2058	Peter Oldfield	NA	NA	DS8	<p>DS8 does not meet the Standard National Policy Framework paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. The over-used stretch of the Rugby Road is already causing pollution and congestion and both of these will be greatly increased as traffic from - the new spine road will be funnelled into this stretch. Each house built in Dunchurch will generate at least two cars using this road, not to mention the 860 which, no doubt will be built along the Ashlawn Road or the warehouse park proposed on the approach to the M45 roundabout. I note there are thousands of car parking spaces planned there and no doubt hundreds of lorries involved in distribution logistics. Finally it seems that no consideration has been taken of the extremely uncertain future economic conditions which will pertain once Brexit is achieved</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need.</p>
2062	Peter Vekic	NA	NA	DS8	<p>Although I do not dispute that there is an urgent need for more housing in this country it has to be done in a planned and well thought out way - i.e. the total opposite of the current proposals. 3. Before destroying more greenfield sites all brownfield sites should be used - of which there are plenty in Dunchurch and surrounding villages.</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

2071	Paul Henden	NA	NA	DS8	<p>The SW Rugby proposal DS8 is in conflict with the NPPF Para 112 planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality. According to the Agricultural Land Classification map West Midlands Region (ALC004), it would seem that the majority of the agricultural land surrounding Dunchurch is Grade 1 “Excellent. It would be considered a reckless action to destroy British agricultural land when the country will need to generate more of its own produce after leaving the EU, rather than being held to ransom with high European imports. Another substantial fault with the DS8 plan, is the diminutive consideration for the drastic effect of increasing the traffic by 5 fold in and around Dunchurch. The roads are already heavy congested and the proposal lacks any significant attempt of addressing it.</p>	<p>The SW Rugby DS8 proposal should be scrapped and a new proposal produced based on realistic forecasts and should seek to use areas of poorer quality land. The public transport and road infrastructure need to be properly planned to reduce traffic congestion, rather than being an afterthought of an enormous house building plan.</p>	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2074	Paul Sanders	NA	NA	DS8	DS8 excessive as does not take into account of falling immigration due to Brexit lowering housing demands; half the population increase for 2013/2014 in Coventry and Warwickshire was due to international migration; no justification for taking some of Coventry's housing allocation; population projection models unstable with no consideration for lower level of net migration and potential for mass oversupply of labour; brownfield land should be prioritised as per NPPF Paragraph 17; concerns expressed in relation to worsened congestion and air quality-contrary to NPPF Paragraph 30; link road ineffective;		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs.
2076	Peter Anderson	NA	NA	DS8	I believe draft policy DS8 is unjustified. Greater consideration should be given to accelerating the development of brownfield sites before committing so much countryside to housing. Therefore the local plan should be improved by dropping this policy.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2084	Ruby Burke	NA	NA	DS8	I believe draft policy DS8 is unjustified. I agree with Daventry County Council that greater Consideration should be given accelerating the development of brownfields sites before committing so much countryside to housing. Therefore the local plan should be improved by dropping this policy. I don't understand why you need so many houses in this town, the town centre is rubbish with no shops maybe you should sort that out instead.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
2093	Louise Welling	NA	NA	DS8	DS8 conflicts with NPPF Paragraph 112 as it needlessly utilises agricultural land. Agreement with Daventry District Council that there should be greater emphasis on brownfield sites.	Policy DS8 should be removed	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2109	Louise Steele	Framptons	Louise Steele	DS8	Support the Council's acknowledgement (4.59-4.61) that there is potential for housing and employment growth targets to be revisited as this is consistent with the NPPF. We consider that significant weight should be placed on the need to support economic growth through the planning system, and that SW Rugby allocation / Policy DS8 supports this aim generally. However to be effective an earlier review of the development plan (i.e. before 2031) could be appropriate if market forces demonstrate an unmet need.	Policy wording in DS8 (introductory paragraph) should be amended to say "a new neighbourhood of up to 5000 dwellings and a minimum of 44 ha of B8 employment land..." The supporting text at para.4.52 should also be amended to, "the allocation of up to 5000 dwellings and a minimum of 44 ha (a minimum floor space of 180,000 sum) of gross B8 employment land..."	The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up.
2109	Louise Steele	Framptons	Louise Steele	DS8	Suggested policy wording amendments to DS8 to reflect reasoning given in representation to Policy DS4.	Policy wording in DS8 (introductory paragraph) should be amended to say "a new neighbourhood of up to 5000 dwellings and a minimum of 44 ha of B8 employment land..." The supporting text at para.4.52 should also be amended to, "the allocation of up to 5000 dwellings and a minimum of 44 ha (a minimum floor space of 180,000 sum) of gross B8 employment land..."	Comments noted. Details to be finalised at Planning Application Stage.

It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
2135	Tracey Smith	NA	NA	DS8	Plan lacks aspiration for Rugby beyond warehousing (which will benefit other areas) and housing (to benefit Coventry) and no plans to save the town centre; consultants have a vested interest in building work- it will be interested to see who from the Council will go into jobs in these areas; a sound plan would look to Coventry and how they have attracted hi-tech, IT and Banking to their area; Rugby is commutable from London Euston and via the M1 and has highly educated people who have to travel; why not have some ambition and save people travelling while having no aspiration beyond turning their home area into a bigger damp offering little to them; make Rugby better- don't commit us to a low skill, low paid economy with congested infrastructure and no town centre;		The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Rugby area, of which 5,000 will be in the Dunchurch area - is excessive. It is far more than is required to meet local needs or to meet Rugby's national commitments. Much of it in the Dunchurch area will be built on green field. It will destroy the historic village of Dunchurch. The traffic and pollution problems are already serious and will become worse. These issues have not been adequately addressed in the proposed local Plan. I am appalled by the warehouses proposed for the Symmetry Park Industrial Development on the A45. There are already huge warehousing complexes in this part of the Midlands with excellent road access. They will increase heavy lorry traffic and pollution, and will completely change the character of this area. Such warehouse development will provide a relatively small number of low- medium waged jobs. There is already traffic congestion in Dunchurch, especially in the centre of the village. Dunchurch is on many routes and the roads near the crossroads are already inadequate for the traffic. The proposed new housing and warehousing will greatly increase traffic causing more delays and pollution. The Plan proposes one new road and spurs, but this will not be built for many years and in any</p>		<p>period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2141	Valerie Mitchell	NA	NA	DS8	<p>case will not solve the problems.</p> <p>I wish to express my objections to the excessive number of houses proposed to be built in Dunchurch and SW Rugby and to the commercial warehousing development proposed in the area. It will destroy Dunchurch as a village with a vibrant Farmland when built over is lost for ever. Planning for development should respect the existing built and natural environment and the draft local Plan fails to do so. In particular I wish to make the following points.</p> <p>1. RUGBY PLANNERS AND COUNCILLORS MUST ENSURE THAT FUTURE DEVELOPMENT REDUCES TRAFFIC CONGESTION AND AIR POLLUTION IN DUNCHURCH</p> <p>Traffic congestion and air pollution are already bad in the centre of Dunchurch. The amount of housing and commercial development proposed for the Dunchurch area will greatly increase the volume of traffic and make congestion and pollution much worse. The air pollution in the centre of Dunchurch is already dangerous and exceeds national limits</p> <p>2. RUGBY PLANNERS AND COUNCILLORS MUST TAKE INTO ACCOUNT THE REPORT OF WARWICKSHIRE COUNTY COUNCIL ON THE HIGHWAY IMPLICATIONS OF</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. 2145	William Stubbins	NA	NA	DS8	<p>The draft policy is unsound as is not compatible with the National Planning Policy Framework (NPPF) especially paragraphs 109, & 114-119. The NPPF seeks to protect and enhance biodiversity. In particular, we are blessed in this area of South west Rugby by having a thriving community of muntjac deer in Cawston Woods. Implementation of policy DS8 would remove the habitat on which they depend. They would become extinct in this location unless policy DS8 is removed from the Local Plan, am angry that developers have not taken advantage of planning permissions that have already been granted in the Rugby area, notably at the Mast site. This approach is unequivocally inconsistent with the NPPF, in particular paragraphs 57, 58, 73, 74 and 109. This is not acceptable !</p>	<p>The selection of DS8 instead of accelerating development in brownfield sites, some of which already have planning approval, is both unsound and not justifiable. On this basis, DS8 must be removed</p>	<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2146	Rhodri Farthing	NA	NA	DS8	<p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS8 - needlessly takes agricultural land and is contrary to NPPF para.112. 5,000 homes will destroy open land between Dunchurch, Rugby and Cawston despite promises of buffers to protect from urban sprawl. Journeys to and from the location will be car dominant and therefore unsustainable. Policy is contrary to NPPF paras. 30 and 124 and is therefore unsound.</p>		<p>The South West link road is identified by the STA as being essential infrastructure to support the S W Rugby allocation. DS9 and the IDP specify the full delivery and timescales for delivery. Following the STA update amendments to DS9 and Appendix 3 IDP (ref LP 54.46 - 54.58 and LP54.120) details how planning applications for S W Rugby are considered in the context of Dunchurch crossroads and ensure the timely delivery of the south west link road. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Daventry District Council have raised concerns regarding soundness, not on Duty to Cooperate. Northamptonshire CC have requested engagement with the highway evidence in relation to DS10. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

