107	D Ridgers	NA	NA	DS1	Underlying housing implications set out in the SHMA open to question, particular as formulated prior to EU referendum.		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.
107	D Ridgers	NA	NA	DS1	Lot is made of housing shortage; however BBC reported 610,000 empty homes in England (government figures). Of these 205,000 unoccupied for 6 months or more - the official definition of 'long term emptiness' Have these been taken into account in the SHMA?		SHMA does not include empty homes, which RBC Housing surveys.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
107	D Ridgers	NA	NA	DS1	In Chapter 4 of Plan, DS1, number of new homes appears to be inordinate for a place the size of Rugby. In Para 4.12 13,664 dwellings as a safeguard against some areas not building the expected number of houses, which is common sense.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs.
146b	F White	NA	NA	DS1	Local Plan failing in its duty to preserve key aspects of the quality of life of its residents. Council not replied to response. Council Voted to proceed with the second draft of the plan without considering responses to its first draft. No evidence that Council had responded to concerns. Plan is unsound as Council not planning the secure necessary healthcare, transport and school facilities to support borough of 130,000 people. Object to DS1 as being unsound as plan is ineffective as it will not deliver sustainable environment for so many people. NHS not able to support current population of Rugby as evidenced by the following: Clearly overstretched GP surgeries with longer waiting times. Closure of Bilton surgery - shortage of GPs, a national problem that is only going to get worse. Closure of Brownsover surgery. Waiting lists at UHCW and increasing postponement of non-emergency appointments during winter months as the hospital fails to cope with current demand. Uncertainty of		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The STA (June 2017) updated the September 2016 STA by increasing the modelled area and incorporating updated travel to work assumptions, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>future of George Elliot hospital. Increasingly long waiting times at A & Eat UHWC. Lack of bed availability. Insufficient parking for current demand at UHWC. Financial pressures on UHCW. Social services - particularly Children's services have long waiting lists just to serve the current demand. Loss of facilities at St Cross, but no plan for them to return despite 30% increases in growth. IDP suggest all additional need can be met with just two extra walk in cubicles at St Cross, one extra operating theatre, a CT scanner, a MRI scanner, endoscopy room and £1m extensions ion to UHCW A & E department. Has not been thought through. Traffic model not updated to take into account new traffic measurements. STA shows traffic will seize up. County Council have not modelled impact of all houses to be built. Pressure on school places, Council should publish report of status and capacity. Situation exacerbated by insufficient land set aside for schools. More houses planned in the North but no land set aside for secondary school. Unclear on the impact new buildings and commercial zones will have on the current level of pollution within Rugby. Dunchurch already outside acceptable limits. Would like Council to respond about how to bring town</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>centre back into life and increasingly empty retail space could be better utilised. Local rates too high. Would like clarification on TPO stance. Rugby commuter town for London, dreadful lack of parking after 7am in the morning. Needs to be addressed before further expansion of the town. Local Plan risks making Rugby frustrating place to live with too few key facilities in education and healthcare and road network not design to accommodate the proposed level of development. Duty of care to ensure future development is responsible and sustainable.</p>		
257	Stephen McGaw	NA	NA	DS1	<p>Object to proposed development SHLAA reference S16045. Land is within green belt, more suitable sites elsewhere. Proposed development huge which would overwhelm Ansty village community. This would require major new development of facilities. Ansty already suffers from traffic which this development would make worse. Would reduce buffer between Ansty and Coventry and encourage more development to follow. Ansty will end up absorbed into Coventry.</p>		<p>Comment noted. The draft Local Plan does not propose allocation of SHLAA sites S10645. No change recommended.</p>
305	Marilyn Greenwood	NA	NA	DS1	<p>Re: SHMA - concerns over impartiality of consultants and those projections have been used as forecasts contrary to NPPF. 							modification LP54.116-140. Therefore no further amendments considered necessary.
337	Catherine Camp	Barby and Onley PC	Barby and Onley PC	DS1	DS1 states that 13664 homes will be provided within the plan period. Stated number of houses required is 12,400, therefore Lodge Farm is not necessary.	Remove DS10 from Plan	All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites or a new settlement site which will remain developable beyond the plan period
337	Catherine Camp	Kilsby Parish Council	Kilsby Parish Council	DS1	Plan contains basic flaws that in its current state would allow excessive numbers of houses to be developed on open countryside, with detrimental effect on local transport infrastructure.		The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124) to contain the transport infrastructure to mitigate against the impacts of the growth on the highway network. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
346	Keith Rogers	NA	NA	DS1	RBC is over allocating based on need and is effectively providing a 25% delivery buffer. In the SHMA, there is a difference between demographic model of 480 dpa and economic model of 424 dpa. GL Hearn has not sufficiently justified the growth number and has not taken into account the residential unemployed in the area, none of which will require new houses to take up jobs. Also doesn't account for residential unemployed in neighbouring authorities commuting to jobs in Rugby. No account of reduction in immigration as a result of EU referendum.	Future housing need for Rugby has been overstated by 2,000 dwellings and should be revised downwards. Remove the Main Rural Settlement sites from allocation.	The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.
407	John Crofts	NA	NA	DS1	The housing needs assessment contained within the SHMA is fundamentally unsound. Concerns over impartiality of consultants and those projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need.		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
469	D Brockway	NA	NA	DS1	<p>Do not need destruction of countryside. Who is going to buy all these homes? What provision has been made for social housing? It is a threat to open spaces (NPPF 50, 57, 58, 69, 70, 73, and 74). Plan has evolved long before the Brexit vote. Total re-vamp needs to be done. And the need for new homes will be much less. DS8 totally unjustified and local plan should be scrapped or at least shelved until WCC and RBC can justify the new homes</p>		<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Policy H2 makes provision for affordable housing. Affordable housing should be provided on all sites of at least 0.36 hectares in size or capable of accommodating 11 (net) dwelling units or more (including conversions and subdivisions). On previously developed sites a target affordable housing provision of 20% will be sought. On green field sites a target affordable housing provision of 30% will be sought. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>
486	E Overton	NA	NA	DS1	<p>The plan acknowledges significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the</p>		<p>The Development Strategy seeks to allocate a range of sites both in terms of size and location in order to maximise delivery, whereas the last Development Strategy focused entirely on the single housing market of the Rugby Urban Area.</p>

966	E Milwain	NA	NA	DS1	<p>With advent of Brexit, population growth projections are now likely to be inaccurate and need to be re-evaluated. Population projections treated as forecasts which are contrary to government policy. Highly questionable that so many houses are needed, especially when so many have already been built on the north side of Rugby. If we need more new housing why are developers not taking advantage of planning permission already granted to them on the Mast site? Deeply worried at the proposed destruction of productive farmland. Foreign food imports are becoming more expensive. Global warming is causing crop failure in various parts of the world. Isn't it logical to preserve agricultural land to feed UK population? Responsibility to preserve land in good condition. DS8 unjustified. Agree with Daventry District Council that greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside to housing. Therefore the local plan should be improved by dropping this policy.</p>		<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

							also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated at modification LP54.116-140. Therefore no further amendments considered necessary.
990	Ann Wright	NA	NA	DS1	Consider that the SHMA has not been undertaken by an independent body as GL Hearn has promoted the Cawston Extension site - also the figures do not take account of Brexit. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is clearly not the case with the housing and employment taken on behalf of Coventry. There is no information as to why Coventry cannot meet its housing needs or why Rugby should take 2,800 dwellings on their behalf. Therefore, the Rugby Local Plan is unsound in its assumptions on housing need. Policy DS1 states that a figure of 12,400 dwellings is needed by 2031 and has been decided on without adequate consideration of Government policy. An essential criterion of soundness for the plan is that it is can be delivered within the life of the plan. The number of dwellings built within the first five years of the plan is in the region of 440 per annum therefore an		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). 1246	Cllr Howard Roberts	Independent Group	Independent Group	DS1	<p>Strongly object to local plan and believe OAN is not a realistic portrait of the future for Rugby - historical links are threatened by unsympathetic development which undermines way town has evolved. Current plan will destroy village communities, move local economy towards low skill base and damage the environment. Spatial vision should see Rugby as a viable town itself, not just enlarged to be part of a bigger region.</p> <ul style="list-style-type: none"> - The idea that Rugby has need for 12,400 housing units is highly contentious. Economic predictions on which plan is based are fanciful by relying on CWLEP figures. This is case for employment as well as housing. Plan predicts a future of low skilled employment which requires larger land use per worker. Hard to dispute that retail and leisure activities change, however plan removes large tracts of countryside as a leisure activity. - Infrastructure is not only element when deciding location of development. Heritage, history and isolation of a village, e.g. Stretton on Dunsmore should suggest which category it fits into. Self-contained village that does not support MRS status and surrounded by Green Belt that is sacred. 		Comments noted

1247	Cllr Crane	NA	NA	DS1	<p>As the sole elected Rugby Borough councillor for Leam Valley ward where there is a significant degree of opposition to policy DS10 – Lodge Farm – I wish to make representations on behalf of my constituents regarding concerns that the plan – and policy DS10 in particular - is unsound. There are a number of questionable assumptions used in GL Hearn's SHMA and a conflict of interest issues. Questions the use of projections in relation to population and household projections (from the Office for National Statistics) which are treated as forecasts when in reality they are likely to be affected by changing government policies (e.g. the effect of Brexit on the economy and population). This is a particular risk when using projections 20 years in the future as have been used in the case of the SHMA, SHMA figures for OAN have been increased from one year to the next with little explanation as to why; and the economic forecasts are optimistic and little consideration has been given to changing commuter patterns.</p> <p>No evidence is provided as to how the decision was made to allocate such a large proportion of Coventry's unmet housing need to Rugby. 2,800 is equivalent to 30% of Rugby's</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA) in partnership with adjoining authorities. The proportion of Coventry's unmet growth within Rugby has been arrived at through joint working through the SHMA based on a logical housing market area. Relevant consultations, consistent with the town and country planning regulations 2012 and the council's adopted SCI have been carried out in relation to this policy to ensure that the evidence has been arrived at in a co-operative and inclusive manner. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. All sites proposed are required to maintain a 5 year land supply throughout the plan period. 					<p>own housing need. In order for a plan to be sound, local authorities should meet unmet requirements from neighbouring authorities “where it is reasonable to do so and consistent with achieving sustainable development” (NPPF paragraph 182). It has not been justified that it is reasonable to take such a large proportion of Coventry’s unmet need and locating it far from Coventry’s boundary and in open countryside and isolated from local services and infrastructure is not consistent with achieving sustainable development. Population growth in Rugby within the plan period is questionable with it being the same as London (30%) and greater than the UK average (15%). If robust evidence cannot be provided for the housing need in Rugby then the plan may be found to be unsound. An independent planning consultant with no prior involvement in planning in Rugby Borough should be appointed to carry out a review of the SHMA and to test the assumptions on which the OAN is based.</p> <p>There is also the issue of the deliverability of the local plan based on such high housing numbers. The average rate of annual completions in Rugby over the last 7 years has been 367. For Rugby Borough</p>		<p>Brexit on household projections is not yet clear and will require several years to trickle down to plan making. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Council to adopt a local plan which assumes a completion rate of 620 per annum is optimistic at best but in practice is likely to be undeliverable which calls into question the effectiveness of the plan and its soundness. The NPPF (para 154) states that “Local Plans should be aspirational but realistic”. The current proposals for such high annual targets are not realistic meaning the plan is unsound as it is not consistent with national policy</p>		
1314	Sue Green	HBF	HBF	DS1	<p>Housing figure should be expressed as a minimum. Concerns raised about assumptions utilised in the SHMA. 1. No adjustment for 10 year migration trend which would result in an increase; 2. Using Household formation rate as a mechanism for uplift for affordability; 3. No increase to help deliver affordable housing - the SHMA affordable housing target is greater than the affordable housing policy requirement therefore the plan will not deliver the requisite number of affordable houses. Noted that the SHMA 2015 concluded that some adjustments might be appropriate for additional needs arising from concealed and homeless households (para 6.59 & 6.76) but no uplift was applied. An Affordable Housing Statement of Common Ground dealing with the complex relationship of meeting and</p>	<p>consider that the SNHP plus adjustments for 10 year migration trends and HFR in age group 25 – 34 multiplied by a vacancy rate allowance would have provided a more appropriate demographic starting point for the calculation of OAHN which should have been further uplifted for economic growth and / or market signals - state housing number is a minimum - statement of common ground with Coventry City Council regarding affordable housing should be undertaken.</p>	<p>The housing target is not expressed as a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No further alteration is required. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>delivering affordable housing needs by a re-distribution of unmet needs from one authority to another may be required between Rugby Borough Council and Coventry City Council. 4. Misalignment of economic growth forecasting timeframes and the two stage re-distribution of unmet needs from Coventry to support economic growth elsewhere. SHMA should have assessed growth projections across the plan period not 2014-31 resulting in lower economic led growth. 5. SNHP 2015 not acknowledge though it is agreed that the work undertaken for Coventry and Warwick DC Local Plan examination and the resultant outcome does not require a change to the planned housing numbers.</p>		
1353	Julian Woolley	NA	NA	DS1	<p>Housing figures in DS1 (12,400) will not relate to current economic and political situation of the country following Brexit - should be reassessed following national assessment of impact in 2017. Regardless of accuracy, local plan states 12,400 homes are required yet provides for circa 20,000 additional homes, well over the recommended 5% buffer for housing land supply.</p>	<p>Provide open and transparent methodology and rationale for development needs numbers used in plan. The 12,400 and 5% buffer should principally be on brownfield land, greenfield should be minimised.</p>	<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period</p>

1403	Sylvia Jacques	Thurlaston PC	NA	DS1	<p>Employment Land: As with the Housing goal, based on out of date statistics and economic forecasts, should be abandoned, so should the employment land forecasts that also use them. Jobs growth is forecast to slow to a crawl over the next 15 years. If this is the case and RBC goes ahead with 660dpa, the borough will be faced with a massive over supply of labour. There appear to be 3 options: large-scale unemployment, massive commuting, or net out-migration from the shiny new houses. None of these sit comfortably with the goal of sustainability. GL Hearn's estimated need for B8 jobs appears to be excessive. Before proceeding with such large scale developments would wish to be sure they are needed. WS Atkins report would suggest that 79ha is a gross estimate. This debatable number should be re-assessed in the context not only of future forecasts but also of an audit of current B-class vacant land.</p>		<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Jobs growth is shown to increase steadily over the plan period and projected to outperform regional jobs growth in the short term, before matching regional rates of growth over the longer term. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target, including where new allocations such as at Coton Park East and Rugby Radio Station (in addition to existing sites in supply) will be expected to provide for a wider range of employment development, including smaller units appropriate for B1 and B2 development, as opposed to the provision of larger B8 uses in particular at Rugby Gateway and the South West Rugby allocation. Rugby objectively assessed housing need is 480 dpa for which quantum of employment development proposed over the plan period is considered to align with.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1403	Sylvia Jacques	Thurlaston PC	NA	DS1	<p>Implementation: Housing completions have averaged 420 dpa over the last 8 years but with little annual variability, consistently 120 dpa below the current target. Developers are only likely to increase supply if demand is increasing. Economic growth, having grown steadily, is now predicted to fall, and inflation is expected to rise, and we have already mentioned the expected fall in net migration. Unlikely therefore that demand for housing will rise beyond current levels. To expect to build 60% more houses more than the medium-term average is a stretch.</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the plan period. 1435	A Sullivan	NA	NA	DS1	<p>Employment provision is poorly presented and just fed. The statistical relationship between land and jobs is questioned. Questions over why only B1, B2 and B8 have been considered and no other types of employment. Not enough clarity and justification have been provided for the recommended employment land provision of 6-8ha per annum. The lift from 79ha to 110ha is not convincingly explained. How Coventry's need was generated is not clear. There appears to be a conflict in the figures between policy DS1 and the employment MoU. Objections to the 35ha of employment land at Cawston Spinney as part of South West Rugby; the CPRE object to warehouse development is an environmentally sensitive area. The Rugby Radio Station site should maintain higher levels of provision.</p>		<p>The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. Additional details will be finalised at the Planning Application stage.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1435	A Sullivan	NA	NA	DS1	<p>The SHMA was neither independent nor objective and does not comply with government guidance. It was commissioned and closely steered by local authorities with a vested interest in growth. Only organisations with a similar vested interest were consulted. We understand that the consultants themselves act for a number of housing developers in the Rugby area so cannot be considered objective. The study treated population and household projections as if they were forecasts, directly contrary to government policy. The study made no attempt to consider how government policy or economic circumstances may change in future. There appears to have been no consideration of the potential impact of the Brexit referendum result on the economy, migration, demand for housing etc. Concerns over the SHMA and housing allocations include: Issues with the trends used for headship rates, that identified uncertainties have been ignored, links between people and jobs is overs simplistic, relationship between affordable housing and overall housing need is never clearly established, Coventry is relying on neighbours for both employment and housing needs which is unsustainable and Rugby</p>		<p>SHMA is considered to be a robust document that details the required housing in Rugby over the plan period. Use of SHMA is in accordance with the requirements of Paragraphs 50 and 159 of the NPPF. Supporting text also includes reference to consideration of future SHMA updates commissioned by the Council and also updated Housing Needs SPD. Amendments to policy not considered necessary. Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. 1444	John Pearce	Amec Foster Wheeler	Warwickshire County Council	DS1	<p>Concern that total quantum of employment land proposed to meet Rugby's needs is too conservative. Consider that the buffer included in the target is insufficient in context of NPPF para.21 which states that plan policies should be flexible enough to accommodate needs not anticipated in the plan and to allow a rapid response to changes in economic circumstances.</p>	<p>Suggest employment land target in DS1 should be increased to 130 hectares.</p>	<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1448	Nick Small	Stagecoach	Stagecoach	DS1	<p>Stagecoach accepts the quantum of development proposed, recognising that the Planning Authority is duty-bound to positively plan to meet the objectively-assessed development needs (OAN) arising within the Borough. This quantum gives rise to an exceptionally ambitious development programme, delivery of which poses significant practical challenges, and not least threatens both to the sustainability of existing bus services throughout the Borough, never mind the improvement and extension of bus services to effectively serve new development. No party can supply evidence that this level of development can be accommodated without the residual unmitigated impacts being severe. As we outline elsewhere, this risks fatally undermining the Plan, in the absence of suitable policy protecting against such an outcome. It is vital to allow the traffic impacts of the development strategy to be most rationally catered for in the first half of the Plan period, by concentrating delivery north of the railway lines, thus avoiding as far as possible, overly impinging of traffic growth on north-south corridors leading to and running across the old Town Centre. These are the very "hot spots" identified in the traffic model.</p>	<p>The Policy should be modified to require that development proposals on sites allocated in the rural area should ensure that where possible, pedestrian and cycle links are provided to maximise convenient access to existing public transport services. Stagecoach urges that Policy DS6 should be modified to read: "Provision, where opportunities are present, of links to existing pedestrian and cycle paths with the adjacent settlement, and to local public transport links, including upgrade or provision of bus stop infrastructure where required;"</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The STA demonstrates the measures contained within the IDP mitigate against the impacts of the local plan growth. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

1511	Dr I B Draper	NA	NA	DS1	<p>Plan proposes the addition of an extraordinary number of dwellings and therefore residents which is difficult to imagine the area can absorb without serious detriment. Increase in traffic thorough Dunchurch crossroads, concomitant increase in pollution and strain on local services will all have considerable adverse effects. Dunchurch I one of the few areas around Rugby with local character, being very picturesque and historical and its ambience will be ruined if these proposals go ahead, and could never be recovered. It does not seem reasonable to lose an important part of Rugby's heritage when there are areas in the locality where this would not be a factor. Lack of independence of some bodies involved in drawing up proposals (GL Hearn, WCC who owns much of the land and is also the Highways Authority), which could have influenced the recommendations. Only those familiar with the area will appreciate the larger adverse effects the Local Plan will cause in its present form. Urge reconsideration of proposals.</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west,</p>

1676	Mr Craig Beech	NA	NA	DS1	<p>The Borough Council cannot put policies in place which put Dunchurch residents under an increased threat of air pollution. DS8 and DS10 will potentially halt the development at the mast site (Houlton) as developers will divert to Dunchurch. These policies could therefore be counter-productive in producing housing numbers for the Borough. I believe the strategic location for housing should be rethought and located next to employment areas and with easy access to primary highway routes such as Ansty Park. This would be a much more appropriate location for DS8 and DS10 and provide the Coventry overspill requirement at the same time.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations.</p>

1720	Jeremy Thorne	NA	NA	DS1	Land to the south of Ashlawn Rd and Hillmorton Rd is outside the designated urban area and is subject to an increasing number of developer planning applications which are unsuited to the infrastructure and facilities of the area. More than enough housing provision has been made in Hillmorton and at Rugby Radio Station.	Designate land in to the south between Hillmorton and Ashlawn Roads as green infrastructure to protect from speculative planning applications.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. This includes consideration of the landscape value of this area. Whilst there have been recent planning applications/appeals in this area, no allocations are proposed in the local plan for land south of Ashlawn Road and Hillmorton Road.
1752	Kay Thorpe	NA	NA	DS1	With all the warehousing units we already have in around the town, are they really necessary, and why on a site adjacent to a small village, whose centre are a conservation area? Not only would they be an eyesore, but would bring significantly more traffic, and disturbance out of proportion to the small number of jobs it might create. The numbers involved in the planned housing developments are alarming, not only because of the areas of green fields in this supposedly rural community which will disappear, but because there seems to be no infrastructure, especially roads, planned in until one third of the houses are built. Dunchurch crossroads is already a bottleneck morning and evening. It is already a dangerous junction and a heavily polluted area. There is also the question of who all these additional		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

					<p>redistribution of employment land in ELMOU given that Ansty Park and Ryton now developed. Employment evidence will need to take account of market signals/intelligence as referred to in ELMOU. <u>Meeting housing requirement</u> - phased approach to delivery is logical from mathematical perspective but illogical to significantly boost the delivery of housing. Sedgefield approach should be used to make up deficit within first five years as agreed by the Government. Council should identify sites over and above dwelling target in Policy DS1 to provide a 20% buffer rather than 10% currently identified. Concern that housing land supply strategy will not deliver dwellings in a timely manner. <u>Meeting the employment requirement</u> - increase CPE allocation from 7.5ha to 11.5ha to maximise use of the land. Council has taken a cautious approach to allocating employment land, given locational advantages a minimum 7ha per annum should be identified and would also assist with flexibility in meeting the economic objectives of the plan. The location of the site is highly attractive for a range of unit sizes. The ELS is informed by the most up to date information,</p>		<p>view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU. With regards to employment land, the Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. An up-to-date employment land supply position, reflecting more recent past take-up, is included in proposed Policy DS1 of the Local Plan as indicated by modification LP54.13 and further discussed in the Employment Land Background Paper (2017). The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016.</p>

2187	David Keene	NA	NA	DS1	Manse Opus LLP and Rolls Royce own 14.5 ha of land adjacent to Parcel C6, which has been proposed for removal from the Green Belt in the local plan. A site assessment would reveal there is little discernible difference between Parcel C6 and land to the east		The site is located within the green belt; the Coventry and Warwickshire Green Belt Review has made an assessment of the West Midlands Green Belt with the results available as part of RBCs online evidence base.
1878	Duncan Chadwick	David Lock Associates	Tarmac Ltd	DS1	Housing target should be expressed as a minimum and 12,400 figures should be significantly increased to meet housing need and economic targets, ensure delivery, and promote choice and competition in the market and to address affordability issues. Target should be 571 dpa or 11,420 overall before unmet need, based on economic led forecasts which reflect the Borough's, the LEP's and the area's employment and economic growth objectives. Policy should also delete references in para.4.10 to an annual housing target of 540 dpa in early part of plan as this is inconsistent with Council's 5 year housing land requirement. In addition to an increased OAN, a further increase will be needed to deal with unmet need from Coventry, unmet needs from Birmingham HMA, and resolution of Nuneaton's contribution to Coventry unmet need. Release of housing white paper expected to reflect the government's commitment to	Local plan should be revised to make provision for allocation of client's site at Ryton on Dunsmore.	The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. No alteration is required. A MoU distributes the OAN across the HMA to ensure it is met within the HMA. Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU. Rugby Borough is not within the Greater Birmingham HMA and does not have a DtC objection from Birmingham regarding housing need. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing

					<p>ensuring the delivery of housing, including increasing the supply of land for housing development. Birmingham Development Plan expected to be adopted in early 2017; as set out in our original rep, the need for housing in the Greater Birmingham HMA has a direct impact on housing need in the C&W HMA. There has been little progress of agreement on how this should be distributed among the sub-region. Rugby local plan should therefore build in sufficient flexibility to accommodate additional growth that may be required to address such need and fulfil the duty to cooperate. Considerable local objection to inclusion of Lodge Farm proposed allocation in the local plan; NPPF supports development that “facilitates the use of sustainable modes of transport” and “where the need to travel will be minimised”. The Lodge Farm site fails these tests in respect of meeting Coventry’s needs, being some distance from the city. More housing should be planned for on the edge of Coventry, within main rural settlements and close to employment and transport infrastructure.</p>		target. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1897	Karin Hartley	Delta Planning	AC Lloyd Holdings Ltd	DS1	<p>RBC seeks to provide 110 ha of employment land; as the requirement (100-130 hectares over remaining plan period) relates to a 16 year period and not whole plan period, arguably the needs are likely to be greater than the 100-130 hectares for the whole plan period. The ELR (GL Hearn Study) excludes consideration of development needs arising from Coventry, for example Ryton and Ansty are excluded. This reduces short term completion trends from 13.2 ha to 3.9 ha per year. The commercial property market around Coventry has been buoyant in recent years and by ignoring it the ELR is fundamentally flawed. The Employment MOU states that Ryton and Ansty have already more than provided for redistribution from Coventry, however most of the land has been taken up over a five year period and difficult to see how remaining land will meet employment requirements over the next 15 years. No flexibility has been built into employment land supply and is likely to exacerbate shortage of strategic land as recognised by more recent sub-regional employment land studies.</p>	<p>The plan fails to address sub-regional need for strategic employment land and has therefore not been positively prepared and will ultimately fail to meet own objective to "ensure that all businesses, whether large or small, can locate and operate in Rugby through the provision of a varied portfolio of employment land".</p>	<p>The Local Plan employment target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. An up-to-date employment land supply position, reflecting more recent past take-up, is included in proposed Policy DS1 of the Local Plan as indicated by modification LP54.13 and further discussed in the Employment Land Background Paper (2017). The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016.</p>

1901	Mathieu Evans	Gladman Developments Ltd		DS1	<p>Overall assessment of housing need is considered to be significant underestimation and does not include reference to 2014 household projections. Concerns relating to unmet need from Coventry as Nuneaton and Bedworth has not committed to delivering its portion of the unmet need therefore no certainty that housing requirements of the HMA can be met.</p> <p>Furthermore the assessed need takes no account of unmet housing needs from Birmingham. Total plan delivery provides for a 10% buffer above the housing target - a buffer is prudent however question whether 10% is enough in case of Rugby. Do not consider proposed strategy is sound as will not deliver overall plan targets and will not be able to demonstrate a 5 year land supply.</p>		<p>The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Proposed alteration LP-54.6 insert new para. After 4.7. Whilst some figures for individual local authorities change slightly, it is clear, at the HMA level that the assessed level of need in the UAoHN (and linked to 2012-based data) remains sound. A MoU distributes the OAN across the HMA to ensure it is met within the HMA. Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU. Rugby borough not within the greater Birmingham HMA. The revised HT (LP54.114) provides a greater buffer than at Publication following the 2016/17 monitoring returns and discussions with developers/landowners of existing sites and proposed allocations.</p>
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS1	<p>It should be stated that a figure of 12,400 homes is a minimum number as is provided for in 4.7.</p>	<p>Add word minimum on first line after word following.</p>	<p>The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS1	An allowance for windfall should not be built into the housing targets and we consider generally that there is insufficient detail in the Plan on delivery targets, implementation and deliverability linked to the major sites, some of which have major constraints to be overcome. In particular the south west SUE, whilst clearly advanced to an extent, has obviously major issues to be overcome and infrastructure to take place before development can commence. This means that it is unlikely to deliver the numbers expected in the Plan and generally we challenge the delivery targets, phasing and the allocations. The housing trajectory, as referred to in 4.15, is insufficiently explained.	Amend Plan and Policies to reflect.	The Housing target has been formulated in line with the NPPF and national best practice. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. It is acknowledged that not all sites will deliver within the Plan period and this is because the Local Plan has sought to allocate a sufficient supply of land to maintain a 5 year land supply by offering the widest range of sites in terms of size and location.
1909	Paul Hill	RPS	St Modwen	DS1	DS1 or the housing background paper does not appear to have been addressed/incorporated the joint 2016 CWHMA housing evidence undertaken in August 2016. Notes that the update only considers the updated sub population/household projection and not local evidence in terms on rents, house prices and affordability. The CWHMA findings do not result in a fundamental change to the SHMA 2015 update. Account may have to be taken of any changes resulting from the White Paper.	<ol style="list-style-type: none"> 1. The 12,400 dwellings should be expressed as a minimum figure. 2. Alteration to para 4.7 to reflect CWHMA 2016 and insertion of minimum into Policy DS1 to provide consistency with supporting text. 	Modification LP54.6 inserts new paragraph to explain how local plan has taken account of latest CWHMA housing evidence undertaken in August 2016. The housing target is not expressed as a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No further alteration is required.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1909	Paul Hill	RPS	St Modwen	DS1	Lodge Farm will accommodate multiple outlets and the delivery rates for the site within the housing trajectory represent a realistic yet conservative estimate for the site. Para 4.12 table “Number of allocated dwellings anticipated to be completed within the plan period – 5,182”. Whilst this figure is not disputed, it is not clear as stated in the Plan how the figure has been produced (i.e. which sites it includes and what proportion of housing the allocations are expected to deliver within the period).	Explanation of the 5,182 should be included to demonstrate anticipated build out rates from the various commitments in the plan.	The Housing Trajectory is based on discussions with developers/landowners assessing how many homes could be built per year relative to capacity, the local housing market and any site constraints.
1909	Paul Hill	RPS	St Modwen	DS1	Policy DS10 should be amended for an allowance for 2ha of employment land meeting the deficit of employment units (B1c, B2, B8) between 465sqm and 1,850sqm identified in the Employment Land Study (2015). Given these suggested changes, it is recommended that the table in paragraph 4.16 listing the supply and allocations should also include Lodge Farm (DS10).	The table in paragraph 4.16 should be amended to include Lodge Farm within the allocations to deliver 2ha of B1/B2/B8 uses.	Commuted noted. However, sufficient land has been proposed for allocation through the plan to meet the strategic employment growth to meet the needs as identified in the ELS and the Employment MoU... No change proposed.

1910	Mrs Sophie Horsley	Strutt & Parker	John Tarrant	DS1	Positive approach to meeting housing and employment need including those derived from neighbouring districts. Over allocated within and beyond the plan period providing genuine flexibility, competition and choice in the delivery of housing in the District.		Support noted. All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The proposed main rural settlement allocations are considered to justify release of land in the Green Belt as suitable, available and achievable sites that can contribute to delivery of housing in the first five years of the plan as opposed to larger sites that will take longer to deliver.
1912	Chontell Buchanan	First City Limited	Archdiocese of Birmingham	DS1	Disagreement with the Local Plan and SHLAA in relation to not allocating land off Station Road, Clifton. The site is 2.5 miles from the town centre, has strong transport links and Clifton has a good range of services, thus is sustainable. Disagreement with the ecological, landscape and sustainability of the site conducted for the SHLAA. Concerns around coalescence could be overcome through creating a buffer. Therefore the Local Plan has failed to select the most suitable sites for development. There is an under-delivery of sites through the first phase of the plan by 1,039 dwellings, which should be made up for in the first 5 years of the second	Land off Station Road Clifton should be allocated within the Local Plan. Include details of meeting the shortfall within the Borough from under-delivery within the first phase of the Plan as well as meeting Coventry's need.	All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify suitable, available and achievable options for allocation.

----	------	--------------	--------	---------------	---------------------------	---	--------------

					phase of the plan.		
1932	Nick Carr	Rosconn Group	Peter Frampton (Framptons)	DS1	DS1 states that: "Rugby Borough Council therefore aims to meet its housing requirement by providing for a minimum of 12,400 new homes between 2011 and 2031." DS1 should read "a minimum of 12,400 additional homes..."	DS1 should read: "A minimum of 12,400 additional homes..."	The housing target is not expressed as a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No further alteration is required.
1935	Sophie Horsley	Strutt and Parker	Will Main (Manor Oak Homes)	DS1	The overall approach is supported although the council is relying on a small number of very large sites with complications including infrastructure requirements, legal agreements and phased release to avoid 'flooding' the housing market. The response cites research by NLP: Start to finish How quickly to large-scale housing sites deliver? Over-allocation provides flexibility if sites aren't delivered. There are identifiable exceptional circumstances to justify releasing the green belt. Large villages between Coventry and Rugby are the most sustainable within the Borough; looking to create new settlements takes time therefore delivery through expanding existing rural settlements will help with early delivery. Main Rural Settlements provide vital services for nearby villages as such supporting their growth aids the sustainability of the Borough as a whole.		Support noted. All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The proposed main rural settlement allocations are considered to justify release of land in the Green Belt as suitable, available and achievable sites that can contribute to delivery of housing in the first five years of the plan as opposed to larger sites that will take longer to deliver.

1936	Stephen Mair	Andrew Granger	The Shirley Family	DS1	Promotion of land to the South of Rugby Road, Brinklow. The site has good access to local services, no known constraints and could accommodate unto 100 dwellings. Clarify how housing trajectory has accounted for the 5 year land supply.	Policy should be amended to state a minimum of 12,400 homes to provide flexibility	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify suitable, available and achievable options for allocation. The housing target is not expressed as a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No further alteration is required.
1951	Alexander Linden	NA	NA	DS1	The continual building of houses on green land is totally irresponsible our CO2 levels are at an all-time high at 400 ppm. If we continue at this rate we will destroy everything we cherish, i.e. our beautiful and clean country side.	Reduce the number of planned housing to 20% of already agreed number; we need to be compliant with our agreed international CO2 numbers. By continuing with the plan we are only guaranteeing destruction of the planet.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify suitable, available and achievable options for allocation. It is acknowledged there will be loss of countryside however this is the case as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. It would be unsound to only plan for 20% of the local plan target as this would not meet objectively assessed housing needs.

1968	Anne Langley	NA	NA	DS1	DS1 (p. 17) The housing target is too high because it is based on dubious assumptions (of much higher growth than is likely or indeed feasible to meet) and includes figures to cope with Coventry overspill.	Reduce the housing target for Rugby by 10% to a more reasonable (and achievable) level, and remove the 2,800 provision for Coventry overspill. This leaves a total of 8,640 by my calculations.	The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. Therefore no further amendments considered necessary.

