policy DS10 within the Local Plan fails all four of the NPPF key tests for soundness:</p> <p>a. Positively prepared – The Local Plan proposes a substantial over-supply of housing and as such does not meet objectively assessed requirements. The Lodge Farm site is in exactly the wrong place to meet Coventry City’s housing needs.</p> <p>b. Justified – The planned over-supply of sites cannot be justified and there are better alternatives to Lodge Farm, including Walsgrave Hill Farm and the full exploitation of sites that already enjoy planning permission.</p> <p>c. Effective – The inappropriate location of Lodge Farm means that cross-boundary working with Coventry is not being achieved. Development of a site that does not yet have planning consent, whilst under-developing sites with permission, militates against housing delivery within the timescale of the Plan.</p> <p>D. Consistent with national policy – DS10 breaches numerous paragraphs of the NPPF: 23 – promote competitive town centre environments. 24 – Accessible sites that are well connected to the town centre. 30 – Sustainable modes of</p>		<p>The Local Plan is considered sound, as outlined in the Soundness self-assessment. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. All service providers have been included and no changes are required.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>impact on viability and land values. STA doesn't provide sufficient details as to the impact of the site, sustainable access strategy provides little details as to the scheme proposed and its deliverability costs, highway mitigation reliant on large scale infrastructure provided by others, given the amount of unknowns in terms of location, form and scale of highway infrastructure required to deliver the site it is impossible to know the impact on the viability and deliverability, no interim solution have been assessed to enable the site come forward before the SWLR and this may not be deliverable given the Dunchurch Crossroads. WCC identify a number of transport mitigations that have not been costed, signage strategy to deter movement at the Dunchurch cross roads suggested but this has not been fully formed or tested. WCC also acknowledge that there will be impacts surrounding villages, but suggests that the promotor should be responsible for doing so. It is not clear as to whether the additional assessment will be covered in their revised traffic assessments when finally completed. Mode consultants have costed the transport mitigations and these alone question the viability of the scheme. A draft financial viability</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>appraisal for the site has been undertaken and the residual land value of £40,000,000 is considered to be below market value which will likely result in the removal of affordable housing from the site. Site should not come forward until the SWLR is provided in full this would result in the site commencing in 2026 and delivering 345 dwellings within the plan period making little or no contribution. Site does not accord with NPPF para 151 with it not being sustainable, it is remote with no relationship with Rugby urban area with travel being predominately by private car with very little public transport, contrary to the principles of garden village. There are no employment opportunities located nearby and no existing facilities in walking or cycling distances eg schools, community facilities, shops therefore residents would need to use their car to access leisure and shopping needs. The SA places a large and disproportionate reliance on two existing bus stops as allowing residents access to employment opportunities etc. without the reliance on the car. SA places an over emphasis on the proposed mitigations for the site. Also highlight Daventry DC concerns about the SA scoring for the site. Considered that the site does not</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					constitute sustainable development as set out the NPPG and NPPF nor is it conformity with GP2 in that development should be focused in the urban area or extension to. . Fundamentally the site is remote and has no relationship to Rugby or Coventry urban area. The site is in an unsustainable location, where travel will be predominantly by private car with very little public transport.		
242 & 1904	Margaret O'Donnell	NA	NA	DS10	Left blank	Remove DS10	No Comment Required
293 & 293	17 Brooks Close	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry. Proposes revised SA scorings for SA1, SA2, SA3, SA4, SA6, SA7, SA8, SA11, SA12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at surrounding nearby settlements; no		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being

852 & 2261	D Cooper	NA	NA	DS10	Objection. Lodge Farm proposal has come as surprise to local communities affected. Outrageous to limit consultation to 6 weeks, falls short of normally recommended guidelines. And leave Council open to criticism at judicial review.	Object to inadequacy of environmental information contained in the local plan. Only two documents - Draft Habitat Regulations Assessment (HRA) and the Local Development Framework - Habitat and Biodiversity Baseline Report".	Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy.
852 & 2261	D Cooper	NA	NA	DS10	Object to 1500 houses into undeveloped countryside between Willoughby and Grandborough without any proper provision for the necessary infrastructure to make such a development sustainable. Not for the benefit of the inhabitants of Rugby District but to help Coventry out of a hole. And will fail to achieve intended result. No Coventry people in their right minds will want to have to commute from the back end of the county to get back to Coventry where the jobs and facilities are.	Object to the closing of this consultation without such essential information as the WCC traffic assessment and the revision of the Sustainability Assessment having been made available for public comment.	All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
852 & 2261	D Cooper	NA	NA	DS10	Urge to provide further 6 week consultation period.	Long and convoluted report proving that the Rugby Local Plan will have no detrimental effect on Ensor's Pool in Nuneaton or a minor river catchment in Leicestershire, Derbyshire or Staffordshire, while only managing to mention Lodge Farm site about once in 80 pages.	Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy.