2152	Catherine M Evans	NA	NA	DS8	<ol style="list-style-type: none"> 1. Threat to agricultural land, contrary to para 112 NPPF. Also agree with DDC look to brownfield and accelerate existing sites. 2. Threat to open spaces contrary to Paragraph 70 of the NPPF 3. Threat to landscape contrary to Paragraph 109 of the NPPF. 4. Threat to wildlife contrary to Paragraphs 114-119 of the NPPF 5. Avoidance of air pollution, contrary to Paragraph 120, 124 of the NPPF. 6. Avoidance of noise pollution contrary to Paragraph 123 of the NPPF 7. Avoidance of traffic congestion contrary to Paragraph 30 of the NPPF. 8. Avoidance of excessive car journeys contrary to Paragraph 34, 35, 37 of the NPPF. 9. Facilities are not within walking distance contrary to Paragraph 34, 35, 37 of the NPPF. 10. Destruction of the unique character of south west Rugby contrary to Paragraph 17 of the NPPF. 11. Unnecessary development over and above what is required contrary to Paragraph 17 of the NPPF. 12. Inadequate consideration has been given to the infrastructure, contrary to Paragraph 162 of the NPPF. 	remove DS8 from Local Plan	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. As such the achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2154	Robert Green	NA	NA	DS8	totally excessive, utterly undeliverable and not a sustainable development, fails to meet the standard of NPPF para 30 on reducing traffic congestion and para 124 on air quality		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. (Therefore amendments not considered necessary or suitable). Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period.
2155	Roger Gunter	NA	NA	DS8	I believe draft policy DS8 is unsound as it is inconsistent with national planning policy. In particular it fails to meet the standard of National Planning Policy Framework paragraph 30 on reducing traffic congestion and paragraph 124 on air quality. Therefore the local plan should be improved by dropping this policy.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2156	Richard Leader	NA	NA	DS8	Needlessly takes agricultural land contrary to paragraph 112 of the national planning policy frame work. Road infrastructure of Dunchurch village cannot cope with the current high volume of traffic let alone the increase caused by these proposed developments. Most traffic will not use new road.	Delete policy DS8 Take the proposed developments elsewhere if at all required in the town	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. The STA concludes that the spine road network will be a more attractive alternative to the crossroads in Dunchurch. There is nothing to suggest this isn't the case. No amendment recommended.
2158	Ron Noakes	NA	NA	DS8	Impact on Dunchurch heritage assets. Impact on infrastructure (schools, etc.) within Dunchurch and Rugby is immense, the proposal to build an excessive amount in the vicinity of Dunchurch should be contested.		All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. DS8 and the IDP both detail the education provision required to support the SW Rugby site to the agreement of WCC Education.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2162	Rachel McCollin	NA	NA	DS8	<p>Believe draft policy DS8 is unjustified for the following reasons, to avoid traffic congestion NPPF 30. To avoid excessive car journeys NPPF 30,34,37,95. To avoid air pollution caused by cars NPPF 120, 124. It will destroy the character of existing settlements NPPF 17,58. Fails to provide facilities for community NPPF 70. Threat to open spaces NPPF 57, 58, 69,70, 73, 74. Threat to landscape NPPF 109. Threat to agricultural land NPPF 112. Threat of Flooding NPPF 93 - 104. Noise pollution NPPF 123.</p>	Delete draft policy DS8	<p>Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF. (Therefore amendments not considered necessary or suitable). All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2163	Rekha Mistry	NA	NA	DS8	Believe that the local plan has not taken into account the amount of congestion it is going to cause as well environmental impact, pollution and the amount of local services that will be needed for this size of expansion NPPF paragraph 30, 120,124		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.
2165	Rodney Pitcher	NA	NA	DS8	I object because local policy DS8 conflicts with paragraph 112 of National Planning Policy Framework as it needlessly takes agricultural land	Local policy DS8 should be scrapped	It is acknowledged that agricultural land will be lost as a consequence of DS8. However, this is the case for all of the proposed allocations due to the significant lack of brownfield sites available. The Local Plan accords with 122 NPPF. No amendment recommended.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2166	Richard Stephens	NA	NA	DS8	<p>Policy DS8, does not take into account the unique characteristics of the village of Dunchurch, which it subsumes into the Rugby conurbation. Dunchurch has history dating back to Doomsday book, is mentioned by Charles Dickens and has links with the Gunpowder Plot. To become part of the South West Rugby development ignores this local history and contravenes the NPPF paragraphs 17, 58 and 126. DS8 is based on SHLAA• which was produced by Warwickshire District Council who, as owners of land, have a vested interest in the development of the land south of Alwyn Road. This document is therefore potentially biased and should have been reviewed by independent bodies.</p>	Delete policy DS8 South West Rugby and Policy DS9 to protect the character of Dunchurch	<p>DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. This is produced by RBC, not Warwickshire County Council. No amendment proposed.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2167	Robert Thompson	NA	NA	DS8	The amount proposed is too large, being built on green belt and will grossly impact on traffic congestion. Plan is influenced by large subsidy's that the council receives from the government.		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
2168	Richard Veys	NA	NA	DS8	Impact on Cawston Woods and wildlife in it is not quantified in the report. This is an important local resource which is being ignored. Planning model does not use an up to date traffic model. As a resident I can see that the traffic around Dunchurch has significantly changed in the last 8 years with marked peaks and troughs. Does not take into account during the building phase most traffic will go through the traffic lights at Dunchurch.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. D8 contains specific requirements regarding a buffer around Cawston Wood. Additional modification LP54.35 and LP54.43 require a woodland management plan to be contained within the SW Rugby SPD and to support planning applications.

2170	Rachael Close	NA	NA	DS8	<p>Recognise requirement for development and that opportunities exist in the SW Rugby area to contribute to this development and the future of the borough. Concern surrounds scale of development. Do not believe warehousing development that is included as part of the plan is consistent with rural nature of Dunchurch & Thurlaston, significant noise & light pollution to this rural/ village community, buildings are not consistent with the existing landscape or natural habitat, nature of jobs not significantly beneficial to long term employment and skills of local residents. SW Rugby area one of the remaining rural areas in the borough, the other edges of the town are already the locations for retail or industrial development. Brownfield should be explored first. Although has access to M45/A45 access to M6 is through town on already congested routes. Proposed SW Link road would disperse traffic to Leicester rd. and Ashlawn Rd which are already congested. Would also make Dunchurch crossroads worse - make air pollution worse. Traffic modelling does not show concerns are unfounded proposals will mitigate my concerns or improve matters. Housing proposals are out of proportion with the existing rural</p>	<p>Local plan should maintain this distinction between areas of the borough and concentrate industrial development in those areas that have already been developed for this purpose</p>	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. Proposed Appendix 3 Infrastructure Delivery Plan and DS8 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The ES identifies SW Rugby as a deliverable location for the employment growth. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>

					communities and should be scaled back significantly to ensure the rural status of Dunchurch and Thurlaston is maintained. Housing also out of proportion with surrounding area. significant areas of woodland that will suffer		
2171	Richard Garside	NA	NA	DS8	Fails to meet NPPF para 30 on reducing traffic congestion and para 124 on air quality. Bringing cars to an already built up area seems not well thought through.		The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2172	Robert Anstruther	NA	NA	DS8	Suffer issues getting in and out of my drive and there is an abundance of traffic. Agree with DDC more acceleration of brownfield land before committing countryside.	Delete DS8	DS8 and DS9 are supported by a full updated STA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The STA clearly shows the mitigation achieved by the south west link road against the impacts on the Dunchurch crossroads. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations.

2172	Robert Anstruther	NA	NA	DS8	fails to meet NPPF para 30 on reducing traffic congestion and para 124 on air quality	Delete DS8	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The STA clearly shows the mitigation achieved by the south west link road against the impacts on the Dunchurch crossroads. This demonstrates meeting the requirement of NPPF 30 and 124. No amendment proposed.
2177	Steve & Tracy Brown	NA	NA	DS8	Strongly object to DS8 when Radio Station has permission which developers not taking advantage of. Will totally destroy the countryside & open land we have surrounding our village & it is to be situated in an area with poor links to the town centre & transport connections. Agree with DDC about building on brownfield land. Strongly object to DS8	Local plan should be improved by dropping this policy.	All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. As demonstrated in the SHLAA there is extremely limited capacity of brownfield land requiring the release of greenfield sites.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2179	Sarah Coulon	NA	NA	DS8	<p>Increase hugely the volume of traffic passing these cottages, and it will also obliterate the countryside which attracted us to this area originally. Volume of traffic travelling along Rugby Road into Dunchurch making it difficult to exit our driveway at peak times. DS8 fails NPPF 30 re traffic congestion and NPPF para 124 on air quality. Agree with DDC regarding greater consideration accelerating brownfield sites.</p>	<p>Local plan should be improved by dropping this policy.</p>	<p>As demonstrated in the SHLAA there is extremely limited capacity of brownfield land requiring the release of greenfield sites. 2180	Stuart Ette	NA	NA	DS8	<p>The objection is based on the following: Loss of identity to the historic villages of Dunchurch and Bilton, to urban sprawl.</p> <p>The plan is unsustainable as Rugby does not have the infrastructure to support all these additional houses. The road network around the town has major failings and pinch points at present, where traffic just grinds to a halt on a daily basis. Air pollution in the area is already high due to the emissions from the Cemex plant. The additional traffic generated by the additional housing will accentuate this causing more health respiratory problems. The only woodland that we have in the area is Cawston Woods and is home to numerous wildlife including bats, butterflies and badgers and should be designated a conservation area. It should not therefore be surrounded by houses but boarder open countryside around.</p> <p>Rugby does not have an adequate hospital to support its existing population, yet alone the additional 12, 000 homes. There are no A&E facilities at St Cross, with people having to drive to Coventry to the already overloaded facility there. Full A&E should be instated at Rugby prior to acceptance of the plan. This service should be reinstated forthwith. Likewise for the maternity</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. All sites proposed are required to maintain a 5 year land supply throughout the plan</p>

2187	Sarah Gray	NA	NA	DS8	Have an adverse negative impact on Dunchurch and the surrounding areas. Impact on Dunchurch historic core, air pollution at crossroads at Dunchurch is already at dangerous levels. Local schools, GPs and hospital already struggling.		The IDP contains details of the infrastructure necessary to mitigate against the impacts of the growth as agreed by the service providers. .The STA clearly shows the mitigation achieved by the south west link road against the impacts on the Dunchurch crossroads reducing congestion and improving air quality. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
2187	Sarah Gray	NA	NA	DS8	I agree with Daventry District Council that greater consideration should be given before brownfield sites are committed to so much countryside housing. This is an opinion shared by Northamptonshire County Council. Is this why they haven't been adequately consulted? The people of Dunchurch are hugely disappointed in their elected officials who have shown little leadership, knowledge or participation in consultation events. The Council has cleared the roadside by Rugby Road on the entrance to Dunchurch that many feel is the start of the development		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DDC and NCC have not raised objections in relation to the Duty to Cooperate and have only commented on issues of soundness.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2226	Barbara Cull	NA	NA	DS8	<p>Concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. SHMA has opted for a comparatively high level of housing requirements, and has also taken a naïve approach to links between people and jobs resulting in poor judgements with regard to commuting. No justification in MOU why Coventry cannot meet its own need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is clearly not the case with the housing and employment decisions taken on behalf of Coventry. Housing target is impossible to achieve. Infrastructure plan is vague with number of uncostered proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road will be delivered by 1500 this is all too little too late and ignores the recommendation of the STA. Concern that the road will be funded by developers</p> <p>Re: Policy DS8 - will almost totally destroy the open land between Rugby, Dunchurch and Cawston and, despite the fuzzy promises of</p>		<p>Independent consultants G L Hearn produced the SHMA and the subsequent updates for the entire Housing Market Area (HMA). Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The achievements of the plan are considered to be consistent with the requirements of the NPPF and the evidence which informs the Local Plan. Therefore no amendments considered necessary. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of</p>