2109	Louise Steele	Framptons	db symmetry	DS1	<p>Substantial need for the local plan to respond to the spatial requirements of the logistics sector in the interests of both the local economy and the UK economy more generally. There is a need for larger footplate buildings with higher eaves heights and without the provision of new sites there will be a shortage of accommodation for strategic distribution needs. Generally supportive of the allocation of SW Rugby for employment development to help meet overall growth targets. Site is suitable location for employment floor space and will deliver substantial economic benefits to local, regional and national economy.</p>		<p>Comments noted. Policy is formulated in relation to the evidence base, including identified need for B8 employment land, and is considered to be sound.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2120	Michelle Simpson-Gallego	Pegasus Group	Peter Drakesford	DS1	<p>The overall OAN should be increased (on the basis of updated Subnational Housing Projections) and Coventry's neighbouring authorities should make up the shortfall. If not the OAN may not be delivered and the plan would not be positively prepared. Disappointed that RBC has not extended the Local Plan consultation period to match that of the former adopted Core Strategy. A number of sites could deliver beyond the plan period, so the plan should be rolled forward. Concern that Nuneaton and Bedworth has not signed unto the MoU, thus risking the HMA needs being unmet. Unmet need from the first phase of the Plan period is not met until 2031- whereas the Sedgefield approach requires unmet demand owing to a lack of 5 year land supply to be met within 5 years. A 20% buffer is suggested by the Local Plans Expert Group- but only 10% is provided. An additional buffer of circa 1,240 homes may help address unmet need.</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Modification LP54.6 inserts new paragraph to explain how local plan has taken account of latest CWHMA housing evidence undertaken in August 2016. Whilst some figures for individual local authorities change slightly, it is clear, at the HMA level that the assessed level of need in the UAoHN (and linked to 2012-based data) remains sound. A MoU distributes the OAN across the HMA to ensure it is met within the HMA. Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU.</p>

2150	Michelle Simpson-Gallego	Pegasus Group	Lioncourt Homes	DS1	<p>The overall OAN should be increased (on the basis of updated Subnational Housing Projections) and Coventry's neighbouring authorities should make up the shortfall. If not the OAN may not be delivered and the plan would not be positively prepared. Dwelling provision may constrain economic growth as SHMA states labour force growth of 12%; Experian forecasts 14.3% across the HMA between 2011-2031. Unmet need has not been taken into account, which is contrary to PPG. Disappointing that RBC has not extended the consultation period beyond that of the former adopted core strategy. Allocated site have the potential to deliver beyond the plan period so the plan should</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. The plan makes provision for a larger housing land supply relative to its identified requirement; much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Modification LP54.6 inserts new paragraph to explain how local plan has taken account of latest CWHMA housing evidence undertaken in August 2016. Whilst some figures for individual local authorities change slightly, it is clear, at the HMA level that the assessed level of need in the UAoHN (and linked to 2012-based data) remains sound. A MoU distributes the OAN across the HMA to ensure it is met within the HMA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>consider longer term growth over 15-20 years. In relation to the duty to cooperate, there is concern that Nuneaton and Bedworth has not signed up to an allocation of Coventry's to the MOU and the needs within the HMA are unmet. Concern that Coventry's will struggle to meet its targets- which is of significance to Rugby given the significant relationship between the two. Unmet need is not addressed until 2031, which is contrary to national policy as the Sedgefield approach requires unmet need to be met within 5 years. Concern that the housing number buffer is only 10%, when the Local Plans expert group recommends a buffer of 20%. A buffer of circa 1,240 homes would also help to address unmet need.</p>		<p>Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU.</p>
2154	Robert Green	NA	NA	DS1	<p>Strategic Housing market assessment were produced by consultants, GL Hearn. Within their report, population projections have been treated as forecasts within the SHMA. This is contrary to government policy. G L Hearn act on behalf of property developers (including SW Rugby) cannot be considered impartial or independent.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Therefore no amendments considered necessary.</p>

2273	D Creery	NA	NA	DS1	<p>Local Plan covers the period 2011-2031 but the models used do not appear to have been updated with the actual information gathered in the first 6 years of the 20. In this period the actual new building rate has been significantly lower than the overall rate required catching up and achieving the numbers anticipated. Number precede the Brexit decision which will likely significantly reduce the net immigration figures which are used as a large factor in determining local population increase in justifying the number of new houses and the need for the extent of additional warehousing. Much of the information given appears to derive from organisations with a vested interest in providing the precise facilities that they advise on and in locations to be cherry-picked and built on first until the inevitable reduced numbers have been achieved. How would housing in SW affect the already low take-up at the mast site? What is the justification for not first completing housing on a brown site before invading Grade 2 agricultural land? Until the tipping point of school children numbers is achieved to initiate the building of a new school or schools, where will the initial influx of pupils be catered for in the already full schools and how will</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction</p>

1979	Charles Johnson	NA	NA	DS1	<p>Existing transport infrastructure is inadequate such as the gyratory, western relief road leading onto a country lane, historic railway tunnels at Mill Road, Newbold Road and Hillmorton are not adequate for modern day traffic; A relief road from Hillmorton to the Avon mill area is planned but it bypasses the town centre and runs outside the railway embankment this does not provide a sensible route for travelling to schools, Elliot's Field is full after 9am, difficult to attract people to the town centre due to queues of traffic trying to get through the outdated railway tunnels; Concerns raised about flooding with the land north of the water tower acts as a sponge for rainwater development of the land will result in flooding on the A426 and A4071. Infrastructure is needed to be improved to support growth proposed in the plan. Funding applications should be sought prior to any development due to the circumstances of the railways tunnels and the motorway.</p>		<p>The gyratory system and wider road network was assessed as part of the STA; Warwickshire County Council have not identified the gyratory as a constraint on development. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan</p>

							and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
2166	Richard Stephens	NA	NA	DS1	Based on an out of date review of needs, the Updated Assessment of Housing Need using economic and demographic projections which are now out of date (post-Brexit).	Re-evaluate projections for housing. Independently review the SHMA (2015) •. Delete Policy DS8 South West Rugby to bring it in line with the required housing projections.	Proposed alteration LP-54.6 insert new para. After 4.7. Whilst some figures for individual local authorities change slightly, it is clear, at the HMA level that the assessed level of need in the UAoHN (and linked to 2012-based data) remains sound. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.
2166	Richard Stephens	NA	NA	DS1	Para 4.12, page 18 increases this to 13,664, (over-allocation of 40%); DS3, 22 total number of plots of 15,427, a total over-allocation of 60% and totally unjustified. This contravenes the NPPF principle of sustainable development and NPPF paragraphs 14 & 17.	Re-evaluate projections for housing. Independently review the SHMA (2015) •. Delete Policy DS8 South West Rugby to bring it in line with the required housing projections.	All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Considered consistent with the NPPF. No amendment recommended.

2166	Richard Stephens	NA	NA	DS1	<p>State to provide for 2,800 dwellings over the plan period towards Coventry's housing needs. The provision of this housing in South West Rugby (Policy DS8) contravenes NPPF paragraphs 30, 34, 37 and 95 by failing to avoid excessive car journeys to/from Coventry. Vastly over allocates for housing compared to the identified needs - DS1 proposes 12,400 new homes over the period which is an over allocation of 30% (480 OAN).</p>	Delete Policy DS8 There is already enough allocation within Rugby boundaries.	5000 dwellings is entirely appropriate to allocate on the site and for the site's contribution to the housing target overall. This figure has informed the various evidence documents which identify the level of infrastructure required to support the local plan growth. Proposed Appendix 3 Infrastructure Delivery Plan and DS8 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).
334, 1503, 1778	D Watson	NA	NA	DS1	<p>Object to inclusion of additional 100 houses at Coton House under DS1. Existing development took place to ensure the future of the main house and other important buildings on the site. It was accepted that there are no local facilities in the site, no public transport, no access to footpath or cycle networks.</p>		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify suitable, available and achievable options for allocation. All sites proposed are required to maintain a 5 year land supply throughout the plan period.
786	F Stevenson	NA	NA	DS1	<p>DS1 - Questions the SHMA and impartiality of GL Hearn. Projections treated as forecasts. Does not take account of Brexit and meeting unmet need should only be considered when it is reasonable and sustainable to do so? Policy DS1 states that a figure of 12,400 dwellings is needed by 2031 and has been decided on without adequate consideration of Government policy. Delivery will need to increase by 55% into meet the target which will be impossible to achieves.</p>		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Infrastructure provision is vague not set out and not set out for education and health.</p>		<p>accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the</p>

1398	Ian Bentlett	Harborough Magna Parish Council and Hill Street Youth and community center	Na	DS2	Unsure if section on Gypsies and Travellers (policy statement DS2) is taking account of the new requirements or not (2014 regulations which I understand have been or are soon to be adjusted.		Policy DS2 will allocate land to accommodate requirements as identified by the Gypsy and Traveller Accommodation Assessment (GTAA) 2014. At the time of writing the GTAA predates the recent changes to the Planning Policy for Traveller Sites (PPTS).
1437	Mark Andrews	Coventry City Council	NA	DS2	Coventry urban fringe is not referenced as a sustainable option within the settlement hierarchy policy. Refs the PO response which recommended this is included in the LP to support the Walsgrave allocation. CCC recognise the specific reference at Para 4.22 to exploring opportunities for providing Gypsy and Traveller sites adjacent to the city's western boundary. Concerns that such proposals would appear to be in conflict with RBC's settlement hierarchy policy.		Unlike residential and employment sites, Para 4.22 is specifically mentioned in regard of Gypsy and Traveller sites due to the difficulty of locating Gypsy and Traveller sites outside of the GB. The SHLAA which informs the Publication Local Plan and Housing Background paper are clear why edge of Coventry is not considered to be a sustainable location and consequently not contained within the settlement hierarchy as such. Comments noted however no further action considered necessary.

52	D Clark	NA	NA	DS3	DS3.6-14: However numbers being allotted to housing increases 530 more to be built. There should be no construction of accommodation on green belt land.		The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Release of Green Belt considered justified in the proposed locations. The assessment of sites within Stretton on Dunsmore is set out within the Stretton in Dunsmore site allocations pack. The promoted site is not considered suitable for allocation therefore no change required.
52	D Clark	NA	NA	DS3	Note that there will be 12,400 houses to build over 20 years. Already 5 years have passed how many have actually been completed. What will be the mix of housing?		2,577 completions within the 5 years. Policy H1 informs housing mix.
52	D Clark	NA	NA	DS3	Looking at the number of houses under construction and to be built there is a discrepancy (see rep for details).		Mods table reference LP54.114 - LP54.115 shows updated Appendix 2 Housing trajectory.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
70	John Lemmonds	NA	NA	DS3	Object to Stretton on Dunsmore being a main settlement in rural area. Any new development will mean more surface water into the village brook which floods various houses in the centre of the village and downstream at Princethorpe. The village school is oversubscribed and traffic congestion on Brookside by the Surgery is severe.		Stretton-on-Dunsmore is already allocated as a Main Rural Settlement. Flood risk would be assessed- with any necessary mitigation measures identified- during the Planning Application stage. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
107	D Ridgers	NA	NA	DS3	Quote NPPF para 79, 80, 81, 83, 87, 89,		Walsgrave Hill Farm site has been removed as a site outside of the green belt (Lodge Farm) has come forward.
107	D Ridgers	NA	NA	DS3	Chapter 4 also refers to altering settlement boundaries to provide growth. Despite platitudes on how important Green Belt is contradiction that 7 of the 9 village boundaries are being changed.		A variety of sites are being proposed both in terms of size and location in order to provide a 5 year land supply.
107	D Ridgers	NA	NA	DS3	Precedent and further incursions into the Green Belt will occur, gradually eroding it away. There will not be enough green space left for carbon capture, water absorption and wildlife habitats/corridors. Unique villages will become ever closer to other nearby villages,		Green Belt has been subject to a greenbelt review. Building Regulations include matters of building efficiency.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					totally destroying the idea of village life altogether.		
107	D Ridgers	NA	NA	DS3	One of objectives is to enable appropriate amounts of development in Main Rural Settlements to bolster their role as local service centres... In North Warwickshire Local Plan 2006 Appendix S1 A minimum population of 2000 people is regarded is regarded as minimum necessary to support the range of facilities necessary to enable a Local Service Centre to function as such. Stretton on Dunmore's current population is around 1200 so even this proposed development would not increase the population to the minimum requirement level.		Main Rural Settlements have been assessed as part of the Rural Sustainability Study.
107	D Ridgers	NA	NA	DS3	75 more dwellings would increase village size by almost a fifth. 180 more people, despite fact that there is no need for open market housing according to our parish plan. This would adversely affect the close knit feel of the community, ability of infrastructure to cope and the heritage of the village.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The Local Plans Development Strategy is based on providing a broad range of sites in terms of size and location.
107	D Ridgers	NA	NA	DS3	Add to this the fact that most families have 2 vehicles, there could be up to 150 vehicles travelling through the village. There are only 2 main routes into and out of the village. School Lane only of use to those wishing to travel westbound on the A45, for those travelling		Highways impacts to be assessed as part of any future Planning Application with any appropriate mitigation measures identified.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					eastbound it would be necessary to drive through centre of the village.		
107	D Ridgers	NA	NA	DS3	Plot Lane and Freeboard Lane were suggested as entrance and exit routes to the village in previous application, but these are single track roads, frequented by walkers, dog-walkers, joggers and horse riders. Access to DS3.10 would also be via Plot Land and Orchard Way (a cul-de-sac at the moment)		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
107	D Ridgers	NA	NA	DS3	No mention of road improvements for Stretton on Dunsmore in the RBC infrastructure.		Assessments for smaller allocations will come forward as part of the Planning Application process.
107	D Ridgers	NA	NA	DS3	In RBC infrastructure Delivery Plan, state that for MRS there will be need for additional education provision. Short term/immediate impact on primary provision are to transport pupils to the next nearest school with places in the required year group. And in the longer term there may need to be some changes in transport arrangements/routes for those on the periphery of priority areas.		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
107	D Ridgers	NA	NA	DS3	<p>Not in favour of daily transporting of primary aged children, but due to closure of many village schools realise the necessity of this... Local Primary school (Knightlow) is fully subscribed and already has pupils brought in daily by coach from outlying villages. Parents also drive children to local school from villages not served by transport for education. Now that parents can exercise a choice of where children are educated they may decide not to send their children to the next nearest school. With new dwellings planned very much doubt whether enough places could be found for up to 30 primary age children.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.</p>
107	D Ridgers	NA	NA	DS3	<p>On education issues alone, proposed developments are unsustainable.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Additional details will be finalised at the Planning Application stage.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
107	D Ridgers	NA	NA	DS3	Sensible to leave these sites in abeyance and exclude from plan? Wold only is a loss of 3.5% and Stretton on Dunsmore houses only account for 0.5% of total. After all, Rugby Town is the most sustainable location with best access to a range of services and facilities.		The Development Strategy seeks to provide a range of sites in terms of size and location to provide a 5 year housing land supply. Focusing growth on Rugby Town did not achieve the levels of delivery hoped for in the previous Plan period.
107	D Ridgers	NA	NA	DS3	Question soundness of Plan with regard to: Number of planned dwellings MRS sites and Stretton on Dunsmore, in particular on the grounds of: Infrastructure and sustainability, especially transport, education and surface water drainage.		The Development Strategy seeks to provide a range of sites in terms of size and location to provide a 5 year housing land supply. Focusing growth on Rugby Town did not achieve the levels of delivery hoped for in the previous Plan period. Infrastructure to be finalised during Planning Application phase.
107	D Ridgers	NA	NA	DS3	Also concerned that planning authorities can manipulate village boundaries so as to include current Green Belt land for the purpose of development.		Green Belt can only be removed through the Local Plan process, which is subject to independent examination by the Planning Inspectorate. Green Belt was subject to greenbelt review.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
107	D Ridgers	NA	NA	DS3	Then in Chapter 3 General Principles regarding Green Belt restrictions and many reference in NPPF to new buildings being inappropriate in green belt. Do not consider proposed 75 dwellings as being needed for 'exceptional circumstances', but they are inappropriate. Brownfield site that could be developed on A45 but there is no mention of that in the local plan. DS3.11 is agricultural land currently under arable cultivation and has been for many years.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
107	D Ridgers	NA	NA	DS3	DS3 - total identified dwellings is 14,900, a whopping 2500 above initial requirement of 12, 400 and 1236 above safeguarded total of 13,664. MRS sites are supposed to deliver up to 527 dwellings. Already in surplus by at least 1235, are ANY MRS sites necessary?		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period
107	D Ridgers	NA	NA	DS3	Both these sites have previously had applications rejected. Infrastructure and limitations remain the same, but suddenly conveniently have had Green Belt removed.GP2 states settlement hierarchy, both Stretton on Dunsmore sites lie outside existing village boundary.		Each Planning Application is considered on its own merits. Justification for green belt release is to provide a variety of sites both in terms of size and location to meet 5 year land supply requirements.

221	Kate Robards	NA	NA	DS3	Policy is unsound as allocates more countryside for housing than is needed to meet Rugby's needs. Alternative option of a faster build of approved and planned housing has not been tested so the policy is not justified.	Review local plan with sound tested statistics that are up to date	The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.
256	Lesley McGaw	NA	NA	DS3	Proposed development site is greenbelt land, contrary to Policy CP1. Proposed development would swamp Ansty, major development of local amenities is required, already problems with congestion, reduction in buffer between Coventry and Ansty and potential to set precedent and there are more suitable sites elsewhere in Rugby. Ansty should not be engulfed by stealth by Coventry like how Walsgrave-on-Stowe has been.		Comment noted. The draft Local Plan does not propose allocation of SHLAA sites S10645. No change recommended.
291	Russell Vessey	NA	NA	DS3	Homes to meet Coventry needs should be accessible to Coventry to allow sustainable travel for		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>employment. Reasonable to assume housing will go on MRS and Rugby as these are accessible to Coventry. Lodge Farm is not. It will not be sustainable and residents will need to travel for most services requiring significant travel by car. Start date of Lodge Farm unrealistic due to large sites being complex to get going. Contrary to Nathaniel Lichfield & Partners in November 2016 assumptions for sites of between 1,000 and 1,500. Based on this LF unlikely to start until 2022. Delivery will also be affected by SW Rugby proximity. Walsgrave is much better related to Coventry with better access to facilities and employment.</p> <p>- Sig overspill from Cove and lack of alternatives considered sufficient justification for GB release. Ref JGBR that parcel plays sig role in preventing coalescence but will 9.5km will remain if built out. Also refs RBC Preferred Options which states sites is mostly contained. Believes emerging CIL could provide funds to assist in early infrastructure delivery to bring Walsgrave forward sooner. Evidence shows LF and Walsgrave could come forward at same time. Heritage and ecological issues at Walsgrave could be overcome. Only advantage LF has is that it is not in GB.</p>		<p>development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory (modification LP54.114-115). There remain heritage and access concerns for the Walsgrave site.</p>

346	Keith Rogers	NA	NA	DS3	<p>SHLAA process not consistent, transparent or robust. Criteria are not weighted and do not state what the 'pass mark' is for sites which means it is not transparent. Discrepancies in site assessments identified. No explanation how sites that passed SHLAA were selected for allocation therefore regardless of whether proposed sites are allocated rightfully so, uncertainty casts doubt on process.</p>	<p>Future housing need for Rugby has been overstated by 2,000 dwellings and should be revised downwards. Remove the Main Rural Settlement sites from allocation.</p>	<p>The SHMA, which includes overall housing need, has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. SHLAA has been conducted in accordance with an agreed methodology and is considered sound. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
346	Keith Rogers	NA	NA	DS3	<p>Amongst plan allocations, RBC proposes to account for Coventry's unmet needs on larger sites at SW Rugby, Lodge Farm and Radio Station. These people will be forced to travel additional mileage from the new developments to Coventry. Alternative approach would be to locate these sites nearer to Coventry. Concern that delivery strategy will dramatically change the village character of main rural settlements, in particular Stretton on Dunsmore. RBC stance is that main rural settlement sites are needed to deliver dwellings in first five years of the trajectory, however this is a fallacy as the MRS will only contribute 10% to the first five years of housing needed. Do not agree that additional housing will offer sustainability for the local services in the village.</p>	<p>Future housing need for Rugby has been overstated by 2,000 dwellings and should be revised downwards. Remove the Main Rural Settlement sites from allocation.</p>	<p>The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.</p>

724	John A Jelley	NA	NA	DS3	Brexit has created uncertainty with regards to future population trends so the Local Plan is outdated; proposals for Stretton on Dunsmore and other parts of district unrealistic; culture and environment of Stretton would be changed irrevocably; no detail on infrastructure; no indication as per type of housing, where will residents and future jobs come from? insufficient infrastructure; evidence base lacking; not opposed to new housing but must be sympathetic;		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
740	Michael Judge	NA	NA	DS3	Concern in relation to the effect of traffic pollution on public health, namely the risk of Alzheimer's associated with living next to a main road and how future housing allocations at Lodge Farm and South West Rugby may exacerbate this. Works proposed at Dunchurch crossroads are insignificant in comparison to the quantity of housing proposed. Proposed warehousing will generate HGV traffic.	Release green belt land at Walsgrave, which is a more sustainable site	Any proposals for the site will need to comply with Policy HS5 which states any development that results in significant negative impacts on health and wellbeing of people in the area as a result of pollution, noise or vibration caused by traffic generation will not be permitted unless effective mitigation can be achieved.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
740	Michael Judge	NA	NA	DS3	Concern in relation to air pollution in Dunchurch, which already exceeds air quality standards.		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA.
760	Emma Turtle	NA	NA	DS3	Unlikely to be affordable housing on the site. Expensive housing. New home owners will be commuters with cars, increasing Dunchurch's traffic and pollution problems. Plan can be improved by replacing Lodge Farm with originally preferred plan to have at Walsgrave. New road will not protect Dunchurch. Highway safety issues. Surgery and Primary School may not be built. Dunchurch is beautiful historic village with conservation area. Character and identity lost and ruined. Contravenes NPPF, Paras 30, 120, 124, 34, 37, 95, 17, 58, 52, 57, 69, 70, 73, 74, 109, 114-119, 112.		Affordable housing is addressed in the new Local Plans housing mix policy with details finalised at Planning Application stage. No evidence before the Council that suggests the affordable housing target cannot be achieved by the site. The Local Plan has been informed by an STA which identifies that flows through Dunchurch will be reduced as a result of the strategic mitigations identified as contained in the IDP. WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA.

1019	Dr J R Ponsford	NA	NA	DS3	Accepted that requirements of Paris Agreement are themselves inadequate to achieve the aim to cap global mean temperature rise to 2 degrees C, even though commitment to electric vehicles and phasing out of gas for cooking. The investment to provide any of this and the necessary renewable energy generating capacity, storage and distribution, let alone in just over 17 years is clearly massive. It will need to be accompanied by realistic efforts to help other countries, particularly with education, reduction in child mortality and encouragement of		It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Comments noted although not considered to affect soundness of plan.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>greater choice in limiting family size, at the same time educating ourselves likewise, sufficiently to adopt a gradual, peaceful, reduction in population size necessary to begin to match the Earth's depleting resources and halt the exploitation that continues to accelerate man made greenhouse gas emissions. Major contingency funds seem necessary to cope as climate change increases flooding and threatens our own food output directly or by increasing infestations. Major contingency funds seem necessary to cope as climate change increases flooding and threatens our own food output directly or by increasing infestations. Spending on new houses, warehouses and infrastructure will divert resources encourage further population growth and expropriate even more land abroad to feed us, acceleration the existing threat of mass global species extinction within decades and to man and to civilisation if global food output falls consistently below demand, prompting massive migrations. Sir David Attenborough's letter regarding population growth needs a proper response if we are to value survival of offspring and continued global enjoyment of the planet...</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1019	Dr J R Ponsford	NA	NA	DS3	<p>UK currently depends on imports for some 40% of its food. Any increase in population must increase this dependency disproportionately as cultivable land is lost. Twice last century country narrowly escaped starvation as a result of blockaded food supplies. World is hardly safer now that Aleppo's suffering now vastly exceeds Guernica's provided just one instance. Cannot be assumed otherwise that adequate, affordable access to food imports will continue indefinitely as population growth elsewhere increases completion for worlds food output. Food importing countries will be most at risk once demand exceeds supply. Ever intensive agriculture here and abroad will hasten mass extinction of other species. Human environment, whether in overcrowded cities, flooded houses on flood plains, remaining but overcrowded countryside, or never ending traffic jams, will lose many of its current pleasures, and increase risk of disaffection and strife. Global temperature rise. If rational and equitable efforts to achieve a peaceful reduction to a genuinely sustainable population size were successful, and if climate change can be halted, a very much higher standard of living for all of humanity</p>		<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Comments noted although not considered to affect soundness of plan.</p>

					and a continuing and advancing future could ensue.		
1023	Paul Salisbury	Binley Woods PC	NA	DS3	<p>Comments on proposal for Binley Woods. High priority should be given to starter housing and provision for the elderly. Parish would consider small addition to this number to fulfil the requirements of this sector. Access onto Rugby Road will create another junction onto this busy road at which there will be many problems. Will also further create a further unsafe hazard for people crossing the road. Ask for consideration of moving access to opposite Ferndale Road and install traffic lights. Would object to the removal of trees along Rugby Road. Further planting should be undertaken. Land to North and East of the site could be donated to village to maintain. Preference for Garden of Remembrance and provision of car parking for this. Proposed play area will be useful although feel any equipment should be aimed at smaller age group children. Consideration should be given with regards to services - already stretched with poor foul drainage and low water pressure to parts of the village. Many storm drains along Rugby Road are blocked and cause floods. Street lighting should be similar to the lights already in situ. Proposal far exceeds</p>		<p>Further details of the development would be considered at the planning application stage. Policy H1 would look to secure a proportion of affordable housing, including taking into account need for starter homes and homes for older people. Concern about housing number noted, although proposal is considered justified in the overall housing strategy. Highways have been a consideration in site selection as consulted on in Binley Woods Site Allocation Development Pack (June 2017), however more detailed matters would be considered at application stage. Other detailed matters such as drainage and layout would also be considered at application stage.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					the needs of the residents of the village.		
1036	J I Liddle	NA	NA	DS3	Support for a secondary school in the Northern Rugby; pupils should not have to travel across Rugby; DS7 contrary to NPPF Paragraphs 37, 72. Allocate space for a secondary school		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.
1140	Mr A J Smith	NA	NA	DS3	I consider an extra 5000 houses in this area outrageous. Is the spine road the only plan for alleviating traffic at the Dun Cow cross roads. Most of the jobs would mean travel. Employment chances would be minimal. The plan swells up Agricultural land and wildlife areas.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1144	Anthony Rogers	NA	NA	DS3	DS3 allocates housing above Rugby's needs; consultants methodology is commercially confidential so cannot be tested; results outdated given Brexit; table included showing over-provision; WCC deem 12-13,000 additional houses as having an acceptable impact on congestion but the 22,000 homes would result in gridlock; DS3 unjustified as alternative of faster build out of the Rugby Mast site has not been tested;		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1183	K Turner	NA	NA	DS3	Objection to S16045: the land is greenbelt thus to change it would set a negative precedent; the area is rich in wildlife therefore should be protected; risk of coalescence with Coventry; concerns in relation to traffic congestion;		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change.
1191	Anthony Baker	NA	NA	DS3	A ruinous increase in housing numbers not only causes more travel chaos within Rugby but the infrastructure for ever more people is not matched by facilities such as hospital bed numbers, local A&E services, doctor surgeries etc.		The IDP and associated site allocation policies has been formulated in relation to evidence base and is considered to be sound. (Therefore amendments not considered necessary or suitable).
1194	Christine and Peter Harris	NA	NA	DS3	Objection to S16045; Ansty has approximately 125 house therefore an additional 1,700 homes would overwhelm the village making it a small town; more schools would be required as the nearest is in Bulking ton and Wolvey; sewage system currently inadequate which would be exacerbated; land subject to flooding; land designated green belt thus the proposal would remove the buffer between Coventry and Warwickshire.		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1245	Cllr Leigh Hunt	NA	NA	DS3	Allocation DS3.1 Coton House has seen extensive development over past 18 months and great deal of work to restore listed building to its former glory as a single home. To place additional market housing on the site seems counter-intuitive in preserving the building and its setting. Previously acknowledged that Leicester Rd and M6 J1 are at capacity; no proper transport studies have addressed cumulative impact of all developments in Rugby area which must be carried out with further consultation before the plan is adopted. Severe problems of accessing A426 from Churchover, particularly heading south. Situation made worse by housing at Coton House and proposal for 4-arm roundabout as new access to Coton House will lead to more accidents.	Believe allocation of Coton House would be an over development of the site and cause significant harm to setting of listed building so should not be included in plan. If development is allowed here or wider area, traffic lights with priority to Leicester Rd but also to allow access from Churchover or Coton House must be considered an absolute priority.	The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The Local Plan has been informed by an STA which identifies the strategic transport infrastructure to support the Plan. The access arrangements for the site will be determined through the planning application stage. The housing background paper contains further details in relation to the selection of the site against the alternatives.
1246	Cllr Howard Roberts	Independent Group	NA	DS3	In general do not believe that blanket figure of 100 housing units for MRS sites are acceptable. Does not distinguish between different villages noted on the MRS list. Do not believe allocation of 75 houses off Plot Lane, a small road which does not allow two cars to pass, is acceptable. Infrastructure is not acceptable and will encroach on village's greenbelt. Any allocation at Ryton on Dunsmore must have evidence to confirm it will not worsen traffic on Leamington Rd at		Allocations have been informed by discussions with service providers and WCC highways that did not raise concerns about the allocations. The allocations will help ensure the Local Plan has a portfolio of sites to ensure that a continuous housing land supply can be achieved throughout the lifetime of the Plan.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					peak times - congestion and pollution already problem here.		
1247	Cllr Crane	NA	NA	DS3	<p>The Local Plan over allocates more than 50% its OAN Lodge Farm should be removed and SW Rugby could be reduced and the OAN would still be met with a degree of flexibility. By allocating so many sites the developers will choose to develop sites that will lead to the biggest profit, rather than those sites which best meet the needs of Rugby Borough (and particularly in relation to affordable housing). The prioritised sites will inevitably be the greenfield sites. This also leads to the risk that many sites will be started but not completed with the result that the necessary infrastructure will not be put in place, making sites unsustainable. The allocation should be reduced on a precautionary basis as once allocated the permissions cannot be retracted. The local plan will be reviewed every 5 years in any event and if the numbers need to be revised upwards at that stage they can be.</p>		<p>The SHMA (and OAN) has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Specific details of a proposal and impacts also assessed at planning application stage.</p>
1249	Alan Gilbert	NA	NA	DS3	<p>Objection: Unnecessary intrusion into the greenbelt, out of proportion to Ansty as existing thus swamping the village, Ansty would become part of Coventry with no clear buffer and detrimental to local wildlife</p>		<p>Walsgrave Hill Farm no longer proposed to be allocated for development.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1250	Ann Dennison	NA	NA	DS3	Objection: Development would be on green belt land; would swamp the existing small village; continual traffic as existing- the development would add 1,000 plus vehicles		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1251	Baljinder Das	NA	NA	DS3	Objection: The land is green belt, acts as a buffer between Coventry and Warwickshire, the size of proposal would engulf existing community and be detrimental to local wildlife		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1252	Barbara Robinson	NA	NA	DS3	Objection: No further building in Ansty- especially on green belt- as it undermines the villages rural character, constitutes urban sprawl, would engulf the village and would remove the buffer zone between Coventry and Warwickshire		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1253	Brenda Wallis	NA	NA	DS3	Objection: Oppose size of development, proposed development location within the green belt. Understand need for more housing so a smaller development of 50-100 properties would be better thus minimising damage to wildlife, air pollution from increased traffic and congestion and preserve the character of the village.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1254	Cathy Gould	NA	NA	DS3	<p>Objection: Detrimental to rural landscape and character of the village, development proposed for green belt which is contrary to Policy, crucial to retain green belt as its being eroded, proposed development will overwhelm Ansty and generate traffic noise. The local need aspect is inapplicable as there is redevelopment ongoing on the Main Road and at least 4 properties for sale with further opportunities to rent or buy in Shelton and new builds on Shelton Lane. Coventry provides a good example of building housing on brownfield sites; no need to expand the city with noise impacts from M6 and setting precedent for ribbon development. The development would blur the lines between the West Midlands and Warwickshire- Rugby Borough needs a distinct boundary.</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>
1255	C Newby	NA	NA	DS3	<p>Objection: Land is green belt; the size would impact the village leading to a significant increase in traffic, adequate services would need to be provided, local wildlife would be impacted, previous applications for smaller developments have been refused as they are within the green belt</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1256	Claire Willis	NA	NA	DS3	Objection: No need for further houses as there are a number for sale to buy and rent; the development is on green belt land, Ansty is a small community and this development would represent over-population; insufficient amenities-public transport, shops, sewage system, 1 road in and out of the village, there should be sufficient housing in Coventry as existing without encroaching onto green belt and affecting wildlife		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1257	David Harris	NA	NA	DS3	Objection: The proposal for 1,500 dwellings would turn Ansty into a suburb of Coventry. 1258	David Newman	NA	NA	DS3	Objection: Proposal contradicts the principle of greenbelt by eroding the buffer between Rugby and Coventry. The size of the development is too large, would contribute to flooding and the focus should be on redeveloping existing housing stock and building on brownfield land.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1259	Diane Rudd	NA	NA	DS3	Objection: Proposed development is within the green belt which currently provides a buffer between Coventry and Warwickshire. Proposal will engulf the village and impact upon wildlife.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1260	Denise Tapp	NA	NA	DS3	<p>Objection: Building on green belt is contrary to policy; similar applications for building on greenbelt have been refused, the size of the development will engulf the community; amenities would need to be provided- to the detriment of the environment; the local area (Ansty and Shelton) already suffers from traffic problems, impact on local wildlife; eradication of buffer between Coventry and Warwickshire; Ansty would no longer be a village and there are more appropriate sites in the Borough</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>
1261	Darren Wade	NA	NA	DS3	<p>Objection: Proposed development is within green belt which should be maintained to protect its village status; Policy CP1 is against greenbelt development when more suitable sites are available; the boundaries between Coventry and Warwickshire would be eroded; previous applications for smaller developments in the green belt have been refused on the basis of being inappropriate; any development would require the development of local amenities and the road network and would seriously impact upon Ansty</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1262	Peter Clarke	NA	NA	DS3	Objection: Development size would diminish wildlife and countryside; would diminish wildlife; undermines principle of greenbelt; Ansty would be engulfed and the village would lose its identity; the buffer between Coventry and Any would be removed; increased traffic would affect Ansty and surrounding villages.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1263	Ellen Johnson	NA	NA	DS3	Objection: Inappropriate development within the green belt, loss of habitat for wildlife, loss of buffer zone between Coventry and Warwickshire and increase in air pollution.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1264	Elizabeth Newman	NA	NA	DS3	Objection: The proposed development land is green belt and farming land; the proposal would overwhelm the village; proposal would undermine wildlife; there must be more suitable sites which will not destroy the buffer between Coventry and Rugby; local farmers should be supported in providing food		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1265	Grahame Fox-Dowden	NA	NA	DS3	Objection: The proposal is located within the green belt which is contrary to policy as it is being promoted ahead of more suitable sites; major infrastructure would need to be developed which would further harm Ansty village; huge increase in traffic; the proposal would remove the barrier between Ansty and Coventry; previous applications for smaller developments in the green belt have been refused; this proposal has provided an 'open door' for another application R16/2058; Ansty would be engulfed	Remove Policy S16045	Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1266	Geraldine Littlewood and Ron Steele	NA	NA	DS3	Objection: The B4065 has over 14,000 vehicles travelling through Shelton per day which is intolerable; accidents already occur on a regular basis and a development of this size will increase this.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1268	Gail Ash (Gail Rolli 1268)	NA	NA	DS3	Objection: The housing allocation can be met by other sites which are not identified as 'Local Wildlife Sites', does not comply with national policy on green belt- no local need; will engulf Ansty village and remove the buffer between Ansty and Coventry thus leading to urban sprawl,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1269	Hannah Waters	NA	NA	DS3	Objection: CP1 states that greenbelt development will be resisted where there are more suitable sites available, previous applications for smaller sites have been refused; the size of the proposal would engulf the community; amenities would need to be provided to the detriment of the environment; Shelton and Ansty already suffer from excessive levels of traffic which would worsen; impact on local wildlife; eradication of the buffer between Coventry and Warwickshire; Ansty would no longer be a village;		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1270	Ian Robinson	NA	NA	DS3	Objection: No further development-large or small- in Ansty, opposition to development within the green belt which must be preserved; small rural villages must be saved from development; would remove the buffer between Coventry and Ansty,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1271	John Batten	NA	NA	DS3	Objection: The proposed development land is within the greenbelt, the proposal would erode the separation between Ansty and Coventry; impact local wildlife; no social or economic benefit for North Warwickshire as most potential future residents would work and socialise in Coventry		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1272	Jane, Franchesca and Joseph Benjamin	NA	NA	DS3	Objection: This proposed development goes against the purpose of the greenbelt. Local needs should be identified through a local plan, this area of land provides an essential green buffer between Coventry and Ansty; the proposals would damage wildlife through the more intensive usage of the Oxford Canal, the main road through Ansty is already at capacity with traffic passing through; in 2015 excess water from Main Road caused flooding to the respondents property and Severn Trent have confirmed this is likely to happen again due to traffic volume;		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1273	Janice Heggerty	NA	NA	DS3	Objection: The proposed development would turn the small village of Ansty into a small town; insufficient facilities to support the development		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1274	John Perkins	NA	NA	DS3	Objection: The proposed development would cause massive disruption on an already over-burdened M6, there are not enough school places or Doctors surgeries locally; Coventry needs to build within its own boundaries and not spill over into neighbouring authorities,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1275	John Tapp	NA	NA	DS3	Objection: The proposed development site is contrary to Policy as it is within the green belt; similar smaller applications in the greenbelt have been refused; the size of the development would engulf the community; there are no local amenities available; the village suffers from excessive traffic which this development would exacerbate; impact on wildlife; Ansty would no longer be a village; the proposed development would erase the buffer between Ansty and Coventry; there are more appropriate sites such as adjacent to the Coombe side of the A46.		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1276	Jessica Waterhouse	NA	NA	DS3	Objection to S16045 Ansty		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1277	Joan Hill	NA	NA	DS3	Objection: The proposed development land is within the green belt which is contrary to CP1, the size of the development would engulf the village, major development of local amenities would be required, there would be a significant increase in traffic, detrimental impact on local wildlife, eradication of buffer between Coventry and Warwickshire, there are more appropriate sites within the Borough, previous applications for smaller developments in the greenbelt have been refused,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					increased congestion in surrounding villages of Shelton, Wolvey and Bulkington.		
1278	Kendall Newby	NA	NA	DS3	Objection: Proposed development would be situated upon greenbelt land and remove the buffer between Coventry and Warwickshire, new local services would need to be provided, local wildlife would be impacted, traffic would increase, there have been smaller proposals for the greenbelt but never this large, Ansty will no longer be a village, cutting trees down would increase the amount of noise from the M69		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1279	Michael Allen	NA	NA	DS3	Objection: The development will overwhelm Ansty, the buffer between Coventry should be maintained to prevent Coventry incorporating Ansty within its boundaries, alternative sites should be considered given the land is green belt which is being eroded nationally, the proposed development is the easy option for the developer		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1280	Marcella Avis	NA	NA	DS3	Objection: The proposed development site is green belt, the land provides a buffer between Coventry and Warwickshire, the size of the development would engulf Ansty, significant impact on local wildlife,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1281	Maureen Fox-Dowden	NA	NA	DS3	Objection: The proposed development site is green belt which is in direct contravention to local policy as other more suitable sites are available, major development of infrastructure would be required, traffic congestion would increase, the buffer between Coventry and Ansty would be removed, previous applications for similar smaller developments have been refused, the proposal has created an open door for another planning application- R16/2058, the proposed development would engulf Ansty,	Remove Policy S16045	Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1282	Monika Kohler-Ridley	NA	NA	DS3	Objection: The proposal would be built on protected greenbelt land, the protection of the buffer zone is important owing to the proximity to Coventry business parks and motorways, Ansty would become an extension of Coventry, if approved the development would set a precedent leading to a merger with Coventry, wildlife in the fields surrounding Ansty would be destroyed, traffic would increase and there would be insufficient local services,		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1283	Maureen Lilley	NA	NA	DS3	<p>Objection: The only thing between Ansty and Coventry will be the M6, the proposed development land is greenbelt, local wildlife- deer, rabbits, hares, birds- would be impacted, trees- which should have preservation orders on them- will be lost, public rights of way cross the land, the amount of building will change Ansty from a village into a small town, existing infrastructure incapable of accommodating further traffic especially the road bridge, the local hospital struggles as existing so furthering demand would be detrimental to it.</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>
1284	Mark Newby	NA	NA	DS3	<p>Objection: The size of the development would engulf the area, major development of local amenities would be required, there would be an impact on local wildlife, the proposal risk the eradication of the buffer between Coventry and Warwickshire, there are more appropriate sites elsewhere in the Borough, previous developments in the green belt have been refused,</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>
1285	Mrs Willis	NA	NA	DS3	<p>Objection: The proposed development would engulf the community- which does not have the resources to sustain it, the level of local services is limited, major concerns in relation to pedestrian safety given the high volume of traffic, the land designated as greenbelt should remain protected,</p>		<p>Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1286	Marie and Derek Harris	NA	NA	DS3	Objection: Detrimental to rural character of the area and would affect house prices		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1287	Mr and Mrs Simpson	NA	NA	DS3	Objection: The proposed size of the development would engulf the community thus increasing traffic noise and disruption, the barrier between Coventry and Warwickshire would be erased and there must be more appropriate development sites such as brownfield as the proposed site is greenbelt and good quality farmland		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1288	Gerald and Veronica Murray	NA	NA	DS3	Objection: The proposed development land is within the green belt and provides a buffer between Coventry and Warwickshire, the development would engulf the village and affect local wildlife		Comment noted. The draft Local Plan is not proposed allocation of SHLAA site S16045. No change recommended.
1291	Paul Baber	NA	NA	DS3	Objection: The development would engulf Ansty, removing this area of green belt land would erode the buffer between Coventry and the village which will encourage Coventry to expand onto the county as it did with the Eastern bypass; the existing infrastructure will collapse with additional requirements		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1292	Pauline Orwin	NA	NA	DS3	Objection: The proposed development would be on green belt land, would engulf the village and the village does not have the services to support these houses		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1292	Pauline Threadgold -Orwin	NA	NA	DS3	Objection: The proposed development would swamp Ansty, be on green belt land and Ansty would no longer be separate from Coventry		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1293	Paul Arnold	NA	NA	DS3	Objection: Some previous developments have been rejected however some proposals in the plan have been put forward and there is no difference. Why is a site in the green belt proposed?	Not proposing sites within green belt	Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1294	Roslin Clayton	NA	NA	DS3	Objection: We are losing too many villages		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1295	Robert Daniel	NA	NA	DS3	Objection: The proposed development falls within the greenbelt and should not become part of Coventry or the wider West Midlands conurbation		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1296	Rhianne Pettifor	NA	NA	DS3	Objection: The land is greenbelt thus should be protected, local infrastructure cannot cope and the local wildlife would be adversely affected		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1297	Sam Kincaid	NA	NA	DS3	Objection: The land should remain greenbelt, provides a buffer between Coventry and Warwickshire and would affect local wildlife		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1297	Sue Kincaid	NA	NA	DS3	<p>Objection: The development of green belt land would set a precedent. Green belt briefing paper 00934 June 30th 2015 supports preventing such development to prevent urban sprawl as set out in Chapter 9 of the NPPF and PPG March 2014 states "unmet housing need is unlikely to outweigh the harm to the green belt." The CPRE describes green belt as an "...essential buffer between towns in the countryside." The village is part of Warwickshire and should not become part of a conurbation</p>		<p>Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.</p>
1299	Sandra Wade	NA	NA	DS3	<p>Objection: Proposed development land is within the greenbelt- which should be protected to preserve Ansty village status and protect local wildlife. Policy CP1 opposes building on greenbelt where there are more suitable sites available- which there are, the boundary between Coventry and Warwickshire would be eradicated, previous applications in the green belt have been refused based on the objections received within this letter, any development would require new local amenities and roads as the existing roads could not cope</p>		<p>Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1301	Steven Waters	NA	NA	DS3	Objection: Proposed development land is within the greenbelt- which should be protected to preserve Ansty village status and protect local wildlife. Policy CP1 opposes building on greenbelt where there are more suitable sites available- which there are, the boundary between Coventry and Warwickshire would be eradicated, previous applications in the green belt have been refused based on the objections received within this letter, any development would require new local amenities and roads as the existing roads could not cope		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1302	Sandra Gilbert	NA	NA	DS3	Objection: The proposed development see falls within green belt, will completely overwhelm Ansty and will erase the buffer between Coventry and Warwickshire		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1303	William Stone	NA	NA	DS3	Objection: No form of building should be allowed in the green belt; the villages of Shelton and Ansty should be given a vote on the proposals		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1304	Christine Bowen	NA	NA	DS3	Objection: The proposal is in the green belt and next to Coombe Park		Comment Noted. However, the Local Plan is not proposing allocation on SHLAA site S16045 at Ansty. No change recommended.
1305	David Bowen	NA	NA	DS3	Objection: The proposal is in the green belt and next to Coombe Park		Comment noted. The Local Plan does not propose to allocate S16034. No action recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1306	Beth Wheeler	NA	NA	DS3	Objection to proposed allocation of upto 100 dwellings on Lutterworth Road site in Brinklow. New dwellings would exacerbate existing flooding and vehicular traffic problems		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1307	Christine Wheeler	NA	NA	DS3	Existing traffic and flooding problems would be exacerbated by the proposed development		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1308	Jennie Booham	NA	NA	DS3	<p>The decision to put forward Lodge Farm is a better option than the original Walsgrave site, primarily because the Lodge Farm site is not green belt, whereas Walsgrave Hill Farm is. The Walsgrave site is close to Coombe Abbey, and building at Walsgrave might impact further on the this facility. Concern has been expressed about increased flooding if the Walsgrave site is pursued.</p> <p>There is concern that a big development at Walsgrave would mean that Coventry housing would encroach even further on green belt, getting closer to nearby villages, and eventually the space between the urban sprawl would reduce further. I support the plan to build at Lodge Farm, which is not green belt, nor subject to flooding, and do not have the problems which have been highlighted at Walsgrave. Support for the plan to build at Lodge Farm.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Support noted. No further action required.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1308	Jennie Booham	NA	NA	DS3	<p>Objection to the plan to build up to 100 homes on the Lutterworth Road site principally because it will be building on green belt. Concerns about further flooding on the site, the effect on flora and fauna, the impact on the historic open site of the Norman Motte and Bailey, the impact of increasing the number of homes in Brinklow by around 25% in a period of five years, and the impact on local services, roads, traffic, general infrastructure, schooling provision, and medical services. Concerns that the location is a linear extension to the village which will not integrate well. The cumulative impact of development on levels of traffic along the Fosse Way is a concern. Smaller development on the site and throughout the village would be more sustainable and boundaries could be changed to allow development to be spread around peripheral sites.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1310	Martin Wheeler	NA	NA	DS3	<p>The proposed development sits within the greenbelt; potential to affect local wildlife; loss of productive farmland and the erosion of the rural character of the village, the proposed envelopment site is a floodplain so further housing would risks increasing the probability of flooding, additional housing will strain local infrastructure, the Parish council undertakes speed awareness exercises which highlights issues with road safety as existing, no details of any preliminary works undertaken by relevant agencies: Has an Environment Agency Survey been undertaken to assess the potential flood risk? Has a Highways Agency survey and risk assessment been undertaken? Inconsistency in excluding other sites e.g. Lutterworth Road West excluded due to landscape impacts yet is only a few metres away from the proposed Eastern site; Heath Lane excluded due to Highways Constraints- yet will avoid vehicular traffic to Coventry, Rugby and Birmingham going through the village.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1311	Paul Fletcher	NA	NA	DS3	DS3.7 contradicts Policy GP2; Lutterworth Road/Broad Street has traffic problems which would be worsened. The site may prevent any long-term bypass to connect to the Bretford Straight. DS3.15 at Lodge Farm is beneficial to Brinklow compared to Walsgrave Hill.	Developing a site further to the South would place potential future residents closer to the centre of the village thus reducing the traffic impacts on Lutterworth Road/Broad Street. A lower number of proposed dwellings would also assist.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1311	Paul Fletcher	NA	NA	DS3	<p>The site selection process is not positively prepared or justified; Sites for a smaller number of dwellings warrant greater consideration; New physical and legal boundaries should be created rather than natural site boundaries to limit future development; Lutterworth Road site will worsen traffic existing traffic congestion. Smaller development sites would lessen this impact and have less opposition; opening up former canal arm would result in loss of biodiversity;</p>		<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. SHLAA has been conducted in accordance with an agreed methodology and is considered sound. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1312	Susan Hartshorn	NA	NA	DS3	The proposed 100 dwellings would exacerbate existing traffic congestion and parking problems alongside the potential impact of the expansion of Fosse Park,		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1313	Timothy Heenan	NA	NA	DS3	<p>The proposal is disproportionate and risks undermining the villages significant heritage assets, the cemetery needs room for expansion- which an area of DS3.7 should be set aside for, there is a flood risk, surveys of archaeology, school places and traffic should be undertaken, flood control measures must be in place, more housing for older and young people.</p>	<p>Development of unto 20 houses as such numbers would be more proportionate to the existing village</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1314	Sue Green	House Builders Federation	NA	DS3	Support the change in the phasing of the housing target. No 5 year land supply statement provided and consider that the LPA would not have one due to the reliance on windfall sites (which are discounted as there might be an element of double counting).state it is essential that the Council's assumptions on lead-in times and delivery rates are realistic as evidenced by historical empirical data and supported by parties responsible for delivering these sites. Consider that a 10-20% contingency should be present to enable flexibility ensuring a five year supply.		Comment noted in relation to the phasing of the housing trajectory. In relation to the windfall assumption this relates to past delivery of sites of 4 dwellings and below. Site of 5 dwellings and above only are included in the housing trajectory t therefore there is no double counting. It is believed there is sufficient land that will be put into supply which will negate the need for further contingency. The Council will be able to demonstrate a five year land supply as demonstrated in the Housing Background Paper.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1323	Sally Chant	NA	NA	DS3	Do not agree with growth forecast and housing allocations that come from this, especially as prepared pre Brexit. We can't check accuracy as unable to obtain data from external company who claim commercial sensitivity. Do not agree that Rugby should take additional housing allocation from Coventry without being able to allocate appropriate amounts of land for secondary schools for the current population - this is not sustainable development and is not acceptable.	Review the forecasts and do not over allocate land for housing. Level of housing proposed cannot be supported by current or proposed transport system. Remove allocation for houses transferred from Coventry.	No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach, the MoU and the SHMA have also been accepted by the inspector of Warwick's local plan. The allocation of sites ensure that the Plan.
1325	Anne Langley	NA	NA	DS3	The wishes of local people - as clearly expressed in parish and neighbourhood plans, and more recently articulated at the recent protest meetings about the draft plan - have largely been ignored. Respect parish and neighbourhood plans. Listen to the electors of Rugby. Local villages need additional affordable houses and accommodation suitable for the elderly but NOT more executive		It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					homes for commuters built in the Green Belt &/or on good agricultural land.		
1325	Anne Langley	NA	NA	DS3	Some development sites are likely to lead to increased flooding and all will create unacceptable pressure on local infrastructure: transport, health services and education. Concentrate development within Rugby town, and on the outskirts, where the infrastructure is already more robust and capable of enhancement at a lower cost. Compel developers to contribute more to the cost of such enhancements as a condition of obtaining planning consent.		DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
1325	Anne Langley	NA	NA	DS3	Some of the sites for development in DS3 are in the Green Belt, contravening national policy and GP2 (p.11). There are no exceptional circumstances to justify this and they would set a precedent for future despoiling of the countryside. All development sites in the Green Belt should be removed from the plan.		It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1327	Amber Collings	NA	NA	DS3	<p>Proposal would undermine character of village of Dunchurch, increase risk to pedestrians and cyclists, Daventry District opposes the plan, greater consideration should be given to Brownfield sites (such as the mast site to the North East of Rugby), greater emphasis should be placed on delivering the mast site as when it is delivered the developers can pay for a relief road for Dunchurch and only then would it be acceptable to sympathetically enlarge Dunchurch. The proposal would result in additional traffic bringing extra pollution, Dunchurch already has their highest pollution levels of any village in Warwickshire, queuing traffic already stretches beyond the village boundary which would be exacerbated, traffic flow through Rugby Town- especially the Leicester Road- would be affected, significant concerns in relation to road safety, historic houses in the village centre will suffer from the vibrations of large vehicles. The proposed new units aren't required as there are empty units or should be built at DIRFT, A5 or Magna Park</p>		<p>No change required. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The mast site has been factored into the housing trajectory and further sites require allocation to deliver the housing target, ensure flexibility and a continuous 5 year land supply throughout the plan period. He allocations of employment site she allocation of employment sites are required to ensure that the Council's locally identified employment target can be met.</p>