852 & 2261	D Cooper	NA	NA	DS10	Second document is well out of date and consists of small maps with no supporting text information on sites noted. Lacking evidence that anyone has looked at or recognised the environmental quality of the landscapes and habitats of the proposed Lodge Farm site. Past 50 years bird populations suffered catastrophic decline. Area is of varied agricultural land with significant features, and valid consideration of its relative importance to birds and other populations ought to take ethos evidence into account. Local Plan has no idea of environmental value of the Lodge Farm site.		No change required. Sites have been appraised on a consistent basis utilising Phase 1 Habitat survey. Further detailed Ecological reports will be submitted as part of any future applications. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The site is considered capable of meeting its policy requirements.

1866	Gary Stephens	Marrons Planning	Gallagher Estates Limited and David Wilson Homes (East Midlands) (GE/DWH)	DS1 & DS3	Question whether the unmet need figure of 2,800 is sufficient given the following; Coventry City Council housing figure has not been test; Nuneaton and Bedworth BC have not agreed to 4,020 as set out in the Coventry and Warwickshire Housing MoU; and Warwick District Council's plan being subject to examination. The Plan should have 10-20% of 11,000 dwellings in reserve or as contingency sites that would be released to meet any further unmet need ensuring that the Plans are flexible to changes in line with NPPF para 14.	Policy DS1 and Policy DS3 should therefore be amended to include the provision of additional homes in order to provide sufficient flexibility to adapt to circumstances where there is unmet need within the Housing Market Area, either as allocations or as reserve sites	The figure of 2,800 is considered sufficient as it is contained within the Maua MoU distributes the OAN across the HMA to ensure it is met within the HMA. Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU. CCC housing number has now been tested as EiPs. Warwick DC has also been tested at EiPs. The HT has been revisited following the Publication Consultation following the annual monitoring of housing returns and consideration of representatives of proposed allocation and permitted sites. Modification LP54.115 shows there is now over 20%.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1118	David Penn	Coventry & Warwickshire Chamber of Commerce	NA	DS1 & DS4	<p>Concern that local authorities process for establishing employment allocations relies too much on demographic and labour force projections and not enough on market signals and market intelligence. The C&W sub-regional target of 714ha (cf. MOU) is grossly inadequate. Due to plan periods beginning in 2011, a time when the economy was still impacted on by the recession, levels of demand relied upon to set employment allocations are significantly understated against real business needs and land supply figures are already out of date. Supply indicates there is only one site (Coventry Gateway) in or near Coventry that could be available for major manufacturing inward investment to 2031. RBC should plan for significant growth of employment land available by removing land from the Green Belt near existing Ansty Park site (between Ansty/Rolls Royce site, M6, A46 and planned housing site at Walsgrave) through the Local Plan process, or as a minimum safeguarding this land for additional sub-regional employment needs beyond 714ha.</p>		<p>The evidence base (Rugby Employment Land Study 2015) does consider the performance of the local economy in the context of the recession of 2008-2013. Forecasts used from Cambridge Econometrics in December 2014 were consistent with actual jobs growth observed by ONS between 2011-13; in this respect the evidence base is clear that the methodology for projecting labour demand did not underestimate jobs growth for the entire plan period due to the effects of the recession. The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1438	Bill Blincoe	Coventry & Warwickshire Local Enterprise Partnership (LEP)	NA	DS1 & DS4	<p>Evidence base is deficient and does not support the proposed distribution of development relating to housing and employment provision opportunities. The removal of strategic development proposals in the west of the Borough is a regressive step and contradicts evidence and the Council's own SA. Market Intelligence and signals point to a deteriorating supply of employment land across many sectors of the market. They also point to increasing difficulties of finding affordable accommodation to meet the needs of small and medium enterprises wishing to expand. The draft proposals are largely silent on these vital local economic matters. Monitoring and land supply data seems out of date and employment land supply is less than that portrayed in the plan. The targets in Policy DS1 should be stated as minimum so that if conditions allow they can be exceeded. Believe that evidence base should be a focus for review to support overall strategy. Highlighted our support for growth around Walsgrave/Ansty area though we cannot be site specific; general area has good potential to fulfil role as sub-regional growth point supported by the Council's evidence. However same evidence is used to underpin</p>	<p>Overall the CWLEP would like to see a "re focus" of the overall strategy to take more account of both local and sub regional housing and employment requirements. While fully supporting the emphasis on the continued development of Rugby itself, we support the re-introduction of growth on the SE fringes of Coventry where there is long term growth potential, access to labour markets and ability to provide mixed use opportunities.</p>	<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary. An up-to-date employment land supply position is reflected in proposed Policy DS1 of the Local Plan as indicated by modification LP54.13 and further discussed in the Employment Land Background Paper (2017). Recent development of employment land on the edge of Rugby has been delivered at an expected rate and new allocations proposed are expected to have outline applications ready to be determined to coincide with adoption of the Local Plan. The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016.</p>