					<p>buffers, will fail to protect the land from the urban sprawl. Loss of agricultural land, poor transport links to the town centre and transport connections. Though good public transport is anticipated majority of journeys will be private car therefore not sustainable.</p>		<p>Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2227	Bridget Durrant	NA	NA	DS8	<p>DS8 is inconsistent with national planning policy. Paragraph 101 of the national planning policy framework bans local authorities from zoning areas for housing if " there are reasonably available sites appropriate for development in areas with lower probability of flooding "</p> <p>Adding roads, houses and asphalt drives to the area behind Montague rd. can only add to the risk of flooding. Policy ds8 needlessly takes agricultural land contrary to paragraph 112 of the national planning policy framework</p>	Therefore development in this area should be removed from the local plan. Delete policy ds8	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
2228	Bridget Rothwell	NA	NA	DS8	<p>Need identified is based on estimation and doesn't take account of economic change and Brexit. The demand for houses needs to be updated given this major change and only smaller schemes committed to until there is more economic certainty of local need. Warehousing creates low income employment and this is reducing due to the motorisation of the industry. Rugby lacking in technical expertise, engineering, manufacturing and creativity instead of warehouse and retail parks. Significant development over 15 years with no justification for Green Belt land being sacrificed for Coventry. Doesn't see how Coventry's quota fits with the local</p>		Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. The Local Plan seeks to allocate 110 hectares of employment land based on a number of factors identified within the evidence base such as average rates of past employment land take-up. Employment mix is informed by the Employment studies contained within the evidence base. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West

					<p>Rugby requirement. Where will all the people work Rugby already has transport congestion issues at Dunchurch lights, the gyratory system, and railway terrace station bridge. Even with a new road (assuming it ever gets built) Rugby centre will continue to be a traffic bottleneck. Additional jobs in Rugby won't support this amount of housing which means more traffic and more commuting going somewhere. Is there essential services to be provided beyond road infrastructure, risk that developers will build pockets of housing falling short on the number that requires them to build the road infrastructure this will impact on pollution and roads. Bypass is a great road until it hits the school traffic jam at the end of it and around Elliott's Field Retail Park adding more chaos at increasingly more frequent periods of the day. Reconsider development in the area in view of a more realistic figure around job creation and local need.</p>		<p>Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. The gyratory system was assessed as part of the STA; Warwickshire County Council have not identified the gyratory as a constraint on development. Impact of development on wider road network has been assessed as part of the STA.</p>

2244	Claire Garside	NA	NA	DS8	<p>Questions why Rugby Radio Station site is not being built out instead building on countryside and causing roads to become gridlocked. Homes should be built where employment opportunities are otherwise there will be congestion and environmental impact. Nonsense that up to 1500 houses could be built (3000+ cars) before any new road will be constructed to alleviate the congestion. Is there sufficient jobs for the growth. SW is on open land is excellent agricultural land and ancient woodland and a place for many around Rugby to enjoy open spaces and the rich wildlife the area offers. Envisage a mass of urban sprawl that completely destroys the character of our town. Warehouse close to Ryton, pollution from lorries will contribute to the already extremely high pollution levels and also flood risk issues. Local Plan goes way beyond the objectively assessed needs for housing and doesn't have a plan for changes to the migration levels (which is quite possible post BREXIT) or if employment demand falls below target. The National Planning Policy Framework document says that 'Local plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change'. Ours does not.</p>	<p>I want my feelings to be heard. I do not believe that this plan is in the interest of local residents and I am not convinced councillors are serving our interests as our elected representatives</p>	<p>All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead</p>

2268	E Elliott	NA	NA	DS8	<p>Particular issues with the Rugby Urban Edge proposed allocation South west to provide 5400 homes beyond Bilton and Cawston. Plan is unsustainable as Rugby does not have the infrastructure to support all these additional houses, like a fully operational hospital with A & E and maternity services, manned police station, additional schools in the location required and roads etc. Air pollution in area is already high due to the emissions from the CEMEX plant. Additional traffic generated by the housing will accentuate this causing more health respiratory problems. Rugby does not have adequate hospital to support existing population. Additional 12,000 homes with no real A & E facilities at St Cross is unacceptable. Traditional village of Bilton is already getting swallowed up in urban sprawl with Cawston and will be totally lost in these plans. Traffic in Bilton frequently congested so additional vehicle movements will cause gridlock, and thus increase pollution levels. Why does Rugby restrict access at junctions when it is not necessary again causing more congestion e.g. near Ashlawn School with junction between Ashlawn Road and Hillmorton Road there used to be 2 lanes so traffic could turn left without having to wait for</p>	"	<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The STA clearly shows the mitigation achieved by the south west link road against the impacts on the Dunchurch crossroads addressing the congestion and subsequent air pollution. NPPF para 30 and 124 are met. No amendment proposed.

704	Mrs F Darcy	NA	NA	DS9	New SW spine road not planned in IDP until end of plan period. Essential to avoid the issue of large numbers of HGVs navigating Dunchurch crossroads so unlikely employment development in the SW could realistically be available to the very end of the plan period in any event.		The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
704	Mrs F Darcy	NA	NA	DS9	SW spine road has significant net negative sustainability score. Proposals are inadequate. Loss of green space and farmland. Valuable habitat for wildlife and ecology. Fields lost by proposal provide for walking and exercise opportunities as well as enjoyment of countryside. Loss of agricultural land. Other areas of brownfield land that could be developed, this hasn't been adequately explored. Need to be more demanding in progressing delivery of currently approved planning consents/allocations.	Draft Local Plan could be improved by omission of DS8, DS9 and DS10. Fails to meet NPPF para 17, 30, 57, 58, 69, 70, 73, 74, 112 and 114-119	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. Sites have been appraised on a consistent basis utilising Phase 1 Habitat survey. Further detailed Ecological reports will be submitted as part of any future applications.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1112	Clive Davies	NA	NA	DS9	SWLR will be delivered by 1500 homes - bit late and wishful thinking for a junction already running significantly over capacity, with air quality pollution levels at dangerous levels, according to EU legislation. RBC reckless indifference to the quality of Dunchurch resident's lives by choosing to ignore the conclusions of the STA.		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA to the satisfaction of the highway authority.
1378	Richard Allanach	NA	NA	DS9	No evidence to demonstrate DS9 will be delivered within the plan period, if at all; STA was not released for scrutiny during Christmas 2015 consultation; examination of PowerPoint slides released by WCCH suggests WCCH expect DS9 to be delivered although requested a detailed review into deliverability of both South Eastern and South Western link roads as they both cross railway land; due concerns that RBC would press ahead without a proper evaluation of the options local residents attended WCC Security committee 9 March 2016- respondent quotes minutes from that meeting which state that WCC require further investigation to see if road mitigation measures could be delivered; STA not available when RBC prepared publication draft of Local Plan as document not released until September 23 2016, Work recommended by WCC in December 2015 and classed as 'vital' in March	Therefore policy DS9 should be withdrawn from the Local Plan and as policy DS8 is dependent on the connection to the Western Relief Road this policy too should be withdrawn. The Publication Draft of the Local Plan identifies sites for 20,119 houses. Policy DS1 states that 12,400 houses should be provided. Policy DS8 can be withdrawn without changing policy DS1.	STA was published alongside the September 2016 Publication Local Plan and available in excess of 6 weeks alongside the Publication consultation. The work of which informed the proposed allocation of DS8 and DS10. DS9 and IDP detail the phased delivery of the spine road network alongside the housing trajectory. Currently the land required to deliver final part of the alignment is outside the site allocation boundary. The Potsford alignment is required to be delivered by 2031, as identified in the IDP, and it is considered that this land will be secured by WCC within the timescales required. A separate connection can be made in place of Potsford Dam, if needed, via B4642. There is nothing before the Council that would suggested that the road will not be delivered.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>2016 has not been undertaken, respondent quotes local plan on DS9 then states that Policy DS9 contravenes NPPF paragraph 154 “Only policies that provide a clear indication of how a decision maker should react to a development proposal should be included in the plan”, respondent quotes green belt constraints identified on delivery of DS9 by WCC- concern that details weren't confirmed prior to publication draft consultation; expansion to the South West would overload Potsford Dam roundabout suggesting its signalisation would be necessary which due to the alignment of the road and presence of railway bridge would create safety risks, alignment of B4642 would preclude a green buffer between the former railway line and Cawston Spinney, Policy DS9 contains two contending road alignments neither of which have been demonstrated to be feasible and one of which is known to pose safety risks. The inclusion of two possible road alignments does not offer the benefit of certainty to developers that the NPPF seeks to ensure. Rugby Borough Council’s case for a south western expansion of Rugby rests on achieving a connection between their proposed “SUE” and the Western Relief Road south of</p>		

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Potsford Dam Farm; Warwickshire County Council had raised doubts on the feasibility of this connection as early as December 2015; In March 2016 Warwickshire County Council stated that work on assessing the deliverability of this option was “vital” to ensuring that the Publication Draft was “viable and sound”; An assessment of the feasibility of this connection has either not been carried out or, if carried out, not published; and As a consequence policy DS9 does not provide clarity for developers and cannot be held to be effective as it is not known whether or not it can be implemented.</p>		
1431	Nick Dauncey (Jasbir Kaur)	WCC Highways	NA	DS9	<p>Preferred option for Strategic Link 2 (North to South) Option 1 - A4071 Potsford Dam Connection comprises a connection onto the A4071 south of Potsford Dam roundabout (Option 1) for the reasons outlined in paragraph 1.30 of the STA. provides considerable safety benefits WCC will submit further evidence on safety to support this view. Traffic & Road Safety Team would be strongly opposed to any further traffic using proposed signals on B4642 Coventry Rd which would arise under Option 2, and have recommended that Option 1 should be taken forward. WCC will provide further technical note on this.</p>		<p>Proposed Appendix 3 Infrastructure Delivery Plan and DS8 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

1489	David Ralph	NA	NA	DS9	<p>Plan for road improvements vague in the Plan. RBC should have a good, workable, sustainable plan for transport improvement for the whole of the area and require develops fund it. Not just piecemeal bits in the immediate vicinity of their interest. Their development will add traffic to the whole Rugby congestion problem, not just at their immediate front door.. No thought in the plan for a joined up proposal nor timetable to improve transport infrastructure around Rugby and Southwest specifically. Need for houses is highly suspect. RBC has to start with an effective traffic plan which is not evident in this Local Plan proposal.</p>		<p>WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124).</p>

1489	David Ralph	NA	NA	DS9	<p>Air Quality - Two worst points, Dunchurch crossroads and the gyratory do not have any planned mitigation proposed in the Local Plan. Ashlawn Road proposed traffic mitigation is to add a 3rd lane southbound of A426 at the Dunchurch crossroads to supposedly ease congestion.. Even if it works, which is highly unlikely, this will lead to an increase in the number of vehicles and the resultant pollution will increase, not decrease. Appears to be reliance on car manufacturers producing more efficient/less polluting vehicles, but the volumes of cars will exacerbate poor air quality.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The gyratory system was assessed as part of the STA; Warwickshire County Council have not identified the gyratory as a constraint on development.</p>