1328	Albert Chattell	NA	NA	DS3	The proposed development should be located at Coventry as previously proposed. The development would not alleviate traffic at University Hospital Coventry. DS10 conflicts with NPPF paragraph (agricultural land), NPPF 30, 34 and 37 (open spaces), NPPF 109 (landscape), NPPF 126, 129, 132-38		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1328	Albert Chattell	NA	NA	DS3	Proposed development would generate additional traffic which raises road safety concerns given the road is a high risk crash route, the proposed development site floods on a regular basis contravening NPPF Paragraph 93-104	Remove DS10, revert to the 9,600 dwellings Rugby alone requires and await the impact of Brexit	The site is not located within flood zone 2 or 3 and future planning applications for the site would need to accord with local and national policy ensuring that flood risk is not increased as a result of the development of the site. Local Plan informed by WCC highways who have not indicated that the site should not be allocated due to the high crash route.
1348	Hollie Wilson	NA	NA	DS3	Infrastructure in Dunchurch cannot cope with such development as closure of Rugby by-pass demonstrated. How will Dunchurch surgery cope with more residents? New road links, new doctors surgery and new schools to provide for new houses.	Remove Policy DS8	The Local Plan has been informed by an STA which identifies the strategic infrastructure to support the Plan. The Infrastructure Delivery Plan has been informed by the CCG and Warwickshire education to support the allocations.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1378	Richard Allanch	NA	NA	DS3	<p>DS3 allocates more of our countryside to housing than is needed to meet Rugby's needs. Draft Policy DS3 rests on a forecast methodology from GL Hearn which is "commercially confidential" and therefore cannot be tested. As it cannot be tested it cannot be relied upon. The housing forecast was produced before June's referendum on the United Kingdom's membership of the European Union. Whether the referendum results in reduced inward migration (as many who voted leave hoped) or reduced economic growth (as many who voted remain feared) the demand for houses in Rugby will fall and should be reflected in the town's projections of housing need. WCC have tested 12-13,000 houses and 22,000 with the latter resulting in evening peak traffic grinding to a halt. WCC have not specifically tested 20,000 houses to be delivered as a result of the plan to demonstrate what the impact would be. Rugby Radio station should be tested for a faster build out rate.</p>		<p>The SHMA, which includes overall housing need, has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. SHLAA has been conducted in accordance with an agreed methodology and is considered sound. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>

1390	Martine Shaw	Ansty PC	NA	DS3	Oppose development as outlined in S16/045: Outside of village boundary and in Green Belt, effect on Green Belt, important buffer between Coventry and Warwickshire, scale and density would cause harm. No local services to sustain such a large development. Significant impact on Local Wildlife Site		No action required.
1391	Sheila Fennel	NA	NA	DS3	The addition of 3000 houses between the A45 and Grandborough village should be withheld until the infrastructure required is put in place. The roads in the Rugby area are already very congested. There is need of an additional GP surgery and the St. Cross Hospital A & E has been run down. Sewage facilities in the Leam Valley are already overloaded.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140...

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1392	Diane Gregory	Churchover PC	NA	DS3	<p>Proposed allocation at Coton House is unsustainable and therefore unsound. Site is contrary to development hierarchy. Not justified. Rejection of Sustainability Appraisal - comments on SA2, SA4-7, SA10, SA13-14, and SA17. WCC Vectos Highways Analysis reports are inadequate. Suggest further dwellings beyond the 150 dwellings proposal. Limited recognition of highway problems that have emerged during the last 2-3 years A426 between M6J1 and the A5 is now at a crawl. These problems have occurred before any traffic has been generated by Rugby Gateway and there are still large vacant plots on Coton, and housing development is far from completed on Coton Park. Issue is not what could be done, but what should be done. Green Belt should be extended up to A426.</p>		<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Not considered to be sufficient basis for extending Green Belt to A426.</p>
1393	David Lowe	Brinklow PC	NA	DS3	<p>Object to the proposed development of Green Belt land in Brinklow. Concern of effect on wildlife, loss of productive farmland and erosion of village character. Proposed site on Lutterworth Road is partly situated on a flood plain, concerns that house building will increase surface run-off and risk of flooding. Proposal will generate 25% expansion of the village in 5 years and the Parish Council believes the time period is unreasonable and unfair.</p>		<p>Effect on the Green Belt has been considered in site selection however considered justified in order to achieve housing targets. Impacts of development including highway matters have been given initial assessment and would be subject of detailed consideration at application stage. Details of drainage would be assessed at application stage to ensure this is dealt with adequately.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Concentration will place undue demands on services and infrastructure. Particularly concerned about GP service and local schools. Concerns about proposed access, one of the top sites for speeding motorists. Increased levels of vehicle movements on this stretch and how vehicles safely enter site. If development were to go ahead would expect to see high level of traffic calming. Junction of Broad Street and Coventry Road already experiences congestion and increased development will exacerbate this problem. Concerns that proposal will restrict ability to extend the cemetery, which is nearly full. Provision should be made to hold back land to the rear to allow growth of cemetery. Parish Council concerned that development will detract from the rural setting that surrounds the current village. Hedges and trees should be preserved... Would continue ribbon development. Would expect pedestrian access be improved to the centre of the village.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1393	David Lowe	WCC Ecology	NA	DS3	<p>Walsgrave Hill Farm Site on Green Belt land which comprises many natural species of flora and fauna. Concern of history of flooding nearby. Support development proposed at Lodge Farm, which is a far better and more suitable option as not in Green Belt, not on a flood plain, and has better access to Coventry along the A45. Walsgrave Hill Farm far exceeds the needs of the residents of the locally surrounding rural villages... Concern that this will lead to further infill development and subsequent expansion of the Coventry area. Therefore strongly support retention of Green Belt land to differentiate the urban and rural environments. Also concerned that the proposed site will add a further burden on local facilities such as schools, access to GP surgeries and substantially increase traffic in an already congested area.</p>		Comment welcomed. No amendment recommended.
1393	David Lowe	WCC Ecology	NA	DS3	Proximity of site to Coventry will lead to no economic advantage to Rugby and the immediate area.		Comment noted. No amendment recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1394	David Parnell	Combe Fields Parish Council	NA	DS3	Objects to any possible development at Walsgrave Hill Farm despite not being included in the September 2016 issue of the draft plan. Site is in Green Belt, Lodge Farm is not. Site is adjacent Combe Park which is a designated Ancient Monument. Ansty provides/will provide employment, any more developments will swamp village. Parish roads cannot accommodate yet more traffic.		Comment noted. No amendment recommended.
1394	David Parnell	Combe Fields Parish Council	NA	DS3	SALFV have made a great play about the provision of High Speed Broadband - there are no plans for high speed broadband within the Combe Fields Parish. New developments require high speed broadband.		Comment noted. Walsgrave Hill Farm is not proposed for allocation in the Publication Local Plan. No amendment recommended.
1396	Geoffrey Tooke (Geoff Marsh)	Ryton on Dunsmore Parish Council	NA	DS3	Support proposed allocation DS3.9. Whilst the site enoaches on green belt it is already effectively brownfield and we believe therefore offers the best compromise. Also support the removal of the field to the SE of Warren Farm (SO61) from Green Open Space allocation. We therefore believe it would be entirely inappropriate for any other sites to be allocated to Ryton in this Plan. Essential for significant infrastructure investment to accompany the scale of additional housing envisaged in the Plan. In particular highways improvements will be required on Leamington Road		Support noted. Initial highways assessment carried out however detailed consideration would be given at application stage.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1397	Helen Stewart	Stretton on Dunsmore Parish Council	NA	DS3	<p>including a traffic light controlled pedestrian crossing.</p> <p>2: Classification of Stretton on Dunsmore as a Main Rural Settlement. Perhaps not unreasonable however reject ramifications of such a classification. 75 extra new houses not based on any housing needs assessment but on desire to identify as many short delivery sites as possible. By not giving a guarantee that this is a maximum means that the local plan gives virtually no steer on likely housing growth from Stretton.3: Greenbelts - Designed to prevent urban sprawl. Suggestion that will need to move the greenbelt for village to grow misses the point of the greenbelt status of land around the village. Reject idea of flexing the Green Belt simply to accommodate today's desirable option.4: Parish Plan: The village has an adopted and established Parish Plan. The plan is an objectively assessed document that draws on research undertaken by the parish council about future growth. It has been ignored in the 'Preferred Option' document.5: No reference to suitability of Stretton to host the infrastructure required for the housing growth proposed by the Preferred Options plan. Do not believe intrinsic infrastructure in Stretton is capable of servicing</p>		<p>Stretton on Dunsmore is classified as a Main Rural Settlement in the Core Strategy and the Rural Sustainability Study details the facilities, services and public transport for the village which affords the MRS status. This level of rural sustainability supports the proposed allocation for the MRS to help the early years of the local plan annual housing delivery to ensure a continuous 5 year land supply. The extent of the site capacity will be determined at application stage. Policy DS3.10 and DS3.11 are both clear in that they both stage 'up to'. No change recommended. The NPPF states that removing land from the GB can only be done in exceptional circumstances. RBC is of the view these have been demonstrated in order to assist in demonstrating a continuous five year housing land supply at the start of the plan period. WCC Education and Highways were fully engaged throughout the development of the local plan and have not raised any concerns which are not mitigated against within the IDP. Both DS3.10 and DS3.11 are located within flood zone 1 and therefore are not subject to sequential test. The housing mix of the new development will be informed by the mix as contained in the SHMA, which is detailed in para 5.10 for market housing and para 5.15 for affordable housing.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>additional homes in the numbers proposed. Roads in and around the village are narrow and maintained with the priority of village lanes. Many are single track roads with existing damage to verges and passing places. Increase in traffic would further damage to the shoulders, verges and amenity of the village as a whole. Public transport is not well provisioned. Bus service to Leamington was reduced. Flooding is already a problem in the village and with possibility of new housing creating a significant decrease in precipitation to run-off time across the catchment can only add to this problem.6: Accept that the village benefits from key amenities (schooling and GP surgeries), but not that adequate appraisal has been provided regarding a 20% increase in village population. Knightlow School is already oversubscribed. May see children who live within the catchment area but outside the village unable to attend the school.7: Housing Profile Local Plan provides no guidance or assurance that the housing profile of any new development will be managed to address the housing needs of a village setting. In order to stay a vibrant and viable community the balance of affordable smaller housing needs to be maintained in</p>

					<p>line with the stock of existing properties which are being constantly extended and improved out of the reach of the incumbent resident's offspring. Without management market forces will move to exploit the sudden availability of development with a highest profit motive and an inevitable shift towards another executive dormitory settlement. That is not a route the Parish Council is willing to take.</p>		
1397	Helen Stewart	Princethorpe Parish Council	NA	DS3	<p>In Princethorpe, flood risk comes from watercourse rather than surface water. Strettons surface water flood risk is Princethorpe's watercourse flood risk. Any development in Stretton that impacts on the ability of the catchment area to absorb rainfall and that adds to surface water problems in Stretton only adds to the volume of the flow heading South from Stretton to Princethorpe. There is no assessment of this risk in the Local Plan.</p>		<p>No objections received from statutory consultees including the Environment Agency. Proposed policy to ensure adequate drainage details are provided at application stage including suitable disposal of surface water (SDC6)</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1397	Helen Stewart	Princethorpe Parish Council	NA	DS3	<p>Flood Risk Assessment: Princethorpe has high level of flood risk, acknowledged in documents of the plan (e.g. village map). Immediate impact from developments planned in neighbouring village of Stretton on Dunsmore. Stretton on Dunsmore have already raised concerns about the Local Plan re the risk to flooding in their village, although the source of the flood risk there is different to the risk at Princethorpe and no note seems to have been made as to how these two different kinds of risk are related.</p>		<p>No objections received from statutory consultees including the Environment Agency. Proposed policy to ensure adequate drainage details are provided at application stage including suitable disposal of surface water (SDC6)</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1397	Helen Stewart	Princethorpe Parish Council	NA	DS3	<p>Amenities: Do not accept that adequate appraisal of key amenities (schooling and Gap surgeries) has been provided regarding the proposed 75 new homes in Stretton on Dunsmore. Princethorpe falls within the catchment for the First School in Stretton. First school in Princethorpe is Catholic school that prioritises families of that faith and is currently full. Stretton school, Knightlow, has been full, closed to Princethorpe families, for 2 years unless the family already have an older child at the school. .</p> <p>Consequently some families in Princethorpe have to travel to Long Itching ton for first school provision. Cannot be true therefore that the school in Stretton has space for the proposed development of 75 new homes when it is already oversubscribed within its current catchment area. Also GP2 permits development within MRS boundaries. S3.11 states that MRS has a sufficient level of services or access to services to allow development within boundaries. Experience of Princethorpe is that this is not true with respect schooling provision. No confidence that adequate consideration has been given to impact on the GP services in Stretton either.</p>		Proposals have been considered in consultation with relevant bodies egg. WCC Education and CCG, and infrastructure have been considered capable of accommodating development.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1400	Lizz Clarke	Brandon & Bretford PC	NA	DS3	<p>Object to the inclusion of Walsgrave Hill as an allocated site in the local plan. Site is in Green Belt. Adjacent to flood plain - with additional houses built causing further potential flooding issues on nearby road with the A46 a major road in the area, and to nearby Walsgrave Hospital and Coombe Abbey. Home to local flora and fauna that will be destroyed and also associated wildlife that live and feed in the area, which will have a damaging impact on Coombe Abbey and its stunning natural surroundings impacting on incoming visitors to the area. Causing additional traffic on an already busy A428 already speeding traffic through rural village and local road network. Parish Council appreciate need for additional houses but do not consider that the site at Walsgrave to be suitable or practical, and could potentially have a damaging environmental impact on local surrounding areas.</p>		<p>Comment noted. Walsgrave Hill Farm is not proposed for allocation in the Publication Local Plan. No amendment recommended.</p>
1401	Maria Meede	Wolston PC	NA	DS3	<p>The plan is not fully 'justified' as it does not seek to address the chronic stranglehold placed on existing rural settlements by the increased use of cars for local travel needs following recent housing developments on the periphery of settlement boundaries. We consider that greater attention should be paid within the plan to supporting rural communities to</p>		<p>Comment noted. Any infrastructure contained within the IDP is to support the proposed local plan allocations. WCC Highways have helped inform the Local Plan and have not raised concerns on any aspect with regard sustainability. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1403	Sylvia Jacques	Thurlaston PC	NA	DS3	<p>manage the impact of this blight.</p> <p>In identifying areas for house building, we have seen little evidence of concern for loss of good farming land. Much of SW is grade 2 agricultural, Has RBC carried out an analysis of land quality at other sites. Would expect approach that develops worst land first rather than best.</p>		<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Detailed surveys will be undertaken at planning application stage, as in the case of the Ashlawn Road site which forms part of the proposed South West Rugby allocation. No change recommended.</p>
1406	Julie Warwick	Wolvey Parish Council	NA	DS3	<p>Parish Council endorses the acknowledgement that each village has different housing and infrastructure needs and welcomes the assertion that "the Neighbourhood Planning process will also influence the form of development and infrastructure provision made."</p>		<p>Comment welcomed. No amendment recommended.</p>
1406	Julie Warwick	Wolvey Parish Council	NA	DS3	<p>Majority of residents support the two site allocations in Wolvey. Throughout 2016 members of the Wolvey Neighbourhood Planning Area Committee (NPAC) have met with RBC planning officers with a view to identifying most suitable sites. It is the Parish Council's intention to include DS3.13 and DS3.14 as housing sites in the Neighbourhood Plan for Wolvey reflect the allocations of the Local Plan. Parish Council therefore supports DS3 and paragraphs 4.32</p>		<p>Comment welcomed. No amendment recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1411	Bill Lewis	NA	NA	DS3	<p>and 4.33 of the Local Plan.</p> <p>Inclusion of Ashlawn Road (DS3.5) in DS8 unsound - inconsistent with national planning policy. Fails to meet the standard of NPPF para 30 on reducing traffic congestion on already congested routes, para 124 on air quality particularly in location where no 2 exceedance are already exceeded. SW bypass may help alleviate air quality issues in Dunchurch not supported by up to date transport assessment. Bypass will not reduce traffic heading towards Daventry/Southam. DS8 states 'the site must contain comprehensive sustainable transport links that integrate with existing networks and provide good connectivity within the development and to the surrounding area. DS3.5 (Ashlawn Fields) is isolated from and not contiguous with remainder of DS8. Highway link already congested existing roads with no plans for improvement. No comprehensive walking and cycling route linking it with major portion adjacent residential area within DS8. DS3.5 clearly not integral with DS8, should be judged as a separate consideration. Concerned about loss of countryside should DS3.5 be developed resulting in impact on bridleway which will be in a housing development site as opposed to</p>	<p>Local plan should be improved by leaving the land north of Ashlawn Road (identified as DS3.5) out of policy DS8</p>	<p>Proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. (Therefore amendments not considered necessary or suitable). It is acknowledged there will be a loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Ashlawn Fields site included as part of DS8 as associated infrastructure works are involved that coincide with development of this site. A Habitats Regulation Assessment has been produced WCC Ecology have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. . Additional details will be finalised at the Planning Application stage. Furthermore land at Ashlawn Road is now in receipt of outline</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>countryside. A pond also present which is ecological haven and adds to 'countryside' feeling which area gives to residents who use bridleway. Development would also lead to loss of agricultural land. Sufficient sites with planning permission to demonstrate a five year supply of housing and development of brownfield sites should be accelerated prior to the release of greenfield sites for housing. Therefore the allocation of DS3.5 is unjustified.</p>		<p>planning permission.</p>
1428	Anne Denby	Canal & River Trust	NA	DS3	<p>Development pack supporting site allocation DS3.7 does not seem to acknowledge Oxford Canal to east of the site. Heritage Asset Review raises concern with potential for impact on designated assets (Morgan's Bridge) and non-designated heritage assets (Brinklow Arches) in close proximity to the proposed allocation. Limited assessment of wider landscape impacts of this site on the historic and visual context of the canal network. In context of Policy DS6, waterways can be used as tools for place-making, therefore we would seek for development to relate appropriately to the waterway, minimise ecological impact and optimise the benefits the location of this allocation can generate for all parts of the local community.</p>		<p>Comment noted. Propose amended To DS6: Provision for appropriate design of the site to reflect any relevant historic environment considerations. To reflect national planning policy and evidence of Heritage Asset Review LP54.24. DS3.7. Any proposals for the site would need to comply with policy SDC3 as to how development could make a positive contribution to the setting of the site adjacent to the canal's heritage assets to</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1430	Andrew Morgan	Place Partnership	Warwickshire Police (WP) and West Mercia Police (WMP)	DS3	Paragraph 11.13 contains the caveat that infrastructure is not limited to the types listed. This list does not include emergency services which developers and planning officers might not think is appropriate. As emergency services are required for the allocated sites it should be mentioned. New IDP cost provided.	To address the concerns expressed in these representations and make the Local Plan sound, we request that the following new paragraph is added to the supporting text to Policy D3: Emergency Services 11.18 Rugby Borough Council is working closely with Warwickshire Police, West Mercia Police, Warwickshire Fire & Rescue Service and the West Midlands Ambulance Service to identify the infrastructure required to support development growth in the Borough. This positive partnership work is reflected in the IDP and the policies of this Local Plan. NEW IDP COSTING ALSO PROVIDED	No change required considered that there is sufficient support contained within the Plan for emergency services to make contribution requires as paragraph 11.18 states that the infrastructure list is not limited to and the IDP sets out the emergency service request for the allocated sites.