2083	Roger & Angela Bull	NA	NA	DS1 & DS8	<p>Objection: acknowledge need for housing although scale of plans too large; predicted requirements from years ago do not take into account the reduction of migrants from Brexit; no justification for taking some of Coventry's housing requirement; insufficient infrastructure- existing traffic congestion through Dunchurch; plans for new schools and health centres vague; loss of landscape value, productive farmland and ancient woodland; loss of recreational value;</p>		<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2233	Brian Bowsher	NA	NA	DS1 & DS8	<p>RBC in slavishly accepting the figures for housing need, employment and traffic flows produced by interested consultants has disregarded the effects on current residents and their environment. Main local issue bottleneck in Dunchurch and subsequent impact on air quality. RBC response is to build more houses surrounding Dunchurch, thereby losing identity as an historic village, create more HGV traffic by promoting the use of huge warehousing close to Thurlaston and Dunchurch which does not provide local employment. Over reliance on logistics should promote itself as engineering and innovation which it has a fine reputation for. RBC has no ambition for the town. DS1 and DS8 flawed figures need to be questioned before ruining landscape and good agricultural land. Brexit not taken account of. High quality jobs required to meet housing for local job creation. Severe traffic problems at the M/A45 roundabout, and with predominantly westerly winds the noise and air pollution effects on Thurlaston will be acute.</p>	<p>Review the housing, warehousing, and job creation requirements in DS1, DS8, DS9 and DS10, particularly in the light of Brexit. Provide detailed traffic analysis based on verified models, and validated against existing traffic flows using satnav information and large-scale traffic surveys. Review the current strategy for job creation.</p>	<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9</p>

					<p>effects on our health. Brexit not taken account for. Town centre vision is non-existent and is a ghost town. The house-building program (if it can actually be delivered) will increase labour supply to more than five times the extra labour demand. Presumably the excess will be commuters – but access to public transport is difficult. New schools are promised, but the timetable is vague; the same is true of other community needs such as health centres. Where are the doctors and teaching professionals coming from. There are chronic shortages now. The development of these essential services will lag the house building process. The area of open land between Rugby, Dunchurch and Cawston is a very valuable resource, containing good quality landscape, productive farmland and ancient woodland. Vague promises of buffers, the gap between the existing urban areas would be virtually obliterated by this massive development. The setting of the ancient woodland at Cawston Spinney would be irreparably damaged. Why is warehousing development required when neighbouring employment sits vacant. No account has been taken of Thurlaston Conservation Area. Development will also increase</p>		<p>surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).The justification of Coventry City’s unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of</p>

					<p>noise, light and air pollution from the large number of day and night truck journeys in and out of the development, as well as the cars. Site is poorly located and despite public transport improvements it will be car dominated.</p>		<p>Warwick's local plan. No alteration proposed. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2272	Ben Holmes	Oxalis Planning	Roxhill Developments Ltd	DS1, DS3, DS4 & DS10	<p>Consider that the employment figures should reflect cWLEP CBRE Study which is reinforced by a Savills report highlight that the need is greater than that set out in CW Employment Land MoU. If the CBRE figure is utilised Rugby BC should allocate land accordingly. Consider a consistent approach should be taken with neighbouring authorities in terms of allocating unmet need from CCC through extensions of the city. This approach will be more sustainable in line with the NPPF instead of allocating housing sites in locations away from the City which is unlikely to address the need in an appropriate location or in a form which will appropriately minimize travel and facilitate sustainable development. Consider that Lodge Farm is not sustainable and it will not sustainably meet the need arising from CCC. The site promoters Walsgrave Hill Farm site is more sustainably located to meet the CCC need, Consider Lodge Farm is not the most appropriate strategy (NPPF 182) when considered against reasonable alternatives. Masterplan of the Walsgrave site and supporting documents are provided that highlight that there are no constraints which would preclude development of the site and the site can be delivered in the plan period</p>		<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary. The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>to meet the housing and employment needs of CCC. Set out the benefits of delivering of the site i.e. A46 improvements, blue light access and additional car parking for hospital. Consider that Lodge Farm is not as sustainable as the Walsgrave site to meet the unmet needs of Coventry, Lodge Farm will be heavily dependent on the use of the private car for access to work and leisure, located by over congested area, on a high risk crash route, no infrastructure present question the viability of the site, reliant on SWLR where there is significant amount of development proposed thus plan is not flexible, housing saturation in the south Rugby, Walsgrave site scores more favourable than Lodge Farm site and only when policy DS10 is SA it scores more favourably and if the Walsgrave site was also subject of a policy it would score more favourably, consider that the Lodge Farm DS10 scoring is not consistent, STA does not consider impact on DDC and no co-ordination with NCC therefore DTC has been failed in preparing the Publication Draft. Consider Walsgrave site should be allocated for 1,500 dwellings (DS3) and include an additional 55ha of employment land to meet the needs of CWLEP (DS1 and make reference</p>		<p>supply throughout the course of the plan. The South West link road is identified by the STA as being essential infrastructure to support the S W Rugby allocation. DS9 and the IDP specify the full delivery and timescales for delivery. Following the STA update amendments to DS9 and Appendix 3 IDP (ref LP 54.46 - 54.58 and LP54.120) details how planning applications for S W Rugby are considered in the context of Dunchurch crossroads and ensure the timely delivery of the south west link road. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. It is viewed that the site can achieve the policy requirements which will include a local centre, primary school, public transport and cycle networks. DS10 is considered to be deliverable and the site promoters have experience of the delivery of such sites. The housing</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					in policy DS4)		trajectory for the Local Plan has been informed by site promoters and developers therefore it is viewed that it is achievable. The allocation the Walsgrave site would increase the employment land allocation beyond the assessed need would result in higher housing numbers which has not been agreed within the HMA. Further to this uncertainty still remains over the access arrangement for the site and there are heritage issues for the site.