					<p>and creating worst pollution in Rugby area. Would rip to potentially dangerous level for people who live here and environment. Loss of productive farmland and wildlife habitats. Dunchurch is protected village with historic buildings and cottages, a memorial, a village green, the stocks, the church, coffee shops. Propel visit for these things and there are walkers and ramblers. More development nearby would ruin this and village would be lost in urban sprawl. Hospital in Rugby always busy. What about schools, GPs and Dentists? Proposed development not to meet Rugby's own housing need which is already met but to cater for overspill from Coventry. Why was the Walsgrave site removed from the plan. Why can this not be reinstated. Is Dunchurch and history not worth protecting. Does our country not want to preserve its buildings and heritage where possible?</p>		<p>suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1517	E Chabli	NA	NA	DS9	<p>Large proportion of traffic travelling through the Dunchurch crossroads runs from Rugby centre in the Southam direction towards the M1 and M40. Vulnerable people live in the village yet the pollution at the cross-roads already higher than EU limits. Crossroads are a congested pinch point and the proposed road plan does not reduce traffic levels at the cross roads themselves.</p>		<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1517	E Chabi	NA	NA	DS9	<p>If massive traffic gridlock and pollution occurs at the cross roads due to local plan policies DS*, DS9 and DS10 conservation sites will be put at risk of degradation and damage. Transport modelling contradicts village residents' understanding of local traffic flows. Currently proposed link road does not address the demand for north-south routing in the Southam direction. To place a secondary and primary school along Cawston Lane plus additional 3 schools in the plan will cause traffic chaos along Cawston Lane, especially at pick up and drop off times. Traffic from Lodge Farm Village will run directly on to A45 up to afflicted Dunchurch cross-roads rather than underused M45. Draft plan for DS8 is unsound and contradicts NPPF para 124.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggest that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

					<p>necks further back. Do not need any more congestion, it's bad enough. Especially in light of Brexit. Cawston has grown beyond belief - infill housing has continued to increase in and around Dunchurch and Rugby. Think about the environment, residents, safety, pollution, green land. Enjoy riding and walking and soon there will be no fields left to enjoy in this area. Plus the local habitat for animals and creatures. Not pleasurable with constant noise and pollution from traffic.</p>		<p>been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).Consequences of Brexit on household projections not yet clear. Government maintains that local planning authorities must ensure continue working towards up to date adopted local plan. Household projections are the starting point for arriving at housing need. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
1522	E Kirkland	NA	NA	DS9	<p>Part of the Strategic Transport Assessment (STA) contains the proposal that a South West Link Road will be constructed that may reduce pressure on the Dunchurch (Dun Cow) cross roads. However, information, that the construction of this road would not be started until at least 1500 new dwellings have been erected in the area, is of major concern and suggests that the funding for the road may be dependent on developers paying for it. That, it seems to me, is a bit late and rather too full of wishful thinking for a junction already running significantly over capacity, and with air quality pollution levels at dangerous levels, according to EU legislation. It is obvious, therefore, that the Borough Council is demonstrating a reckless indifference to the quality of Dunchurch resident's lives by choosing to ignore the conclusions of the STA. Its decision to disregard the negative impact that such large scale housing plans will have on roads within the Borough, but especially Dunchurch, is culpable.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. STA has shown that proposed mitigation schemes reduce traffic flows through Dunchurch crossroads compared to the existing levels. 1869	Michael O'Connell	Amec Foster Wheeler	Warwickshire County Council	DS9	Support the proposal for a new spine network road however the policy as worded is prescriptive for the route of the road. We would wish to see the policy enable flexibility in the route of the road as the Masterplan SPD is still in preparation. WCC are a significant land owner and land in the allocation has the potential to meet significant proportion of development needs for the plan period.	Wording of the policy should be amended so that it refers to the route of the spine road generally according with the route shown in the plan.	The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required. Details to be finalised during the Planning Application phase.
1903	Haydn Jones	Richborough Estates	NA	DS9	Support the SW Rugby allocation (as per rep on DS8) and within this support the spine network road in Policy DS9. Do have concerns over soundness of parts of Policy DS9 though relating to: flexibility of the route; the Potsford Dam Farm connection being outwit the allocation; and, conflict between the East-West spine road route in the publication draft local plan and the draft Masterplan SPD. Flexibility required so that land is allocated to facilitate the delivery of the spine road, rather than land allocated for the exact alignment, which will emerge through the submission of planning applications. Do not believe that the Potsford Dam link is necessary to facilitate the allocation or that is has been adequately justified in technical terms. The spine network road as broadly shown on the draft development framework		Comments noted however no further action considered necessary. Policy has been formulated in relation to evidence base and is considered to be sound.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					plan is wholly appropriate to deliver the allocation and mitigate impacts on the highway network.		
1909	Paul Hill	RPS	St Modwen	DS9	No objection exists to the principle of the policy nor indeed to the principle of its delivery. It is however, noted that a short section (approximately 130m) of the indicative alignment of the link road is within the Green Belt. It is not clear from the highway evidence that the element of the road infrastructure within the Green Belt, having regard to other potential non-Green Belt options has been fully justified and therefore the necessary Exceptional Circumstances demonstrated.	There are no text changes recommended, however clear justification of development within the Green Belt would need to be presented should this option be carried forward by the Council.	Comment noted.

1937	Sally Stroman	Smith Jenkins	Sally Stroman	DS9	Policy DS9 is unsound because it is potentially ineffective and inconsistent with the masterplan and Policy DS8. There is no certainty as to the road alignment, how it relates to the separation buffer, and the amount of local junctions it will be expected to serve. The Transport Assessment submitted in support of the plan warns that the route should not have multiple junctions or its benefits will be diminished. This should be reflected in both Policy DS9 and the masterplan with the development and road between Cock Robin Wood and Alwyn Road deleted from the plan.	Both Policy DS9 and the masterplan should include a route that serves only a minimal amount of development between the A426 and Alwyn Road	The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. DS8 makes specific requirement of a buffer between Rugby and Dunchurch, which will be further detailed in the framework masterplan and adhered to in subsequent planning applications. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
1978	Antony and Susan Kember	NA	NA	DS9	We object to the proposed Local Plan as we believe it can only have a further detrimental effect on the traffic volumes in Dunchurch village centre, which will inevitably lead to cars queuing at the traffic lights creating dangerously higher levels of NO2. NO2 is extremely dangerous creating respiratory problems and recent research indicates a link to Alzheimer's Disease. Additional bypasses are required from that identified within the Local Plan prior to any development in the SW such		The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>as a new bypass taking traffic from the A45 at Disbar Fields across to the East joining up with the A426 at Cock Robin island and a A426 Eastbound bypass with a link south west of Dunchurch taking traffic from A426 Southam Road at Toft linking up to the Disbar Fields Island and thus to Cock Robin Island A426. Without this sort of infrastructure the proposed developments will be unsustainable and create a huge upturn in existing NO2 levels and health issues in Dunchurch village centre. In addition to the bypasses there must be a ban on heavy goods vehicles in the village centre. Without addressing the need for more bypasses of Dunchurch than already proposed in the plan would be a blatant and irresponsible disregard for the serious air quality health issues affecting people living, working and visiting central Dunchurch. Proposal to Create an additional Traffic Lane at The Dun Cow Crossroads A426 would impact on the Conservation area and result standing traffic thus impacting on air quality even further. Further to this road and signage should be more in keeping with in the conservation area.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 2077	Peter Walls	NA	NA	DS9	Local Plan contrary to NPPF paragraphs 30, 34, 37, 95, 120 & 124 concerning traffic congestion and excessive car journeys and NPPF paragraphs 114 to 119 with regard to mammals & invertebrates;	The proposed main Spine should be extended to release excessive levels of local traffic out to bordering main routes; The green corridor should be extended to link Cock Robin Wood with all the surrounding conservation areas with tunnels and/or bridges to traverse the new road network, particularly across to Cawston Woods.	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.
2153	Rachel Gower	NA	NA	DS9	Grave concerns about the proposed development to the South West of Rugby. Developers are not taking advantage of the planning permission already granted for the Rugby Radio Masts. Agree with DDC more acceleration of brownfield land before committing countryside.	This policy should be dropped.	The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
2154	Robert Green	NA	NA	DS9	Concerns about the Strategic Transport Assessment and the actual effect of the Plan on Dunchurch cross roads. Junction already running significantly over capacity, air quality pollution levels at unacceptable levels the Borough Council is demonstrating a complete disregard to the quality of Dunchurch residents' lives and the protection of a historical village.		Policy has been formulated in relation to evidence base and is considered to be sound and consistent with the requirements of the NPPF para 30 and 124 as mitigation proposes significant improvement on traffic congestion and air quality as demonstrated in the STA. (Therefore amendments not considered necessary or suitable).
2273	D Creery	NA	NA	DS9	So called essential new road network in the Southwest will not begin until 30% of dwellings have been completed and then presumably the initial extent will be at the judgement of the builders. Roads are already heavily congested without the addition of construction vehicles - and 30% new homes.		The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. 1455 & 1900	Louise Steele	Framptons	DB Symmetry, Taylor Wimpey, Gallagher Estates, Richborough Estates and Warwickshire County Council	DS9	Parties recognise and agree that infrastructure will need to be delivered in parallel with delivery of new housing and employment, albeit that it will be necessary for some development to come forward in advance of this in order to fund and generate demand for the new facilities in order that they are viable. Parties do not consider that Potsford Dam link necessary to facilitate delivery of S W Rugby, or that its provision has been adequately justified in technical terms. This link would require the release of Green Belt land to facilitate its delivery. Parties continuing to discuss other access solutions with WCC as highways authority, but consider spine road network currently shown on draft development framework Plan in draft S W Rugby Masterplan SPD is wholly appropriate to facilitate delivery of allocation and mitigate impacts on highways network.		Comment noted. The updated STA shows the necessity for the Potsford Dam link as part of the SW Rugby. Currently the land required to deliver this alignment is outside the site allocation boundary. This alignment is required to be delivered by 2031, as identified in the IDP, and it is considered that this land will be secured by WCC within the timescales required. It is acknowledged within the supporting text for DS9 that a separate connection can be made in place of Potsford Dam, if needed.
1	Karl Quinny	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments

6	Mrs I Overton	NA	NA	DS10	<p>Accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. Walsgrave Hill Farm site would provide a more sustainable site to meet housing overflow from Coventry. The decision to remove this proposed allocation is contrary to the argument that additional allocations are necessary or justified.</p>		<p>The NPPF states a plan period of 15 is preferable, not a requirement. The growth proposed for allocation within the plan exceeds the plan period. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.</p>

11	Susan Waddington	NA	NA	DS10	The Plan is flawed as drivers will take the quickest route into Rugby despite Dunchurch already being bottlenecked; Lodge Farm residents are likely to find employment at DIRFT resulting in additional traffic through Rugby and Kilsby which is already burdened by traffic; increased traffic would result in additional risk of accidents on the A45 in both directions;	Plan is fundamentally flawed and should be reconsidered	The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
11	Susan Waddington	NA	NA	DS10	Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals. Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA. Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. A more focused</p>		<p>South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the</p>