					Stepping stone habitat for Farmland Birds and Pollinators; Green roofs; and Rain water gardens		
1106 & 1913	David Joseph	NA	NA	DS3 & DS6	DS 3.8 land North of Coventry Road, Long Lawford could be capable of accommodating more than 100 dwellings, so greater flexibility on capacity assumptions required	Amend residential allocation DS3.8 to a minimum of 100 dwellings	The Main Rural Settlement Pack details the allocation of DS3.10 including reference to the heritage asset review and the archaeological constraints which are considered at the local plan stage to limit the capacity of the site to 100. No change recommended.
1245	Cllr Leigh Hunt	NA	NA	DS3 & DS7	Welcome that a buffer zone has been left between proposed development and Newton village - no development should be allowed to encroach on this buffer now or in the longer term future. Previously acknowledged that Leicester Rd and M6 J1 are at capacity; no proper transport studies have addressed cumulative impact of all developments in Rugby area which must be carried out with further consultation before the plan is adopted. Some residents from this site will almost certainly work at DIRFT or employment land at Rugby Radio Station. Current residents do not use trunk road (A426/A5) network to travel to work due to volumes of traffic, instead use Newton Manor Lane or travel through Clifton upon Dunsmore which has led to weight limits, speed limits and traffic calming. No improvements planned for St Thomas Cross junction. This		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Wider comments noted. Further mitigation measures will come through as the result of individual planning applications and WCCH proposes various mitigation measures.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>development has potential to add considerable volumes of traffic to both Leicester Rd and M6 J1. In order not to make bad situation worse, traffic lights with priority to Leicester Rd but also to allow access from Churchover or Coton House must be considered an absolute priority. If further development permitted then contribution should be made towards costs of improvement at St Thomas Cross junction - applicable to DS3.2 and DS3.3. Believe allocation of Coton House would be an over development of the site and cause significant harm to setting of listed building so should not be included in plan. If development is allowed here or wider area, traffic lights with priority to Leicester Rd but also to allow access from Churchover or Coton House must be considered an absolute priority.</p>

1442	Rohan Torkilsden	Historic England	NA	DS3	<p>Further evidence is required than provided by the brief commentary in the draft SPD which accompanied the Plan.</p> <p>Unclear whether a robust setting assessment has informed proposals adjacent to Bilton Grange, a designated historic park, and Cawston Farm (Grade II listed building). With regard to the latter could I strongly suggest that the associated red brick 'traditional' agricultural buildings are retained as these contribute to the historic integrity of the farmstead?</p> <p>It is vital that before the capacity and strategic parcels are identified, such matters are addressed and not left to the stage of a planning application.</p>		<p>Comment noted. The SPD which supports DS8 will be developed upon the draft published to accompany the Publication Local Plan and will be consulted upon before adoption. HE's engagement will be expected at this stage. The considerations in this representation will be addressed through the final development framework masterplan and subsequent planning applications. DS3 is clear that the quantum of housing is 'up to 5000' to accommodate any such capacity issues.</p>

1442	Rohan Torkilsden	Historic England	NA	DS3	<p>Proposed allocation contributes to the significance of Coton House, a Grade II* Listed Building. The Sustainability Appraisal considers that development would have a “significant negative effective”. Evidence proportionate to the likely impact does not appear to have been provided by the Local Authority to demonstrate how an understanding of the site’s contribution to the significance of the Grade II* Listed Building and its setting has informed the principle of development, nor without prejudice, the capacity and necessary design response. If evidence were to demonstrate that harm would be caused to the significance of the listed building, to respond to the above point 4, is the local authority unable to show that there is not a more suitable alternative elsewhere in the Borough?</p> <p>As a consequence of the above the local authority has not demonstrated that the Plan is consistent with the national objective of achieving sustainable development nor can be delivered in accordance with policies in the NPPF.</p>	<p>If the Local Authority intends to pursue the inclusion of this site then evidence will be required and a clear and convincing justification provided for any harm in accordance with the clear and explicit national policy tests. Unless national policy can be satisfied the allocation should be omitted and an alternative site found.</p>	<p>Comment noted. The Heritage Assessment produced by J S Management and Town Planning identifies the impact, as detailed in the Housing Background Paper, which concludes that on balance the site is required to support the first 5 years of the plan period. No change.</p>

1454	Roger Ellis	The Sky Blue Trust	NA	DS3	<p>Concern about allocation DS3.9 to allocate housing development on the site of current Coventry City FC training ground. Supporters are keen to ensure the Club retains a training facility in or in close proximity to Coventry. Note that proposed DS3.9 says that implementation "can only occur when adequate replacement of pitch provision is made to the satisfaction of RBC and Sport England in accordance with national planning policy". It is unclear precisely what 'adequate replacement' would mean or where it should take place. Note should be amended to state that "such replacement provision should be specifically designed and constructed to be suitable for the Club and should be occupied by the Club before the implementation of site allocation DS3.9. The replacement provision should be made either in the Borough of Rugby or in the City of Coventry or in another District not more than five miles from the boundary of the City". Would refer to NPPF paras. 70 and 74.</p>		<p>No change required. Considered that the existing text relating to alternative provision being required to the satisfaction of Sport England is sufficient.</p>

1468	Claire Woodfield	NA	NA	DS3	<p>There has been a lack of information to the relevant parties. RBC and Wolston Parish Council has not made contact with any of the neighbours affected by this proposed allocation of land for development- therefore the 'Duty to cooperate' has not been adhered to. The proposal for Linden Tree Bungalow is a potential conflict of interest as the site owners and promoters are also RBC Planning Officers. Revisions have been made to the Wolston Site Allocation Development Pack to the advantage of Linde Bungalow: Revising distances to local school and village hall to make them appear closer to improve the accessibility of the site- which is inaccurate, questionable that Linden Tree Bungalow can be partially demolished, no details as to whether the other 7 sites promoters were able to amend their sites and the site doesn't meet the need for 100 dwellings for Wolston, therefore the site should remain unsuitable. The document does not state the author, thus rendering the document impartial as it could have been written by the site promoters.</p>	<p>Linden Tree Bungalow site should be removed from the proposed allocation as the site allocation is not properly positively or justified. Question over partiality.</p>	<p>Duty to co-operate relates to certain public organisations and not neighbours to sites. Public consultation has been carried out on the plan, including the proposed allocation at Wolston. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

1472	David B Smith	NA	NA	DS3	Traffic from the South already uses Hillmorton Lane and passes through Clifton to go Rugby Station and out of town shopping complexes along Technology Drive and Leicester Road in preference to negotiating Rugby Town Centre.		Comment noted. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. These measures appear in the IDP.
1472	David B Smith	NA	NA	DS3	Houlton to Butlers Leap link road: Understand that according the present plan there will be no access to this road for traffic from The Kent wishing to turn left from Hillmorton Langhe towards Butlers Leap. Issue of traffic more acute once Lodge Farm development comes on stream.		STA supports local plan proposals. WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan.
1480	D Cusworth	NA	NA	DS3	Housing needs to be in the right area and scaled appropriately, not swamping already struggling villages.		Main Rural Settlement in the Core Strategy and the Rural Sustainability Study details the facilities, services and public transport for the village which affords the MRS status. This level of rural sustainability supports the proposed allocation for the MRS to help the early years of the local plan annual housing delivery to ensure a continuous 5 year land supply. No change recommended.
1483	Derek Lil	NA	NA	DS3	Although quite a good mechanism compared to other plans in DS8 and NE3 to ensure as planning applications come forward Green Infrastructure is appropriately designed to ensure connectivity.		Comments noted. Details to be finalised during any future Planning Application stage.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1488	D Palmer	NA	NA	DS3	Strategic location for housing should be re-thought and located next to employment areas and with easy access to primary routes such as Ansty Park. This would be much more appropriate location for DS8 and DS10 and provide the Coventry overspill requirement at the same time.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1489	D Ralph	NA	NA	DS3	Unsound: RBC does not believe all land allocated in Southwest would be built by 2031. RBC believes 860 houses could be built on Ashlawn Fields site. Clearly site could be withdrawn from Local Plan without threatening RBCS plans 12,600 houses built.		Land is being allocated outside of the plan period in order to ensure a sufficient supply of sites. Ashlawn Road site now has Planning Permission given original refusal overturned at appeal.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1489	D Ralph	NA	NA	DS3	An alternative proposal would be to concentrate on building the Rugby Radio Masts site and if and when additional housing sites were needed producing a coherent plan for the development of the sites west of Dunchurch Road. This alternative has not been evaluated by Rugby Borough Council and hence the proposal to build on Ashlawn Fields is unsound through being unjustified.		Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
1510	Dr G Shelton-Rayner	NA	NA	DS3	Beautiful and historically important village again under threat from outlandish and ill-considered residential housing development within its vicinity. Significant proportion of housing will be situated around Dunchurch is of extreme concern. Over past decade Rugby's expansion has impacted on village, particularly in terms of traffic volume. Infrastructure already feeling the strain. Only need to observe congestion that occurs during rush hour. How can village infrastructure cope with an increase in the surrounding population,		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>especially of the magnitude proposed? Why is Rugby expected to accommodate a significant proportion of Coventry's projected housing needs? Unacceptable and poor judgement that willing to consider it. If Coventry has such a housing demands why not possible to implement development of its numerous brownfield sites as well as on its outskirts? Reason Rugby and Dunchurch is such a desirable place is that it is a rural idyll - but not for much longer id the SHMA is ratified. Cannot believe RBC considering inclusion of significant logistics park 'Cawston Spinney' adjacent Thurlaston. Dunchurch already suffers with extremely poor air quality due to already over congested road network. Where will the hundreds of road journeys per day that this proposal will pass thorough? Dunchurch! Additional housing inevitable but needs to be realistic with serious consideration as to where it will occur. Why rip up green fields and Rugby's heritage if other sites available. RBC needs to stand up to District Council to protect environment and heritage, its charter states this provision. Hope that willing to put welfare of its current residents first above future provision and develop a more considered and realistic Local Plan.</p>		<p>reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to</p>

1525	E Davies-Pelc	NA	NA	DS3	Massive number of houses proposed would take away green spaces surrounding the village and reduce quality of life... Village would no longer be applicable but rather urban sprawl.		The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1525	E Davies-Pelc	NA	NA	DS3	No official consent to the proposed building of housing by Rugby council to meet the housing quota required by Coventry.		The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. The Local Plan proposes to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The provision of employment land in Rugby Borough includes addressing a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, which has</p>

1576	H Creery	NA	NA	DS3	<p>5000 houses in Southwest plus those at Lodge Farm would be built on good agricultural land. Southwest also a well-used leisure area and a home to ancient woodland. Will proposed houses match the needs of the proposed workforce? Why is site at Walsgrave not being considered? Why is Rugby prepared to build houses for Coventry when Coventry is part of the West Midlands Authority and receives the benefits that the WMA affords its members? Proposed new B8 houses are again a gross overestimate of capacity required. Doubtful whether they can be justified as already excess capacity in North of the town and many more warehouses to the East. Also create flood conditions with larger cemented/paved areas. Heavy traffic and pollution during and post construction period. Road system heavily congested at the moment with excessive pollution at the crossroads in Dunchurch. Should these plans get approval the traffic will worsen? Should the Southern Spine Road constructed who would choose to use a road with 6 roundabouts when there is a straight road alternative. GP surgeries are mentioned in the proposed developments - where are the GPs going to appear from when there is a national shortage and 2 surgeries in</p>		<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. The STA June 2017</p>

1587	Gillian Key-Vice	NA	NA	DS3	Whilst there is a need for some development greater consideration needs to be given to the impact on the existing villages of additional housing, especially in terms of character, landscape and infrastructure. Most roads are single lane and in many instances widening them isn't possible. S14/022 requires Plot Lane to be widened but this would also require Freeboard Lane to be widened. The village centre suffers from congestion and a shortage of parking spaces and the wider village is used as a rat-run. S14/122 is not suitable as Plot lane would need to be widened, the junction from Freeboard Lane onto Oxford Road would become more congested, Squires Road is narrow with limited parking which would be exacerbated, the site is a	If 100 houses are to be provided, they should be located on sites with more suitable access. S16/018 and part of S129 would be preferable due to better transport links and would not contribute to 'ribbon development'.	The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>considerable distance from the village centre and school traffic is an issue. S14/004 has the similar issues to S14/122 plus the argument that it would prevent ribbon development is insufficient as is the flood risk analysis as the area already suffers during heavy rainfall. S14/154, S16002 and S14/157 would all use D routes which already suffer from congestion which new development would exacerbate. The access to each site requires further consideration. The Highways Agency would not accept any access onto the Fosseway and there are already highways safety concerns.</p>		
1588	Angela Boxwell	NA	NA	DS3	<p>Plot Lane is narrow, has existing traffic congestion issues, dangerous accesses and is unsuitable for heavy traffic. The local school is already at capacity.</p>	<p>Proposed new housing development should be removed so the village remains the same size</p>	<p>WCC highways and WCC education have informed the selection of sites and did not raise concerns about Plot Lane or education provision which would prevent the allocation of sites within Stretton on Dunsmore.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1590	Alan Yates	NA	NA	DS3	<p>Coventry still has the SUE at Walsgrave Hill Farm in its emerging local plan which is of concern as RBC supports the Coventry and Warwickshire Memorandum of understanding, which are unjustified and has not been subject to consultation. No exceptional circumstances have been proven to justify the release of greenbelt land. 527 new homes within the green belt and outside of village boundaries. The proposed housing forecasts are not justified and subject to a degree of uncertainty given the long timescales involve could contain at least a 10% margin of error- the proposed dwellings for the green belt are less than 4% of the proposed, well within the 10% margin of error. The 4% should be added to sites outside of the greenbelt and development brought forward within the plan period. Arguments presented in terms of market saturation and infrastructure development do not amount to exceptional circumstances as they could be applied anywhere. No case has been made for individual villages in terms of exceptional circumstances or scale of development- whereas exceptional circumstances should be applied to specific places not a broad-brush approach. The extension of the</p>	<p>Stretton-On-Dunsmore must not be expanded beyond its existing boundaries. For the plan to be made sound, no development should be allowed outside of village boundaries. Directions in the village plan of retaining the character of the village, not widening lanes and using brownfield sites first should be upheld.</p>	<p>The Walsgrave Hill Farm site is no longer proposed by RBC as Lodge Farm represents a site outside the green belt. Green belt sites proposed to be allocated are located around Main Rural Settlements to offer the broadest range of sites in terms of size and location in order to meet RBCs 5 year land supply.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Stretton-On-Dunsmore village boundary would leave new defensible boundary such as rivers etc. thus setting a precedent for further development- conflicting with the green belt characteristics of permanence and openness. The Green Belt Study confirmed that the green belt surrounding Stretton performs well against the green belt objectives in the NPPF. There is no evidence to support a claim that main rural settlements must expand to make their infrastructure viable- the reverse is true in Stretton due to additional congestion etc.</p>		
1591	Barbara Lewis	NA	NA	DS3	<p>The Village of Stretton on Dunsmore can in no way support a large development as proposed in the Rugby B.C. Local plan. I trust that you will consider all these before increasing any further. ONE AREA THAT IS IN DESPERATE NEED OF DEVELOPMENT IS THE CORNER OF LONDON ROAD (a45) AND WOLSTON LANE. I understand that a planning application has been presented, and a number of homes could be built on the area. - A 'brown field site'.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

1593	Elizabeth Slater	NA	NA	DS3	<p>I would like to raise an objection to the local plan in reference to Stretton on Dunsmore. I am a local resident on Plott Lane and find the 2 sites proposed to be unacceptable. Both are green belt sites which have both had planning refused before. In addition Plott Lane suffers from a huge amount of water coming down the street when raining and more housing can only lead to poorer drainage and more water pouring down Plott Lane. The village currently has one doctor's practice which can have large waiting times for appointments and a small primary school. Surely the infrastructure of this village will come up short with the addition of more inhabitants, more traffic. The village life atmosphere we currently enjoy will surely suffer.</p>		<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1594	Georgina Hawkins	NA	NA	DS3	<p>While I recognise the need for more housing I am concerned, as a resident of Squires Road, about the impact these plans will have mainly on drainage and traffic through the village and down the already over used Plott Lane and Freeboard Lane. To expand, the turning out of Squires Road is already a difficult one and the increased use and traffic passing the entrance will make it more dangerous. There will be increased traffic past the playground where there is often already a speed issue. Plott Lane has frequent near misses (or actual crashes) from traffic and I often feel endangered when walking up it especially when the light is poor. It becomes more and more eroded especially when raining heavily. The water that drains off the fields above Squires Road already causes issues with waterlogged gardens (even in the summer) and flooding on Plott Lane.</p> <p>I am also concerned that both building recommendations impact on the same area of the village. If these plans were to go ahead, I feel it would be important for there to be concrete plans for improvement in drainage, traffic calming measures and improvements to Plott Lane and Freeboard Lane.</p>		<p>DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. 1602	Richard Nicholls	NA	NA	DS3	<p>The Housing Target and Distribution background paper on which the housing forecasts are based were made 3-4 years ago- with some data much older- which does not take into account the effect of Brexit, a longer period for deficient reduction and the economic impacts of these- which could reduce demand for new housing. Development on the green belt for housing is unacceptable as housing development does not constitute exceptional circumstances (which may include large infrastructure etc.). If developers say that their slow pace of building reflects market demand, this proves housing targets are too high and more focus should be placed on completion rates of sites already allocated. The infrastructure delivery plan does not consider broadband provision. The reasons for the refusal of the 2013 application for DS.13 are still applicable- namely that the harm to the greenbelt is not outweighed by other factors, the proposal would have been out of character and not in a sustainable location- and the plan doesn't mention car journeys to and from secondary schools. Widening the roads to accommodate the extra traffic is neither desirable or plausible.</p>		<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1603	Tom Waterworth	NA	NA	DS3	<p>The additional 70 dwellings would result in approximately 90 additional cars; Plot Lane and Freeboard Lane aren't well placed to accommodate the extra growth as they are single track and the impact of construction traffic must be considered. DS3.11 has significant drainage issues during times of heavy rainfall which the loss of absorptive land will only increase. The existing primary school is over-subscribed with no capacity for additional pupils. Both sites are outside of the village boundary and within the green belt as such other sites such as the brownfield site on the A45 should be considered first. The character of the village will be undermined. The proposals go against the assessment of needs in the Parish plan. Given how many houses the Rugby Urban Area is taking it would be better to direct development there given the greater ability to accommodate housing numbers in comparison to a small village where the impact would be felt disproportionately.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.</p>
1604	Dave Cardus	NA	NA	DS3	<p>Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.</p>		<p>Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.</p>

1605	Diane Ellard	NA	NA	DS3	Site unsuitable for residential development as its prime farmland, liable to flooding and would affect local wildlife.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Any application for the site would need to take account of the flood risk and biodiversity policies contained within the Plan.
1606	G. Moreton	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1610	Margaret and Bernard Timings	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1611	Mr and Mrs Hammonds	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1612	Pat and John Docker	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1613	Penny Louis	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave Hill Farm site no longer proposed to be allocated for development.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1614	Rebecca Picarelli	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1615	Chantelle and Peter Richards	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1616	Sue Cardus	NA	NA	DS3	Does not support the Walsgrave Hill site being allocated as the proposed development site is located within the green belt and next to Coombe Park.		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.
1617	Steven Roberts	NA	NA	DS3	Oppose proposal at Walsgrave Hill Farm as the proposed development site is located within the green belt, would impact upon Binley Woods, would destroy the tranquillity of Coombe Abbey Country Park, would result in urban sprawl from Coventry and lead to housing estates off the A46		Comment noted. Walsgrave not being proposed as an allocation within the Publication Local Plan.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1618	Claire Woodfield	NA	NA	DS3	<p>There has been a lack of information to the relevant parties. RBC and Wolston Parish Council has not made contact with any of the neighbours affected by this proposed allocation of land for development- therefore the 'Duty to cooperate' has not been adhered to. The proposal for Linden Tree Bungalow is a potential conflict of interest as the site owners and promoters are also RBC Planning Officers. Revisions have been made to the Wolston Site Allocation Development Pack to the advantage of Linde Bungalow: Revising distances to local school and village hall to make them appear closer to improve the accessibility of the site- which is inaccurate, questionable that Linden Tree Bungalow can be partially demolished, no details as to whether the other 7 sites promoters were able to amend their sites and the site doesn't meet the need for 100 dwellings for Wolston, therefore the site should remain unsuitable. The document does not state the author, thus rendering the document impartial as it could have been written by the site promoters.</p>	<p>Linden Tree Bungalow site should be removed from the proposed allocation as the site allocation is not properly positively or justified. Question over partiality.</p>	<p>Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy.</p>
1619	Richard Holt	NA	NA	DS3	<p>Support proposals for S14/064 by altering settlement boundary and allocating for residential development.</p>		<p>Comments noted however no further action considered necessary.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1629	Ian and Anne Wright	NA	NA	DS3	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding.</p> <p>Re: SW Rugby - 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. How will this be funded and maintained? Object to the size and potential impact of this proposal on the historic village of Dunchurch.</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1656	John Leeming	NA	NA	DS3	Object to both S14/122 and S14/004 sites in Stretton on Dunsmore. Both sites are green belt and lead to ribbon development. Surface water is already a problem on Plot Lane and the addition of 70 homes will cause flooding. Traffic cannot be handled by country lanes and the access road to S14/004 should be through Orchard Way not the playing field entrance. S14/154 and S14/157 are infill and must be considered.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The reasoning as to why sites were not considered suitable for allocation is set out in the Stretton on Dunsmore Site Allocation Development Pack.
1672	Ken Rowe	NA	NA	DS3	Along with all the thousands of houses to be built in 'Houlton' to the east of Hillmorton, 'now' two potential major developments in Barby Lane, and potentially many hundreds of new builds along Ashlawn Road to the west, one can only imagine how traffic congestion will become even more of a major problem, including at Paddox junction. Also, how many people do you need to bring into the town and local area before our A&E will be re-established		STA supports local plan proposals, WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1673	Kenneth Knott	NA	NA	DS3	RBC has previously protected the separate nature of the village of Dunchurch and the surrounding green belt, yet these plans ride roughshod over these traditional principles. Surely long term development of Rugby Radio Station provides for housing needs. Coventry overspill as reason for this allocation is preposterous. Traffic levels are already a big problem for the village centre at busy times and the proposed developments would generate a vast increase in the number of vehicles passing through the crossroads. Council should try harder to encourage brownfield development.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1695	Phillip James	Sharba Homes Ltd	NA	DS3	Support for policy DS3.6 with an expanded capacity to give greater assistance with achieving housing targets, especially near to Coventry from where a significant overspill is to be accommodated. Support for settlement hierarchy and spatial distribution of housing. Support for MRS allocation development packs assessing suitability and non-suitability of sites in Binley Woods.		Support noted. No further action required.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1699	Karen Harvey	NA	NA	DS3	Object to any more development around junction of M1 and A426. The increased traffic to/from Magna Park following the recent approval of further development means the A426, which is currently grid locked both in the mornings and in the evenings, will be unable to cope. Increasingly hard to turn right from Churchover onto A426. Expansion of development at Coton House and proposed Moto service area will exacerbate situation.		The STA June 2017 updated the September 2016 STA to include a specific Leicester Road (A426) model and has incorporated updated travel to work assumptions, junction counts and queue surveys, to identify the strategic transport infrastructure and relevant mitigation schemes to support the Local Plan growth proposed. WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan.
1710	Jeffrey Stone	NA	NA	DS3	How can people on benefits pay more? Defaults will increase.		N/A
1721	Jill McNamee	NA	NA	DS3	Object to development plans around Dunchurch village. Traffic is already heavy at Dunchurch crossroads and pollution levels are exceeded at peak times. Historic buildings need protection from increased traffic vibration and pollution and the village identity would be changed beyond recognition. The infrastructure is not good enough for the proposals - some houses are needed but the current plans are beyond comprehension.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1729	John Jelley	NA	NA	DS3	<p>Since Brexit the country is in a very uncertain position regards the future prosperity yet the plan continues to pursue a policy which is out of date and at odds with what the future might hold. Proposals for Stretton on Dunsmore are unrealistic as well as other parts of the District. Would change the culture and environment of Stretton by building on green belt and have not shown any plans for the infrastructure required to support this. No indication of the types of houses that would be built nor the jobs for these people.</p>		<p>The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Evidence has also assessed employment requirement. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.</p>
1732	John Osborne	NA	NA	DS3	<p>Obvious that landowners want to sell off assets (Ryton training ground) and squash the club (Coventry City FC) by buying cheapest land and sticking a shed on it.</p>	<p>If land is to be sold then must be made to build another training ground to the same value</p>	<p>Implementation of DS3.9 in Ryton on Dunsmore can only occur when adequate replacement of pitch provision is made to the satisfaction of Rugby Borough Council and Sport England in accordance with national policy.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1758	John Woodcock	NA	NA	DS3	<p>The proposed development would have a significant and adverse impact on the character and appearance of the landscape in this location, the proposed dwellings would appear as an intrusive extension of the urban area into the surrounding countryside and would diminish the landscape character of this area. They would further appear visually intrusive and prominent within the landscape to the point of being harmful. The proposal would consequently not constitute sustainable development and would be contrary to policy CS16 of the Rugby Core Strategy 2011 policy GP2 of the Rugby Borough Local Plan para 17 of the national planning policy framework.</p> <p>Obviously any development in this area would be contrary to both the local and national policy and would not be sustainable. This area needs to be protected for future generations and classified as green infrastructure bearing in mind the extensive development that will take place in Hillmorton over the next 20 years.</p>		It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1759	Yousef Dahmash	NA	NA	DS3	<p>I wish to formally request that the Rainsbrook Valley and the countryside in the vicinity of it, in the area of Hillmorton are protected with Green Infrastructure status in the updated Local Plan. It is clear that any development in this area would already be contrary to both local, and national, policy and would not be sustainable. I believe that further scrutiny of the calculations produced by, and the methodology used by, GL Hearn in their assessment of Rugby's Objectively-Assessed Housing Need, Homes per Annum 2011-2031 (OAN) as part of their Strategic Housing Market Assessment (SHMA) should take place. I believe that elected members of Rugby Borough Council and local residents should be able to assess this document in greater detail. Having studied the Final Report document produced I believe that there are further questions that should be asked in regards to whether the OAN used for the Local Plan – Publication Draft document is accurate. If the calculations produced by GL Hearn are inaccurate and overstate Rugby's Housing needs then our local area may be subject to unnecessary over-development in areas local residents and elected councillors do not wish to see development take place.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Essentially by overstating Rugby's OAN the borough could be subjected to the unnecessary, and avoidable, over-provision of land for housing I also have concerns regarding the projected rate of build on the Radio Station Rugby site as outlined in the Local Plan – Publication Draft document and believe that it may have been significantly understated. I would wish to understand whether the developers of the Radio Station Rugby site agree with the projected build out on the site as outlined in the Local Plan – Publication Draft document.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1866	Gary Stephens	Marrons Planning	Gallagher Estates Limited and David Wilson Homes (East Midlands) (GE/DWH)	DS3	<p>Whilst GE/DWH therefore support the proposed allocation of the land for residential development within DS3, importantly there is no evidence to justify its allocation being “tied to” the delivery of other land allocated to the south west of Rugby. The land does not physically adjoin the land to the south west, nor does it visually relates to it and therefore does not share any characteristics that would require the land to be master planned as one development. No evidential justification for Ashlawn Road to contribute to the delivery of infrastructure in this area, or its delivery to be tied to the delivery of infrastructure elsewhere other than those infrastructure items that are required to accommodate the development itself. Also have a further parcel of land (SHLAA reference S16072) that was assessed in the SHLAA but not taken forward as an allocation due to a covenant. Consider that there is a good prospect that the covenant could be lifted and the site could be developable in the 6-10 years plan period.</p>	<p>GE/DWH would therefore recommend land at Ashlawn Road is individually allocated within Policy DS.3, and be extended to include the land to the west (SHLAA reference S16072).</p>	<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Covenant identified on additional parcel of land to West affecting deliverability and not considered suitable for allocation therefore.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1867	Joel Jessup	Heaton Planning	Tarmac Ltd	DS3	Overall support the principle of growth in the Borough. Proposed allocation at Coton House (DS3.1) should take account of Shawell Quarry and potential expansion to west of A5 as promoted through the Warwickshire Minerals Local Plan. Consideration should be had to the need to safeguard mineral resources and the potential requirement for a buffer to protect residential amenity from mineral extraction sites. Consideration of these issues should be included in Environmental Impact Assessment for the allocation.	Plan shown in DS9 should be updated to reflect the draft development framework plan in the SPD. No need to show Potsford Dam link on Plan. DS9 policy wording to be amended to say land allocated with facilitate the 'delivery' of the spine road and route will be 'broadly in accordance' with draft or final SPD.	Comment noted. At the application stage consideration should be had to the impact of the nearby quarry on the development site.
1872	Rob Wells	Savills	Neyland Properties	DS3	Strongly support the allocation of 110ha for employment land over the plan period and Coton Park East for B1/B2/B8		Comment noted.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1875	Michelle Simpson-Gallego	Pegasus Planning	AC Lloyd / Persimmon	DS3	<p><u>Urban edge</u> - concern that another extremely large allocation at SW Rugby will have similar deliverability issues as experienced at Rugby Radio Station, particularly given the number of landowners and infrastructure involved. Council should identify a contingency of additional deliverable sites (not complex large scale allocations) which may be outside urban area given existing constraints on edge of Rugby town. <u>Policy DS3.3</u> - identification of land at Coton Park East for 800 dwellings is welcomed, site is extremely deliverable with existing access points and no other major infrastructure works necessary. Envisaged that 50 dwellings per annum per developer (minimum of 2 developers) will be delivered. <u>Main rural settlements</u> - pleased that land has been identified to meet needs of arising market and affordable households in rural areas. Concern that Green Belt boundaries may not endure beyond the plan period as required by NPPF 83. Changing circumstances in the future may require additional land for development and therefore a review of the plan to enable changing of green belt boundaries which would be insufficiently responsive resulting in further unmet housing need.</p>	<p>Identify contingency of additional deliverable sites which aren't large scale urban allocations. Identify safeguarded land at each of the main rural settlements to future proof the plan against rising dwelling requirements in the future.</p>	<p>The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1876	David Keene	David Lock Associates	Manse Opus LLP and Rolls Royce	DS3	<p>Manse Opus LLP and Rolls Royce own 14.5 ha of land adjacent to Parcel C6, which has been proposed for removal from the Green Belt in the local plan. A site assessment would reveal there is little discernible difference between Parcel C6 and land to the east owned by our clients. It would be prudent to remove this land from the Green Belt to enable the long term expansion of Ansty Park / Rolls Royce Ansty, with the M6 acting as a long term, defensible boundary to the north.</p>	<p>Land on attached location plan should be removed from Green Belt designation on the Proposals Map. For consistency of approach and unless the site can be proven to be not suitable or capable of delivering smaller units, there should be a requirement on the site to do so. The following should be added: "Smaller units in the range of 5,000 – 50,000sq. ft., in B1c, B2 and ancillary B8 employment uses shall be provided as part of the employment development at this location."</p>	<p>The evidence of labour demand contained in the Employment Land Review (2015) identifies the extent of land required in B1, B2 and B8 uses to be provided for during the local plan period. The quantitative supply-demand balance of employment land in the Borough has resulted in two new employment allocations being proposed in the local plan - Coton Park East and South West Rugby. Due to the nature of these two sites (and existing sites currently in supply), it is considered that only SW Rugby offers the opportunity to meet the scale of the B8 demand identified in the labour demand figures set out in the evidence and therefore this site is more suitable allocated for B8 development rather than smaller units providing for a potential mix of B class uses.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1878	Duncan Chadwick	David Lock Associates	Tarmac Ltd	DS3	<p>DS3 should be amended in line with representation to DS1 and provide for a larger strategic element of growth in main rural settlements such as Ryton on Dunsmore. The delivery of proposed allocation DS3.9 is uncertain and therefore should not be included. A more comprehensive strategic approach would justify allocation of our client's larger site of c.300 dwellings, or at least safeguarded for future development if not allocated. There is no policy included in the local plan dealing with Green Belt and no comprehensive review of Green Belt boundaries - this is a serious omission as the plan's strategic approach to the Green Belt should be identified. The proposed modest revisions to the Green Belt have not been positively prepared to account for present and future need. Release of housing white paper expected to reflect the government's commitment to ensuring the delivery of housing, including increasing the supply of land for housing development. Birmingham Development Plan expected to be adopted in early 2017; as set out in our original rep, the need for housing in the Greater Birmingham HMA has a direct impact on housing need in the C&W HMA. There has been little progress of agreement on</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The Ryton on Dunsmore site allocations development pack sets out the reasoning as to why the promoted site was not considered suitable for allocation. It is not reasonable for the authority to Plan for unmet need as a result of the Birmingham Development Plan where discussions are still ongoing within the relevant HMA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>how this should be distributed among the sub-region. Rugby local plan should therefore build in sufficient flexibility to accommodate additional growth that may be required to address such need and fulfil the duty to cooperate. Considerable local objection to inclusion of Lodge Farm proposed allocation in the local plan; NPPF supports development that “facilitates the use of sustainable modes of transport” and “where the need to travel will be minimised”. The Lodge Farm site fails these tests in respect of meeting Coventry’s needs, being some distance from the city. More housing should be planned for on the edge of Coventry, within main rural settlements and close to employment and transport infrastructure. Local plan should be revised to make provision for allocation of client's site at Ryton on Dunsmore.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1898	Charles Robinson	DLP Planning Ltd	Muller Property Group	DS3	Further growth is necessary for main rural settlements to sustain these for benefit of existing communities as well as future growth. Considered that sites DS3.10 and DS3.11 both suffer from significant environmental constraints and do not meet tests to release from Green Belt. Sites DS3.10 and DS3.11 should be removed from the local plan; Stretton on Dunsmore is a highly sustainable location and further development should be proposed. Considered that site promoted in this representation should be allocated.	To address site specific issues relating to proposed allocation of two sites requiring evaluation and that another site is available that will better meet key objectives	The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. The assessment of sites within Stretton on Dunsmore is set out within the Stretton in Dunsmore site allocations pack. The promoted site is not considered suitable for allocation therefore no change required.
1899	Denise Blott	NA	NA	DS3	Propose housing targets should be considered as a Minima as other areas around Coventry are struggling to meet their needs putting greater pressure on Rugby. Draft local plan fails to provide sites that deliver key objectives. There should be greater flexibility in respect of the main rural settlements coming forward. The boundaries of the main rural settlements should be amended to include additional sites. Both sites DS3 suffer from environmental constraints and fail to meet any reasonable test against the principles for releasing land for the Green belt site. DS3 should be removed from the Draft Local Plan		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1901	Mathieu Evans	Gladman Developmen	NA	DS3	Does not consider that Council has erred in settlement hierarchy		The selection of sites as informed by the SHLAA, and other relevant evidence, for