49	Jennifer Millington	NA	NA	DS1, DS8 & DS10	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. 					<p>of 2,800 for adjacent authority, particularly as Walsgrave proposal has now been shelved. Current housing trajectory shows provision for 13,677 units which is an over provision and only allows for 40% and 60% respectively of units delivered on Rugby Radio Station and Rugby Gateway sites. Emphasis of RBC should be on securing the delivery of already approved sites before granting allocation for further development.</p>		<p>continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations.</p>

1643	Jacqueline Bowsher	NA	NA	DS1, DS8, DS9 & DS10	<p>Concerned that sustainability of plan is seriously questionable and disregards the effects on current residents and their environment. Main local issue is traffic bottleneck and effects on air quality at Dunchurch. More housing around the village will mean it loses its identity, more lorry traffic will be created from huge warehousing close to Thurlaston which does not provide local employment.</p> <p>Re: spatial objective 4, Rugby has a fine record on engineering and innovation and needs to promote itself as such not a distribution centre.</p> <p>Policy DS1 and DS8 - figures are clearly flawed and may lead to ruination of landscape and good quality agricultural land. Developers will aim to build high value housing which without local job creation will lead to greater levels of commuting and traffic issues, particularly if warehousing proposals proceed early it seems likely that traffic problems at A45/M45 junction and noise/air pollution impacts on Thurlaston.</p>		<p>Policy has been formulated in relation to evidence base and is considered to be sound. Relevant statutory consultees have been engaged. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan.</p>

536	Clara Thompson	NA	NA	DS10 & DS3	Garden Village proposal is without support nppf para 30	remove lodge farm from the draft plan	Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan.
701	Emma Turtle	NA	NA	DS10 & DS3	Lodge Farm is not sustainable and will not provide affordable housing. All new residents will be commuters with cars increasing traffic and air quality issues in Dunchurch. New road will not be provided until 2026. Traffic wanting to travel to the M40 or Leamington will travel through Grandborough which is small village and narrow lanes. GP surgery and school proposed but does not mean it will built and staffed.	Replace Lodge Farm with the originally preferred plan to have the 1500 homes near Walsgrave instead, by making the developers build the mast site homes and rechecking the numbers on the required housing.	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
852	Dennis R Cooper	NA	NA	DS10 & DS3	Environmental information inadequate; HRA only mentions DS10 once; HBA outdated; UK Bird population suffered catastrophic decline; Local Plan does not know environmental value of Lodge Farm		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1351	Joseph A. Oliver	J Marine Ltd	NA	DS10 & DS3	Lodge Farm fails to meet the criteria for sustainable development. The proposal fails the social and economic dimensions of sustainability as it would harm the local rural economy and harm the health and social wellbeing of the local community. The combined proposals for S16046 and S16107 would add a further 1939 houses-taking the combined proposal to 3,688 dwellings in the open countryside. J Marine Ltd operates Dunchurch Pools Marina (formerly Barby Pools Marina) located at Onley Village adjoining the proposed development- representing an investment of £15 million, £750,000 GVA and 20 f/t jobs and 12 p/t, with additional £1,013,00 GVA and equivalent 45 f/t jobs in local economy. The flat nature of the existing landscape would make views of the development especially prominent and would affect the 'Grand Union/Oxford Canal Conservation Area' in Daventry District Council and the proposed development would be detrimental to Onley Deserted Medieval Village		Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					(scheduled monument)- affecting the business due to its wider impact on tourism, which could have a knock-on effect on funding local parkland and footpaths.		Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.