35	D J Dunkley	NA	NA	DS10	<p>Absence of any assessment as to why provision needs to be made on a Greenfield site in a location outside of its development strategy to achieve compliance with the NPPF. The plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. Does not explain why delivery of existing allocation and infrastructure connected with it could not be brought forward. Without this, DS10 cannot be justified. No evidence that DS10 will increase delivery within plan period.</p>		<p>It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5</p>

					already a high crash route		
44	Andrea Hughes	NA	NA	DS10	Lodge Farm located on an agricultural field, in a rural location with narrows and by the historic Willoughby and Grandborough. Fails to provide cyclists and horse riders. Development will result in increased traffic on rural roads impacting on cyclist and horse riders		No change required. The site selection has been informed by SHLAA and other evidence base documents which highlight that greenfield land is required to be released to ensure that the housing target can be met with flexibility and therefore a continuous five years supply of housing can be achieved throughout the plan period.
44	Andrea Hughes	NA	NA	DS10	Lodge Farm has no secondary school allocation and schools are currently full. There will be a need to bus children in to town school or parents driving their children resulting in further traffic at Dunchurch.		No change required. DS10 requires the delivery of public transport which will support the access to secondary school provision in the town.
44	Andrea Hughes	NA	NA	DS10	Development of the site will have an impact on birds, mammals, invert abates and plants. There will also be a loss trees and hedgerows. Results in loss of countryside will impact on residents.		No change required. The allocations of sites has been informed by HBA Phase 1 habitat surveys further ecological surveys will be required as per policy NE2.
44	Andrea Hughes	NA	NA	DS10	Lodge Farm will destroy the character of the historic villages such as Grandborough and Willoughby. The allocation will engulf these settlements impact on the rural character.		No change required. Policies contained within the Plan such DS10 and NE4 will require the landscaping of the site and the settlement will still maintain the rural character of the surrounding settlements. Account will also be had to the historic environment through policy SDC3 Protecting and enhancing the Historic Environment. No objection was received from Historic England regarding the site.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
44	Andrea Hughes	NA	NA	DS10	Lodge Farm is known to be prone to flooding, development of the site will take away land currently used as 'run-off' for flood waters which will result in increased flooding in low lying areas such as Grandborough and Willoughby which is already at a high risk of flooding.		No change required. Lodge Farm is located within Flood Zone 1. Any proposals for the site will need to ensure that flood risk is not increased further as per national policy and Local Plan policy SDC5/SDC6.
44	Andrea Hughes	NA	NA	DS10	Site will result in the loss of countryside, productive agricultural land. The area also supports a network of footpaths and bridleways used by local residents. The site would be better located on a brownfield site or edge of urban area.		No change required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target.

77	Sarah Faulkner	NA	NA	DS10	DS10 is inconsistent with NPPF Paragraph 30 (reducing greenhouse emissions and congestion), Paragraph 34 (maximising sustainable transport modes), Paragraph 38 (promoting mixed use development); DS10 is not allocated adjacent to the main Urban area, would not include additional employment land, future residents would be required to travel to Rugby, Daventry, Coventry etc. for work; whilst public transport could be provided evidence from around the UK indicates a high proportion of residents in rural areas rely on private cars for travel.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.
77	Sarah Faulkner	NA	NA	DS10	DS10 inconsistent with Paragraph 17 of the NPPF, outlining 12 core principles which should underpin plan-making and decision making, especially the final point that planning should "actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; DS10 inconsistent with NPPF Paragraph 17 due to its distance from the urban area, especially for walkers and cyclists; public transport provision could be increased but it would still be over-reliant on private cars for	Remove DS10	Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the

82	Angela Brooke	NA	NA	DS10	Disagrees with the SA objectives 1-18 stating that there is no evidence, no guarantee, unrealistic and no assurances. No evidence that there is a need from Coventry for housing in Rugby	Remove Lodge Farm from the Local Plan	No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan.

The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements. The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan,</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>area; site will not promote urban regeneration; and there is no certainty over the delivery of onsite GP and commercial space. Site will have a negative impact by using a green field site losing resources from the local environment; increased consumption of building materials, then fossil fuels; no public transport and additional traffic; site will negatively impact the surrounding area and villages; site will destroy some farmsteads; site will not promote relationships with town areas and the site will cause a major impact on the existing characteristics; site will increase pollution and have a negative impact on air quality; site will have a negative impact on vulnerable wildlife and farmland bird populations and Comments relating to evidence for Lodge Farm site was made after a decision was made to allocate the site in place of Walsgrave.</p>		<p>and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.</p>
104	Pauline Stratton	NA	NA	DS10	<p>DS10 contrary to NPPF Paragraph 30 (pollution), Paragraph 34 (minimising the need to travel) and Paragraph 38 (promoting mixed use development), Lodge Farm not adjacent to urban area and would not include additional employment land</p>	Remove DS10	<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>therefore residents would be required to travel through the sub-region (Rugby, Daventry, Coventry etc. for work), public transport to the site could be increased but evidence from across the UK suggests car reliance more likely,</p>		<p>period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
104	Pauline Stratton	NA	NA	DS10	<p>STA is insufficient, invalid and limited, the proposal is unsustainable and the Local Plan unsound; the STM traffic model does not include Lodge Farm, Daventry and the A45- model not fit for purpose given scale of development and proximity to Daventry, trip-end data used to support Lodge Farm invalid as it is based on outdated 2011 census data with model outputs unreliable thus can't be used to assess DS10, DS10 only included in traffic modelling as an afterthought by way of a limited Sensitivity Test which is not appropriate for a major allocation-model should have been extended, re-calibrated and the whole Local Plan assessment redone to determine cumulative impacts across the whole network, Dunchurch Crossroads represents a serious impediment to the development of South Rugby with the traffic consultants advising that any increase in traffic at the crossroads would be 'highly undesirable'- consultant's recommendation is to complete the South West link road at the earliest opportunity and in the interim locate housing away from the South West altogether, RBC has not followed the traffic consultants recommendations as RBC keen to promote Lodge Farm;</p>	Remove DS10	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

104	Pauline Stratton	NA	NA	DS10	<p>No evidence that sub-housing market area can accommodate number of dwellings proposed; sites slow at delivering due to lack of demand (Rugby Mast site only has three developers and is assessed to deliver less than the 6,000 homes capacity over the plan period; housing numbers increasing from 558 in 2017-2018 to 1,314 and 1,122 in 2020-2021 and 2021-2022 respectively all reliant on SW Rugby SUE coming forward- housing background paper calls this target 'aspirational'; if these homes aren't delivered the Borough will not have a 5 year land supply for the first 5 years of the plan,</p>	Remove DS10	<p>The existing permissions alone cannot support the delivery of the housing which is why both DS8 and DS10 are proposed, alongside the other allocations, including the Main Rural Settlement allocations. No change required. No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver</p>

133	Louise Truslove	NA	NA	DS10	<p>Objections to the inclusion of land proposed to be developed as part of the Rugby Local Plan under the South West Rugby area and lodge farm based on the following Re: SHMA - concerns over impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncoded proposals. SW employment site will result in significant traffic movement and modifying Dunchurch crossroads will not cater for the growth planned for there will also be an impact on air quality. SA- strongly believe that the scores provided within the Sustainability Assessment Framework have been assessed in a biased manner to provide a positive outlook for this proposed development. Before any decisions regarding this plan are reached, the Sustainability Assessment Framework should be reviewed by</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
143	Chris Barfield	NA	NA	DS10	Plan is inconsistent and contradictory. Plan allocates 3,027 dwellings more than the housing target therefore why is Lodge Farm needed to meet the overall target. Lodge Farm is an unnecessary inclusion in the Local Plan and included to attempt to get funding from central government and HCA but it is unsustainable and should be dropped.		The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. No alteration is required.
143	Chris Barfield	NA	NA	DS10	Site is too large for 1500 dwellings. If a scheme is refused for a larger number of dwellings it is likely that the appeal will be overturned. Implications are that all other arguments against the scheme regarding transport, proximity of amenities, employment etc. are greatly increased and the failure to comply with NPPF para 30,34,37,75,95,120 and 124 is simply multiplied by this error.		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period.
143	Chris Barfield	NA	NA	DS10	Plan fails to understand and plan for traffic movement in the area of the proposed Lodge Farm development contrary to NPPF para 30,34,37,95,120 and 124. Introduction of bus service will take you to the Town Centre but to access jobs at least two bus trips will be required. Services therefore would be difficult to travel to work locations and will evening services be provided to access to Junction 1 or Walsgrave. Vast majority of trips		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>will be by private car. Works for school bus but not for work and leisure requirements. Significant flow of traffic from the site will head west and some traffic going to DIRFT and M1 Junk 18 at Crick. With the exception of the A45 roads within the area are single carriageway of varying widths which a further 500,1000 or 1500 vehicle movements per day will be passing through. This will affect villages, hamlets, cyclists and riders of horses and ponies. WCC seem to think everyone will use the A45 but if you want to go to M40 south you would go through Southam and on to Banbury. M40 north through Bishops Itching ton. M1 south through Daventry, Weed on and Flora. M1 North past Barby, through Kilsby to J18. Rugby through Dunchurch which fails air pollution standards already. Then the A45 which is designated a high crash route which access will be needed to be provided on to and safety improvements required which will impact on viability and other s106 requirements. The location of Lodge Farm must count badly against any sustainable criteria but the SA objectives seems to show opposite.</p>		<p>infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
143	Chris Barfield	NA	NA	DS10	RBC failed to involve local communities or obtain their support before inclusion of the site in the plan contrary to NPPF para 52 and DCLG March 2016 paper Locally led Garden Village, Towns and Cities clause 48.		The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.
143	Chris Barfield	NA	NA	DS10	Contrary to NPPF para 50 fails to provide adequate social and affordable housing . High infrastructure cost and very high s106 costs means that potential developers are reluctant to commit themselves to provide any affordable housing . RBC accept that affordable housing may not be possible at Lodge Farm which will result in an executive housing estates with higher than average sales figures creating a single class community which fails to meet the broad needs of the community.		Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory.