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
		ts Ltd			<p>proposed. However number of deficiencies with regard to overall approach of site allocations and the allocation of specific sites. Plan continues to be heavily reliant on delivery of strategic urban extensions for vast majority of its housing requirement. There must be a realistic assessment of how long these take to deliver. Confining development to large SUEs has a negative effect on small and medium housebuilders; plan should promote sites of a variety of scales in a variety of locations. Therefore we believe additional sites should be allocated to ensure plan targets are being met. Surprising that Council has decided to allocate Wolvey Campus site in preference to Gladman promoted site on southern boundary of Wolvey as Wolvey Campus is current employment site (and is contrary to local plan Policy ED1) and detached from settlement. It also has potential remediation issues, and is affected by a local wildlife corridor and significant flood risk issues. Site has also not been subject to assessment in Green Belt Review. Evidence to support the site selection is in line with concerns that the SA process has been misinformed and therefore we consider the process for site selection to be unsound.</p>		<p>proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The Plan continues to focus delivery on the most sustainable location which is the Rugby urban area and the housing trajectory which has been informed by developers is considered to be deliverable. The selection of the Wolvey Campus site would be the redevelopment of a brownfield site within the Green Belt and reducing the landscape impact of the proposal. Any proposals would need to accord the policies contained within the Plan such as flooding and biodiversity.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1903	Haydn Jones	Richborough Estates	NA	DS3	<p>Support allocation of SW Rugby (DS3.5) and in that respect plan is sound. However we have concerns over the use of a maximum number of dwellings as plan states "up to 5,000 dwellings" which we consider to be unsound. NPPF requires plan to significantly boost supply of housing and be flexible to meet the full objectively assessed need. Para.4.60 acknowledges this requirement however it is not carried in to the policy allocation which caps the dwelling requirement at SW Rugby. 5,000 dwellings should be expressed as a minimum figure. Also relevant is that evidence indicates the objectively assessed need across the HMA is greater than that expressed in the SHMA (2015).</p>	<p>Policy should refer to a minimum of 5,000 dwellings.</p>	<p>It is appropriate for South West Rugby to be up to 5000 dwellings. This figure has informed the various evidence documents which identify the level of infrastructure required to support the local plan growth. A minimum figure on this site would make evidencing the local plan much more complex and uncertain. Furthermore it has the potential to place uncertainty on the alignment of the housing and employment targets. The SHMA has been accepted at the recent Coventry and Warwick Council Local Plan examination and the Plan allocates more than the housing target.</p>
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS3	<p>We will in due course produce evidence to demonstrate that the allocations are inappropriate both in terms of what could be expected to be achieved from the major strategic sites and from the rural settlements where we know there have been objections by local residents and there is insufficient evidence that neighbourhoods will consider positively the allocations expected. We also propose to show that the Garden Village proposed at Lodge Farm, Site DS3.15, is inappropriate when looked at in the context of the Plan generally and also how the</p>	<p>Reallocate DS3.15 and review other policies, etc. generally.</p>	<p>Comment noted.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					strategic residential allocations have been made. We state again the inadequacy of the Plan to reflect the needs of Coventry.		
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS3	Little consideration was given here to the needs of Coventry and in order to satisfy the overall housing requirement, which accommodates the figures provided for in the MOU. Lodge Farm site DS3.15, is a proposed allocation in preference to other sites which are more sustainable and consistent with the needs of the MOU and Coventry. All of Walsgrave Hill Farm/Hill fields Farm would be a much more sustainable and appropriate location.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
1909	Paul Hill	RPS	St Modwen	DS3	The Local Plan, supported by the SA, does not contain a separate housing target (and associated site allocations) to meet the needs of Coventry due to the need being derived from the same housing market area. Any views that the proportion of Rugby's housing requirements relating to Coventry must be located on the edge of Coventry is far too simplistic an approach, it does not recognise the area is a single housing market area, with functional linkages. For example Coventry, North Warks, Rugby and N&B house prices and rents are similar but it is noted that Warwick	Other than the inclusion of the number of dwellings for each site/settlement expected to be delivered within the Plan Period, no other changes are required for this policy.	No change required. The Plan allocates land that it seeks to put into supply to ensure that there is flexibility in achieving a five year land supply and the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>and Stratford are significantly higher. Similarly the commuting ratio for RBC is fairly neutral in comparison to other LPAs therefore there is not a one size fits all approach to how authorities meet Coventry's need within their respective plan's. Account needs to be taken of sustainability criteria's such as historic environment and flooding and in particular the Green Belt in establishing its approach to spatial distribution. The SA sufficiently considers the benefits of the proximity of development in relation to Coventry (and Rugby) through the SA of the development strategy options, in particular Option 2 (urban and urban edge focus). Lodge Farm would not result in the development of Green Belt land is well located to Rugby and Daventry. Separate land use appraisal has been undertaken for the site. For clarity the plan should state how many houses will be delivered within the plan period.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1909	Paul Hill	RPS	St Modwen	DS3	<p>The title of the section should be re-named from Garden Village to “Lodge farm – Main Rural Settlement”. The identification of a Garden Village in paragraphs 4.34 - 4.36 as a focus of housing development along with the SUEs and MRS is considered appropriate. Lodge Farm is deliverable in its entirety irrespective of the outcome of the Bid process and can still deliver the principles of Garden Villages/Cities. The text should refer to the site being classed as a Main Rural Settlement in the plan period as opposed to being classed as such “later” (Para 4.34). Reference to the settlement being self-sustaining in paragraph 4.36 should be removed. As addressed elsewhere, whilst the concept is understood, the reality is that ‘self-sustaining’ is unlikely to be achieved for any such developments no matter what location or size.</p>	<p>1. The title of this section should be changed as follows: Garden Village Lodge Farm – Main Rural Settlement 2. Para 4.34..The Strategy for distributing housing development across the Borough.....The provision of a new garden village, that will later be classified as a Main Rural Settlement, 3. Para 4.36....levels of infrastructure required to ensure the new settlement is self-sustaining and sustainable.</p>	Comments noted - No action required
1911	Peter Wilkinson	Salisbury Investments Ltd	R Galey	DS3	Specific housing needs of older people should be recognised		No change required. Local Plan policy H6 relates to specialist housing meeting the needs of older people.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1912	Chontell Buchanan	First City Limited	Archdiocese of Birmingham	DS3	Disappointed Clifton on Dunsmore not allocated for residential development. Disagree with conclusions of Council. Other sites less appropriate. Site at Clifton sustainable and suitable	Allocate land off Station Road, Clifton, for residential development and amend policy wording accordingly.	The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Other areas preferred due to location and ability to contribute to 5 year land supply. Approach is based on evidence and considered sound. Not considered justified to make further allocation at Clifton on Dunsmore.
1912	Chontell Buchanan	First City Limited	Archdiocese of Birmingham	DS3	Disagreement with the Local Plan and SHLAA in relation to not allocating land off Station Road, Clifton. The site is 2.5 miles from the town centre, has strong transport links and Clifton has a good range of services, thus is sustainable. Disagreement with the ecological, landscape and sustainability of the site conducted for the SHLAA. Concerns around coalescence could be overcome through creating a buffer. Therefore the Local Plan has failed to select the most suitable sites for development. There is an under-delivery of sites through the first phase of the plan by 1,039 dwellings, which should be made up for in the first 5 years of the second phase of the plan.	Land off Station Road Clifton should be allocated within the Local Plan. Include details of meeting the shortfall within the Borough from under-delivery within the first phase of the Plan as well as meeting Coventry's need.	Comment noted. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No further additions to the allocations are required. Therefore no amendments considered necessary.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1914	Peter Frampton	Framptons	Brandon Estates Ltd	DS3	<p>Supporting information promoting site for development argues that site is not viable for continuation of its current use. The site constitutes 'exceptional circumstances' and as such its release from green belt would be justified as site is believed to be largest brownfield site within the Borough- and the only one considered suitable for residential development- as such would constitute redevelopment of previously developed greenbelt land (approx. 50% of the site is already occupied by built form.) The Local Plan must respond to the cessation of current use as the 'does nothing' option is untenable given the size of the site and if left as is, its dilapidation will continue. The site fits in well to the existing built settlement and to Coventry. The proposal for Lodge Farm is unsustainable, with poor transport links and services compared to the Brandon Stadium site. Brandon provides an alternative- not in terms of total number of dwellings- but can play a part in re-distributing the dwellings allocated for Lodge Farm.</p>		<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. Circumstances of site considered but in assessment process found to be a constraint. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Further allocations not considered to be required.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1916	Peter Frampton	Framptons	Philip Mawson and Christine Wheeler	DS3	Promotion of two parcels of land (land to the west of Lutterworth Road and land to the East of Lutterworth Road) which the agent claims should be released from the green belt. The local plan is not sound due to the allocation of Lodge Farm representing an unsustainable location. If sites are to meet Coventry's housing allocation, they should have a stronger geographical relationship to Coventry. Further land should be released from the green belt within Brinklow owing to its sustainable location and proximity to Coventry. The sites relate well to the existing settlement and previously identified constraints are considered inapplicable.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
1916	Philip Mawson and Christine Wheeler	Framptons	Peter Frampton (Framptons)	DS3	Two parcels of land identified in accompanying plans should be released from the green belt. The Local Plan is not sound due to the Lodge Farm allocation, which is an unsustainable, of insufficient size to sustain a range of facilities. In taking Coventry's allocation there should be a strong geographical relationship to Coventry in order to maintain existing socio-economic relationships. Green belt boundaries need to be reviewed to asset Coventry's growth given the city lacks enough space within its own boundaries- this constitutes exceptional circumstances, thus	The Lodge Farm allocation should be replaced	Comment noted. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No further additions to the allocations are required. Therefore no amendments considered necessary.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>more land should be relapsed from the green belt to meet Coventry's needs. Land West of Lutterworth Road- Strong site boundaries- unless previously developed land all allocations would be encroachment into the countryside, but the site is well contained. The site has the potential to have a separate access, and could be delivered early. The part of the site considered in the SHLAA (S16075) was rejected for a loss of small scale pastoral qualities- but this is misconceived as green belt is not a landscape policy. No compelling argument that small fields should be protected on the basis of a transition zone between the edge of built up areas and farmland. Site 2- land West of Heath Lane: Highways analysis is flawed as site could be accessed off Heath Lane- so can be delivered without Highways improvements to green lane. Allocated site S14065B is subject to flooding, high voltage lines impact capacity- which calls into question its capacity.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1922	George Percy	Sworders	Diana Hopkins	DS3	<p>Land at School Farm, Churchover (SHLAA REF: S16/1902) and Land West of Church Street, Churchover (SHLAA REF: S16/1903) There is an over-reliance on large sites and an under reliance on small sites. This may lead to under-delivery due to issues regarding the economic viability of larger sites. This risks affecting early delivery. Small sites are considered more deliverable as there is a greater flexibility (a research paper- 'Start to finish: How quickly do large scale housing sites deliver'- by NLP- is provided as evidence for this). Main rural settlement allocations of 527 dwellings are 173 short of the 700 put forward at preferred options stage- increasing the reliance on large sites. The larger sites are only at draft publication stage and have not been tested in public examination or adopted in the plan as such allocating this land should not affect the assessment of other sites. The proposed publication draft will be inconsistent with national policy as it will not be effective in terms of housing delivery.</p>	<p>The number of rural allocations should be increased from 527- only accounting for less than 5% of proposed housing trajectory to at least 10%- including in other locations in main rural settlements and other rural settlements. 700 units should be allocated at the very least.</p>	<p>Comment noted. Churchover is a Rural Settlement and as demonstrated in Rural Sustainability Study not considered sustainable for extension. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1924	Joel Hancock	Hancock Planning	Mr and Mrs Fetherston-Dilke	DS3	DS3 is unsound as it is not justified, effective or consistent. Only 3.4% of proposed dwellings allocated for rural settlements, which is considered insufficient. The proposal for Lodge Farm is in an unsustainable location and of an insufficient size to constitute a self-contained settlement. Land East of Ryton Police College (S16010) should be allocated as previously identified highways issues (pedestrian safety) could be overcome. The existing training grounds would provide a level of community facilities. Other potential allocations at Lakeview Road (S16/008 and S16/009) would have a greater impact on the openness of the greenbelt.	The proposed housing numbers for rural settlements should be increased.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. With the exception of Lodge Farm, all rural allocation has required removing land from the GB, requiring exceptional circumstances to be demonstrated. It is considered that no further release of GB is sufficient to be of exceptional circumstance.
1925	Jim Jacobs	Godfrey Payton	Various	DS3	Refer to previous submissions of site at Binley Woods (S14054 / S16003) and site at Stretton on Dunsmore (S129) for consideration in local plan, particularly in context of C&W MOU and unmet need from Coventry.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The promoted site was not considered appropriate for development as set out in the Binely Woods Site Allocation Development Pack.
1927	Mike Jones	Brandon Planning and Development Ltd		DS3	Support for the allocation of land for 75 dwellings at Leamington Road, Ryton as the site is sustainable and capable of accommodating growth. It is normal practice to avoid referring to a sites maximum capacity as this has yet to be		Comment noted but no change required. The capacity figures are based on discussions with the site promoters and SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					established.		
1931	Peter Frampton	Framptons	Reuben Bellamy, Cala Homes	DS3	Support for allocation of DS3.1 for 100 new dwellings. Heritage report enclosed owing to the historical significance of the site which sets out the sites context and the response to it.		Comments noted.
1932	Nick Carr	Rosconn Group	Peter Frampton (Framptons)	DS3	Lodge Farm: No evidence that a settlement of this size in a remote location can be sustainable, function as a new settlement or develop a sense of place- an isolated housing estate with a limited range of services and facilities. The housing requirement for Lodge Farm should be re-distributed to existing settlements where residents can benefit from existing services. Whilst Lodge Farm is not within the green belt, green belt considerations should be subservient to wider considerations of sustainability. Land at Fosseway, Stretton-On-Dunsmore is promoted- this has previously been considered- although rejected on highways grounds- although the previously raised concerns are not applicable as this proposal is for 40 dwellings only. The proposed development of 40 houses would haem no adverse impact on landscaping and extending Stretton-On-Dunsmore would constitute a sustainable pattern of development.	Lodge Farm should be deleted and housing allocations re-distributed to other sites, such as land at Fosseway, Stretton-On-Dunsmore	DS10 will become a new main rural settlement contain a local centre, primary school and GP surgery. The level of services will be greater than some of the existing main rural settlements. The Stretton on Dunsmore Site Allocations Development Pack.

1935	Sophie Horsley	Strutt and Parker	Will Main (Manor Oak Homes)	DS3	Supporting information submitted for land at Lutterworth Road, Brinklow for upto 100-120 dwellings. The location is identified as sustainable, suitable, available and deliverable within 5 years, with infrastructure benefits identified from CIL and New Homes Bonus receipts. Part of the identified land has the potential to serve as an extension to an existing cemetery. Green belt release justified due to sustainability of location relative to other rural settlements. The site has clearly defined boundary's so constitutes a natural extension to the village.		Comment noted. No amendment recommended.
1936	Stephen Mair	Andrew Granger	The Shirley Family	DS3	Land to the South of Rugby Road, Brinklow, should be included. Providing a single development site in the village is inflexible and a second development site should be allocated in case of issues in delivering the other development site.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No change recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1937	Sally Stroman	Smith Jenkins Ltd	NA	DS3	<p>DS3 is unsound as the plan acknowledges over-provision yet the sustainability appraisal has concluded a neutral impact on town centres and townscape- this is illogical and should be amended to assess the true impacts. A robust analysis of the services in all main rural settlements should be undertaken before the level of growth in each settlement is finalised. The development strategy is based on the dispersal of residential development away from Rugby which is unsustainable. The proposal would result in the coalescence with the Rugby Urban Area with the main rural settlement of Dunchurch- to the detriment of the social and physical characteristics of the settlement in terms of Dunchurch's identity as a distinct settlement. During the consideration of the existing core strategy, the Inspector concluded that Dunchurch should remain distinctly separate from the Rugby Urban Area. Growth in each rural settlement should be resolved through Parish plans.</p>	<p>DS3 is fundamentally flawed. Land should be designated between Dunchurch and the Rugby Urban Area as a 'area of separation' or 'strategic gap'- which many other LPAs have.</p>	<p>No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. A Rural Sustainability Study has been undertaken for Borough's rural settlements and discussions have taken place with service providers such as the CCG's, Warwickshire education and national grid in relation to allocations at the main rural settlements. The allocations at the main rural settlements will play a vital role in ensuring that the Council can demonstrate a five year land supply. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1937	Sally Stroman	Smith Jenkins	Unnamed Dunchurch resident	DS3	Over provision of development in plan period. Concern at the effect this will have on coalescence, particularly in South-West allocation between Rugby Town and Dunchurch. Not sound conclusion about effect on character of townscape and sense of place. Housing requirements based on pre-Brexit forecasts. Other Councils have delayed preparation to give this matter consideration. Being neutral Concerns raised at PO stage not resolved through Publication stage.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Coalescence has been a consideration in site selection and the requirement for a suitable buffer has been included in the proposed policy. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.
1938	Sinead Turnbull	DLP Planning	Sinead Turnbull	DS3	Document promoting land at Manor Farm, Burton Hastings comprising several farm buildings within the green belt. The agent requests that the land be included with the Burton Hastings settlement boundary. The site forms part of a wider commercial establishment and constitutes previously developed land.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1939	Patrick Reid	DLP Planning	Sinead Turnball	DS3	Email from agent promoting land along Coventry Road, Dunchurch for inclusion in the Urban Proposals map. The site currently hosts two dwellings but has the development potential for five.		Site within the SHLAA addendum and Planning Application received on site
1940	Michael Burrows	Savills	Legal and General	DS3	Supports allocation of site although opposes restriction to 85 units. As previously developed site, the principle of redeveloping the site is supported by the NPPF, irrespective of the Local Plan. The site is not a strategically significant employment site. Confident the site can be delivered within 5 years. Supporting information from property agent assessing market demand for such units. There is an identified housing need in rural locations. The site is already served by utilities; pedestrian/vehicular access- Warwickshire County Council Highways identifies a potential betterment to the public highway from residential redevelopment. The Landscape Sensitivity Study identifies the site as of medium landscape sensitivity. Client has commissioned a Combined Green Belt Review and Landscape & Visual Appraisal which identifies the site as a 'lower functioning element of greenbelt', with strong defensible boundaries. Only large site capable of delivering large quantum of housing without developing	The site capacity should be upgraded from 85 to 90	No change required. The Wolvey Campus has been informed by site constraints and discussions with the site promoter. The evidence to support the change to 90 dwellings has discrepancies with the Council's evidence.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>agricultural or greenfield land. Site capacity under-estimated due to lack of technical information available for SHLAA process; site is capable of accommodating 90 dwellings without compromising the greenbelt or landscape qualities of the area. (Layout plan showing 90 dwellings submitted).</p>		
1940	Michael Burrows	Savills	Legal and General	DS3	<p>Site DS3.14 should be removed from the green belt. Paragraph 4.31 states that the settlement boundaries of the 7 Main Rural Settlements will be altered to accommodate housing allocations but does not state that the land will be removed from the green belt. Wolvey Village is not within the green belt. Landowner has commissioned a Combined Green Belt Review and Landscape & and Visual Appraisal for the site which found that the site does not contribute to the green belt due to existing development around the site. The focus for the redevelopment of the site should be urban design and housing mix, but if it remains within greenbelt the impact on the green belt risks becoming the primary assessment. Furthermore, the capacity of the site could be constrained, potentially leading to the need to release further greenbelt land, rather than a previously developed site. There are strong defensible boundaries, which</p>	<p>Site Reference DS3.14 should be removed from the green belt and possibly included in the Wolvey settlement boundary.</p>	<p>Site is detached from main settlement and it is considered that in the interests of the Green Belt this designation should not be removed so that development is not maximised with increased impact.</p>

1944	Tristan Peck	Bletsoes		DS3	The settlement boundaries are unjustified. The site identified on attached plan is already developed land and should be included within the settlement boundary.	Site should be included within the Princethorpe settlement boundary	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No change recommended.
1948	Andy Dunning	NA	NA	DS3	<p>The national policies outline a need for there to be no significant adverse effects to air quality, traffic or health. AQMA within Rugby Town and in 2014 two monitoring locations exceeded the annual mean NO2 objective; these were at the Dun Cow, Dunchurch, and the Webb Ellis Pub, Corporation Street.' An extra 12,000 homes all of which will have a significant impact on the number of cars using Dunchurch and its main roads particularly the dreaded Rugby Road will increase this issue further leading to clearly unacceptable levels of pollution for anyone living in this area.</p> <p>Countryside to the southwest of Rugby also out towards Leamington Hastings will increase the above issue as well as destroy the quality of life in this area. Plan will destroys the identity of a historical and beautiful village of Dunchurch. The plan does not go far enough in the north of Rugby near the motorway links which make sense for more houses to be near rather than sending vast numbers of traffic through the town</p>		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					to access it. Clearly the centre of the town also has further opportunity not realised in this plan which takes the easy but not the right choice.		
1968	Anne Langley	NA	NA	DS3	DS3 (p. 22) Some development sites are likely to lead to increased flooding and all will create unacceptable pressure on local infrastructure: transport, health services and education	Concentrate development within Rugby town, and on the outskirts, where the infrastructure is already more robust and capable of enhancement at a lower cost. Compel developers to contribute more to the cost of such enhancements as a condition of obtaining planning consent	The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1992	M J Parker	NA	NA	DS3	<p>Proposed housing numbers are too high. Housing allocated at Cawston South and the former Rugby Radio Station Mast Site is sufficient. Lodge Farm is unsustainable and can't understand why it was swapped from the Walsgrave Hill Farm site. Brownfield site at Church Lawford airfield should be developed. Should be a green belt swop between Church Lawford airfield and area around Cawston lane and A45. Planning Inspector should be made aware of large brownfield site at Church Lawford.</p>	Develop Church Lawford airfield	<p>The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. Local Plan has been subject to a sustainability assessment.</p>
1995	Mark Ferguson	NA	NA	DS3	<p>Concern in relation to the number of houses proposed and the potential impact on congestion, which as existing is severe. Don't even have hospital with A & E department.</p>		<p>Plan has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF. Mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. (Therefore amendments not considered necessary or suitable). WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan.</p>

2014	Michael Prag	NA	NA	DS3	The local plan conflicts with paragraph 112 of the National Planning Policy Framework as it needlessly takes agricultural land. Inadequate infrastructure for recent developments.		It is acknowledged there will be a loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
2015	Mick Lavin	NA	NA	DS3	Insufficient detail provided on alternatives sites to Brinklow; insufficient weight of evidence to justify greenbelt release; Brinklow Parish Council oppose the plan and their neighbourhood plan proposes only 'infill' development; amenities, infrastructure and services evidence is flawed; pedestrian access to the proposed amenities and services is unsafe; proposals detract from Brinklow rural character;		The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. SHLAA has been conducted in accordance with an agreed methodology and is considered sound. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2101	Melanie Cannell	NA	NA	DS3	<p>I strongly object to the proposed Local due to the inevitable huge increase in traffic this will create and the devastating consequences of this for local people. Traffic through Dunchurch is already horrendous every morning and evening with queues to the cross roads on the Dunchurch/ Rugby Road. The proposed increase in housing locally would make it absolute grid-lock. Volume of traffic is already seriously affecting air quality and causing serious illness and death - what studies have been done to measure the air quality in Dunchurch? The increase in traffic will also prevent people walking and cycling. The proposed relief road is completely inadequate to combat the increase in traffic and will not prevent thousands of drivers, including massive HGVs coming from the direction of Banbury/Southam/Daventry or the proposed Lodge Farm development from taking the route through Dunchurch. I have other concerns relating to the Local Plan, including school provision and inadequate G.P. services for the increase in people.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. 2107	Toby Haselwood	Sworders	Jenny Cooper	DS3	Land between Priory Road and Rugby Road, Wolston, SHLAA Ref: S14/029 and S16108 previously submitted as part of the call to sites but an issue with the access was identified- a technical note was later submitted which identified that a suitable access could be achieved. An 85% reduction in the number of houses allocated to Wolston (15, compared to 100 at the proffered options stage) is prejudicial to early delivery. A large number of smaller sites are more deliverable than a fewer number of large sites. The main rural settlement allocation of 527 is 173 short of the numbers proposed at the preferred options stage.	To ensure the Local Plan is sound the number of rural allocations should be increased from 527- currently accounting for less than 5% of the proposed housing trajectory to at least 10% or 700 houses.	The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. Sites not considered suitable for allocation in SHLAA assessment. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Specific details of a proposal and impacts also assessed at planning application stage. Further allocations not considered justified.
2113	Ian Long	DLP Planning	NA	DS3	*Support HBF's objections to the new local plan in particular to OAHN*.Promote site on edge of Harborough Magna settlement boundary (within the green belt) for redevelopment as a residential site. Site previously submitted and assessed in 2016 SHLAA.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Not considered justified to make further allocation

					3. The site was submitted as part of the call to sites process but was rejected due to its potential impact on a heritage asset.		
2117	Isla Longmuir	How Planning LLP (On behalf of Taylor Wimpey)	Andrew Thorley	DS3	Supporting document submitted promoting land to the East of Barby Lane (which is currently subject to a planning application for upto 113 dwellings). Document outlines the sites suitability and the need to develop sites along the Rugby urban edge. The site would contribute to the Councils 5 year land supply. Delivery of sites along the urban edge will contribute to meeting the annual targets for the plan period 2017-2022, which have been above historical delivery rates. The site is suitable, deliverable and sustainable.		The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Further allocations not considered to be required.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2118	Guy Longley	Pegasus Group	Mr Chris Merriman (Merriman Property)	DS3	<p>The Council has failed to properly consider all sites adjoining Rugby as such the release of greenbelt land is not justified. Representations previously made for the site at the preferred options and call for sites processes, but the site was rejected because- whilst deemed 'suitable and available'- sites to the South East of Rugby are the least desirable because firstly highways mitigation is required for developments to the South West of Rugby. The highways assessment was in relation to the wider potential for upto 3,000 dwellings thus did not assess small scale developments. (A highways supporting document has been submitted). Strategic sites need to be balanced with the allocation of smaller sites. This site could be delivered early on in the plan period.</p>	<p>DS3 should be amended to include land to the East of Kilsby Lane for upto 150 dwellings</p>	<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. WCC Highways and Highways England have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Specific details of a proposal and impacts also assessed at planning application stage. Further allocations not considered justified.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2120	Michelle Simpson-Gallego	Pegasus Group	Peter Drakesford	DS3	<p>Concern in respect of the delivery of the South West allocation owing to its size, infrastructure requirements and multiple land ownerships. RBC needs a contingency of deliverable sites away from the Rugby Urban edge. Insufficient land has been removed from the green belt to endure beyond the plan period in relation to NPPF Paragraph 83 (that boundaries are capable of enduring beyond the plan period). Additional land should be identified in each Main Rural Settlements to futureproof the Local Plan.</p> <p>Disappointed that land at Lake View Farm, Leamington Road, Ryton-on-Dunsmore, despite having previously been identified as suitable. Logical to bring forward land at Leamington Road with land at Lake View Farm to create a more comprehensive scheme with 24 additional dwellings, services and infrastructure. Illustrative masterplan submitted.</p>		<p>No change required. There is sufficient flexibility in the supply of sites therefore no further allocations is required. As proposed the access to Lake View Farm will require land not within the same ownership and no formal agreement has been agreed.</p>
2125	Trevor Farthing	NA	NA	DS3	<p>Not all villagers oppose new development in Stretton-on-Dunsmore; respondent welcomes new housing for young people; majority of people are the last people to arrive in the village, the village must have new life to keep it alive</p>		<p>Support for proposed allocations at Stretton on Dunsmore noted.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2150	Michelle Simpson-Gallego	Pegasus Group	Lioncourt Homes	DS3	<p>Rugby gateway and Rugby Radio Station are previous allocations whilst Coton Park East and Coton House are small allocations. Concern that another large site has been allocated despite issues in delivering the Radio Mast site- circa 10 years since allocation without any completions. Given land ownership issues and infrastructure requirements in the South West, this may be repeated so RBC should look to contingency sites. Pleasing some green belt release is planned, but insufficiently responsive to meet rising needs, risking creating unmet need. NPPF Paragraph 83- green belt boundaries must endure beyond the plan period- might not be met, so review of the plan before 2031 may be required. The Allocation of Sherwood Farm for development is supported. However, the site is capable of accommodating 75 dwellings- rather than the 62 allocated within the Local Plan, given concerns in relation to land supply, the allocation should be increased. The principle of increasing the number of dwellings and including unto 10% bungalows is supported by the Parish Plan (illustrative site plan included).</p>	<p>Additional land should be identified in each main rural settlement. 75 dwellings should be allocated for the Sherwood Farm, rather than 62.</p>	<p>No change required. The Sherwood Farm allocation has been informed by site constraints and discussions with the site promoter.</p>

2168	Richard Veys	NA	NA	DS3	<p>SW Rugby not required. Already enough planned housing in and around Rugby. More pressing is affordable housing near Ansty Park/ Walsgrave Hospital. Concern about traffic and air pollution at Dunchurch (most polluted junction in Warwickshire) any development will put pressure on Cawston Spinney, no assessment of the impact of the development around Cawston Spinney, no mention of water flow, pollution from construction, increase footfall due to the additional numbers of people. DS10 is not sustainable, goes against RBC objective should not development agriculture land, provision of 2 bus stops is not sustainable transport, inclusion of broadband is somehow a way of removing social exclusion on its own is ridiculous A45 high cash route, more development will make it worse will devalue surrounding villages, too far from Rugby town to impact homelessness. Concreting over of the area will increase flooding on the Leam.</p>	<p>The plan needs further local consultation and review. Removal of the proposal for additional houses in South West Rugby and Lodge farm - both should be scrapped as plans.</p>	<p>The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. DS8 contains specific requirements regarding a buffer around Cawston Wood. Additional modification LP54.35 and LP54.43 require a woodland management plan to be contained within the SW Rugby SPD and to support planning applications. Both DS8 and DS10 are supported by policies which contain specific mitigation against impacts informed by relevant service providers. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>
2169	Rose Wattam	NA	NA	DS3	<p>Conflicts with para 112 NPPF as it needlessly takes agricultural land. It also conflicts with paras 93-104 as a threat to flooding. DS10 Conflicts with paragraph 112 for the same reason and it also conflicts with paragraphs 30,34,37,95 because it would cause excessive car journeys</p>	<p>DS8 and DS10 scrapped, not been thought through properly. I think the calculation for the quantity of houses is over estimated.</p>	<p>It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA, therefore consistent with the NPPF.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2174	Ryan Farthing	NA	NA	DS3	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS8 - needlessly takes agricultural land and is contrary to NPPF para.112. 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. Journeys to and from the location</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

					<p>will be car dominant and therefore unsustainable. Policy is contrary to NPPF paras. 30 and 124 and is therefore unsound.</p> <p>Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. A more focused delivery strategy would make better use of existing infrastructure.</p>		<p>greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it</p>

2188	Sarah Green	NA	NA	DS3	<p>Housing needs vastly overinflated, insufficient consideration given to Government Policy or impact of Brexit. The scale of the development disproportionately detrimental effect on the surrounding areas. The provision for infrastructure is inadequate and timescale for building such infrastructure unsatisfactory. Rugby Borough Council has already pursued an aggressive course of development taking more houses than all others in Warwickshire. A development of this scale is not needed or justified. No explanation as to why taking 2,800 from Coventry. A more balanced view of the likely future growth is required with particular reference to Employment Land (Cambridge Econometrics were high WS Atkins substantially lower) provide substantially lower projections relied upon and to environmental impact of building such warehouses on Cawston Spinney site. Provision of a 'green buffer' to protect Dunchurch as a historic village is totally inadequate. Nor are there any guarantees that this buffer will be respected or retained. No clear or concrete plans on provision of infrastructure. Road network cannot support provision of primary schools, no information as to how this was calculated.</p>		<p>Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The housing target is not a minimum because it is based on need. . The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2189	Shirley Hall	NA	NA	DS3	<p>Plan prepared by G L Hearne not independent. Ignore pollution levels at crossroads. These already exceed EU requirements. Traffic from developments will go through Dunchurch crossroads. WCC using out of date model. WCC owns much of the land - potential conflict with being the Highway Authority. No thought of infrastructure needs to cope with huge influx. Should extend Coton Meadows instead where warehousing already exists instead of rural area.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

2197	Susan Kealey	NA	NA	DS3	<p>Concern about congestion and safety of roads in and around Dunchurch and Cawston, in particular for cyclists. It is an inadequate road system already, with more cars will make worse and the increased air quality problem. Necessary services to support new population not properly considered - most already struggling. Planners have killed off town centre - nothing to offer extra 20,00 new residents. Cannot understand why need to provide 2,800 for Coventry. SW Rugby will ruin open space between Rugby and Dunchurch. Also agree with DDC look to brownfield and accelerate existing sites.</p>		<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2217	Scott Civzelis	NA	NA	DS3	<p>Objects to DS3.7. North side of Coventry Rd a better alternative for the local community, although accepted larger than needed be discounted for invalid reasons. Proposed site will increase through traffic upon Brinklow main community high street and specifically will force traffic through the Broad street Coventry Road junction which is already congested and ineffective at peak hours. Also location excludes potential for future bypass of Brinklow and elongates the villages.</p>	<p>Coventry Rd Plot whilst being a bigger plot than required could be effectively re-plotted and reduce in size to accommodate the 100 homes with the remaining footprint and boundaries protected which is not a valid argument for discounting. In support of the Lutterworth Rd Plot I would suggest if as part of the development traffic calming methods were added to control the flow of heavy goods vehicles, and the speed of public traffic this could add value to the broader Brinklow community</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.</p>
2223	Angela Collins	NA	NA	DS3	<p>housing numbers - should be based on new planning white paper and not due to under provision by other authorities 2 house numbers for Dunchurch and grand borough on green belt unsound as infrastructure not planned sufficiently 3 housing settlements at Dunchurch and grand borough should be in central government allocation for new settlements with appropriate financial support for necessary</p>		<p>The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as</p>

					<p>infrastructure Dunchurch high pollution not mitigated 4 smaller sites and support to self-build would mean better community building 5 more support for build to rent for more affordable housing</p>		<p>Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. The proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2262	Tony Lyons	WCC Minerals	NA	DS3	Warwickshire Minerals Plan is progressing and a number of sites have been put forward as Preferred Options. Of the larger strategic sites proposed in the Rugby Plan, none of the larger allocations appear to affect the potential mineral allocations.		No further action required.
1083 or 1512	Dr J Stocker	NA	NA	DS3	Council anticipates that windfall sites will generate another 645 homes, a further 6% of the total requirement - leaving a shortfall of less than 3% (just 200 homes). More than 500 homes are intended in 9 separate sites within existing Main Rural Settlement and up to 5000 in South West Ruby (DS8 and DS9).		The Local Plan seeks to include a buffer of allocations in order to maximise delivery and thus ensuring RBC maintains a 5 year land supply.
1083 or 1512	Dr J Stocker	NA	NA	DS3	Even if there was an objective requirement for a new Main Rural Settlement within the Borough, there is nothing in the Local Plan to suggest that Lodge Farm is the right location. Its selection as a site has been dictated entirely by the wish of the current landowner to develop his land. In view of the very long-term consequences of any substantial new settlement, this is the wrong approach. If such a requirement does exist (which I dispute), the Council should identify the most appropriate location within the Borough and then seek to secure the land for development. No solution should be supply-driven, as is the Lodge Farm proposal.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Lodge Farm has been subject to an SA. Lodge Farm represents a site outside of the green belt which is considered to be deliverable as there are no known constraints. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1083 or 1512	Dr J Stocker	NA	NA	DS3	Wrong Place: 2,800 homes (more than a quarter of the remaining requirement) are intended to meet Coventry City's needs. To this end, the Preferred Options Local Plan proposed the release of land at Walsgrave Hill Farm, adjacent to the City itself. This proposal has been expressly dropped in favour of Lodge Farm, which is almost as far from Coventry as it is possible to get within Rugby Borough. Furthermore, this substitution now means all of the proposed development sites in the Local Plan are in the eastern half of the Borough, yet Coventry lies to the West. This is self-evidently nonsensical. It is, moreover, incompatible with a sustainable transport network and will greatly increase the number and length of car journeys compared to the original proposal		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
1083 or 1512	Dr J Stocker	NA	NA	DS3	DS3 therefore allocates sites for up to 15427 dwellings in total - 5227 (50%) more than the requirement. This excess is over three times the number proposed for Lodge Farm.		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1106 & 1903	David Joseph	Bloor Homes	NA	DS3	DS 3.8 land North of Coventry Road, Long Lawford could be capable of accommodating more than 100 dwellings, so greater flexibility on capacity assumptions required	Amend residential allocation DS3.8 to a minimum of 100 dwellings	The Main Rural Settlement Pack details the allocation of DS3.10 including reference to the heritage asset review and the archaeological constraints which are considered at the local plan stage to limit the capacity of the site to 100. No change recommended.
1119	Ross Middleton	CC Town Planning	Amberville Properties	DS3	The Squires Road site (DS3.11) has no legal issues or covenants or any other technical constraints which would prevent the immediate delivery of residential development at the site. Local Plan is based on a sound strategy when considered against the reasonable alternatives. DS3 should remove the word up to 50 dwellings using indicative instead	DS3 should remove the word up to 50 dwellings using indicative instead	Comment noted. However, this is consistent with all proposed allocations to afford necessary flexibility at application stage where detailed master planning may need to allow slight adjustments in numbers whilst conforming with policy. No change.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1308 & 1607	Jennie Boonham	NA	NA	DS3	<p>Objection on the basis that the proposed site for 100 dwellings falls within the greenbelt, the site is prone to flooding, there would be a potential impact on flora and fauna, site is connected to the historic Norman Motte and Bailey site; the proposal would increase the number of homes in Brinklow by 25% over 5 years which will have a significant impact on local services and infrastructure, the proposed development doesn't match the development pattern of the existing village, the development could generate 1-200 cars at a time when traffic from an expanding Magna Park is being felt in Brinklow. Lutterworth Road was chosen due to its defined boundaries- RBC should not exclude other sites on this basis as boundaries could be re-drawn.</p>	<p>The proposal for Lutterworth Road be reduced and other smaller sites within Brinklow considered due to an acceptance that more dwellings are needed and that within this location they would fall under the green belt designation</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable options for allocation. The Brinklow Site Allocations Development Pack (June 2016) considered a range of evidence such as landscape sensitivity, heritage impacts and highways advice in proposing site DS3.7 for allocation over other sites considered around the village of Brinklow. More detailed assessment of development impacts would be required as part of planning application(s). Acknowledged that northern section of the site is within flood zone however indicative layout of development proposes no buildings within this area; more detailed information regarding drainage and avoiding increase to flood risk off site will also be a requirement of planning application supporting information.</p>
1325 & 1968	Dr Anne Langley	NA	NA	DS3	<p>The wishes of local people- expressed through parish plans, neighbourhood plans and protests- have been ignored.</p>	<p>Need for more affordable homes for the elderly not executive homes</p>	<p>Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. Consultation summaries have been produced which indicate how representations have been considered in the drafting of future stages of the plan.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1325 & 1968	Dr Anne Langley	NA	NA	DS3	Some of the proposed development sites are within the green belt- DS3.7, 3.9, 3.10 & 3.11- in contravention of national policy and GP2.	All green belt developments should be removed from the plan	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The NPPF states that removing land from the GB can only be done in exceptional circumstances. RBC is of the view these have been demonstrated in order to assist in demonstrating a continuous five year housing land supply at the start of the plan period.
1455 & 1900	Louise Steele	Frampton	DB Symmetry, Taylor Wimpey, Gallagher Estates, Richborough Estates and Warwickshire County Council	DS3	Parties have concern about soundness of policy para 14 NPPF requires that for plan making Local Plans should meet OAN, with sufficient flexibility to adapt to rapid changes. Currently policy seeks to impose a ceiling on the amount of development that can come forward at the site by stating the capacity as an 'up to' figure. This is contrary to the objectives of the Framework (paragraphs 17 and 47). Ensure that the policy was positively prepared, be effective and consistent with national policy, and would enable the Local Plan to be flexible and respond to changing circumstances.	amend "Up to 5000" to "a minimum of 5000"	It is appropriate for South West Rugby to be up to 5000 dwellings. This figure has informed the various evidence documents which identify the level of infrastructure required to support the local plan growth. A minimum figure on this site would make evidencing the local plan much more complex and uncertain. Furthermore it has the potential to place uncertainty on the alignment of the housing and employment targets. The SHMA has been accepted at the recent Coventry and Warwick Council Local Plan examination and the Plan allocates more than the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1455 , 1900 & 2109	Louise Steele	Frampton	SALFV	DS3	The Council has not worked with local community in relation to the Lodge Farm Allocation which is not in accordance with NPPF para 52 or NPPF150 which states that "Local Plans are the key to delivering sustainable development that reflect the visions and aspiration of local communities." Furthermore the late inclusion of the site has not enabled meaningful engagement with neighbourhood, local organisations and business as per NPPF para 155.	Requested that this residential allocation is deleted and the supporting text for the policy is deleted from the Publication Draft Local Plan.	The local authority has sought to consult with public on all of the proposed allocations.
1468 &161 8	Claire Woodfield	NA	NA	DS3	Object to S14/064. S16/067 is a more suitable site...S14/064, access road was altered from unsuitable to suitable implying property would need to be demolished. No evidence of other sites reviewed in published documentation for Wolston. S16/067 was subsequently changed to being not suitable without any available evidence of the basis for this change.S14/064 not sound for following reasons: Size of site: Suitable for only 15 dwellings. Does not contribute to RBC requirement of 100 dwellings in Wolston. Does not justify volume of infrastructure required. Access: Access only achievable by demolition of existing property. This alters character of the area and adds another busy junction to a busy road. Safety should be reviewed. Environmental: Site has established biodiversity in an area		S14/067 is not a deliverable site as detailed in the SHLAA and Main Rural Settlement Site Allocation Development Pack - Wolston.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>surrounded by agricultural monoculture that would subsequently be destroyed. Traffic and footpath: Access is on to busy main road with no direct footpath into the village. Construction of one would be very expensive, too narrow and not possible due to multiple ownership of land. Location: Distance is over a 10 minute walk from amenities and schools. Only access along busy road.S16/067 more suitable for allocation because: Potential for 80 dwellings, more flexible, shape and size could be defined, Trees could be planted, does not have building height restrictions, larger site would justify costs and meet more accurately local and national housing needs, open site with clear access should not be considered with a deliverability of 10-15 years, it has no know restrictions and should be considered within the 5 year category.</p>		
734	D A Ross	NA	NA	DS3	<p>Development in Stretton on Dunsmore should not result in greater flood risk this is of particular concerns giving flooding that has occurred in the settlement. It is vital that developments also provide affordable housing and Policy H2 dwelling split should be adhered to.</p>		<p>The selection of the allocated sites was informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence. Policies relating to flood risk and drainage (SDC5 and SDC6) included in the plan to further address flooding matters.</p>

705	James Darcy	NA	NA	DS4	<p>Employment strategy in the plan identifies a requirement for 79 ha of land however this has been adjusted to claim a need for 110 ha being for warehouse/distribution use. This quantum is over exaggerated and based on figures prior to the UK deciding to leave the EU. Vast majority of the 79 ha requirement can already be delivered by the Borough, also the figures do not include allowance for warehousing at DIRFT or Prologis, Ryton which appears inconsistent for the plan to ignore reference to these two sites. RBC are proposing to provide allocation to meet employment and housing needs for Coventry, not the needs of the Borough itself. Use of Ryton site would exceed 79 ha requirement and if further floor space is required this can be located at Coton Park East due to its position on highway network. SW spine road link to A45/M45 junction is essential to avoid the issue of large numbers of HGVs using Dunchurch crossroads so unlikely that SW employment development could be available until end of the plan period.</p>	<p>Remove Policy DS4.3 and DS8/DS9 as already sufficient employment land in the Borough to meet employment land targets and therefore unnecessary to allocate land in SW Rugby.</p>	<p>Proposed allocation sites are considered to be suitable and deliverable sites for employment development within the plan period. The local plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. Furthermore the Local Plan sets out how completions, existing supply and proposed new allocations meet this target at amended Policy DS1 as indicated by modification LP54.13. 1435	A Sullivan	NA	NA	DS4	<p>Employment provision is poorly presented and just fed. The statistical relationship between land and jobs is questioned. Questions over why only B1, B2 and B8 have been considered and no other types of employment. Not enough clarity and justification have been provided for the recommended employment land provision of 6-8ha per annum. The lift from 79ha to 110ha is not convincingly explained. How Coventry's need was generated is not clear. There appears to be a conflict in the figures between policy DS1 and the employment MoU. Objections to the 35ha of employment land at Cawston Spinney as part of South West Rugby; the CPRE object to warehouse development is an environmentally sensitive area. The Rugby Radio Station site should maintain higher levels of provision.</p>		<p>The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. Additional details will be finalised at the Planning Application stage.</p>