143	Chris Barfield	NA	NA	DS10 & DS3	HCA did not select Lodge Farm probably due to it not being sustainable. Preferred Options a better plan less objections and Government have changed thinking on Green Belt. Council cannot ask SA consultants to review the document to reflect the concerns raised by the public as the Council will be open to legal challenges		Lodge Farm has been subject to an SA. With Lodge Farm providing a developable site outside the green belt, RBC is unable to demonstrate exceptional circumstances for green belt release.
143	Chris Barfield	NA	NA	DS10 & DS3	Understand a vendor is not willing to sell therefore the site is not deliverable.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
143	Chris Barfield	NA	NA	DS10 & DS3	Critiques SA giving detailed reasoning as to why scoring for SA1,4,11,6,2 and 14 have been scored incorrectly and gives revised scoring.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
143	Chris Barfield	NA	NA	DS10 & DS3	Undertaken a RLV appraisal which considers that the site is not viable in its current form and to make it viable will be contrary to the Plan.		The Local Plan is supported by a Viability Testing exercise carried out by independent consultants.
166	Carl Harris	NA	NA	DS10 & DS3	Site will not have any leisure or cultural opportunities, public transport not listed in the IDP and no evidence that such provision will be deliverable. Increase the need to travel by private car. No guarantee that GP will happen. DS10 does not conform with NPPF para 30,34,37,95,120,124,30,75 and 40.	Remove Lodge Farm DS10 DS3.15 from the Local Plan and replace it with Walsgrave Hill Farm - more sustainable.	Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
306	Christine Green	NA	NA	DS10 & DS3	Development will lead to loss of agricultural land. Walsgrave site should replace the site as it is closer to Coventry and its facilities. Site will look alien and impact on the landscape, destroy the character of settlements and be a threat to open spaces. The site will increase flooding as result of development on agricultural land impacting nearby settlements due to surface water runoff. Site will result in rat running in rural roads that a narrow and prone to flooding. Increased air and noise pollution. lack of acceptance for the site which will be in an isolated rural location		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS10 is located within flood zone 1. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. All relevant reports and Surveys have been completed and submitted to relevant parties.
490 & 1946	Alan Hughes	NA	NA	DS10 & DS3	Lodge Farm is not sustainable as it is threat to birdlife migration route(conflict NPPF 114-119) , threat agricultural land being grade 3 (conflict NPPF 112) and fails to provide sufficient social housing after infrastructure costs .	Remove Lodge Farm from the Plan	No change required. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Any planning application for the site would need to accord with the local plan policies which will consider biodiversity and viability.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
490 & 1946	Alan Hughes	NA	NA	DS10 & DS3	Lodge Farm is not sustainable as it is threat to flooding of Willoughby and Grandborough, flood already due to low lying road and drainage system that cannot cope. Large development would make this worse due to run off and storm drains would run into the Rainsbrook which feeds into the River Leam leading to the flooding of the river (nppf reference 93-104)	Remove Lodge Farm from the Plan	The site is not located within flood zone 2 or 3 and future planning applications for the site would need to accord with local and national policy ensuring that flood risk is not increased as a result of the development of the site.
535	Heather McBreen	NA	NA	DS10 & DS3	The Council should consider 'green belt swaps' to protect villages in the countryside and allow areas around Coventry such as the Walsgrave Hill site to be developed. The road deliverability issue at Walsgrave has been resolved by the developer. A call for sites does not seem an appropriate or fair way of finding land for development. In addition to Walsgrave, sites at Heath Lane and Coal Pit Lane and the Lawford Aerodrome are good locations for housing. The water cycle study has not been published therefore it is not known if Severn Trent Water can supply new housing proposed. Technical traffic shortcomings are as follows: - The county council is still using 2009 census data and the results of the 2016 survey have not been included in the modelling they have done for the Local Plan; - The county council has not modelled the impact of all the extra		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>traffic which would come from the South West Rugby “sustainable” urban extension on the A4071/straight mile junction; and</p> <ul style="list-style-type: none"> - The county council has not modelled the impact of the extra traffic the Lodge Farm development would impose on the A45 eastbound into Northamptonshire. - It has not taken into account traffic from Lodge Farm commuting through Grandborough to M40 Leamington Warwick Gadon Southam Banbury. 		<p>Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