143	Chris Barfield	NA	NA	DS10	<p>Contrary to NPPF 93 to 104 as RBC failed to appreciate the effect the development will have on the flooding problems that exist in many parts of the upper leam valley catchment. Understands that SUDs will be incorporated ensuring green field run off rates but what happens in the future when additional patios and driveways are built. What then for the flood calculation in this very sensitive flood risk area? Failed to understand existing flooding issues visible on EA maps on areas such as the A426 and A425 where roads have been closed resulting in traffic travelling through villages. Lodge Farm will add to traffic chaos and nothing is proposed in the plan to help this. Due to the topography in the Upper Leam area little can be done to stop or slow the water in periods of rainfall. Predictions that the frequency and the severity of flooding is commonly known and faced with increased traffic flows and worse flooding with no consideration.</p>		<p>The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
143	Chris Barfield	NA	NA	DS10	Site is too large for 1500 dwellings. If a scheme is refused for a larger number of dwellings it is likely that the appeal will be overturned. Implications are that all other arguments against the scheme regarding transport, proximity of amenities, employment etc. are greatly increased and the failure to comply with NPPF para 30,34,37,75,95,120 and 124 is simply multiplied by this error.		All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period.
143	Chris Barfield	NA	NA	DS10	Fails to recognise implications of the site location relative to employment. This will increase traffic contrary to NPPF para 30,34,37 and 95. Five principle areas of employment opportunities DIRFT mainly warehousing so low employment numbers. Leamington, Warwick and Gadon offer higher level of employment opportunities. Coventry, Daventry and Rugby more mix of employment opportunities. Gadon opportunities growing. Affordable housing target likely to be met by Warwickshire, Coventry and Rugby residents then Northamptonshire residents where the site is located close to. Bus services will not be provide the range of times and destinations to allow Lodge Farm residents to make any sensible use of public transport and that private car will be the choice for travelling to work.		Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The

					<p>Therefore majority of vehicle movements will be to Rugby through Dunchurch, to Coventry along the a45 and a46 or to Leamington and Warwick through the lanes to the west of lodge farm. Dunchurch already has the highest traffic pollution levels in the district and the added flow from Lodge Farm will magnify this. Believe that people will ignore the South west link road and drive through Dunchurch. Preliminary site layout displaying estate loop linking to Grandborough road that the developers see a significant number of car movements being into that road and through the lanes and onto the A425 and A426. Road entrance to Grandborough coming in from the a45 is inadequate for 1,000 plus trips heading to Leamington, Warwick or gay don.</p>		<p>delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

143	Chris Barfield	NA	NA	DS10	Failed to undertake environmental impact assessment for the site. The site location will increase car journeys and increase pollution as a result. Increase congestion in Dunchurch, no facilities in walking distances with the entertainment centre, shopping centre and employment opportunities at least 5 miles away. Contrary to NPPF para 30,34,37,75,95,120 and 124.		Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.
143	Chris Barfield	NA	NA	DS10	Failed to carry out any ecological survey of the site and being 260 acres of mixed arable, grazing and managed woodland farming will contain a rich diversity of bird, invertebrate, mammal and plant life. The area is relatively flat with numerous hedgerows and ditches bordering the fields, a natural habitat for man of this county's protected species. Contrary to NPPF para 114-119		Sites have been appraised on a consistent basis utilising Phase 1 Habitat survey. Further detailed Ecological reports will be submitted as part of any future applications. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

143	Chris Barfield	NA	NA	DS10	<p>Plan fails to understand and plan for traffic movement in the area of the proposed Lodge Farm development contrary to NPPF para 30,34,37,95,120 and 124. Introduction of bus service will take you to the Town Centre but to access jobs at least two bus trips will be required. Services therefore would be difficult to travel to work locations and will evening services be provided to access to Junction 1 or Walsgrave. Vast majority of trips will be by private car. Works for school bus but not for work and leisure requirements. Significant flow of traffic from the site will head west and some traffic going to DIRFT and M1 Junk 18 at Crick. With the exception of the A45 roads within the area are single carriageway of varying widths which a further 500,1000 or 1500 vehicle movements per day will be passing through. This will affect villages, hamlets, cyclists and riders of horses and ponies. WCC seem to think everyone will use the A45 but if you want to go to M40 south you would go through Southam and on to Banbury. M40 north through Bishops Itching ton. M1 south through Daventry, Weed on and Flora. M1 North past Barby, through Kilsby to J18. Rugby through Dunchurch which fails air pollution standards already.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p>

					<p>Then the A45 which is designated a high crash route which access will be needed to be provided on to and safety improvements required which will impact on viability and other s106 requirements. The location of Lodge Farm must count badly against any sustainable criteria but the SA objectives seems to show opposite.</p>		
143	Chris Barfield	NA	NA	DS10	<p>RBC failed to involve local communities or obtain their support before inclusion of the site in the plan contrary to NPPF para 52 and DCLG March 2016 paper Locally led Garden Village, Towns and Cities clause 48.</p>		<p>The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.</p>

					<p>allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified. Concerns raised about the site's SA scoring of the site and provides revised scoring for SA14,12, 4 and 2.</p>		<p>throughout the course of the plan. 160	The Occupier	NA	NA	DS10	<p>Objects to Lodge Farm (DS10) Proposes revised SA scorings for SA1, SA2, SA3, SA4 and SA12 with the reasoning covering the following: no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will be a burden to existing services and necessitate the use of the private car to reach them and leisure and cultural facilities; no certainty over the delivery of the GP or public transport; and the site will result in additional traffic through Dunchurch which is already an AQMA.</p>		<p>No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

166	Carl Harris	NA	NA	DS10	Sustainability Appraisal was not undertaken before July 2016 when Lodge Farm was incorporated into the Plan in replace of Walsgrave farm therefore SA has not informed the plan. Number of surveys/assessments not been undertaken for the site and SA has been fitted around the decision.	Remove lodge farm from the Plan	The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA. All relevant Surveys and assessments have been completed and provided to all relevant parties.
166	Carl Harris	NA	NA	DS10	Lodge Farm 5-6 miles away from Town Centre and Elliot's Field taking 20-50 minutes travelling time therefore people will go to Daventry, Coventry or Leamington for shopping. Therefore Lodge Farm will have a very small impact on the growth of Rugby's local economy.	DS10 should be removed from the plan as it will have no real benefit for Rugby and it does not conform with one of the key principles of the NPPF>	Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. The site is considered capable of meeting its policy requirements.

189	Caroline Colbourne	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation which should be brought forward. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of its development strategy to achieve compliance with the NPPF. Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified. Individual sustainability comments on SA1,SA2,SA3, SA4, SA6, SA7, SA8, SA11,SA12 and SA14. Site is isolated, will place a burden on existing services, broadband will not help social exclusion, no leisure or cultural opportunities, residents will have to drive to access services on the A45 which is dangerous road, GP not supported by funds to build and operate, impact on air quality at Dunchurch crossroads. not the right site for affordable housing with it being remote site no public transport and cost of access to services, limited employment</p>		<p>Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. 					regeneration; and there is no certainty over the delivery of onsite GP and commercial space.		
224	Mark Hallam	NA	NA	DS10	Existing planning permissions already satisfy the housing requirement and it is not explained why these cannot be brought forward and no explanation as to why DS10 will improve delivery. The site is greenfield and in a location outside opt the development strategy. Walsgrave Hill Farm is considered a more suitable development site as it is more sustainable.		Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.

228	william Sherman	NA	NA	DS10	Plan unsound as takes growth from Coventry. This will be of detriment to residents in Dunchurch: loss of agricultural land, heavier traffic, greater air pollution, threat of flooding and uncertainty over the supply of support services.		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of

					<p>rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry. Proposes revised SA scorings for SA1, SA2, SA3, SA4, SA6, SA7, SA8, SA11, SA12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at surrounding nearby settlements; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will necessitate the use of the private car to access jobs retail ,services, leisure and cultural facilities impacting on congestion and air quality; limited employment opportunities in the area; site will not promote urban regeneration; and there is no certainty over the delivery of onsite GP and commercial space.</p>		<p>consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>
234	Christine McGillian	NA	NA	DS10	<p>STA is invalid, which in turn makes DS10 unsustainable and ultimate makes the entire draft plan unsound. Several issues: Vectos STM traffic model does not properly consider DS10, particularly the impacts to Daventry and along the A45 through Flora Hill. Trip-end data is invalid as</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>based on 2011 Census data that is already set at significant variance to present day reality. Due to time constraints imposed on Vectos by Rugby Borough Council, DS10 is considered in the form of a limited sensitivity test. This approach is not viable for such a significant allocation. Dunchurch Crossroads presents a serious constraint on development to the South and South-West of Rugby. This is accepted by Vectos who advise that any increase in traffic would be highly undesirable.. Further, they acknowledge that there is limited capacity in this area for additional improvements and recommend construction of link road at earliest opportunity, and prior to this keeping housing away from Southwest entirely. RBC have decided to ignore advice and promote DS10 at an earlier date. Not identified, modelled or costed in the Draft Plan. Not subject to impact assessment concerning listed buildings in vicinity of Dunchurch Crossroads Not demonstrated as avoiding sever consequences of routing additional traffic through an area (Dunchurch crossroads) with existing severe Air Quality issues.</p>		<p>Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick’s local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Coventry City Council or Daventry District Council. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
234	Christine McGillan	NA	NA	DS10	RBC failing its duty to meet Coventry's unmet need with it replacing the Walsgrave site with Lodge Farm which is 15 miles away. Warwick's Plan failed to meet the City's need resulting in the delay of the Plan and the allocation of sites on the edge of the city.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
234	Christine McGillan	NA	NA	DS10	Site is not in accordance with NPPF para 30,34 and 38 with it not being adjacent to the urban area or employment land. Residents will need to travel to the sub region for work, whilst public transport will be increased the site will still be reliant upon the private car.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
234	Christine McGillan	NA	NA	DS10	<p>Inconsistent with NPPF core principle about making the fullest possible use of public transport, walking and cycling , and focus significant development in locations which are or can be made sustainable. Lodge Farm does not conform to this due to its distance particularly for walkers and cyclists to the main urban area. Public transport could be improved but not clear how it will be funded over time there will still be an over reliance on the private car for journeys to work and leisure facilities.</p>		<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered.</p>
234	Christine McGillan	NA	NA	DS10	<p>No evidence, thought or consideration of impact of 12,700 homes being proposed to the south west or south east of the town can the sub housing market area, cope with significant level of housing over 20 years. There is a lack of demand and risk of no 5 year supply of housing due to the aspirational target.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.</p>

235	Kim Cockburn	NA	NA	DS10	Not the correct place to build a village	Remove DS10 from local plan	All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.
238	Anne Cockburn	NA	NA	DS10	The roads round all the small villages are unsuited to all the extra traffic also the new village is opposite a prison	should not be built	No change required. The STA identifies the strategic routes from DS10 with further localised impacts being identified through the planning application process. The operation of a prison opposite the site is not a planning constraints for the allocation of the site though it may influence the design of the frontages and consultation will take place with the operators when a planning application is submitted for the site.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
239	Sally Ann Williams	NA	NA	DS10	DS10 is unsuitable due to the main road and nearby prison; open to expansion in the future;	Remove DS10	Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan.
240	Rosalin Collard	NA	NA	DS10	Should not be built on good farmland. Is not needed for this area and will create more traffic.		Proposed Appendix 3 Infrastructure Delivery Plan has been amended following consideration of this consultation response and the updated Strategic Transport Assessment. DS9 and IDP mod updates ref LP54.46 - LP54.58 - and LP54.120 - LP54.123