1444	John Pearce	Amec Foster Wheeler	Warwickshire County Council	DS4	<p>Rugby should be considering now how they intend to address issue of shortfall in employment land within Coventry beyond 2031 plan period. Council should consider whether land adjacent to Coventry in the Green Belt be removed and/or safeguarded for future development. In doing so this would ensure the Green Belt boundaries can endure beyond the plan period and would negate the need for a further review in preparing a local plan after 2031. Consider County Council sites at Blue Boar Farm and Coney Grey Farm should be removed from Green Belt and identified as safeguarded land. These sites are draft allocations in the Warwickshire Minerals Local Plan, in which flexibility is sought that these sites could be worked sooner to enable their re-use for other non-mineral development in the future.</p>	<p>Identify sites on the urban edge of Coventry that could be allocated for development in the post 2031 period, if it became apparent, as expected, that Coventry could not meet their own development needs again.</p>	<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary. The provision of employment land in Rugby Borough to address a shortfall in meeting sub-regional strategic employment needs, arising from the unmet needs of Coventry City, has been addressed through Duty to Cooperate and the Coventry & Warwickshire Employment Land MoU agreed in 2016.</p>

1448	Nick Small	Stagecoach	NA	DS4	<p>35Ha SW Rugby B8 allocation (Cawston Spinney). Stagecoach supports this proposed allocation. This credibly ought to help rebalance journey to work flows across the urban area, especially with large-scale residential growth committed and proposed SW of Rugby. In particular it helps damp the demand for trips to work across the town to the north and east, which would otherwise add to existing serious peak congestion in and around the town centre and Hillmorton. Stagecoach also welcomes the obvious opportunity to introduce important "reverse tidal" flows on the existing frequent bus corridor (service 4) along the Bilton Road to the Cawston and SW Rugby areas, on which there is plenty of unused capacity. It will tend to assist with supporting the commercial viability of bus network improvements serving wider residential development also proposed in the Plan south west of Rugby.</p>		<p>Support for proposed employment allocation noted. Development proposals to implement this allocation are required by draft Policy DS8 to ensure comprehensive sustainable transport links that integrate with existing networks and provide good connectivity within the allocation site and in the surrounding area, including to Rugby town centre. Detail of how this will be delivered will be negotiated by the local planning authority, site promoters, public transport operators and the local highways authority and will be an important consideration in any planning applications for this site.</p>

1864	Andrew Macdonald	Swanvale Developments Ltd	NA	DS4	<p>Land at M6 Junction 2 should be removed from the Green Belt and allocated for employment use. The land lies adjacent the highways compound and there is interest in further depot type facilities in this location. The allocation of this site for employment purposes would accommodate this demand and contribute to the provision of smaller B1, B2 use units as have been identified as being needed in the Rugby Employment Land Study 2015 (and noted in the Local Plan paragraphs 4.8 – 4.9). The site (as part of parcel C6) does not contribute to the Green Belt as noted in the Coventry and Warwickshire Joint Green Belt Review (2015) and its removal from the Green Belt is supported (paragraph 4.24 and 5.8 of the Green Belt Review) where exceptional circumstances exist. The provision of employment facilities to meet a specific demand would present such circumstances. As paragraph 5.8 of the Green Belt Review notes, the development of this location would effectively be ‘infill’ and would be well contained by existing significant features in the landscape – namely the motorways. Local Plan confirms at paragraph 4.37 that this Local Plan “has released land at M6 Junction 2 from the Green Belt, as evidenced by</p>	<p>The Local Plan should remove the site from the Green Belt and allocate it for employment purposes in order to address the inconsistency with the evidence base recommendations and ensure the Local Plan is positively prepared in seeking to address employment needs.</p>	<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary. As such proposed Policy DS3 has been amended as indicated in modification LP54.20 to remove reference to the release of land at M6 Junction 2 from the Green Belt.</p>

1912	Chontell Buchanan	First City Limited	Archdiocese of Birmingham	DS4	<p>Land off Station Road is capable of accommodating over 100 dwellings and is in single ownership. Agreement with the sentiment of Paragraph 4.42 but considers that legal agreements should be in place to ensure a collective approach is promoted.</p>	<p>Allocate land off Station Road, Clifton, for residential development.</p>	<p>Comment noted. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. No further additions to the allocations are required. Therefore no amendments considered necessary.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1915	Peter Frampton	Ardmore Ltd	Peter Frampton	DS4	<p>Chamber of Commerce document included which was sent to Coventry City Council outlining a shortage of allocated employment land within Coventry due to former employment sites being used for housing. Paper is critical of using 2011 as a base figure owing to the economic context of the time, thus available office space at the time was unusually high. A shortage of allocated and 'ready to go' employment land could damage business growth, so there is a need to work on a sub-regional basis to allocate sites within Rugby Borough- including green belt release- owing to Coventry's own land constraints as part of the 'duty to cooperate'. Ardmore Ltd controls the land on the submitted plan and seeks to prove 'exceptional circumstances' for greenbelt release. The green belt between Rugby and Coventry was defined over 30 years ago thus is considered outdated due to changes in the economy and as such the geographical application of the green belt- rather than the policy in itself- is questioned. Resisting the re-allocation of green belt land along the Coventry urban edge does not help Rugby's economy but does damage Coventry's. A criteria-based policy could be developed for companies looking to move to the released green belt land.</p>		<p>The Local Plan target allows for flexibility in supply to deliver employment land requirements based on consideration of forecast jobs growth, increases to resident labour supply, and projections of past take-up rates of employment land. Policy is formulated in relation to the evidence base and is considered to be sound. 1430	Andrew Morgan	Place Partnership	Warwickshire Police (WP) and West Mercia Police (WMP)	DS5	The policy consider Policy DS5 to be unsound because, contrary to the NPPF, it will not secure and deliver adequate security, community safety and policing infrastructure to meet the needs of the housing developments that it will cover, as it does not cover police service infrastructure requirements at all.	To resolve the objections made in Section 6 of these representations, we request that Policy DS5 be amended as follows: · Provision of and/or contribution to police infrastructure and community facilities such as schools, community buildings or sports facilities. Without this amendment the Plan cannot achieve one of its main purposes, securing adequate infrastructure including through Section 106, as long as it does not recognise the essential nature of policing infrastructure for schemes of 100 dwellings or more. As explained above, this fact has been accepted by the Secretary of State and Planning Inspectorate on numerous occasions.	Whilst we consider that these representations present our case fully, we would be prepared to participate at the oral part of the examination should the Inspector consider this beneficial to proceedings?

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1448	Nick Small	Stagecoach	NA	DS5	<p>Stagecoach strongly welcomes and supports this draft policy. We recognise the difficulty, especially at SW Rugby, of multiple land ownerships, discussed in paragraph 4.42. It is essential that this development is planned and brought forward comprehensively, accompanied by an agreed package of transport and highways mitigations. Many of these will be delivered within and adjacent to the allocation, and thus the master plan must be worked up so that seamless delivery is achieved. This also would allow for the proper phasing of supporting infrastructure, not least new road links which will need to perform much more than merely local access functions.</p>	<p>Support for proposed allocation noted.</p>	<p>Support noted. WCC Highways and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.</p>
1637	Ian Bates	NA	NA	DS5	<p>Policy DS5 - we have already seen developers adjust their plans to avoid their responsibilities - the limit of 100 dwellings is too high and needs to be halved in order to make this policy effective. Objectives missing connection to infrastructure. Plan is written in biased way against current residents and allows quality of the environment to be diminished.</p>		<p>Local Plan has been formulated in line with national Planning system, which sets statutory requirements on such matters.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1866	Gary Stephens	Marrons Planning	Gallagher Estates Limited and David Wilson Homes (East Midlands) (GE/DWH)	DS5	<p>First paragraph of Policy DS5 is unnecessary as any planning application for over 100 dwellings will require the submission of a Design and Access Statement which would explain the master planning process and demonstrate the justification for the proposed design. There is therefore no need for the policy to repeat this requirement. Furthermore, the requirement for a viability assessment would only be relevant if the applicant considered the proposed development was not deliverable.</p> <p>Second paragraph of Policy DS5 sets out a number of specific requirements for proposals of over 100 dwellings. No evidence is provided to support the Plan on the implications of these burdens on the viability and deliverability of development contrary to Paragraphs 173 and 174 of the Framework.</p> <p>Final bullet point in the second part of Policy DS5 requires an assessment of the energy requirements of the proposed development and measures to minimise energy use and include renewable energy generation is unnecessary and contrary to Paragraph 95 of the Framework and the Ministerial Statement (Deregulation Bill 2015).</p>	<p>GE/DWH recommends the first paragraph is removed from the policy.</p> <p>GE/DWH recommend that in the absence of any clear evidence the second paragraph is removed from the Plan, or amended to add 'where necessary, reasonable and without rendering development undeliverable'.</p> <p>GE/DWH recommends the final bullet point is removed from Policy DS5.</p>	<p>Policy DS5 seeks to ensure that development comes forward within the context of an appropriate infrastructure scheme. Without such schemes, the delivery of infrastructure and services cannot be guaranteed or properly integrated into an area. Incremental proposals which do not take sufficient account of proposals for the whole site are less likely to deliver a high quality development. DS5 is considered compliant with the NPPF.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1907	Martin Herbert	Brown & Co	Edward Walpole Brown	DS5	The development strategy is inappropriate and it is not compliant with certainly the first two bullet points.		The development strategy seeks to provide a variety of sites in terms of size and location. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
1909	Paul Hill	RPS	St Modwen	DS5	Query the need for this policy and, in particular, how it should be read alongside other site specific policies for strategic sites. Should it be retained, it could be explained that this doesn't contradict or duplicate the requirements for sites allocated in the plan which already have site specific policies.	<p>If the policy is retained, the supporting text should include wording such as:</p> <p><u>“this policy only relates to sites over 100 dwellings not already in the plan which may come forward in the plan period”</u></p> <p>Should the policy be retained then detailed wording changes are required to ensure contradictions or duplications of existing site specific policies does not take place.</p>	Comment noted. Policy considered to be important in directing larger schemes that may come forward within the borough. No further action required.

1455 & 1900	Louise Steele	Framptons	DB Symmetry, Taylor Wimpey, Gallagher Estates, Richborough Estates and Warwickshire County Council	DS5	The Building Regulations control how energy efficient/sustainable a building should be and therefore this action of the policy is a duplication of existing controls and should be deleted.	Last bullet point in the second paragraph of the policy which requires that proposals for strategic sites must include: "An Assessment of the energy requirements of the proposed development and measures to minimise energy use and include renewable energy provision should be deleted.	The achievement of sustainable development is the central principle of this Local Plan. The specific characteristics of each site will determine how these requirements will be met. DS5 is considered compliant with the NPPF.
1455 & 1900	Louise Steele	Framptons	DB Symmetry, Taylor Wimpey, Gallagher Estates, Richborough Estates and Warwickshire County Council	DS5	Supporting statement submitted outlining national policy context, local planning context, site specific merits, delivery of the South West allocation and outlines mutual agreement between the named parties. Parties object to final bullet point of Policy DS5 (Comprehensive Development of Strategic sites) on energy efficiency and renewable energy as it is inconsistent with national policy (Ministerial statement 25th March 2015 on setting of technical housing standards in England forbidding "...any local technical standards or requirements relating to the construction, internal layout or performance of new dwellings".		Comment noted. Modification LP54.22 removes this text from the policy.

					paragraphs 4.45 and 4.46 of the local plan.		
1448	Nick Small	Stagecoach	NA	DS6	Stagecoach broadly supports the approach taken to rural allocations in the main. However we object to the current policy which fails to ensure that development opportunities identify and take up the opportunities for sustainable transport fully. This is necessary for the Policy to be aligned with NPPF paragraph 32, and thus legally compliant.	The Policy should be modified to require that development proposals on sites allocated in the rural area should ensure that where possible, pedestrian and cycle links are provided to maximise convenient access to existing public transport services. Stagecoach urges that Policy DS6 should be modified to read: "Provision, where opportunities are present, of links to existing pedestrian and cycle paths with the adjacent settlement, and to local public transport links, including upgrade or provision of bus stop infrastructure where required;"	Comments noted however no further action considered necessary

1431	Nick Dauncey (Jasbir Kaur)	WCC Highways	NA	DS7	<p>Reword 'Mitigation to M6 J1' in the IDP table to 'Full signalisation of M6 J1'. The following mitigation schemes which do not appear to be listed in the IDP but are identified in Table 1 of the STA also need to be included:</p> <p>Essential: M6 to Coton House Rugby Gyrotory</p> <p>Recommended: Hillmorton Road Pedestrian Crossing Leisure Centre Access Clifton Road/Lower Hillmorton Road roundabout Whitehall Road Pedestrian Crossing Butlers Leap/Clifton Road</p> <p>These developments will also be reliant upon the delivery of the Avon Mill/Hunters Lane improvement scheme and, if it is not fully funded at the time they come forward, contributions from them should be sought to aid delivery of this scheme.</p>		Proposed Appendix 3 Infrastructure Delivery Plan has been amended following consideration of this consultation response and the updated Strategic Transport Assessment (June 2017), as shown by modifications LP54.116-140.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1448	Nick Small	Stagecoach	NA	DS7	<p>Stagecoach offers its renewed strong support for the principle of this proposed allocation. Not least its proximity to a very large concentration of existing and recently created employment north of the railway line, and the A-class uses at Leicester Road, mean that development here is least likely to add great pressure to the local highways network within the town. There are considerable opportunities for walking and cycling. There is also an inherent potential synergy in developing further homes here, where a greater critical mass of demand is anchored on a single obvious new high-quality bus corridor. However, the draft Plan remains unsound inasmuch as the very great opportunities presented by this allocation to address the opportunities to create a step change in local public transport accessibility have not been explicitly set out in the Plan, or its evidence base.</p>	<p>Policy in support of the draft allocation is currently inadequate to ensure that the unhelpful legacy of the past is addressed, and that the proposals themselves build on the opportunity to catalyse the extension and enhancement of the current service 10-12 corridor. It is therefore not compliant with NPPF paragraph 17 and paragraphs 29-35, and unsound.</p>	<p>Support for site allocation noted. Development proposals to implement this allocation are required by draft Policy DS7 to ensure provision of a direct, high quality public transport link between the site and Rugby train station and town centre to the south. Detail of how this will be delivered will be decided between the local planning authority, site promoters, public transport operators and the local highways authority and will be required as supporting information to any planning application for the site.</p>

1509	Dr Gurav Joshi	NA	NA	DS7	DS7 unsound as inconsistent with NPPF. In particular fails to meet standard of NPPF para 37 on minimising journey lengths for travel to school and para 72 which requires a proactive approach to ensuring sufficient space for the new schools. Therefore DS7 should be improved by allocating space for a secondary school...		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.
1872	Rob Wells	Savills	Neyland Properties Ltd	DS7	Whilst we do not object to the proposed allocation at South West Rugby, we do object to policy requirement that fail to identify the need for the site to partially contribute to qualitative demand to provide smaller units within the borough which results in undue burden being placed on site DS4.1 through policy DS.7 to meet the Council's objective of providing such units.	The following should be deleted from the policy wording: "Employment development at this location will be provided to meet the qualitative demand for smaller units in the range of 5,000 – 50,000sq. ft., in B1c, B2 and ancillary B8 employment uses."	It is considered that the site at Coton Park East offers the most suitable employment land opportunity, in addition to redevelopment opportunities on existing employment sites, for smaller units to accommodate a mix of B uses in order to help meet a qualitative need as identified in the Rugby Employment Land Study (2015). This is especially in light of the much larger land requirement identified for B8 uses that can more suitably be delivered at the South West Rugby allocation.

1875	Michelle Simpson-Gallego	Pegasus Planning	AC Lloyd / Persimmon	DS7	Housing and employment allocation welcomed at Coton Park East; additional 4ha of employment land should be allocated as this would assist in bringing forward the smaller units referred to in Policy DS7.	Wording of the policy should be sufficiently flexible to take account of viability and demand for units in this location. Finite amount of land exists next to the motorway and it is paramount that sites in this location are prioritised for the types of industries that benefit most from accessible locations such as Coton Park East.	The overall employment land target for Rugby Borough of 110 hectares is considered to be justified by the Rugby Employment Land Study (2015) and includes flexibility above the minimum land requirements calculated from jobs growth and labour supply forecasts and past take-up projections. The Local Plan sets out how completions, existing supply and proposed new allocations meet this target and therefore no further employment land allocations are considered necessary, in particular at the risk of unbalancing the alignment of housing and employment delivery in the plan.
2003	Michael Whittaker	NA	NA	DS7	1 secondary school in North Rugby and 5 in South Rugby. The gyratory already exceeds government standards for air pollution which traffic going from North to South will exacerbate. Roads around Rokeby School too narrow for cars and coaches twice daily with no areas for additional parking. DS7 is inconsistent with NPPF paragraphs 37 and 72.	DS7 should allocate space for a secondary school in the North of the town.	Detail of infrastructure to be provided to support local plan growth is contained in the IDP which is a live document and has been updated by modifications LP54.116-140. Specifically LP54.136 outlines a requirement for financial contributions from the Coton Park East allocation to secondary school provision to the north of Rugby based on the needs arising from the site itself. Discussions are at an advanced stage between the Borough Council, County Council Education department, the Education Funding Agency (EFA) and landowners/site promoters to identify a site to the north of Rugby that the development of Coton Park East will contribute to.
2120	Michelle Simpson-Gallego	Pegasus Group	Peter Drakesford	DS7	Allocation of Coton Park East is supported.		Support noted.

None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
10	Timothy Back	NA	NA	DS8	<p>Concern in relation to the proposed scale of development, warehousing proposal and lack of infrastructure, no improvement to existing bottlenecks i.e. Blue Boar flyover A45/A4071 junction, Dunchurch crossroads or the gyratory system and further out congestion at Princethorpe- which new development will exacerbate; HGVs would have to use the Western relief road joining onto the Leicester Road to access the M6 and A14 despite Leicester Road already being at capacity with shoppers, HGVs and commuters- Rugby will come to a standstill; Thurlaston is a Conservation Area yet allowing a distribution centre 300 metres from it doesn't seem sensible; concerned that developers have already priced buildings and started advertising before the plan is approved and planning permission granted; DS8 states Cawston Woods to be a Conservation Area yet will be surrounded by housing which is confusing; building infrastructure after 30% of houses have been completed will lead to gridlock; housing should be located nearer to where people work;</p>		<p>No changes required. The Local Plan has been informed by an STA undertaken by Warwickshire County Council and consultation has taken place with Highways England, which has identified the strategic requirements to support the Plan. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. The STA June 2017 identifies that there would be a reduction of traffic flows at Dunchurch cross roads. Historic England's consultation response does not highlight concern of the impact of the development on Thurlaston Conservation Area though it does highlight that further evidence is required than provided by the brief commentary in the draft SPD which accompanied the Plan prior to the submission of any planning application for the site.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
11	Susan Waddington	NA	NA	DS8	<p>Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA.</p> <p>Re: Policy DS8 - needlessly takes agricultural land and is contrary to NPPF para.112. 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. Journeys</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>to and from the location will be car dominant and therefore unsustainable. Policy is contrary to NPPF paras. 30 and 124 and is therefore unsound.</p>		<p>greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base.
30	John Watts	NA	NA	DS8	Traffic in Rugby at peak times is horrendous; Gyrotory and Dunchurch crossroads are particularly bad and already breach air quality regulations. Traffic queuing at junction of Leicester Rd/Newbold Rd also bad. Policy DS8 is unsound as fails to meet NPPF para.30 and 124. Policy DS8 is also unjustified, greater consideration should also be given to brownfield sites before using countryside for new housing.	Delete Policy DS8	STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. The gyratory system was assessed as part of the STA; Warwickshire County Council has not identified the gyratory as a constraint on development. Improvements have been identified along the Newbold Road. It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

31	D Massie	NA	NA	DS8	Countryside within the area should not be built on whilst the developers are NOT taking advantage of the planning permission that has already been granted for the Most Site.		It is acknowledged there will be loss of agricultural land however; this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.
31	D Massie	NA	NA	DS8	Field behind home has many species, these animals are not being considered as required by NPPF para 114-119		WCC Ecology has been fully engaged, as have the WWT with further assessments to be made during any future Planning Application phase and any appropriate mitigation measures identified.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
31	D Massie	NA	NA	DS8	DS8 is unjustified. Agree with Daventry District Council that greater consideration should be given to accelerating development of brownfield sites before committing so much countryside to housing.		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

353	A Mcveigh	NA	NA	DS8	<p>Plan offers no benefit to the residents of Rugby which already has overstretched infrastructure, inadequate roads provision due to out of date modelling and the destruction of rural amenity before other opportunities have been exhausted. Plan does not respond to Rugby needs, build rate will never be achieved, goes beyond the objectively assessed needs and inflexible to respond to changes such as Brexit. SW employment site will result in increased traffic, very few jobs and a blot on the landscape. Already several logistic parks in better locations to the north of rugby and no evidence of need for logistics to the south which has inadequate road access to the north and west. SW would be better served by office development that is low level complementing warehousing. There is conflict between DS8 and the draft SW masterplan. Reduce the scale of housing, improve infrastructure and provide more employment opportunities</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p>

					<p>in proposed development. Population projections have been used as forecasts contrary to NPPF.</p> <ul style="list-style-type: none"> - Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so - why should Rugby take 2,800 dwellings on behalf of Coventry. - Particular concern over Dunchurch crossroads as air pollution in this area exceeds EU limits. Noise pollution is also very evident. Dunchurch is a conservation village and needs protection. Traffic rat-running and congestion from 5,000 homes will cause chaos. - Population projections are unstable, low net migration is the government's objective. A massive over supply of housing to labour requirements will either increase local unemployment or increase commuting. Warehousing as local industry is poorly paid. - Schools are shown on plan but what about surgeries, hospitals, dentists etc. - these are seriously overwhelmed at the moment. Plan does not seem to consider protection of local bridleways and footpaths. 		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of</p>

434	Wladek Mular	NA	NA	DS8	Threat to agricultural land contrary to NPPF Paragraph 30. DS8 contrary to NPPF Paragraph 30 (congestion)	Delete DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The Local Plan has been informed by an STA undertaken by Warwickshire County Council and consultation has taken place with Highways England, which has identified the strategic requirements to support the Plan. DS9 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. The STA June 2017 identifies that there would be a reduction of traffic flows at Dunchurch cross roads. No change recommended.
436	Heather Bradshaw	NA	NA	DS8	Policy DS8 is inconsistent with national policy to avoid excessive car journeys and air pollution caused by car traffic. Further contrary to NPPF paras. on: <ul style="list-style-type: none"> - destroying character of settlements; - proposing garden village without community support; - failure to provide community facilities; - threat to open spaces and agricultural land; - threat of flooding and noise pollution 	Delete Policy DS8. New road links, new doctors surgery and new schools to provide for new houses.	The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. IDP sets out strategy for infrastructure delivery.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
437	Richard Pell	NA	NA	DS8	<p>Requirement for housing grossly over exaggerated. Why is Rugby taking housing for Coventry? Infrastructure not capable of supporting growth. Local Plan appears to rely upon private car. There is nothing to stimulate the town centre. Lodge Farm ill-conceived uses valuable farmland. Sites with planning permission should be built out first. Where is the industry going to go?</p> <p>Object to DS8 - land between Dunchurch and rugby valuable, ancient woodland, valuable farmland. Light and air pollution will worsen. Thurlaston conservation area will only by 300m away from SW Rugby. Also poorly located for access to town centre.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
438	Oliver Pell	NA	NA	DS8	<p>Housing requirement is grossly exaggerated, no justification for accepting Coventry's housing allocation. Infrastructure incapable of sustaining the growth envisaged. Significant congestion already at peak times. No plans to stimulate the town centre as there are lots of empty shops risking the town centre becoming a ghost town. No out of town centre developments should be allowed until the town centre has no vacant units. The development in Willoughby is ill-conceived and will lead to the loss of farmland and increase traffic in the area. Existing planning permissions should be utilised before other sites built. No industry envisioned, only warehousing- the area around DIRFT has been ruined as will the area around the A45 junction at Cawston. The land between Bilton, Cawston and Dunchurch has good quality landscape, farmland and ancient woodland- which the plan will damage irreparably. Little thought has gone into the South West masterplan SPD. Coventry Road and Dunchurch will become increasingly busy, with increased light and air pollution. Thurlaston Conservation Area will be 300 metres from the developments proposed and the proposals would not make a positive contribution to its character,</p>	<p>Improve the quality of employment wanted, plan for town centre needed and measures to make the plan sustainable</p>	<p>The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>appearance and significance. The development is poorly sited for access to the town centre and railway station and is likely to increase traffic exponentially, which is unsustainable in transport terms. The Local Plan should meet objectively assessed needs with sufficient flexibility to adapt to rapid change. As proposed the Local Plan will ruin the area surrounding the historic market town. A more up-to-date assessment of housing numbers is required. If more jobs are to be created RBC must be more ambitious than advocating warehousing jobs. RBC should be encouraging the return of creative industries.</p>		
443	Rita Sherring lucas	NA	NA	DS8	<p>Policy DS8 does not satisfactory address a severe risk of flooding at the edge of development with the gardens in Lime Tree Avenue and Lime Tree Village</p>		<p>DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. Threat to agricultural land contrary to 112 NPPF. DS8 needlessly causes noise pollution contrary to para 120-124 NPPF.</p>	Delete policy DS8	<p>The Local Plan is in conformity with para 123 of the NPPF. All applications for S W Rugby will be subject to SD1 and HS5 in respect of noise and amenity. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The STA clearly shows the mitigation achieved by the south west link road against the impacts on the Dunchurch crossroads. Any new development will inevitably increase car journeys, however, as demonstrated by the STA the proposed measures as identified in the IDP will mitigate against the impacts of DS8, No amendment proposed. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. No amendment proposed. The Local Plan is in conformity with para 123 of the NPPF. All applications for S W Rugby will be subject to SD1 and HS5 in respect of noise and amenity.</p>

652	F Stubbs	NA	NA	DS8	<p>Fields at back of Montague Road flood extensively in the winter and building homes would not help the situation. Fields also home to great deal of wildlife. Area already densely populated and increase in population would stretch resources beyond the limit e.g. hospitals and surgeries. Air quality and noise would also be affected badly by the increase in traffic. Proposed relief road would cause even more congestion and pollution.. Draft policy unjustified. Agree with DDC that greater consideration should be given to brownfield sites before committing so much countryside to housing. Local plan should be improved by dropping this policy. Why is mast site not being developed?</p>		<p>DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.</p>

653	D Jones	NA	NA	DS8	Contrary to National Planning Policy para 112.	Delete Plan DS8. Build some of the houses somewhere else. Share it out a bit more to many in the same area.	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
654	Marion Abernethy	NA	NA	DS8	DS8 is contrary to NPPF Paragraph 112	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
655	P J Trewen	NA	NA	DS8	Former Rugby Radio Station Mast site has not commenced- South West allocation would enable developers to land bank sites. Conflict of interest that Rugby Borough Council and Warwickshire County Council own some of the land allocated and also being in a position to give approval for the development. Pollution levels at Dunchurch crossroads already exceed recommended levels which further housing would exacerbate, sketches enclosed of proposed changes to Dun Cow crossroads- won't make significant difference to pollution and will cause problems for large vehicles, limitations to junction size will restrict the number of cars that could use it		Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels.

					<p>effective to mitigate. Cawston Lane pretty country road that will be ruined. Traffic would use lanes around Grandborough. Damaging to health as resident would not be able to exercise on these anymore. Too dangerous with several hundred cars a day commuting on them. Lodge Farm fails sustainability objectives SA11 by increasing climate change, SA14 for not having sustainable transport and SA15 by increasing pollution. DS10 and DS8 both unsound as inconsistent with NPPF. Fails to meet para30 on traffic congestion and 124 on air quality. Also remove farmland and destroy landscape paras 112 and 109. Once land is gone cannot get it back Country cannot grow enough food for current population. Not sustainable. Lack of affordable housing SA4 also failed. Better to allow more small build projects. People born and raised truly in the rural countryside will not want to live on the Lodge Farm Estate. To improve plan requires radical amendment and further consultation. Preferably long enough consultations. Removing Walsgrave and inserting Lodge Farm at such short notice was extremely unfair.</p>		<p>Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from</p>

Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncoded proposals.</p> <p>Re: Policy DS8 - concern of gap between Rugby/Bilton and Dunchurch. Should develop out at sites with existing planning permissions and brownfield sites prior to releasing greenfield sites. Employment site will lead to increase in traffic close to the village impacting on congestion, air quality and noise pollution. Question the need for warehousing site given existing employment sites and Brexit impact on trade. Concerns over environment sustainability.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of</p>

704	Mrs F Darcy	NA	NA	DS8	<p>Transport assessment and projections are based on outdated information and not modelled in the most appropriate way. Also do not take into account current traffic movements. Some areas already operating at capacity. Additional areas of the town are in grid lock. Not clear how additional infrastructure will alleviate issues. Proposed SW spine road will not deal with huge number of shorter journeys using local roads, also not Not-South traffic. Air quality issues at Dunchurch crossroads that will deteriorate further with increased traffic. No modelling for garden village at Grandborough. Also not clear if huge employment allocation has been taken into account. Incredulous that no high level cost estimates. How can delivery and financial burden be adequately assessed without the benefit of outline infrastructure costs? Danger infrastructure costs financially unsustainable. Spine road not complete until later which would be untenable and area grinding to a halt. Lack of co-ordination. WCC have conflict of interest with land.</p>	<p>Draft Local Plan could be improved by omission of DS8, DS9 and DS10. Argument for highway and mitigation measures has not been adequately demonstrated. Fail to meet standard of NPPF para 30 and 124.</p>	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

708	Brian Day	NA	NA	DS8	An objective should be to preserve the environmental quality of the Coventry Road between the M45/A45 island and Dunchurch this is damaged by1. The proximity of the new employment allocation to the island 2. The large housing areas between the Coventry road and the public bridleway section of Northampton Lane on the approach to Dunchurch from the west.	It would be mitigated if the employment allocation is shifted westwards allowing more of a green buffer along the Coventry Road to the bridleway. The exact alignment of the section of the link road will be a crucial factor. At present it is different on different plans.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
						<p>The housing area, probably in excess of 150 dwellings will detract from the approach to Dunchurch from the west. To link the housing area to the proposed east/west link road would mean severing the well-used public bridleway. But if accessed from the Coventry Road it will further increase the traffic problems in the historic heart of Dunchurch. The housing should therefore be omitted from the proposals to the northern section of the field(s) could perhaps be used as school playing fields and the green areas freed up near Cawston Lane could perhaps be used for small housing development.</p>

Change SDC1 to specify the maximum appropriate height for housing close to the existing built up area of Rugby.	Delete Policy DS8	DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. Housing heights are a matter to be finalised by Development Control through the Planning Application process. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.

757	H Somerset	NA	NA	DS8	<p>South West proposal equivalent of a new town. Impact of cars on local roads and increase in traffic horrific. Lime Tree Village residents will not be able to drive out safely. Contrary to stated aim of creating environment supportive of the elderly. Roads do not have the capacity to cope with the extra traffic. Green area eaten up by proposed SW Rugby (DS8 and DS9) is vital green area near centre of Rugby. Much needed outdoor leisure space and much needed urban countryside, both for wildlife and to reduce town pollutants and make the air quality acceptable and liveable. Catastrophic effect on local environment. Area is very pleasant to live in. Traffic is manageable, shops are near and sufficient, and facilities are good. 5000 new properties would wreck local living environment. If additional housing is required then fell that developments such as Lodge Farm better way to increase housing.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

800	C A O'Neil	NA	NA	DS8	<p>Questions the independent of GL Hearn and the SHMA given Brexit vote and its potential impacts. No information appears to be available why Rugby should take housing on behalf of Coventry. The infrastructure plan is lacking in many areas especially education and health provision as well as transport estimates. The roads shown in the plan would be inadequate to support the plan as substantial link roads and bypasses would be needed. Dunchurch will become worse and the air pollution would give more concern than it currently does. District centre not fully described? Efforts should be concentrated on Brownfield sites and endure the "mast" site is delivered at a consistent rate. Infrastructure requirements as a result of Lodge Farm have not been considered and RBC has not undertaken its duty to care with Northampton CC and Daventry DC.</p>	<p>complete review of realistic up-to-date infrastructure needs is clearly required with a further and sensible public review and re-assessment in due course</p>	<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. 815	Ben Wright	NA	NA	DS8	<p>The proposed industrial development will result in additional traffic with 3,000 employees with car parking for 1,800 plus vehicles plus lorries. Dunchurch Crossroads is one of the most polluted areas of Warwickshire with severe public health implications in terms of air quality. Development will multiply existing congestion issues, for example traffic queues along the Rugby Road back to Bilton Grange. Residents on Rugby Road, Southam Road, Coventry Road, and Daventry Road experience severe vibration.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. South West Rugby has yet to be formally adopted therefore the parking spaces mentioned does not form part of the proposed local plan and refers to a document produced by a land promoter .Details would be formalised during the planning application stage.</p>
815	Ben Wright	NA	NA	DS8	<p>Housing needs identified in the SHMA by GL Hearn are unsound as GL Hearn acted on behalf of a developer within the South West Broad Location for a development of 600 properties whilst working on the SHMA. Treating population projections as forecasts is contrary to government policy, does not take into account the impact of Brexit, opts for a high level of housing requirement despite acknowledging</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>the uncertainty around future housing need and links population and job statistics resulting poor judgements with regards to commuting. There is no information as to why Coventry cannot accommodate its housing needs. The proposed annual completion rate would be 55% higher than the existing which is unrealistic. The infrastructure delivery plan is vague with no information on numbers of schools and GPs required- infrastructure delivery takes time and the impact on existing services is under-estimated. University Hospital Coventry is already under strain. At 30 metres the proposed buffer between Rugby Town and Dunchurch is insufficient, the South West proposal has poor transport links and the proposed industrial units are unjustified as there are constant vacancies at nearby industrial sites and contradicts the Thurlaston Conservation Area,</p>		<p>EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from</p>

822	Carol Seager	NA	NA	DS8	Widening of Dunchurch road will impact on the historic crossroads.		STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. The alterations to the junction are being led by Warwickshire County Council who will engage with the relevant statutory heritage bodies.
823	Nicholas Long	NA	NA	DS8	Dunchurch already suffers from traffic congestion; Northampton Lane and Atkinson Avenue are used to bypass the Dun Cow Crossroads, which additional houses will exacerbate. Altering the layout of the Dun Cow crossroad will not alleviate the problem. Concerns expressed in relation to road safety at the Dun Cow Junction, Rugby Road and Northampton Lane. Air quality is poor around Dunchurch as existing, which additional dwellings will only exacerbate. DS8 fails to comply with NPPF Paragraph 30 (congestion) and Paragraph 124 (air quality).	Remove DS8	The Local Plan has been informed by an STA undertaken by Warwickshire County Council and consultation has taken place with Highways England, which has identified the strategic requirements to support the Plan. DS9 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. The STA June 2017 identifies that there would be a reduction of traffic flows at Dunchurch cross roads. No change recommended.