690	Ant Mcbreen	NA	NA	DS10 & DS3	<p>Developments around villages should be small and few. Lodge Farm will not be affordable, meet any exceptional need or meet local housing need. Building the site is contrary to policy GP2, housing need identified no need within Grandborough and the village survey resulted in 87% against Lodge Farm. Lodge Farm site does not comply with definition of sustainable as it would result in the loss of agricultural land which conflicts with NPPF para112. Should build upwards in the urban area and brownfield sites not outwards causing urban sprawl and urban corridors. There will also be traffic impacts on the small nearby villages, crime might increase and fire & rescue will be unable to attend a far larger population in a rural location especially with services already stretched. Roads are dangerous and could get worse with increase number of houses. Heavy reliance on the private car resulting in more traffic in Dunchurch and in other villages, with restricted single track lanes. Will also result in more pollution in Dunchurch. Apart from the site itself it will not be safe for walkers, cyclist or riders (a45 high crash route and dangerous narrow unlit country lanes with no pavements). Development will</p>	Remove Lodge Farm	<p>No change required the allocation of Lodge Farm will result in a new main rural settlement which will contain a local centre, gap surgery and a primary school. The site will also benefit from public transport, cycleway and footpaths. The modified IDP sets out when infrastructure will be provided at the site and the costs. The emergency services have been consulted upon. WCC Highways have informed the Plan and have not indicated that the high crash route would not be a constraint on the site. The landscape character of the site will need to be taken account of through policy DS10 and NE4. Ecological impacts of the development would also need to be addressed through policy NE2. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP. 690	Ant Mcbreen	NA	NA	DS10 & DS3	<p>Development along the A45 will have air and noise pollution impacts on Lodge Farm and Dunchurch residents. Green Belt swaps should be considered to protect productive agricultural land and rural settlements from unsustainable urban development. Fitting that Government did not support the site as a Garden village. Why was another call for sites held when Walsgrave was already identified and it also understood the highways issues for the site have been addressed. Other sites must be available and more appropriate such as Blue Boar Farms and Lawford Airfield which are located off the A45 closer to Coventry. Not having a plan is better than having a bad plan. There are plenty of sites for developers to get on with that already have permission granted. Make the developers get on with those before annihilating more countryside.</p>		<p>Noise and air pollution concerns on the A45/ Dunchurch will be taken account of during the planning application stage through policy HS5. A further call for sites was undertaken to ensure that all potential alternative available land could be assessed prior to the next stage of the Plan production. Access to the Walsgrave site is dependent on Highways England work to the A46 which is not currently a committed scheme therefore timescales for its delivery are unknown. There are also heritage issues that are present for the site. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, the proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1462	Norman Lines	Thurlaston Parish Council	NA	DS4 & DS1	<p>Target should be based on Atkins (2014) Study which recommends 34 ha. Why is target raised from 79 ha forecast to 110 ha. Already 151 ha of land constructed or approved in the plan period so why is SW Rugby employment allocation required. Major sites such as Ansty, Ryton and DIRFT also provide employment opportunities for Rugby residents. Believe the plan will create 9,000 people who will have to find jobs outside the area.</p>		<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target, including where new allocations such as at Coton Park East and Rugby Radio Station (in addition to existing sites in supply) will be expected to provide for a wider range of employment development, including smaller units appropriate for B1 and B2 development, as opposed to the provision of larger B8 uses in particular at Rugby Gateway and the South West Rugby allocation. Rugby Employment Land Study (2015) explains how the jobs growth from 2014 Cambridge Econometrics forecasts is more strongly concentrated in B uses than the jobs growth derived from 2013 Cambridge Econometrics forecasts used in the Atkins Study, which principally explains the difference in land requirement.</p>

1530	Dr Edmund Hunt	NA	NA	DS5 & DS8	<p>Overall I believe there is a lack of transparent information, notably the fact that prospective logistics developments that may support the South West Expansion have not been articulated or mentioned. Objectives - would support Economic objective 4 for no over reliance on logistics DS5 - defines strategic housing areas >100 but Coton House is at 100 yet this site meets very few of the criteria for 100 above even though it is so close to a strategic development (sceptically convenient?!). I appreciate a line has to be drawn but Coton House does little to meet sustainable development objectives and there should be limits to any further development at Coton House to mitigate against it becoming a large scale development with no sustainable benefits. DS8 - With strategic objective to not rely on logistics, there appears contradictions with the proposed Symmetry Park application near Dunchurch. Considerations need to be given to how this development would invest in the local road network to support the entry to South West Rugby and mitigate against Dunchurch travel flow. ED2 - Support this and would request the policy goes further to ensure that large scale logistics developments</p>	<p>Ensure transparency of call to action for development sites Be more thorough and committed to how you will ensure the success of Rugby Town Centre It is disappointing that, within your duty to cooperate, I am not aware of you informing adjacent Parish Councils, whose residents use rugby, about the consultation more actively. Also see previous comments.