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
241	D Weaver	NA	NA	DS10	Should not be built here. Too much traffic created by at least 2 cars per house. Also to low lying for drainage. Flooding.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
242	Margaret O' Donnell	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Walsgrave Farm is a more sustainable site to meet the overflow from Coventry.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover

					lack of public transport; the site will necessitate the use of the private car to access jobs retail, services, leisure and cultural facilities and executive style housing will further limit social integration.		
247	Karen Holmes	NA	NA	DS10	The local plan is unsound as it does not directly deal with obligations under the MOU with Coventry unless it re-allocates the Walsgrave site and removes Lodge Farm. Sustainability appraisal evidence was not available at time of replacing Walsgrave site with Lodge Farm proposal. Plan proposes 12,700 dwellings to south of Rugby, can the sub-housing market area cope with the delivery of this. Increased delivery rates in plan are aspirational and if not delivered then plan will not have a 5 year housing land supply. Lodge Farm is an unsustainable location where travel will be predominantly by private car, site being remote to urban areas of Rugby and Coventry, and is therefore contrary to 12 core principles of NPPF. Lack of employment means people will be required to travel to work. Traffic congestion will increase at Dunchurch crossroads and air quality will deteriorate further. Lodge Farm site has only been introduced to transport modelling as sensitivity test which is not sufficient. The flat nature of the site means the	Remove Lodge Farm and reinstate Walsgrave site	The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. 254	Steve Palmer	NA	NA	DS10	<p>Local Plan Preferred Options received 280 comments however the draft Local Plan received over 2000 comments during the first consultation- a majority of which relate to Lodge Farm and came from residents living throughout the Borough; at Preferred Option stage RBC allocated Walsgrave Hill Farm to meet obligations to Coventry's need under the MoU- the document stated "In consideration of the significant contribution other areas will be making to meet Rugby's housing need and that the additional need is coming from Coventry.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>Delivery on the edge of Coventry is the logical approach...the promotion of sustainable patterns of development that meet identified housing needs is an exceptional circumstance that can justify Green Belt release. In this specific location, the advantages of locating development that meet the unmet housing needs of the Coventry and Warwickshire housing market area, Coventry City specifically, are a further sufficiently exceptional circumstance to justify Green Belt release within Rugby Borough"; reasons identified in Housing Background Paper for subsequent exclusion of Walsgrave are doubts over deliverability of road infrastructure, heritage concerns, ecology concerns and the requirement by the site promoters to include employment land- it is believed that these concerns have been significantly addressed by Oxalis Planning on behalf of Roxhill; sustainability assessment for Walsgrave Hill Farm site shows it to be more sustainable than Lodge Farm- hence the criteria for removing a site from the Green Belt (NPPF Paragraph 84)- has been met; SALFV believes that the draft Local Plan does not provide for Coventry's need (2,800 homes); NPPF supports development which "facilitates the</p>		<p>deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan,</p>

					<p>use of sustainable modes of transport” and “where the need to travel will be minimised”. The proposed sites in the Draft Local Plan ostensibly fail these tests in respect of Coventry’s needs - being more than 5 miles from the City boundary (A46) as the crow flies and considerably further by road; SALFV believe that DS10 is neither sustainable nor deliverable; DS10 is isolated and remote from employment, schools, retail and leisure; public transport is minimal and 1,500 homes falls short of numbers needed to significantly improve public transport meaning reliance on private cars; SALFV believe DS10 fails to meet all 18 sustainability objectives; no relevant and site specific transport assessment; with no specific obvious employment sites residents would use the A45 to work in Daventry, Coventry and Rugby; residents working at Jaguar Land Rover (Gadon), Southam and DIRFT would use country lanes; A45 a high risk crash route and known pollution in Dunchurch; major improvements to the A45 are required with the proposed spine road only making a minimal contribution to alleviating traffic problems caused by DS10; country lanes in Northamptonshire and Warwickshire; total lack of</p>		<p>which are contained within the modification IDP. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					<p>infrastructure at site, primary school and GP identified for site but will need water, electricity, sewage and flood protection (to alleviate rainwater runoff from Rainsbrook); funding for infrastructure must be in place before homes are constructed; the SW Spine Road is essential for Lodge Farm yet not scheduled for completion until 2025/2026 yet the first houses at Lodge Farm will not be completed until 2020- deliverability of Lodge Farm has not been thought through; very high cost of providing infrastructure which will reduce affordable housing provision a point conceded by the Head of Growth and Investment at Rugby Borough Council; SAFLV believes Lodge Farm is neither sustainable nor deliverable- a belief reinforced by consultants who the Committee (SALFV) have engaged; DS10 is opportunistic, ill-conceived and unrealistic and SA not prepared on basis of objective assessment of evidence</p>

261	Adrian Dunkley	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>

262	M Champion	NA	NA	DS10	Objection to DS10 on the basis that it would be out of character and increase congestion		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
263	James Hesketh	NA	NA	DS10	Accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. Walsgrave Hill Farm site would provide a more sustainable site to meet housing overflow from Coventry. The decision to remove this proposed allocation is contrary to the argument that additional allocations are necessary or justified.		The NPPF states a plan period of 15 is preferable, not a requirement. The growth proposed for allocation within the plan exceeds the plan period. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
							<p>most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.</p>

275	C J Dunkley	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified.</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
284	Pete Warren	NA	NA	DS10	DS10 is contrary to NPPF Paragraph 112 as it is needlessly using agricultural land, unsustainable. No provision for extra schooling, emergency services, highways provision for Dunchurch, increased traffic on a high risk crash route (A45), air and noise pollution, Dunchurch is already gridlocked which would be exacerbated and there would be an increased risk to pedestrian safety	Remove DS10	It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	<p>1: Provide good quality local services... (SA - not in any settlement, but alongside 2 bus stops on Daventry Road: a minor negative): Regular Rugby - Daventry bus service that used the A45 has been deleted, and there is now minimal bus service. It is unlikely that any improved service would be viable, at least until well into the build programme. In the meantime early residents will have no service. SA should be a major negative. Grandborough PC Parish Plan survey carried out in the first week of September 2016 asked residents if they thought the proposed development would be beneficial to the parish. 87% said no. The 8 respondents who thought it might be beneficial gave reasons such as the provision of a local shop, local school, affordable housing, and local Doctor's surgery . It is apparent these perceived benefits are unlikely to be delivered for at least 15 years if ever. Had this information been available in early September it is quite likely that there would have been 100% response perceiving no benefit.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. All service providers have been consulted with and no change is required</p>

289	Roderick Hastie	Grandborough Parish Council	NA	DS10	Promote/improve health of population (SA - Green infrastructure and possible Doctors Surgery, but additional air quality issues at Dunchurch. Minor positive or minor negative).. Site will contribute additional traffic to Dunchurch intersection, already designated as an AQMA. Healthcare or GP facilities proposed but given slow build-up of site deliverability must be extremely unlikely. SA score should be at least a minor negative.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	3) Provide affordable and decent housing which meets the needs of the Borough. SA - Large site, 1500 homes will make a significant contribution to meeting Borough's housing needs. A major positive. Given cost of infrastructure required on this remote greenfield site, and the slow build-up of house numbers, the likelihood of any affordable housing being built is low or non-existent. SA score should be at least a minor negative.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	4) Reduce crime and perception of crime. (SA - no direct effect): Already there are concerns within nearby local communities that the creation of a new chunk of urban development, albeit with fields around, will lead to an increase in crime and anti-social behaviour. The SA score should be a minor negative.		No change required. Warwickshire and West Mercia Police have been informed of the policy requirements. Phase 1 habitat survey has been informed of site selection. No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	5) Promote/enable a strong, stable and sustainable local economy. SA - two bus stops and a promise of future public transport links. A minor positive score. See above re: bus stops and likelihood of further infrastructure provision. Due to difficulties in accessing Rugby Town Centre through Dunchurch, trade and commerce will be lost as residents will likely choose outskirts of Coventry via A45 or Daventry for social, shopping and other economic activities. SA score should be a minor negative impact.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	6) Promote vitality and viability of the Town Centre. (SA score no impact). See above reaches to Town Centre. SA score should be minor negative impact.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	7) Reduce Boroughs contribution to climate change (SA - Not in settlement, but two bus stops: negligible effect). See above re: bus stops. This means that all movement to/from the development will be by private vehicle for the foreseeable future, this surely means at least a minor negative impact.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	8) Avoid, reduce, and manage flood risk (SA - outside flood zones 3a and 3b therefore minor negative). The site is a large tract of agricultural land with high absorbency, and significant flood water storage, sited at the top of the Leam catchment. Despite Rugby BC policy to require developers to ensure run off is no greater than current, there is a very real prospect that this requirement will not be met. Sure a significant negative.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
289	Roderick Hastie	Grandborough Parish Council	NA	DS10	9) Promote a sustainable and accessible transport network (SA - two bus stops; minor positive). Do not accept presence of two bus stops should general minor positive score, and in any event not comments rebus service above.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

289	Roderick Hastie	Grandborough Parish Council	NA	DS10	<p>Furthermore, while proposal has good access to A45/M45 for East/West travel, any traffic heading to Rugby will go via Dunchurch crossroads, thus replacing traffic flows which the proposed new spine road is designed to remove. Traffic will use country roads through Grandborough. These roads have long stretches of single track with passing places, two narrow hump back bridges, and a sharp right angle turn right in the centre of the village. The roads are also liable to flooding at many points. Suggestion that traffic flows will be reduced by traffic calming measures is laughable. Such measures do not stop drivers who perceive a route is a short cut. Existing villagers will be subject to greater inconvenience, even more noise and the probability of traffic vibration induced damage to property, with no benefit in reduced traffic flows. All of the above points to an SA score of significant negative.</p>		<p>The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017). The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

					<p>offered for development and apparently accepted by RBC as potentially suitable. Question figure of 1500, developers would be looking for more so higher figure more realistic. Had the proposal been for land adjacent to the A45 but to the West of Dunchurch and Coventry it might have more validity, since such a location would provide easy access to A45, M45, Western Relief road, new spine road and reasonably wide routes to the South. Or even better, the original Walsgrave site adjacent to Coventry (whose housing shortfall we are required to assist with), and with excellent infrastructure already largely in place.</p>		<p>determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing</p>

308	Paul Greenwood	NA	NA	DS10	<p>The proposed level of housing is too high as almost 7,000 dwellings (50 Bilton Grange, 1,500 Lodge Farm and 5,000 South West) equates to approx. 25,000 more people and 10-20,000 cars. Concerned that as existing congestion and highway safety are issues in Dunchurch. Risk of coalescence between Cawston, Dunchurch and Rugby as the proposed size of the development is equivalent to a small town. Dunchurch crossroads already operating over-capacity and pollution at Dunchurch in breach of regulations; No justification as to why Rugby is taking Coventry's need. Questions over the data behind the SHMA. Agreement with Daventry District Council that further consideration should be given to accelerating the development of brownfield sites,</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption,</p>

312	Michael	NA	NA	DS10	Re: SHMA - concerns over		No change required. The justification of

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
	Greenwood				<p>impartiality of consultants and that projections have been used as forecasts contrary to NPPF. The SHMA has opted for a high level of housing requirement when uncertainty as to future housing need. Housing and employment needs from adjacent authorities should only be considered when it is reasonable and sustainable to do so, which is not the case with housing and employment from Coventry. No justification in MOU why Coventry cannot meet its own need. Infrastructure plan is vague with number of uncosted proposals.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA.</p> <p>Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought</p>		<p>Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. 					regeneration; and there is no certainty over the delivery of onsite GP and commercial space.		
332	Martin Sutherland	NA	NA	DS10	DS10 is unsustainable as it is in an isolated location resulting in car dependence, no public transport and will have an air quality and pollution impact on the Dunchurch Crossroads as well as being reliant on the South West spine road. There is no employment, retail or leisure nearby, resulting in car reliance. In terms of deliverability, the scale of development is insufficient to provide a meaningful local centre. No prospect of early delivery in the plan period as any mitigation work would affect delivery rates and maintaining a 5 year housing land supply. No transport assessment submitted, no Phase 1 Ecology Assessment, no utilities assessment and no flood risk assessment.	Remove DS10	Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so