990	Ann Wright	NA	NA	DS8	<p>Numbers of houses proposed would swamp existing communities. Developing countryside around Dunchurch risks a loss of amenity. The impartiality of the consultants who produced the SHMA is questionable as they acted on behalf of a developer within the South West broad location in the promotion of a site for 600 houses, therefore the assessment is unsound. Population projections have been treated a forecasts within the SHMA which is contrary to government policy and there has been a failure to take into account any potential impact from 'Brexit'. The SHMAs housing numbers are high, there is a tenuous link between housing numbers and employment and the Memorandum of Understanding is unjustified. The figure of 12,400 houses has been finalised without adequate consideration of government policy. 440 dwellings per year represents a 55% increase in the number of dwellings delivered which is unrealistic. The infrastructure delivery plan is insufficient and lacks the capability to hold developers to account. There are poor links to the town centre from the proposed development site meaning a reliance on cars and thus an increase in air pollution at the Dunchurch</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. 990	Ann Wright	NA	NA	DS8	<p>Draft policy DS8 is unsound as it is inconsistent with national planning policy. In particular it fails to meet the standard of National Planning Policy Framework paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. Therefore the local plan should be improved by dropping this policy. Proposal will put extra vehicles in the area which is already one of the most polluted areas in Warwickshire. Some mitigation work has been undertaken by WCC recently, but the problem has in fact become much worse. Concerned about health impacts from increased traffic from the allocation and neighbouring authorities proposals.</p> <p>We know that WCC have agreed a scheme to help with traffic at the crossroads but it will not help. Traffic congestion already exists and houses on main routes through Dunchurch suffer from vibrations of traffic.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 999	H Molyneaux	NA	NA	DS8	<p>Rugby is turning into a mini city with inadequate services, congestion and a dying heart. Please can the vision include a holistic design, work with local wildlife organisations, and refer to Milton Keynes developments who have led the way in considering energy efficient housing. Small north faced windows added minimising heat loss. A good mix of social housing and not just high end housing. Adequate off road parking as most households have 2 to 3 cars. Space for local health services, a community hub/village hall. More health services to return to Rugby as accessing Walsgrave is a nightmare. The plan will mean a massive increase in traffic, please consider the best way to minimise traffic in Northampton Lane. Adequate public transport with additional bus routes should be considered at the planning stage. Bike routes to Industry through the North of the town would be useful. Rugby Town Centre there is nothing to do and see unless you want to use financial services or buy a house. Relocation of the larger chains is a sad incitements even when charity shops are giving up. The Council needs to be radical and imaginative in its approach to reviving the Town Centre.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. Policy H1 addresses housing mix. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 1027	Brian Simpson	NA	NA	DS8	I believe DS8 is unsound as its inconsistent with NPPF para 30,123 and 124 on reducing traffic congestion and increasing air and noise pollution. I feel it is also a loss of country side and inconsistent with para 112		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1028	Joan Adkins	NA	NA	DS8	SW Rugby is an important green corridor and habitat for animals and the proposal is contrary to NPPF para.114-119. It is also agricultural land and therefore contrary to NPPF 112. Not clear if provision has been made for walking and cycling. Noise pollution likely from increased number of cars and capacity issues at local doctors surgery and St Cross hospital. Has sufficient thought been given to development already underway on the Mast site.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Relevant statutory consultees have been engaged.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1033	Lesley Dudley	NA	NA	DS8	DS8 is unjustified and more consideration should be given to stop the development on all of our Brownfield sites. Housing numbers do not add up, young people cannot afford to buy these houses. Threat to open spaces and wildlife in Britain.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations.
1068	John and Gillian Keighley	NA	NA	DS8	Plan is contrary to NPPF para.30 and will cause unbearable traffic congestion. Attention should be made to capacity of schools, medical facilities, shops and churches. Increase in population will require extra parking in and around the town. No consideration appears to have been made for increased traffic levels caused by increased levels of employment in Coventry, Birmingham and the West Midlands. The plans will destroy the character of all surrounding settlements and loss of countryside will be detrimental, pollution will increase and wildlife/natural habitats will be destroyed - we oppose the plan in its current form.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Statutory consultees have been engaged where appropriate.

1080	Beryl Chessell	NA	NA	DS8	Including DS8 is unsound because it fails to reduce congestion and improving air quality. It would increase traffic at both ends of Ashlawn Road and add to the already increased queues at Dunchurch crossroads. Ashlawn fields is a landlocked with boundaries and only access from the narrow Ashlawn Road. There would be no official vehicular access with increased traffic getting on and off the site. The proposed bus and emergency service route would be unsafe as local residents would use this to save on long journey times.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
1084	E O Howe	NA	NA	DS8	Accelerating the development of brown space should be considered before committing so much country side to housing.		The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations.
1088	Bernadette Moore	NA	NA	DS8	Schools are in the wrong place, threat to open spaces, threat to existing landscapes and wildlife. Threat to reduction of agricultural land, enormous increase in noise pollution and substantial increase in traffic congestion.		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The interim measures of an additional lane at Dunchurch cross roads

1111	Michael O'Neil	NA	NA	DS8	<p>DS8 would have detrimental impact on Dunchurch. SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA.</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of</p>

					<p>highway safety for cars and cyclists; Western relief road should have been extended to the A45 and a road from the end of Northampton Lane to the M45; insufficient retail provision; DS8 unsound as inconsistent with NPPF Paragraph 30 (traffic congestion) and Paragraph 124 (air quality).</p>		<p>deemed necessary. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1208	Robert Hale	NA	NA	DS8	DS8 contrary to NPPF Paragraphs 30, 34, 37 and 95. Dunchurch already suffers from traffic congestion at peak times, which DS8 would exacerbate, resulting in gridlock-evidenced by the recent closure of the A4071 for maintenance.	Delete Policy DS8	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
1209	June Hale	NA	NA	DS8	DS8 is contrary to NPPF Paragraphs 30, 34 and 37. The siting of a school in Cawston opposite Lime Tree Village is inappropriate as Lime Tree village is a retirement village and the school would produce congestion and highways safety issues on a narrow country lane;	Remove DS8	WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
1211	Ann Goodyear	NA	NA	DS8	Local Plan is contrary to NPPF Paragraphs 17 and 58 concerning the destruction of the character of settlements; risk of coalescence between Dunchurch and Rugby Town and the loss of Dunchurch's rural setting.		DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1212	Pippa Hall	NA	NA	DS8	Policy DS8 is a threat to open spaces and landscape, contrary to NPPF Paragraphs 57, 58, 69, 70, 73, 74 and 109	Delete DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.
1214	S R Bolland	NA	NA	DS8	I believe DS8 is unjustified, greater consideration must be given to accelerating the development of brownfield sites. The local plan should be improved by dropping this policy. G L Hearn are not independent, Dunchurch crossroads exceeds air pollution limits, and proposal has poor transport links and will add to congestions between Town Centre and Dunchurch cross roads. Projected numbers are flawed, not objective, not validated or effect or consistent with National Policy. Dunchurch is a conservation village and should be protected, population projections are unstable and massive oversupply will increase local unemployment or increase commuting. Warehousing how is this affordable as poorly paid. What about Dr's surgeries, hospitals, dentists etc.? No protection of local bridleways and footpaths.		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered

					<p>need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncostered proposals. Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS8 - needlessly takes agricultural land and is contrary to NPPF para.112. 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. Journeys to and from the location will be car dominant and therefore unsustainable. Policy is contrary to NPPF paras. 30 and 124 and is therefore unsound.</p>		<p>relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends</p>

1378 j	R Allanach	NA	NA	DS8	<p>SA Report did not form part of evidence that informed LP. 1st Draft not available until 15th Sept. Publication Draft available 22nd September. How did RBC use SA to inform Plan. Clear from papers considered by RBC meeting of 19th July that SA was to support Publication Draft and not inform. Concerns how Ashlawn rd. appears in SA. Reasons not site specific, do not address SARD PO Consultation concerns: (a) inclusion not required to meet 2031 housing target; (b) not contiguous with SWR - makes master-planning more difficult; (c) pressure on Gyrotory, Dunchurch Cross Roads, Barby Rd/Ashlawn Rd junctions Ashlawn Rd/Hillmorton Rd junctions, residential streets such as Bawnmore Rd & Percival Rd “rat-runs”; (d) SWR add to air quality problems; (e) site distant from open spaces; (f) not well served by health care provision. (g) STL to rest of the South West Rugby site costly (h) surface water flooding – (e – h would make the site economically burdensome - less attractive for development). For the purposes of this comment on the Publication Draft shall only consider points b, c, e, f and g amongst the points raised by SARD earlier in the year. Ashlawn Fields separated from SW Rugby by farmland A426 and Cock Robin</p>		<p>The role of the SA/SEA is to assess likely effects of the plan when judged against reasonable alternatives, which has been fulfilled. The SA concluded the proposed allocated development sites would have fewer significant negative effects than the alternative options considered. Land sty Ashlawn Road now benefits from planning permission visa the SoS, which determined the effects of the site on Dunchurch crossroads can be mitigated by improvements to the junction. The site had been proposed for inclusion in the S W Rugby allocation as it required the spine road network for highway mitigation. As detailed in the housing background paper the mitigation from Ashlawn rd. will now help support delivery of the spine road network so important to be included in the allocation. More generally the STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Wood - important barriers. iii) WCCs assessment concluded W Rugby location most deliverable in transport terms of the three locations tested, assumed Ashlawn Fields in all three options. WCCs analysis does not analysis impact of Ashlawn Fields site. Flawed assessment. Significant problems still identified with building on Ashlawn Fields (See Rep). Impact of the development on Dunchurch crossroads contested. RBC proposing to include Ashlawn Fields proposal and not mitigate issues it generates. Difficult to produce masterplan for the SW Rugby area that included Ashlawn Fields. Draft Southwest SPD deficient in several ways including not conforming to DS9, not indicating how sustainable transport routes will run through the site, and c) not showing how conflicts between DS9, green corridors and sustainable transport routes will be resolved. Nothing to suggest how site to West of A426 could be integrated with site to the East. Plan retains problems from failed David Wilson/Gallagher Estates scheme for Ashlawn Fields (See Rep). Preferred Option SARD stressed difficulty of providing sustainable transport route. And no local primary health care provision available for potential residents of an Ashlawn Fields.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Consequences of required engineering not acknowledge in Masterplan. Omit Ashlawn Fields from DS8. PHASE 2 raises same concerns re SA as above noted: DS8 embraces Ashlawn Fields. An alternative DS8 policy which omits Ashlawn Fields has not been seriously considered by RBC. SA Report Table A7.1 page 551 Council's reasons for selecting Ashlawn Fields not site specific, same words are used for no fewer than eight sites selected. Do no address SARD PO concerns as listed above making this land less attractive for development; WCC's transport assessment concluded that the South West Rugby location was the most deliverable in transport terms of the three locations tested. WCC' does not include analysis of specific transport impact of Ashlawn Fields site - BWB's 2014 transport assessment of Ashlawn Fields is flawed. It assumes that each house produces 0.42 departure trips during 8am 9am peak hour. WCC – 48, SARD- 0.99 comparable new housing development edge of Rugby. BWB still identified significant problems with building Ashlawn Fields – along major routes in rugby town (see rep for full summary).</p>

Additional details will be finalised at the Planning Application stage.</p>
1412	Christopher Dwyer	NA	NA	DS8	<p>Inclusion of Ashlawn Fields in draft policy DS8 is unsound - inconsistent with national planning policy. Fails to meet NPPF para 30 on reducing traffic congestion and para 124 on air quality. This proposal would place pressure on the cock robin roundabout and Barby and Hillmorton junctions. Necessary mitigation measures have not been included in the infrastructure plan.</p>	<p>leave Ashlawn Fields out of policy DS8</p>	<p>Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. (Therefore amendments not considered necessary or suitable). Furthermore land at Ashlawn Road is now in receipt of outline planning permission.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1414	Mr I Moxen	NA	NA	DS8	Policy DS8 conflicts with NPPF para.112 as it takes agricultural land unnecessarily. It also fails to comply with NPPF para.30 on reducing traffic congestion and 124 on air quality. The STA does not include several housing developments that are underway and therefore under-calls the net effect of traffic congestion within the town.		Policy has been formulated in relation to evidence base and is considered to be sound. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. Statutory consultees have been engaged where appropriate.
1420	Michelle Lines	NA	NA	DS8	As existing, there are problems with traffic congestion when travelling from Hillside to Dunchurch, with associated issue of air pollution. Traffic light adjustments at Dunchurch will not fix this issue. Development at Ashlawn Fields contravenes NPPF Paragraphs 30 (congestion) and 124 (air quality). Focus should be on housing delivery at the former Rugby Radio Station Mast Site.	Ashlawn Fields should be removed from Policy DS8	Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.

1431	Nick Dauncey (Jasbir Kaur)	WCC Highways	NA	DS8	Schemes listed in IDS essential to mitigate development impacts and lists mitigation schemes not listed in the IDS but are in STA Table 1; site promoters will be expected to support cycling through provision for cyclists within the site itself and through securing funding for the wider cycling network; developers should lease directly with stagecoach to secure high frequency bus services to the site;	<p>following mitigation schemes which do not appear to be listed in the IDS but are identified in Table 1 of the STA also need to be included:</p> <p>Essential:</p> <ul style="list-style-type: none"> Dunchurch Signposting Potsford Dam Roundabout Rugby Gyrotory Dunchurch Road Sainsbury's Roundabout Cawston Grange Drive/A4071 <p>Recommended:</p> <ul style="list-style-type: none"> Hillmorton Road Pedestrian Crossing Leisure Centre Access Clifton Road/Lower Hillmorton Road roundabout Whitehall Road Pedestrian Crossing Full signalisation of M6 J1 Full signalisation of M45/A45 A426/Central Park Drive A426 Newton Manor Lane <p>We suggest that there should also be a contingency for unforeseen impacts.</p>	Proposed Appendix 3 Infrastructure Delivery Plan and DS8 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1432	Jennie Milligan	NA	NA	DS8	<p>Concerned about proposals to build so many houses on green fields around Dunchurch. Crossroads have always been an area of congestion where levels of pollution are already too high, surely so many houses will only increase these levels. Developers have no concerns about history of Dunchurch village.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>
1434	Annie English	Warwickshire Wildlife Trust	NA	DS8	<p>Objection to soundness of South West Rugby allocation as currently proposed without further clarity on extent and nature of buffer to be provided between new development and Cawston Spinney ancient woodland. Concern with scale of development proposed and high risk to ancient woodland from recreational pressure, invasive species, predation from pets and drifting of herbicides/pesticides. Second bullet point, fifth para. Lacks clarity on what is protected from the proposed buffer, which should be at least 50m to satisfactorily protect the ancient woodland.</p>	<p>To achieve the aim of protecting Cawston Spinney, the second bullet point in the fifth paragraph needs to provide greater clarity over what will be required to protect the ancient woodland. The Trust recommends the following wording: "Specifically regarding the wider Cawston Spinney, a minimum of a 30m semi-natural buffer must be identified and maintained through proposals made in the allocation;" To better reflect research findings on protecting woodland from the impacts of development, the Trust also recommends that 30m is changed to a minimum of 50m.</p>	<p>Comment noted. Although a strong desire to maintain a 30m buffer from the council, this has been reduced to a minimum of 15m to reflect standing advice of Natural England and the Woodland Trust. Mods reference LP54.35. WCC have been fully engaged in development of the Local Plan.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1445	Steph Matthews	Natural England	NA	DS8	<p>General support of this relatively strongly worded policy. We are pleased to see outline master plans and the intention of a Supplementary Planning Document (SPD) to guide development within this allocation. In addition we are pleased to see the issues outlined in paragraphs 4.28 and 4.42 are specifically dealt with in the policy for this allocation. We are however, concerned at the lack of reference to the proximity of this allocation to Draycote Meadows SSSI, in both the SA and the Local Plan itself. There will be a need for proposals coming forward to adequately ensure there are no hydrological impacts to the SSSI as a result of any development taking place. We are unclear that this has been considered.</p>		Commend noted. Such issues will be addressed through planning application stage.

1455	Louise Steele	Framptons	DB SYMMETRY, TAYLOR WIMPEY, GALLAGHER ESTATES, RICHBOROUGH ESTATES AND WARWICKSHIRE COUNTY COUNCIL	DS8	Requirement for a “comprehensive 30 metre buffer” around the wider Cawston Spinney to “be identified and maintained through proposals made in the allocation” is also overly restrictive and unnecessary. The Natural England and Forestry Commission ‘Standing Advice for Ancient Woodland and Veteran Trees’ (April 2014) advises that a 15 metre buffer is sufficient, and refers to a planning case concerning an ancient woodland in Wessex, Four Acre Wood where a 15 metre buffer was recommended by the Inspector and endorsed by the Secretary of State. only part of the Spinney comprises an area of ancient woodland	(see above) The size and nature of buffer should be informed by more detailed assessment of the specific site, and is a matter of detail that would be more appropriately determined through the planning application process. It is therefore recommended that the policy is amended remove reference to 30 metres.	DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.

					<p>is due to migration? (Ansa: for the period 2014-2024, 64%) 3. How many extra households does that represent by 2031? (Ansa: 5300 approx., using mean household size of 2.3) 4. Excluding migration, how many extra households does that represent by 2031? (Ans: 1900, estimated), Coventry's Local Plan proposes to build some 25,000 homes in the period 2011-2031, but includes in that total (1) houses already built , 2011-2016; (2) sites with planning permission; (3) sites under construction; (4) an allowance for windfall sites. All of this reduces its new build requirement by nearly 50%. 5. Why does RBC's Local Plan not do the same? (There are many significant developments already under way, and sites with planning permission—more than 10,000 homes.) GL Hearn believe that houses need to be built at a rate of 660 dpa. As a result, they estimate the size of the working population—the labour supply—will be 64,000. 6. What do they expect to be the labour demand? (Ans: 55,000; a total of 9,000 will not have local jobs) 7. Does RBC therefore expect large-scale unemployment, or large-scale commuting? Is this “sustainable”? Rugby's Local Plan assumes that “Symmetry Park” will generate 875 jobs. 8. Why, then, does it need 1840</p>		<p>plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The justification of Coventry City’s unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick’s local plan. No alteration proposed. The Local Plan has been subject to a Sustainability Appraisal (SA).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>car parking spaces? GL Hearn's report criticises the "remoteness", "landscape impacts", and sustainability issues" associated with "Symmetry Park"; they further recommend that it requires an analysis of its "viability, sustainability and impact." 9. Has such an analysis taken place? If so, when will it be published? (Planning law is clear: "evidence should not be collected retrospectively in an attempt to justify the plan".) 10. Why was the WS Atkins report on employment land ignored, despite using more up-to-date figures than GL Hearn's? 11. Which census provides data to calibrate the Rugby Wide Area (RWA) transport network model? (Ans: 2001) 12. What areas of Rugby Borough have been used to validate the RWA model, and when? (Ans: Radio Mast site, DIRFT) 13. What data are needed to validate its application to SW Rugby? (Ans: A proper traffic survey utilising the latest methods—GPS, mobile phone tracking etc.)14. What will be the effect of the network proposals on air pollution in Dunchurch?(Ans: Net worsening. Not supposed to happen—see NPPF) 15. Why was the Blue Boar junction not modelled?</p>		<p>The proposed South West allocation has yet to be adopted through the Local Plan process therefore the promotion of land for distribution usage within the South West falls outside the Local Plan process and such matters would be considered were a Planning Application to be submitted at a future date. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p> <p>STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

1486	D Orton	NA	NA	DS8	<p>No mention of a new hospital, police station, fire station, shop, community hall. People's welfare not being taken into consideration. These things should be considered before any houses are built. Cost cannot be used as excuse as money available from Council Tax generated.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1486	D Orton	NA	NA	DS8	DS8 unjustified. Agree with Daventry District Council that greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside housing and warehousing. Therefore the local plan should be improved by dropping this policy		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>
1486	D Orton	NA	NA	DS8	Don't think seeing all the housing and warehouses which are planned for the future in Dunchurch area as different councils are involved.		Rugby Borough Council is considered to have fulfilled the requirements of the Duty to Cooperate

1498	D R Daniel	NA	NA	DS8	<p>Oppose Plan. Concern of proposals for the Dunchurch/Bilton area.. Concerns that plans shown were the property of Savills, begs the question as to whether plans are biased to developers rather than local population and the Council. Not convinced volume of housing represent a realistic likely need in area. Development of Southwest is an easy option for planners - large land parcel outside the green belt and offers large scale development with the minimum of effort. However to achieve this it has been necessary to overlook the need for local services and infrastructure. In reality Dunchurch will need to be protected from urban sprawl, compromising much of the proposed development area. Would strongly suggest that planners look at future developments where the infrastructure and communication routes are available and more direct. This would demean looking to North West, North and North East of Rugby.</p>		<p>Land promoters are able to submit plans to the Council for assessment but RBC produces its own allocations plans. . The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Coton Park East, Coton House and Gateway already allocated to North of the Town.</p>

1498	D R Daniel	NA	NA	DS8	<p>Dunchurch: Concerned development will inevitably change character of the area and engulf Dunchurch in urban sprawl. Council should re-instate commitment to protect Dunchurch's surroundings. Plans for Mast Site safeguard boundary of Clifton on Dunsmore, why has same allowance not been proposed for Dunchurch. Providing same protection to Dunchurch is essential. Greater protection and more green space should be allocated to surrounding area of Dunchurch. Propose green space South from existing Woodlands housing estate on a line to Dunkley's Farm to achieve this.</p>		<p>DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>
1498	D R Daniel	NA	NA	DS8	<p>Question scope and extent of protection of ancient woodland areas. RBC aims to protect area in accordance with national policies and the standards set out by Natural England. These also require habitat should remain connected to the wider natural environment. Plans would effectively encase Cawston Woods with little or no connections to countryside Further work needed to allocate more Green corridor space to Cawston Woods.</p>		<p>Policy NE3 makes provision for green infrastructure. Ancient woodland will be protected relative to statutory requirements in relation to buffers- this will inform future housing layouts during any future Planning Application phase.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1498	D R Daniel	NA	NA	DS8	Current plans sought to pack housing in land SW of Rugby. Several garden villages should be planned, perhaps to the North of Rugby. This would alleviate pressure on the Southwest and allow more developments which include retention of larger Green Spaces.		Development Strategy has been informed through land availability through the SHLAA process. Two allocations adjacent to the Northern Rugby Urban Area (Gateway and Coton Park East) with one allocation to the North of the town (Coton House).
1498	D R Daniel	NA	NA	DS8	If further 5400 houses required would make more sense to plan them near to commercial and retail development on the North side of Rugby.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
1498	D R Daniel	NA	NA	DS8	Any development to the SW of the scale proposed will require allowance for local services, and this is not included. Such services need to be planned as part of the proposal, despite the fact that they would further compromise the available housing development capacity.		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1498	D R Daniel	NA	NA	DS8	Suggestion that Dunchurch would get a by-pass at the cost of being engulfed in Rugby's urban sprawl and instead being congested as a focus for local services to its new modern neighbouring town. Is hardly an attractive option.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).

1514	Dr R Clark	NA	NA	DS8	<p>Number of homes around Dunchurch seems disproportionate, particular given current appalling air pollution levels caused by high volumes of traffic through the village. Dangers of fumes and impossible to avoid the pollution fully. Aware that crossroads in the village has exceedingly high levels of atmospheric pollutants. Severe problems at Crossroads noted in Air Quality Status Report 2016. Severe, consistent and ongoing problem with traffic pollution in centre of Dunchurch. Considerable body of evidence that traffic pollution such as nitrogen dioxide is associated with increased premature mortality and hospital admissions for a range of respiratory and cardiovascular endpoints. Traffic pollution will only become even worse if the proposed developments go ahead. Even proposals to mitigate traffic low will surely be inadequate given massive scale of housing expansion and currently illegally high levels of traffic and pollution. Therefore DS8 unsound as inconsistent with national planning policy. In particular fails to meet NPPF para 30 and 124.</p>	<p>Therefore local plan should be improved by dropping this policy.</p>	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 1516	E Burke	NA	NA	DS8	Rugby is a nice place to live so why do you want to ruin it by building all these houses? DS8 unjustified. Agree with Daventry District Council that greater consideration should be given to accelerating development of brownfield sites before committing so much countryside to housing. Therefore local plan should be improved by dropping policy. Don't want more lorries and cars going past me every day and like lots of green space so can walk dog.		Comment noted. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period.
1517	E Chabi	NA	NA	DS8	Dunchurch has roots in 11th Century and has several designated conservation areas and buildings. Believe that current plan does not appear to contain any significant heritage conservation measures and therefore contradicts NPPF section 12-12. Conserving and enhancing the historic environment.		The relevant statutory consultees have been engaged throughout the Local Plan process. The Local Plan contains policies to protect the Boroughs heritage.

1518	Esther Ette	NA	NA	DS8	<p>The plan is unsustainable, Rugby does not have the infrastructure to support all these additional houses, like a fully operational hospital with A&E and maternity services, manned police station, additional schools in the location required and roads etc. Air pollution in the area is already high due to the emissions from the Cemex plant. The additional traffic generated by the housing will accentuate this causing more health respiratory problems. Bilton is already getting swallowed up in urban sprawl with Cawston and will be totally lost in these plans. The traffic in Bilton is frequently congested and additional vehicles will cause gridlock increasing pollution levels. To add additional bus services should not be considered, as the ones at present are barely utilised. The only woodland that we have in the area is Cawston Woods and is home to numerous wildlife including bats, butterflies and badgers and should be designated a conservation area.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. 1520	E Fairgrieve	NA	NA	DS8	<p>Object to planned development in Cawston/Dunchurch/Thurlaston area. Concerned that number of housed people will increase without there being existing infrastructure to support them. Not convinced that plans to upgrade roads, add capacity for schools and health centres will proceed in time to meet demand. Worse even the completed plan may be based on flawed models. Can't see that new development could do anything but increase traffic density through Dunchurch. Local area will lose green open spaces. Land is currently used by residents for leisure and productive farming. Beautiful area and the established trees and wildlife and eco systems could not be replaced. If the area becomes built up we will lose important water run off capacity and it will increase risk of flooding. Since the area already floods regularly (on the A45 island) this cannot be an improvement. It has been implied that this is a quota/numbers negotiation with neighbouring Coventry. Does not seem fair that Rugby countryside should be obliterated to accommodate another district's capacity. Development is not near existing train or bus stations which does not seem to deliver any kind of sustainability improvement.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. 							<p>There is nothing before the Council that would suggested that the road will not be delivered. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1523	E Lovell	NA	NA	DS8	<p>With reference to building 285 acres of industrial estate consisting of 7 giant warehouses at Thurlaston would oppose the following: 1: Lorry movements and 3500 car movements onto the site would be a serious detriment to local Air Quality. Would deter active travel in the area. (Adding to already a dangerous road). Dunchurch already exceeds legal limits for air quality so the 'plan' is to make it worse. National Policy does not allow this - any person acquiring a respiratory problem could sue any Council that in full knowledge of this problem deliberately makes it worse. Why build more warehousing behind existing warehouses on Coventry Road that have been 'to let' and empty for years? If there is a need why can't the existing be let? Area of Thurlaston, Dunchurch, South Rugby and villages nearby have a high skill and education level. Why not propose something more aspirational? In addition, given the likely price of new housing why build it away from any likely employee catchments with few transport links in place? Why build on agricultural land that has been farmed for centuries when nearby there are sites on the same road that are brownfield - such as old quarry sites, and buildings that have been</p>	<p>Given that existing warehousing adjacent to the site is empty and has been 'to let' for years, propose re-appraising where this facility is needed. The site is in the middle of the gap between Ryton Warehouses and DIRFT - the Thurlaston site would be reliant on taking business from these sites in a more damaging environmental way - built over green fields and road only, and local roads in most directions. If the national policies were taken into account then a less damaging site environmentally would be chosen.</p>	<p>The proposed South West Rugby allocation has yet to be formally adopted. Any proposed layouts published by the site promoter are only illustrative at this stage as no Planning Application has been received. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggest that the road will not be shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>abandoned for years. Area around Cawston Wood is ancient woodland home to species. Nocturnal creatures that will be affected by the destruction of the existing dark landscape, not to mention the planned building over many badger sets - aren't they supposed to be protected? Site is on a path for migratory birds arriving at Draycote Water - light pollution from flood lighting nearby and huge expanses of car park and warehouse roofs especially when wet would likely bring large flocks of birds to ground next to motorway. Thurlaston site is on top of hill, one of highest areas in Warwickshire, and floodlit site would be in worst possible location for light pollution. National policy is to mitigate against environmental damage, nuisance, pollution and climate change, so why propose a giant transportation hub away from a railway, over a green field site and near to residential areas.</p>

1524	E Palmer	NA	NA	DS8	Excessive amount of housing units and industrial land allocation will have a significant detrimental effect on the local road network. This is totally against NPPF para 30.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

1525	E Davies-Pelc	NA	NA	DS8	Object to proposed massive numbers of houses in Dunchurch Village.		The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period
1526	Eliabeth Adams	NA	NA	DS8	Draft policy DS8 is unjustified. It clearly fails to meet the standard of NPPF para 30 on reducing traffic congestion and para 124 on air quality. Dunchurch suffers already with unacceptably high air pollution and highly congested roads. Furthermore, it fails to meet the standard of NPPF paragraphs 17 and 58 as it will destroy the character of the settlements of Bilton and Dunchurch. The threat to open spaces fails to meet the standard of the NPPF paragraphs 57, 58, 69, 70, 73 and 74. The threat to the landscape fails to meet the standard of NPPF paragraph 109. The threat to agricultural land fails to meet the standard of NPPF paragraph 112. The threat of flooding is another concern and I believe the plan fails to meet the standard of NPPF		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

1531	Eileen Knee	NA	NA	DS8	<p>The village struggles already to cope with lorries from Southam and beyond and the link road to the M45 from Daventry did nothing to improve this problem. The centre of Dunchurch is in doubt. With this junction already running significantly over capacity and air quality pollution levels at dangerous levels. The proposal for up to 5,000+ homes in the South West Rugby location will almost totally destroy the open land between Rugby, Dunchurch and Cawston. The mammoth development equal to the size of a small town is to be situated in an area with poor links to the town centre and transport connections. Although it is anticipated that good public transport links will be provided it is predictable that journeys to and from the location will be car dominated and therefore not sustainable. The plan provides no assurance that the needs of the development on this massive scale can be met.</p>		<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 1533	Eleanor Flower	NA	NA	DS8	<p>Policy DS8 is not consistent with the NPPF guidelines which state that a local plan should be:</p> <ul style="list-style-type: none"> • Positively prepared, • Justified • Effective • Consistent with National Policy. <p>The proposals for large scale housebuilding (5,000) are based on housing allocation needs for Coventry rather than Rugby. The housing is planned for greenfield sites which are currently used for agricultural purposes as well as providing additional benefits for the environment and as a much used source for recreation (walking, cycling..Etc.....). As well as the loss of valuable farmland and greenfield space, the Plan will effectively infill much of the areas between Dunchurch, Bilton, and Cawston. The proposal for the “Symmetry Park” warehousing site does not meet employment needs of Rugby. Employment particularly in such an advantaged rural location? This warehousing site will be 300m from the Thurlaston Conservation Area. We are concerned with the impact on the local infrastructure particularly from the increased traffic resulting from such an increase in housing and large freight vehicle. The crossroads in Dunchurch is already a pinch point on the local road network which won't be able to cope with the</p>		<p>The housing target is not a minimum because it is based on need. . The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>additional traffic. The main roads through Dunchurch village are already very busy at peak times and any increase in traffic will be particularly hazardous for the large number of local children who walk to the two primary schools in the village. In addition there are the detrimental effects to the environment (air quality, noise) and health from the increase in traffic and traffic congestion.</p> <p>Unsustainable pressures on the provision of schooling and doctor surgeries if the local population is increased. We ask that the Local Plan be extensively revised until it is in compliance with the NPPF.</p>		
1538	Dr P Cooper, Mr F A Cooper, Mrs B Y Cooper	NA	NA	DS8	<p>Proposal will radically alter the landscape and townscape. Unconvinced that scale of building is justified in such a concentrated area and feel the Local Plan should spread building more equally across the borough, not saturate specific areas. Question if market for c.5000 homes especially in current economic climate (post Brexit). Strategic Urban extension anticipated to lead to jobs, reduce the need for out-commuting and reliance on the private car. No way RBC or WCC can envisage or guarantee any of these things. Dangerously optimistic and not rooted in reality. No reason to suppose new or existing residents</p>		<p>The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. WCC Education and Highways, UHCW and CCG, and</p>

1557	G Norton	NA	NA	DS8	<p>DS8 inappropriate in its excessive size and location in a sensitive area that currently adds greatly to the character and local amenities of Rugby and the village of Dunchurch. Plan would hugely increase vehicle traffic and associated pollution and congestion. New road does not mitigate the effect on the Dunchurch crossroads. Unnecessarily develop a large amount of countryside and farmland. Destroying character of the area. Contribute to urban sprawl. Stated aim of plan is to avoid coalescence of Rugby town and Dunchurch, contrary to statements in the Plan the token 'green buffer' would not effectively achieve this. Overall number of new houses is greater than estimated requirements. Plan states this is to accommodate overspill from Coventry. Unnecessary increase in vehicular traffic as new residents travel to and from Coventry for work and to visit friends and family. Plans for storage and distribution site would increase heavy traffic, noise, pollution and congestion in the area. DS8 unsound as it is inconsistent with the NPPF. Policy disregards NPPF paragraphs: Traffic (30), Excessive car journeys (30, 34, 37, 95), Traffic Pollution (120, 124), Destroying character of an area (17, 58), Threat to open spaces (57, 58,</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the</p>

					<p>local people. LP constructed behind closed doors by stakeholders who benefit from the conclusions. At no stage were local people or their democratically elected representative empowered to shape their surroundings in any meaningful sense. Local Plan required to promote vitality of main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it. Local Plan fails to address the lack of vitality in Rugby town centre. Variety and quality of shops has reduced significantly over time, despite reasonable economic growth since 2010. Local Plan assumes building of thousands of new homes will improve the situation, but this appears to be little more than wishful thinking. The decline of Rugby centre as a shopping destination has coincided with significant growth in Rugby's population and multiple new housing developments. It defies logic to suggest that the proposed new development will buck the trend. Also, the LP fails to respect "the intrinsic character and beauty of the countryside". A large housing and industrial development to the South West of Rugby would completely</p>		<p>EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The proposed South West allocation has yet to be formally adopted and no Planning Application has been received so any proposals drawn up by land promoters</p>

					<p>change the character of approaching the town from the A45. Rather than meandering through farmland and past native broad leaf woodlands, visitors to the town would leave the dual carriageway and drive through suburbia. At no point in the LP has the economic cost of destroying this natural habitat been factored into the equation, both in terms of use values (recreation etc.) and non-use values (existence, bequest values etc.). Paragraph 17 of the NPPF also states that: "Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area" The key to this quotation is the objective assessment of needs. The LP fails this on multiple levels. The modelling work that has been conducted on behalf of RBC fails to meet basic standards of rigour and appears to have been accepted uncritically by the Council. Firstly, we shall consider the work undertaken by GL Hearn (GLH) to estimate Rugby's future housing needs. After many revisions and much tweaking of the data, GLH settle upon an objectively assessed need of 480 homes per annum. However, much of Rugby's demographic growth since the early 2000s has been driven by net international migration. GLH's population</p>		<p>are purely illustrative at this stage.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>projections rely upon extrapolating past demographic trends into the future. In light of June's referendum result, it appears grossly injudicious to assume that the migratory trends of the last 15 years will continue into the future. Despite this, RBC appear to wish to build 660 homes per annum - an increase of nearly 40% a year on GLH's already optimistic estimate of 480 homes. In light of this, I would urge RBC to conduct a new housing assessment that takes into account recent economic and political events. This new assessment should not be conducted by GLH, who have a vested interest (their public reputation) in ensuring that their research produces similar answers to their previous work. The econometric forecasts relating to employment needs appear to be built on even shakier foundations than the housing assessments research. GLH obtain a figure (79 ha) that varies wildly from the figure (34 ha) obtained in a similar exercise by WS Atkins. Their response to this discrepancy involves a large degree of hand waving, but little substantive reasoning to demonstrate that the higher figure is more accurate. Furthermore, both Cambridge Econometrics and Experian expect job growth to slow in the next 15</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>years. If RBC forges ahead with the plan to build 660 homes per annum, the new development will either face large scale unemployment or become a dormitory suburb for Coventry, Birmingham and other large employment centres. This scenario is clearly at odds with the stated aim of sustainable development. My final concern relates to the proximity of "Symmetry Park" to the Thurlaston Conservation Area. Paragraph 128 of the NPPF requires the local authority to " describe the significance of any heritage assets affected, including any contribution made by their setting." It is unclear how a conservation area will be "protected, sustained and enhanced" by the building of an industrial development a mere 300m from the area's boundaries. Conversely, it is likely that the conservation area will suffer from increased light, air and noise pollution. In summary, the Local Plan is an ill-thought out and poorly evidenced proposal that will do nothing to improve the character of the Rugby area or the lives of those who live there.</p>

1576	Helen Creery	NA	NA	DS8	<p>I don't doubt that more houses are needed but why not complete the development on the mast site and then assess the remaining need before destroying good quality agricultural land which this country needs for crop production with a failing economy. Green fields and open spaces are essential for the health and wellbeing of society. Likewise, delay construction of industrial units until there is a proven need - industrial units have spare capacity at present. There is a 10 year plan for DIRFT and proposed expansion of Magna Park. The construction and operation of industrial units involves noise, light and air pollution. The proposed industrial units and nearby housing do not match as warehouse operatives could not afford the housing which would be nearby. There are more graduates than in previous years – could Rugby not attract industry/research/innovation to attract a higher skill set to the town?</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All statutory consultees have been engaged.</p>