</p>	<p>South West a proposed allocation-landowners are able to promote land outside of the Local Plan process. The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. Coton House has been subject to an SA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>close to the town would be closely considered by RBC. The policy therefore needs to ensure Rugby and its Local Plan have influence on Magna Park and any prospective developments, notably 6.12 and the proximity of employment land to residential areas given the lack of close, viable residential amenity to Magna Park H2 - Do not agreed given the prospective increase in logistics in SW Rugby. Would suggest an increased proportion of affordable housing in particular at any sites close to employment land (e.g. New South West Rugby to accommodate potential logistics expansion for lower income employees) TC3 - not quite clear how this prioritisation of retail allocation will be delivered in reality - the current trend for rugby (and many other) citizens is for out of town convenience, therefore RBC will receive developer interest for large scale retail areas. Should a policy not focus on limiting out of town allocation, in other words, categorised between in town and out of town TC3 - I could not clearly understand how the local plan is going to commit or ensure improvements are made to the town centre. Surely a call for sites, or at least evidence of a similar process, should be done to transparently</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>identify the town centre long term plan and sustainable future according to NPPF. D1 - some evidence behind to validity / success of Travel Plans and the rationale for including them should be provided as there is very mixed success of them D1 - it appears slightly surprising there is not a specific or clear policy that identifies key strategic routes around Rugby (e.g. A45 / A426) and how these need to be assessed an invested in as the Town grows significantly in the coming years. There is little emphasis on driving new technologies or lower carbon emission transport infrastructure to support a cleaner, quieter, safer town centre and surrounding traffic routes.</p>

312	Mike Greenwood	NA	NA	DS8 & DS10	New development will undermine Dunchurch's historical value and Conservation area, congestion around Dunchurch has been increasing- future development in the South West corridor, Lodge Farm and Bilton Grange will exacerbate this due to poor public transport links creating car reliance, coalescence between Cawston, Dunchurch and Rugby, infrastructure plan vague and uncoded, agreement with Daventry District Council that brownfield sites should be prioritised first,	Remove DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Works to the centre of Dunchurch would be carried out by Warwickshire County Council Highways in collaboration with applicable stakeholders. DS9 and IDP detail the spine road network which will mitigate further the impacts at the crossroads. DS8 and the SPD require a buffer between Rugby and Rugby.
329	Lynn Pell	NA	NA	DS8 & DS10	The requirement for housing is grossly exaggerated. No explanation as to why Rugby is taking Housing and Warehousing which should be in Coventry. Infrastructure is not capable of sustaining the growth envisaged as there is severe congestion as existing. Nothing included to stimulate the town centre, with 27 shops empty the town risks becoming a ghost town. There should be a town centre plan with no out of town shopping allowed until the plan is in place. Developing in the countryside will result in the loss of farmland and increase congestion. Developing around Dunchurch/Cawston/Bilton		The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the

					<p>will result in loss of landscape value. Other sites already have planning permission. Questions over certainty of demand and projections. No industry is visualised- only warehousing- the area around DIRFT has already been ruined. South West Masterplan is poorly developed with little thought gone into it. The Thurlaston Conservation Area will be 300 metres from the perimeter of the proposed development and would be detrimental to it. The South West corridor would have poor access to the town centre and railway station. RBC should take steps to encourage the return of creative industries to Rugby.</p>		<p>evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The Local Plan has been informed by an STA undertaken by Warwickshire County Council and consultation has taken place with Highways England, which has identified the strategic requirements to support the Plan. DS9 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. The STA June 2017 identifies that there would be a reduction of traffic flows at Dunchurch cross roads. Historic England's consultation response does not highlight concern of the impact of the development on Thurlaston Conservation Area though it does highlight that further evidence is required than provided by the brief commentary in the draft SPD which accompanied the Plan prior to the submission of any planning application for the site. Any proposals for the site would need to accord with the biodiversity policies contained within the Plan and Policy DS8 also requires community facilities to be provided.</p>

799	Linda Holmes	NA	NA	DS8 & DS10	<p>Concern over possible bias in the SHMA as it is alleged the consultants also worked with a developer looking to bring forward a development of 600 houses in the South West corridor. Projections have been treated as forecasts, contrary to government policy. Impact of Brexit has not been considered. SHMA overstates housing need and have a naive approach to links between people and jobs resulting in poor judgements with regards to commuting. MoU offers no justification as to why Rugby is taking some of Coventry's Housing needs. Building 440 dwellings per annum is an increase of 55% which would be almost impossible to achieve. Infrastructure plan is vague, with no costings. DS* would lead to the coalescence of Rugby, Dunchurch and Cawston with poor transport links to the town centre. There would be a loss of agricultural land. Construction on the link road identified by the Strategic Transport Assessment would not be constructed until 1,500 houses have been built, putting further pressure on the Dunchurch crossroads which is already over-capacity and breaches EU Legislation on emissions.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). 1524	E Palmer	NA	NA	DS8 & DS10	<p>Housing numbers included in SHMA are seriously over estimated. Out of date, pre-dating Brexit and exaggerated. DS8 and DS10 will potentially halt the development at the mast site (Houlton) as developers will diver to Dunchurch. These policies could therefore be counterproductive in producing housing numbers for the Borough.</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>
1529	Eddie Kealey	NA	NA	DS8 & DS10	<p>To increase this volume of traffic by up to five fold is completely unsustainable for such a small community such as Dunchurch. The infrastructure of this area does not, nor will be able in the future to support the volume of houses proposed for Lodge Farm Village, the proposals for Cawston Lane and the A45 Coventry Rd approaching the M45 roundabout. Where is the employment for the people moving into these homes, none. This means increased traffic as people commute, the Centre of Dunchurch will become gridlocked more so than it is now as busy times. The increased air pollution will mean serious health issues to cyclists, walkers, children walking to school, a</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is</p>

2188	Sarah Green	NA	NA	DS8 & DS10	<p>Housing needs vastly overinflated, insufficient consideration given to Government Policy or impact of Brexit. The scale of the development disproportionately detrimental effect on the surrounding areas. The provision for infrastructure is inadequate and timescale for building such infrastructure unsatisfactory. Rugby Borough Council has already pursued an aggressive course of development taking more houses than all others in Warwickshire. A development of this scale is not needed or justified. No explanation as to why taking 2,800 from Coventry. A more balanced view of the likely future growth is required with particular reference to Employment Land (Cambridge Econometrics were high WS Atkins substantially lower) provide substantially lower projections relied upon and to environmental impact of building such warehouses on Cawston Spinney site.</p> <p>Provision of a 'green buffer' to protect Dunchurch as a historic village is totally inadequate. Nor are</p>		<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The housing target is not a minimum because it is based on need. . The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>there any guarantees that this buffer will be respected or retained. No clear or concrete plans on provision of infrastructure. Road network cannot support provision of primary schools, no information as to how this was calculated.</p>		
2189	Shirley Hall	NA	NA	DS8 & DS10	<p>Plan prepared by G L Hearne not independent. Ignore pollution levels at crossroads. These already exceed EU requirements. Traffic from developments will go through Dunchurch crossroads. WCC using out of date model. WCC owns much of the land - potential conflict with being the Highway Authority. No thought of infrastructure needs to cope with huge influx. Should extend Coton Meadows instead where warehousing already exists instead of rural area.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

1170	Blanaid Cook	NA	NA	DS8 & DS9	<p>Concern over short consultation period. Question the independence of GL Hearn and Capita. Can their figures be trusted. No evidence Coventry cannot meet their own needs, Coventry's population does not appear to be growing much so why does Rugby need to supply land for houses. Thurlaston is a rural doomsday village that will be surrounded by housing and employment there appears to be no green buffer for Thurlaston. The increased traffic on the A45/M45 will have a huge deleterious effect on this rural village. Noise , light and emissions. Traffic will increase substantially when heavy trucks and workers are accessing the industrial units night and day. Quite a number of deliveries are made at night to these warehouses. I am convinced that there has been little thought given to the population of Dunchurch and Thurlaston who will need to access the A45/M45 roundabout. I have seen no projected traffic flow analysis depicting expected increase in heavy vehicles using this junction. At the Cock Robin corner there will be equal problems for local people trying to access Sainsbury's or Rugby town centre pollution. Increased traffic on the M45/A45 roundabout will make it difficult for residents of</p>	<p>Withdrawal of plan DS8 and DS9 until there is enough time allowed for proper democratic consultation of all residents. We need specific answers to the questions I have posed. No just vague promises which do not add up. These plans have been in the pipeline for some time but the residents were not told until very recently. We are then given a few weeks to consider the implications and object. This is undemocratic.</p>	<p>Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. 705	James Darcy	NA	NA	DS8, DS9 & DS10	<p>Transport assessments are based on outdated information and are not modelled in most appropriate way. The gyratory and Dunchurch crossroads are already operating at capacity. Additional areas of grid lock are Ashlawn Rd junction with Hillmorton, Leicester Rd around Elliot's Field, Technology Drive, and junction of A4071 with Straight Mile. Proposed SW spine road will assist traffic flow running east west but will not deal with shorter journeys using local roads. Traffic congestion will increase at Dunchurch crossroads and air quality will deteriorate further. Lodge Farm site has only been introduced to transport modelling as sensitivity test which is not sufficient. Not clear whether modelling has taken regard of huge extent of employment allocation in the plan. IDP is uncosted which means balance between delivery and financial burden on developers cannot be adequately assessed. Disconnect between phasing of spine road and housing trajectory. Conflict of interest between WCC as landowner is SW Rugby allocation and WCC as highways authority.</p>	Remove policies DS8, DS9 and DS10, these policies are contrary to NPPF para.30 and 124.	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>