1630	Isobel Clewett	NA	NA	DS8	Policy DS8 is not consistent with NPPF para.112		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan.
1631	Ilke Cochrane	NA	NA	DS8	Policy DS8 is not consistent with national policy, in particular para.30 on reducing traffic congestion and para.124 on air quality		Policy has been formulated in relation to evidence base and is considered to be sound.
1634	Iwona Middleton	NA	NA	DS8	Policy DS8 is inconsistent with national policy to avoid excessive car journeys and air pollution caused by car traffic. Further contrary to NPPF paras. on: - destroying character of settlements; - proposing garden village without community support; - failure to provide community facilities; - threat to open spaces and agricultural land; - threat of flooding and noise pollution		Policy has been formulated in relation to evidence base and is considered to be sound. Statutory consultees have been engaged where appropriate.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1635	Isobel Norris	NA	NA	DS8	To imagine that the air quality can be reduced by building 1000's of houses with traffic routes linked with Dunchurch village centre is at best absurd. Even with a Spine road there will not be an improvement in the air quality. The volume of standstill traffic will continue to increase. The local plan in its present form needs to be rejected on its failure to take account of the public health of Rugby residents.		Policy has been formulated in relation to evidence base and is considered to be sound. Statutory consultees have been engaged where appropriate.
1636	Irene Novy	NA	NA	DS8	Policy DS8 is not consistent with national policy, in particular para.30 on reducing traffic congestion, para.112 on agricultural land and para.124 on air quality		Policy has been formulated in relation to evidence base and is considered to be sound.
1638	Ian Parker	NA	NA	DS8	Wish to register my objection to this horrendous local plan. Consultants have a conflict of interest, as do WCC who are a landowner and highways authority. Loss of Cawston woods would be a tragedy for over calculated housing, especially in light of Brexit. Congestion and air quality problems at Dunchurch crossroads are awful. The industrial units near Thurlaston appear unnecessary in view of the existence of DIRFT and infrastructure does not exist for this development - St Cross hospital would have to be fully opened and expanded.		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Statutory consultees have been engaged where appropriate.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1641	Jane and Delwar King	NA	NA	DS8	Regarding development at Ashlawn Road, we object to the size and scale of this proposal. Traffic congestion and noise/air pollution will affect us, as will traffic and noise from the proposed school. Three storey high properties on the perimeter of the site would be abhorrent visually. We support the issues raised regarding air pollution at Dunchurch crossroads.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Matters of building height would be assessed during the Planning Application stage. Relevant statutory consultees have been engaged.
1642	John Batchelor	NA	NA	DS8	Change in our quality of life will be catastrophic with noise pollution from the school caused by students, buses, cars. GL Hearn are not impartial and projections have been treated as forecasts which is contrary to national policy. Policy DS8 is contrary to NPPF para.30 on reducing traffic congestion and para.124 on air quality.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1648	John Chapman	NA	NA	DS8	Object to proposed local plan as it is unsound and not comply with government policy. The SHMA is neither impartial nor objective and is fundamentally flawed. Uncertainty regarding future housing needs and increases in traffic flow and road requirements for commuting. SW Rugby proposal will destroy open land between Dunchurch, Cawston and Rugby. Plan does not give sufficient detail regarding infrastructure in terms of roads, schools, doctors etc. Particularly concerned about air quality and high		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Infrastructure Delivery Plan details infrastructure provision.

					levels of pollution at Dunchurch crossroads.		
1651	Joe Garthwaite	NA	NA	DS8	The level of traffic down Cawston Lane has mushroomed over last 10 years as surrounding areas have been extended. Traffic in centre of Dunchurch is already at severe levels and local plan makes no attempt at improving the volume of traffic in the village, in fact 5,000 new homes will make all travel substantially worse. Policy DS8 is unsound as inconsistent with NPPF para.30 and 124.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1652	Jack Gledhill	NA	NA	DS8	Policy DS8 is unjustified - agree with Daventry DC that greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside to housing		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
1653	James Gray	NA	NA	DS8	Re: Policy DS8 - concerns over Dunchurch crossroads and its junction capacity / air quality issues. Risk of children getting to school and access to GP surgery and St Cross hospital. Inadequate consultation with local services.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All relevant statutory consultees have been engaged and assessments undertaken where appropriate, with further details finalised at Planning Application stage

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1654	Judith Hobill	NA	NA	DS8	Strong objection to proposed 5,000 houses at SW Rugby. Traffic wanting to reach Dunchurch crossroads or gyratory have major problems. Policy DS8 is inconsistent with NPPF para.30 and 124.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. Traffic flows subject to assessment by Warwickshire County Council Highways.
1660	J Moxen	NA	NA	DS8	Inclusion of Ashlawn Fields in DS8 is unsound as inconsistent with national policy, in particular NPPF para.30 and 124. Two areas of concern for air quality at Gyratory and Dunchurch crossroads. Any development would increase traffic and pollution at these points and place pressure on existing junctions where Ashlawn Rd intersects with Barby Rd and Hillmorton Rd. Also unjustified as greater consideration should be given to brownfield sites before using green land or countryside for housing as these areas improve mental and physical wellbeing of all residents.		Policy has been formulated in relation to evidence base and is considered to be sound. Statutory consultees have been engaged where appropriate and relevant assessments undertaken.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1661	Janice North	NA	NA	DS8	See no justification for further 5,000 homes, particularly if Rugby is making provision for Coventry. Infrastructure even with proposed new roads will not be able to sustain the extra traffic generated. Public services will be more stretched. Agricultural land should not be used for housing.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. A MoU distributes the OAN across the HMA to ensure it is met within the HMA. Although NBBC are not signatories of the MoU, RBC is of the view, from limited inspection of NBBC evidence that NBBC can deliver their contribution of the OAN as identified within the MoU.
1662	John Novy	NA	NA	DS8	Object to local plan in terms of its scale, underlying assumptions and devastating impact it will have on local community in terms of traffic congestion and pollution. Huge increase in traffic volumes around Dunchurch and air pollution at crossroads is unbearable and more than likely illegal. Building a further 5,000 homes will destroy open land around the village and exacerbate existing congestion and pollution, contrary to NPPF para.30 and 124. Further believe the SHMA is based on unsound foundations as consultants not independent, used outdated data and ignores impact of Brexit.		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Policy has been formulated in relation to evidence base and is considered to be sound. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1664	Jon Pedoe	NA	NA	DS8	<p>Concern with proposed development for SW Rugby as open countryside will be lost new development could badly affect the character of the local community. Recent development around Cawston has led to large increase in traffic and congestion problems in Bilton and at Sainsbury's island, which appears to already be at saturation at peak times. Consideration should be given to taking full advantage of Rugby Radio Station site and proposed development at Lodge Farm. These have the advantage of providing a much improved environment for new home owners, as well as avoiding further congestion on present road system. Greater consideration should also be given to brownfield sites before using countryside for new housing.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>
1665	J.R Cooper	NA	NA	DS8	<p>Concerned by increase in traffic and dangerous levels of pollution in Dunchurch. Policy DS8 fails to meet NPPF para.30 and 124.</p>		<p>Policy has been formulated in relation to evidence base and is considered to be sound. All relevant statutory consultees have been engaged with appropriate assessments undertaken.</p>
1668	Joe Taplin	NA	NA	DS8	<p>Object to amount of housing proposed for Rugby area. Greater consideration should also be given to brownfield sites before using countryside for new housing.</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1669	Jan van den Ende	NA	NA	DS8	Policy DS8 takes agricultural land contrary to NPPF para.112. Greater consideration should also be given to brownfield sites before using countryside for new housing. Does not comply with NPPF paras. 57,58,69,70,73 and 74.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1675	K L Frost	NA	NA	DS8	Objections to homes to SW Rugby concern: Dunchurch Cross Roads does not have the capacity to accommodate the extra traffic that will result from additional residential areas, indeed the only solution is to have a bypass that runs from north to south; residents want to keep the green and statue area in the village; the impracticalities of additional infrastructure, such as sewage works, needed to facilitate the building of new sites and subsequent detriment to the quality of life to the residents of this village; no need for housing to spread towards Dunchurch when can go elsewhere in the County; the open space ('rec') behind Atkinson Avenue must not be lost.		The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1676	Mr Craig Beech	NA	NA	DS8	Excessive highway congestion at Dunchurch crossroads which creates the unacceptably high levels of air pollution known to exist at this location. Inconsistent with NPPF para 124. The excessive amount of housing units and industrial land allocation will have a significant detrimental effect on the local road network. This is totally against NPPF paragraph 30 which seeks to reduce traffic congestion. The Borough Council cannot put policies in place which put Dunchurch residents under an increased threat of air pollution.		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF. (Therefore amendments not considered necessary or suitable).
1678	Luke Fereday	NA	NA	DS8	DS8 needlessly takes agricultural land contrary to NPPF para.112	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1679	Lisa Fereday	NA	NA	DS8	DS8 needlessly takes agricultural land contrary to NPPF para.112	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1681	Lizzie Lodge	NA	NA	DS8	I disagree with the amount of green space this plan is taking up and the volume of housing/industry proposed. I believe draft policy DS8 is unjustified. I agree with Daventry County Council that greater Consideration should be given accelerating the development of brownfields sites before committing	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

1707	Jon Parry	NA	NA	DS8	Plan does not address tendency for land behind Montague Rd to flood which is contrary to NPPF 93-104. Number of dwellings planned is significantly greater than requirement identified and poses threat to agricultural land and wildlife contrary to NPPF para.112 and 114-119.		DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1711	Joseph Welling	NA	NA	DS8	Policy DS8 takes agricultural land contrary to NPPF para.112. Policy DS8 is also unjustified, greater consideration should also be given to brownfield sites before using countryside for new housing.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

1712	Jackie Vucevic	NA	NA	DS8	<p>Object to proposed development at SW Rugby. Believe it is inconsistent with national policy to reduce congestion and improve air quality. Proposed development will significantly add to an already serious problem. Children have a right to breath clean air. 5,000 homes is a massive number of additional housing with potential for shocking amount of extra traffic commuting in and out of the area. Do not believe sufficient detail in plan about how the shortfall of school places will be addressed. This level of development does not seem at all sustainable in this respect. Projected population increases seem to be vastly exaggerated and does not consider possible effect of Brexit. Employment opportunities are fairly limited. More emphasis should be on smaller scale development on brownfield sites nearer the centre of Rugby and on affordable housing for younger residents.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. Consequences of Brexit</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1714	James Bennett	NA	NA	DS8	Policy DS8 conflict with NPPF para.112. Also para.17,30,57,58,69,70,73,74,120,123,124	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1715	Lucy Batchelor	NA	NA	DS8	Change in our quality of life will be catastrophic with noise pollution from the school caused by students, buses, cars. GL Hearn are not impartial and projections have been treated as forecasts which is contrary to national policy. Policy DS8 is contrary to NPPF para.30 on reducing traffic congestion and para.124 on air quality.		Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1715	James Harbord	NA	NA	DS8	Policy DS8 is not justified - greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside to housing. This land provides open and enjoyable recreational and agricultural space to the local area. Development of 5,000 houses will scar the area's nature and habitats and the impacts will be irreversible.	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Ecology have been fully engaged throughout the development of the plan and further ecological assessment would be undertaken during the planning application phase with any necessary mitigation measures implemented.
1716	James Leng	NA	NA	DS8	The Plan appears to seek to increase the scale of housing within and immediately surrounding Dunchurch by 5-6 times with no corresponding scale of provision of new infrastructure, nor adequate local services. Schools are already at breaking point with Dunchurch, Cawston and Bilton infants and primaries all oversubscribed. The inclusion of major industrial unit development in an area of residential nature and countryside when adequate provision for growth over the next 10-20yrs already exists at DIRFT and Magna Park is totally unjustified. Road noise and pollution levels in Dunchurch are already a problem. Plan would also result in devastatingly bad environmental consequences.	The plan should propose something more proportionate and in keeping with our local community.	WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base.

1718	Janet Tilley	NA	NA	DS8	Believe DS8 is contrary to NPPF para.57,58,69,70, 73 and 74 as the threat to open spaces is unjustified and an unnecessary overdevelopment of the local area in mind of development that has already been agreed.	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1725	Joanna Grimes	NA	NA	DS8	<p>Proposed development will impact on quality of life of those people living to the south of the town. Understand the need for new housing but not to this huge extent. The extent of the proposed development will completely alter the nature of Rugby, Dunchurch and its surrounding villages. Do not feel that is it truly necessary to commit such a large amount of countryside to housing, when it is our understanding that there are brownfield sites which could be considered as an alternative. Also concerned that the infrastructure in Rugby and Dunchurch would not cope with such increased numbers of people travelling through the town on a daily basis and impact on safety and air quality in Dunchurch village. Ongoing development in and around Rugby shows little consideration for the needs of the local people, by not providing sufficient school places for example and leaving residents with a 30 minute journey to the nearest hospital.</p>	<p>Object to plan in its current form because of the sheer size of the proposed development. Plan should be redrafted to reduce the extent of the development and do more to preserve the rural nature of Rugby and Dunchurch</p>	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

1728	Joanne Sheridan	NA	NA	DS8	<p>Council are monitoring air pollution levels outside my house on Coventry Road, Dunchurch. At the moment levels are not over the EU levels but are still high. This is obviously an average and therefore during rush hour will almost certainly be over the acceptable level. This is before anymore buildings occur with the resultant increased traffic. Therefore I feel that if you approve any further building work that increases the pollution /traffic levels in Dunchurch you as a council will be directly responsible for the reduced health of the inhabitants in Dunchurch. This is also happening at the gyratory where the air pollution is over the EU limit. The infrastructure needed to service the number of buildings you are planning would need to be built and working prior to any more traffic being produced from new houses and warehouses. Believe Policy DS8 is inconsistent with national policy in particular NPPF para.30 and 124 on traffic congestion and air quality. Greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside to housing.</p>	Delete Policy DS8	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1739	Julie Price	NA	NA	DS8	<p>I am concerned that the traffic which is already increasing along Coventry Road, and in particular Dunchurch Square, will have a negative impact on my health and that of all others due to the air pollution levels already exceeding statutory levels. Congestion is also already a significant problem, specifically during school run time and rush hour. Believe DS8 is inconsistent with NPPF para.30 and 124 on traffic congestion and air quality. The justification is completely outdated and fails to take into account anything such as the amount of unused units that are already in place in both Rugby and Coventry, the fact that the town centre requires regeneration as everything is now 'out of town', the effect of Brexit, the fact that there are many areas of land with permission granted on which houses have not yet been built and that it was only recently established that there was no housing need for our local area. I am also none the wiser as to what these warehousing units are going to be used for and who buy, nor as to what impact that will have on me in terms of additional noise, house prices, visual effect, etc. The area is already lacking in local amenities, yet there is also no mention of them in the plan. There is also no certainty as</p>	<p>I believe that others sites should be considered prior to committing such a vast amount of countryside to housing and can see no reason for the industrial warehousing requirement when there are so many empty sites and businesses already. The local plan requires improvement and modelling revisiting</p>	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 					<p>to when infrastructure and schools will be built or what impact that will have on the current infrastructure. And although we are not on a flood plain, the road at the A45/M45 roundabout is forever under water; where is all this water going to go once the countryside which is present to drain water is effectively concreted over by large warehouses and parking areas? It seems as though the plan has been put together purely based on availability of land as opposed to whether the land is fit for the desired purpose. Concerns regarding wildlife habitats, access to public footpaths, impact on cyclists using local area. The atmosphere of Dunchurch and Thurlaston conservation areas would be removed entirely by proposed warehousing development. Land near A45/M45 is only land that separates Rugby from Coventry and as used for Coventry's gain concerned as to where boundaries will lie in the future.</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1740	Julie Tayler	NA	NA	DS8	<p>I believe the inclusion of draft policy DS8 is unjustified. Greater consideration should be given to accelerating the development of brownfield sites, such as the Rugby Radio Masts site for which planning permission has already been granted, before committing so much open countryside to housing. I believe that DS8 conflicts with paragraph 111 of the NPPF; as well as paragraph 112 by needlessly taking agricultural land. The planned developments would have an enormous impact on traffic congestion and air quality and conflict with NPPF para.30 and 124. These developments would create significant additional pressure. The situation would be unsustainable, as there do not appear to be any measures in the infrastructure delivery plan to mitigate the problems in these areas. I am not convinced that the proposals for the South West Rugby spine network are viable and they would, in any case, result in the loss of even more countryside.</p>	Delete Policy DS8	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. 							<p>Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

1751	Katy Morrison	NA	NA	DS8	<p>Traffic and congestion on main road through Dunchurch is already bad at peak times with school and work traffic. Dunchurch Crossroads struggles with congestion and awful air pollution. Rugby town centre is congested at peak times and getting across town is difficult as sit in stationary traffic. Policy DS8 is unsound as it is inconsistent with NPPF para.30 and 124. Policy DS8 is also unjustified, greater consideration should also be given to brownfield sites before using countryside for new housing. The countryside to the South West of Rugby is beautiful and keeps open fields around an already heavily populated area. Why are the developers not taking advantage of the planning permission that has already been granted for the Rugby Radio Station.</p>	Delete Policy DS8	<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>
1757	Joan Peck	NA	NA	DS8	<p>Please give serious consideration into making the Rainsbrook Valley into a country park with no more housing development-after all the Rainsbrook Crematorium has been built here as well as the new houses next to Ashlawn School. Also can you make sure we have sufficient road space, drainage, doctor's surgeries, schools, and hospital capacity etc. for these new developments.</p>		<p>Comments noted - No further action required</p>

1866	Gary Stephens	Marrons Planning	Gallagher Estates Limited and David Wilson Homes (East Midlands) (GE/DWH)	DS8	Whilst GE/DWH therefore support the proposed allocation of the land for residential development within DS3, importantly there is no evidence to justify its allocation being “tied to” the delivery of other land allocated to the south west of Rugby. The land does not physically adjoin the land to the south west, nor does it visually relate to it and therefore does not share any characteristics that would require the land to be master planned as one development. No evidential justification for Ashlawn Road to contribute to the delivery of infrastructure in this area, or its delivery to be tied to the delivery of infrastructure elsewhere other than those infrastructure items that are required to accommodate the development itself.	GE/DWH would therefore recommend land at Ashlawn Road is allocated separately from Policy DS8. GE are also part of a consortium of developers and landowners with interests in the remainder of the proposed allocation who have submitted separate representations in respect of Policy DS8. Those representations relate to their land interest at Cawston which is within the proposed allocation, and confirm the land at Ashlawn Road can come forward independently.	WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
1869	Michael O'Connell	Amec Foster Wheeler	Warwickshire County Council	DS8	Support the allocation at SW Rugby but consider that the policy places an upper limit on the number of dwellings that could come forward and is therefore not consistent with the NPPF in terms of significantly boosting housing supply. Concerns about requirement to meet specific energy efficiency standards which are already covered by building regulations and therefore a duplication. WCC are a significant	Revise policy wording to refer to a minimum of 5,000 dwellings. Delete energy efficiency standards from policy.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					land owner and land in the allocation has the potential to meet significant proportion of development needs for the plan period.		
1872	Rob Wells	Savills	Neyland Properties Ltd	DS8	No objection to proposed allocation, however we do object to policy requirement that fails to identify the need for the site to partially contribute to qualitative demand to provide smaller units within the borough which results in undue burden being placed on site DS4.1 through policy DS.7 to meet the Council's objective of providing such units.	For consistency of approach and unless the site can be proven to be not suitable or capable of delivering smaller units, there should be a requirement on the site to do so. The following should be added: "Smaller units in the range of 5,000 – 50,000sq,ft, in B1c, B2 and ancillary B8 employment uses shall be provided as part of the employment development at this location."	The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment policies seek to protect existing employment land unless it can be demonstrated that a unit is no longer in demand.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1875	Michelle Simpson-Gallego	Pegasus Planning	AC Lloyd / Persimmon	DS8	Dwelling completions at this allocation will not commence in earnest until the mid to end of the plan period particularly given the number of landowners. Appropriate therefore to identify range of smaller sites in different locations otherwise may be deficient in maintaining a rolling five year land supply. How much can reasonably be delivered in the plan period at SW Rugby and how much will be beyond 2031?	A number of smaller sites should be identified to ensure housing delivery in the short to medium term. Identify contingency of additional deliverable sites which aren't large scale urban allocations. Identify safeguarded land at each of the main rural settlements to future proof the plan against rising dwelling requirements in the future.	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period.
1902	Matthew White	Godfrey Payton	Mrs Nicki Holt	DS8	The draft plan showing allocation of SW Rugby omitted an area of land approximately 4 acres known as Penlan, off Cawston Lane. This has been submitted previously as being suitable for residential and should be included within the plan. The new spine road will be of limited use for the development of this site if ransom strips are to be used to prevent access to it. Cawston Lane needs to be widened for a longer length so that development of 'Penlan' can be brought forward within the timescales of the local plan.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1903	Haydn Jones	Richborough Estates	NA	DS8	<p>Richborough Estates control land within the SW Rugby allocation site which will deliver residential development, open space, and the first section of the proposed spine network road, where allocation links with existing Rugby Road. In the main we consider the allocation and Policy DS8 to be sound however there are elements of DS8 we consider to be unsound. These include: capping dwellings requirement at 5,000 (see rep to DS3); restrictive nature of wording in relation to Masterplan SPD - suggest policy should refer to the draft or final SPD to avoid applications being held up by finalising of the SPD; energy usage - this duplicates building regulations and should be deleted as it is not necessary; Other relevant local plan policies - this wording is too vague and other specific relevant policies should be set out in this policy; conflict between wording of policy and para.4.53 re. Comprehensive development - this implies a need to submit a single planning application when the approach of the consortium and Borough Council has been to bring forward the site through separate planning applications.</p>	<p>Change "up to" to "minimum of" 5,000 dwellings in Policy DS8. Change "in accordance with" to "broadly aligned with", or "in general accordance with" where DS8 refers to Masterplan SPD. Delete energy usage part of Policy DS8. List specific 'other relevant policies'. Amend policy wording to reflect that separate individual applications will be submitted. Policy should refer to a minimum of 5,000 dwellings.</p>	<p>The housing target is not a minimum because it is based on need. . The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.</p>

					West document, which could undermine any future compulsory purchase order.		
1918	George Percy	Sworders	Keith and Kathleen Wheeler	DS8	Clients have control of land within South West allocation and specifically relating to Policy DS9. Symmetry Park plan produced by another site promoter shows a link road across the clients land and through their bungalow. Therefore concerns about delivery.	DS9 should refer to a plan where the ownership is under the control of developers by varying the plan, developers engaging landowners or extending Policy DS8 allocation area across the clients land	Land ownership is a private matter outside of the Local Plan process. The site promoters of S W Rugby have made clear that there are no constraints to delivery of the spine road network.
1919	George Percy	Sworders	Mark Tobin	DS8	The developer has misrepresented the deliverability of the site and hasn't addressed how access could be achieved over the clients land. Proposed units are shown on land the client has a right of access over. The client and developer have been in discussions but no agreement has been reached as what the developer has offered would leave the clients property unsaleable due to a compromised right of access. As such this brings deliverability into question. The client has control over a significant element of the land yet has not been engaged in the development of the South West Rugby Masterplan- this has implications for compulsory purchase powers.	Varying the plan or the developer reaching an agreement with the client.	Land ownership falls outside of planning legislation.

The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1950	Andy Larque	NA	NA	DS8	<p>The local traffic plan is poorly modelled. Out of date models have been used and case studies are likely inaccurate and ill-measured. Employment site will have an impact on Coventry road and is not well located to the town centre, railway station and buses. Believe the local plan fails to meet the standard of National Planning Policy Framework (NPPF) paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. Removes countryside which is used for running, walking, public footpaths, farming and access to woodlands, wildlife and impact on the setting of Thurlaston Conservation Area. The plans also do not 'contribute to conserving and enhancing the natural environment and reduce pollution' as per paragraph 17 of the NPPF. Questions why Rugby has taken the unmet need from CCC. Questions why the plan allocated so much warehousing and what will the impacts be of technology and Brexit. The development of health centres, schools, etc. also have little thought and will come only after the house building process which is also a concern as it is already a struggled to access them due to oversubscription. The area also lacks in local amenities. Paragraph 14 of the NPPF says 'Local Plans should meet</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 					objectively assessed needs, with sufficient flexibility to adapt to rapid change' however this is clearly not the case. no plan B should employment demand or net migration be lower than expected		
1952	A Morris	NA	NA	DS8	Draft policy DS8 is unjustified. Greater consideration should be given to accelerating the development of brownfield sites before committing such a vast amount of countryside to housing. It does not comply with paragraphs 57,58,69,70,73,74 and should be dropped from the local plan	Delete Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
1952	Arron Morris	NA	NA	DS8	DS8 is unjustified; redevelopment of brownfield land should be accelerated. DS8 contravenes NPPF Paragraphs 57,58,69,70,73,74	Remove Policy DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1953	A Oughton	NA	NA	DS8	<p>Believe the ds8 area has used the old railway line as one of its boundaries.. Own land down most of this boundary. And only heard about the proposal through the paper and should have been informed before due to impact. Considers that small business units should be developed as opposed to distribution where workers will be travelling in putting extra strain on services. Due to Brexit I believe the figures for the number of people who will need housing over the next few decades is wrong. Brexit has not been considered. -I believe brownfield sites should be fully exploited before destroying the beautiful countryside that we all enjoy</p>	<p>To make the plan sound much more transparency is needed. A much longer consultation period, people like myself that will be on the front line of this development need to be taken into consideration rather than ignored. Sites that already exist need to be fully exploited first. for example, the radio masts site that is still no way near developed and for employment area the huge Royton site that still has large areas yet to be developed. Surely Coventry and rugby council can work together to share this land</p>	<p>Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

					<p>Government policy. Dunchurch crossroads cannot cope now with the level of traffic, although a link road is proposed I can see no provision for Southam Road where I live. Currently it is hard to leave our property at rush hour times so if 5000 homes are given the go ahead it can only make it many times worse. The pollution levels are already amongst the highest in the area.</p>	<p>development should be encouraged. Until adequate proposals to solve the traffic/pollution problem in Dunchurch are produced I don't see how a housing development can be considered.</p>	<p>Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels.</p>

2013	Michael Graham	NA	NA	DS8	Concerns in relation to the impartiality of the consultants, number of dwellings forecast not being in line with government policy and would have a severe impact at Dunchurch crossroads. Proposed link road would not alleviate congestion at Southam Road.	Develop the former Rugby Radio Station Mast site	Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2016	Mr & Mrs E L Evans	NA	NA	DS8	<p>DS8 phase of the plans is very destructive of the green areas bordered by Cawston Road out of Rugby and Alwyn Road. The recreation use for walkers, dog walkers, and those who enjoy the open spaces is huge, and should not be destroyed. The 30m buffer is not sufficient to sustain the woods or to maintain the character of the woods, leave a lone conserving the wildlife. The proposed green corridor between Cock Robin Wood and Cawston Spinney is not good enough. There is a very thin line of green from Cock Robin Wood along the length of Dunchurch Road, which is really not good enough, but even then that is divided by the proposed East West link road. There must also be a Green Corridor link from Cawston Spinney to the disused railway line running to Birdingbury.</p>		<p>DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested before that the road will not be delivered.</p>

2020	Mrs E J & Mr R Larque	NA	NA	DS8	<p>We feel that any development does need to fit in with local housing needs and be in keeping with the area. This does not appear to be the case here. Possibly, the best solution should be to build on any remaining brownfield land, or land within the areas originally intended e.g. Coventry. The traffic along the Coventry Road is a particular concern for us. We are deeply worried that the increased traffic, pollution and type of vehicle would impact adversely, the noise during the construction phase would be detrimental. In paragraph 17 of the NPPF, it says 'planning should be genuinely plan-led, empowering local people to shape their surroundings'. As frequent visitors, we have not seen anything in the area to inform us of this plan.</p>		<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2033	Nicholas Jones	NA	NA	DS8	<p>G. L. Hearn cannot be considered as impartial or objective so therefore this assessment is fundamentally unsound. Population projections have been treated as forecasts within the SHMA which again is contrary to government policy, no attention has been given to future economic conditions including any impact from Brexit on future housing needs. The SHMA has opted for a comparatively high level of housing requirements despite recognising that there is a high degree of uncertainty as to future housing need. The SHMA has also taken a naive approach to links between people and jobs resulting in poor judgements with regard to commuting. Housing and employment needs from adjacent authorities should only be considered. The Mou offers no reason as to why Coventry cannot meet its housing needs or why Rugby should take 2,800 dwellings on their behalf. Therefore, the Rugby Local Plan is unsound in its assumptions on housing need. Policy DS1 states that a figure of 12,400 dwellings are needed by 2031 and has been decided on without adequate consideration of Government policy. The infrastructure plan for the provision of housing numbers anticipated is, to</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>say the least, vague with a number of uncosted transport proposals together with a presumption that developers will pay for not only transport needs but schools and health provision no information on the number of schools or GP surgeries required is given. Of particular concern is Dunchurch cross roads, whilst the construction of a South West Link Road is welcomed the scale of relief within the centre of Dunchurch is in doubt. With this junction already running significantly over capacity and air quality pollution levels at dangerous levels. The proposal for up to 5,000 homes in the South West Rugby location will almost totally destroy the open land between Rugby, Dunchurch and Cawston and despite the fuzzy promises of buffers to protect the land from the urban sprawl The Rugby Master Plan SPD demonstrates that little thought has been given to the implementation of such a proposal. The mammoth development equal to the size of a small town is to be situated in an area with poor links to the town centre and transport connections. Although it is anticipated that good public transport links will be provided it is predictable that journeys to and from the location will be car dominated and therefore</p>		<p>evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>not sustainable. The plan does not justify why provision needs to be made on a greenfield site to locate 1500 dwellings. The Strategic Transport Assessment [STA] demonstrates that the Local Plan does not fully account for the transport impact arising from the proposed Lodge Farm allocation..</p>		<p>would suggested that the road will not be delivered. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>
2035	Nicola Keers	NA	NA	DS8	<p>I believe the DS8 draft proposal is unsound as it is inconsistent with the NPPF. It does not offer a sustainable housing development solution particularly in the key areas shown below: NPPF Para 7 “ Proposal DS8 does not provide an environmental role in contributing, protecting or enhancing our natural environment. Nor will it improve biodiversity or demonstrate prudent use of resources. It will also hinder any</p>	<p>Due to the points of inconsistency with the National Planning Policy Framework above, I believe the Rugby local plan should be improved by dropping the DS8 [and also the DS9] draft proposals.</p>	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>ability to adapt to climate change as mitigation options will be permanently destroyed. NPPF Paragraph 9 “ (2nd bullet) The proposal will also destroy any chance of moving from a net loss of bio-diversity to achieving net gains for nature NPPF Paragraph 34, 35, 37 “ With no apparent balance of land uses offered, the DS8 proposal will create significant movement of people as there are no significant local employers in the area. The plan does not appear to have investigated any opportunities for incorporating sustainable modes of transport. Indeed, the DS9 proposal appears to deliver a new road without first investigating other more sustainable opportunities. NPPF Paragraph 99, 100 “ As stated above, the DS8 draft local plan does not appear to take account of climate change over the longer term. The field directly behind Montague Road is often flooded at times of heavy rain. The field acts as a natural soak-away, protecting existing houses on Montague Road. However, the plan proposes to build houses on this land. As more green areas are developed, the surface water issue is highly likely to get worse in the future. The NPPF states that local plans should be: safeguarding land from development that is required</p>		<p>local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>for current and future flood management. The DS8 draft proposal does not comply with this requirement. NPPF Paragraph 112 – The draft DS8 plan proposes development of some of the most versatile agricultural land which contradicts the NPPF Paragraph 118 – The draft DS8 plan suggests building up to the Cock Robin Wood which could have an adverse effect on the nature reserve. For example, frogs often cross my garden [I believe] on their way to the wood. Once land is developed, they will not be able to follow their migration / breeding paths. NPPF Paragraph 124 – I believe the DS8 plan fails to comply with the NPPF on air quality. With the additional planned roads and resulting congestion (eg around Sainsbury's round about and at Dunchurch Cross roads [which some people cannot avoid!]) etc., air quality is only likely to worsen. (See comments above on sustainable transportation options)</p>		
2036	Nick Burke	NA	NA	DS8	<p>The SW Rugby DS8 policy needs improvement and conflicts with paragraph 112 of the National Planning Policy Framework. The plan is needlessly developing agricultural land.</p>	<p>Policy DS8 should be scrapped.</p>	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2037	Norah Harris	NA	NA	DS8	DS8 conflicts with NPPF Paragraph 112 as it is needlessly proposing to develop agricultural land. Agreement with Daventry District Council that brownfield sites should be developed first.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.
2038	Neil McCollin	NA	NA	DS8	DS8 contravenes NPPF Paragraph 30 (reducing traffic congestion), NPPF Paragraphs 30, 34, 37, 95 (avoiding excessive car journeys), NPPF Paragraphs 120 and 124 (avoiding air pollution caused by cars), Paragraphs 17 and 58 (destroy character of existing settlements, Paragraph 70 (fails to provide community facilities), NPPF 57, 58, 69,70, 73, 74 (Threatens open spaces), NPPF 109 (threatens landscape), NPPF 112 (threatens agricultural land), NPPF 93 - 104 (threat of flooding) NPPF 123 (noise pollution).	Delete DS8	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 2041	Nicholas Duncan Elliott	NA	NA	DS8	<p>I wish to formally register my objection to the proposed redevelopment plan (Policy DS8) Dunchurch Village has witnessed increasing traffic queues at the Dun Cow junction, and fail to see how Rugby Borough Council's scheme will improve matters there. I am currently one among thousands of daily commuters that use Dunchurch as a through road to commute to and from work. Again with the proposed plan of industrial units at the A45/M45 roundabout this will only contribute to the congestion and pollution already being experienced in Dunchurch. I also believe the pollution levels currently in parts of Dunchurch exceed the EU guidelines; these too will only get worse with increased traffic from the proposed additional 5000 houses and industrial units, queuing at the Gyratory. I believe draft policy DS8 is unsound as it is inconsistent with national planning policy. In particular it fails to meet the standard of NPPF paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. Therefore the local plan should be improved by dropping this policy.</p>		<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.</p>

2043	Nigel Austin	NA	NA	DS8	DS8 conflicts with paragraph 112 of the national planning policy framework as it needlessly takes agricultural land	Scrap DS8	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
2045	Nithiya Clark	NA	NA	DS8	<p>The proposal for up to 5000 homes in this location southwest of Rugby will destroy almost all the open land between Rugby, Dunchurch, and Cawston. Despite vague promises of buffers to protect against urban spread, the Rugby master plan (SPD) shows that little thought has been given to the how any such proposal could be realised. Moreover, this large number of houses proposed at this location is in an area with poor transport links to the town centre or anywhere else by public transport. Whilst better public transport links are promised it is certain that the vast majority of journeys to and from this new development will be via cars and therefore not sustainable. In particular, the crossroads at the centre of Dunchurch is one of two of the most heavily polluted locations in Rugby borough. Whilst proposals for a southwest link road are welcome, it seems doubtful whether this would reduce traffic sufficiently to safe and legal NO2 levels. In addition, it is not certain that a relief road will be built.</p> <p>Consultants (G. L. Hearn) who</p>		<p>DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the</p>

					<p>cannot be considered as impartial or objective given that they also act on behalf of developers. I note that the SHMA treated population projections as forecasts which is contrary to government policy. Furthermore, the recent 'Brexit' referendum result seems likely to have long-term implications for housing requirement. I believe draft policy DS8 is unsound as it is inconsistent with national planning policy. In particular it fails to meet the standard of National Planning Policy Framework paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. Therefore the local plan should be improved by dropping this policy.</p>		<p>Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>
2047	Phillip Dickinson	NA	NA	DS8	<p>DS8 is unjustified as brownfield sites should be developed before building in the countryside. The proposed 5,000 homes will destroy the land between Cawston, Dunchurch and Rugby. No need for houses on greenbelt land contrary to NPPF paragraphs 73 and 74. No employment within walking distance resulting in increased congestion and air pollution. DS8 contrary to (National Planning Policy Framework Policy paragraphs 30, 34, 37, 95, 120, 124).</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Local Plan has been subject to a Sustainability Assessment.</p>

2048	P E Greenway	NA	NA	DS8	Your proposal for 5000 houses in and around the village will more than double its size and will effectively make us part of Rugby despite the silly buffer ideas. You must already know the air quality in the centre of Dunchurch is above permitted levels so the extra traffic is going to increase this drastically.		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
2049	Peter Eccleson	NA	NA	DS8	Policy DS8.The proposal for up to 5,000 homes in the South West Rugby location will almost totally destroy the open land between Rugby, Dunchurch and Cawston and despite the unsubstantiated promises of 'buffers' to protect the land from the urban sprawl. The mammoth development equal to the size of a small town is to be situated in an area with poor links to the town centre and transport connections. Although it is anticipated that good public transport links will be provided it is predictable that journeys to and from the location will be car dominated and therefore not sustainable. The STA demonstrates that the Local Plan does not fully account for the transport impact		DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. 					<p>nightmare with traffic queuing up to 20 minutes to go through the traffic lights all day long. I believe the air pollution level in the centre of Dunchurch is above the accepted EU limits and this is a health hazard for local residents. Buffer zones to separate Dunchurch from Rugby is a joke as when the leaves fall from the trees and bushes in autumn you will be able see the new development (icehouses) thirsted EU limits and this is a health hazard for local residents. How will local services cope with Schools and Doctors Surgeries. The Hospital of St Cross would not be large enough to cope with the increased population and would need expanding. Why cannot all brownfield sites around Rugby be built on by developers before farm land is considered. With the proposed plan I see no provision for recreation such as sports playing fields and parks for the increase in population. Rugby as it is has not many such amenities at the moment compared with other towns.</p>		<p>a live document and has been updated at modifications LP54.116-140.</p>

2054	Paul Jaques	NA	NA	DS8	<p>The construction of 7 warehouses and 5000 houses will severely despoil and plunder a most valuable rural landscape in close proximity to a Conservation Area. There will also be damage to an ancient woodland area. Insufficient regard has been given to traffic management issues generated by the additional houses and warehouses and the models used are not considered reliable. Insufficient regard has been given to environment issues touching flooding and pollution. Insufficient regard has been given to infrastructure touching medical services, schools and access to the town. There is limited consideration for developing the town centre of Rugby which has numerous empty shops and a very limited evening economy. The plan contravenes the National Planning Policy Framework paragraph 17 by failing to contribute to conserving and enhancing the natural environment and reducing pollution. Also (same paragraph) there has been no regard for empowering local people to shape their surroundings or to set out a positive vision for our future.</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>