							<p>that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

337	Catherine Camp	Barby and Onley PC	NA	DS10	RBC failed in Duty to co-operate as did not consult with Barby and Onley PC or engage with them over inclusion of the Lodge Farm site despite Onley being the closest residential development. Housing at Lodge Farm not justified. Site is isolated and will not meet sustainability objectives. Will not address shortfall of Coventry as too far away. Lodge Farm would exacerbate Air Quality issues at Dunchurch. Site at Lodge Farm is contrary to proposed GP1 and GP4 policies.	Remove DS10 from plan	No further Action required. Consultation letters were sent to Barby and Only Parish Council and it is considered that RBC has fulfilled its duties. Principle of Lodge Farm site and associated impacts have been considered and the proposed allocation is considered sound.
337	Catherine Camp	Barby and Onley PC	NA	DS10	Green Belt already compromised at originally proposed Walsgrave site. Do not see how Lodge Farm site justified. Will educational needs be met. Transport Assessment assumes Lodge Farm will provide off site contributions to the SW spine road (prior to commencement of Lodge Farm itself). Transport Assessment flawed as does not take into consideration traffic flows in Northamptonshire despite plans that traffic will access M1 South and A14 - local road networks already under pressure. Transport Assessment acknowledges Air Quality issues at Dunchurch and any increase in traffic will be unsustainable and detrimental. Do not feel as though impact on landscape and environment has been taken into		Plan considered to be the most suitable strategy so no further action required. Area at Walsgrave is designated Green Belt and therefore not recommended for allocation. Sites have been selected following assessment and represent preferred strategy. Infrastructure delivery has been considered. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.. Site selection considered to be most suitable option following assessment. Site

337	Catherine Camp	Kilsby Parish Council	NA	DS10	Is Lodge Farm site required Identified need for 12400 houses by 2031, but draft housing trajectory shows that this target will have been exceeded by 442 houses without any houses built on the Lodge Farm site. Cannot see how this garden village is justified.		The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EiPs. The housing target is not a minimum because it is based on need. The Local Plan sets out a target which is exceeded by the proposed allocations and existing permissions. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period. No alteration is required.O307
337	Catherine Camp	Kilsby Parish Council	NA	DS10	Is it justifiable to build in rural open countryside as an alternative to using a "Green Belt" site which is already compromised by Walsgrave Hospital on one side and Industrial/Employment sites of Ansty Park and Rolls Royce on the other?		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
337	Catherine Camp	Kilsby Parish Council	NA	DS10	Will educational needs be met, with a primary school only planned after 25 homes are occupied, and no provision for additional Secondary education places?		No change required. DS10 and IDP contain detail of the education provision onsite and offsite contributions to be made from the site, in agreement with education authority.
337	Catherine Camp	Kilsby Parish Council	NA	DS10	Transport Assessment acknowledges that pollution levels at Dunchurch Cross roads exceed European safety levels of nitrous oxides, and any increase of traffic by development of 1500 houses in a "Garden Village" site at Lodge Farm will be unsustainable and have a detrimental effect on the environment.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. The interim measures of an additional lane at Dunchurch cross roads has been found to be acceptable following called in decision for land at Ashlawn Road west, Rugby, Warwickshire (ref: 3147448 - 10 July 2017).
337	Catherine Camp	Kilsby Parish Council	NA	DS10	We do not feel that the impact on the landscape and environment has been taken into consideration with a proposal to build a large housing development in a rural area of prime farm land. Site at Lodge Farm is isolated from other built up areas and is contrary to the statements made in the Draft Local Plan which		It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
					state that brownfield land will be promoted.		
337	Catherine Camp	Kilsby Parish Council	NA	DS10	Leam valley is a flood plain and local villages experience flooding problems in Winter. This will be exacerbated.		DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.
337	Catherine Camp	Kilsby Parish Council	NA	DS10	SA1 (Reduce/eliminate poverty...): Question how housing development completely separated from Rugby conurbation and with no significant employment opportunities in the locality, will meet this objective. Residents would be dependent almost entirely on motor vehicles to access employment, education, shopping , recreation and healthcare. For these reasons it will not be a viable site for affordable or social housing and will not reduce social exclusion. Loss open countryside and associated increase in traffic will reduce social well-being of the local community and change this area forever.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA13 objective as the site contains ridge and furrow which forms part of the historic landscape linking it to Onley village which is a Scheduled Ancient Monument (SAM). Ridge and Furrow was a reasoning with a crematorium was refused in Willoughby. Potential for further undesignated assets to be identified. By adopting DS10 the policy will not conform with the NPPF as it forms part of the setting of the SAM.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA11 objective as the site will lead to a greater consumption of fuel due to it being colder than surrounding villages. Higher fuel costs than locations closer to Rugby or Coventry for residents accessing school, services and leisure facilities. Community services and facilities are limited and no effective delivery of services for the site.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA8 objective as the site is remote from urban areas and cannot, conceivably, be considered to promote urban regeneration because residents will meet most of their requirements locally or via internet. For the weekly shop the development, if built, will bring more trade to Sainsbury at Dunchurch via the AQMA zone at Dunchurch lights or shops in Daventry where there is free parking.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA1 objective as the cost of infrastructure will result in very little affordable housing. The cost of transport to access local centres will be greater to those related sites more closely to commercial areas.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA6 objective as it will be difficult to see how public transport infrastructure will be provided as it will only be used by people without their own transport (likely to live in affordable housing).		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA2 objective as it will take time to develop a green field site enabling a sufficient community to warrant a primary school or surgery facilities. During initial phases will be required to use existing local facilities that are overstretched. Residents will unlikely change their established use of the offsite facilities. There will also be cost to residents who do not have access to their own transport.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA9 objective as this location will lead to greater consumption of power and fuel than other more appropriate sites. It is a proven fact that night time air temperatures at Onley and Willoughby are often 2-3 degrees Centigrade lower than surrounding villages of Dunchurch Barby and Braunstone due to the effect of the surrounding hills. This will lead to Increased heating cost. Fuel costs will be higher than locations closer to Rugby or Coventry due to needs for car transport to work, bus transport for schoolchildren, shops and entertainment, deliveries etc.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA4 objective as the high cost of infrastructure will result in negligible or no affordable housing. Remoteness of the site will reduce practicability for unemployed or lower income families to live there due to the lack of public transport and limited access to private transport to access services and leisure.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA7 objective as other locations for development adjacent to Rugby will have a more positive effect on 5A7 than DS10. Traffic congestion into Rugby from DS10 would discourage residents from shopping and trading in the Town. Residents, as they currently do in surrounding villages, will choose the trading centres on the outskirts of Coventry, in Daventry and even Milton Keynes via the A45 thus depriving the town of revenue and increases the shopping miles by car		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA12 objective as no flood risk assessment or mitigations is available and risks are unknown, particularly the impact on neighbouring villages. Current Afar based on info last updated in 2008 it does not take account of future risks due to climate change. Run off from the proposed housing site will be significant and will lead to increased flooding in Willoughby. SUDS will be difficult to engineer due to levels and there is no guarantee that it would be maintained long-term.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA14 objective as the STA is not adequate failing to assess traffic impact from the site with the model area not extending to it thus rat runs through surrounding villages and travel to Daventry not taken account of. Not been established that the proposed spine road will mitigate the impact of traffic on villages south of Dunchurch through to Daventry.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
347	Dorothy Ogle	NA	NA	DS10	Proposes revised scoring to SA17 objective as there is no evidence that the council has taken account of the NPPF core principle of the intrinsic character and beauty of the countryside for DS10. The Council have not taken account of the historic character and landscape in SA13. Site also has an ancient trackway which was used to transfer salt from Droitwich to Priors Marston to communities such as Hillmorton, Crick and Barby. Salt way passed through Onley and Woolscott probably leading to their evolution.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA2, SA4, S12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at the surrounding nearby settlements; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will necessitate the use of the private car to access services, leisure and cultural facilities; and there is no certainty over the delivery of onsite GP, commercial space or public transport.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

							junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification IDP.
378	D Scott	NA	NA	DS10	<p>DS10 unsound. Unsustainable and does not comply with NPPF for following reasons:Transport:Isolated location Total reliance on car. No meaningful public transport. Infrastructure - rail or buses. Access not yet agreed with local highway authority. Traffic and air quality impact on Dunchurch cross roads. Reliance on link road/spine road a part of South West allocation. Nearest facilities. No employment opportunities located nearby. No existing facilities, therefore total reliance on the car. Deliverability. Scale of development not sufficient to provide a meaningful local centre. Lack of detailed information: Lack of evidence on highways deliverability - no transport assessment. No phase 1 ecology assessment. No utilities assessment e.g. sewer capacity/treatment. No flood risk management.</p>		<p>No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5</p>

Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

440	Edward Pell	NA	NA	DS10	<p>Housing requirement grossly exaggerated; why is Rugby taking housing and warehousing which should be in Coventry?</p> <p>Infrastructure incapable of sustaining growth envisaged; existing congestion; DS10 will result in loss of farmland and increased traffic; existing Planning Permissions sufficient; no employment proposed; area around DIRFT has been ruined which DS8 would replicate along the A45; ancient woodland and farmland between Rugby, Dunchurch and Cawston; South West Rugby Masterplan poorly developed; Thurlaston Conservation Area will be impacted as new development will not enhance or conserve; DS8 has poor access to the town centre; Local Plan not positively prepared, justified, effective or consistent with national policy; doesn't oppose principle of development just the proposed allocations; more up-to-date assessment required; should be more ambitious than warehousing jobs; Local Plan should focus on improving the area; should improve quality of employment rather than warehousing; should protect countryside;</p>		<p>All sites proposed are required to maintain a 5 year land supply throughout the plan period. Makes provision for a larger housing land supply relative to its identified requirement, much of this is linked to longer term infrastructure investment and part of large urban extension sites which will remain developable beyond the Plan period. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. No alteration proposed. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited</p>

481	Jackie Gibbard	NA	NA	DS10	Lodge Farm will not provide or promote a healthy community; how will we provide health centres. Inconsistent with NPPF on avoiding traffic congestion, destroy character of villages, ignores local history, threat of flooding, and noise pollution.	Remove Policy DS10, replace with Walsgrave site	All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.

485	D Waddington	NA	NA	DS10	Lodge Farm was substituted for Walsgrave in the beginning part of 2016 when at the time no Sustainability Appraisal was available. Site is remote with no relationship to the Rugby or Coventry main urban areas.		The Housing Background Paper, Regulation 22c and Full Council agenda (LP 55) provide the detail of the Publication LP distribution strategy was arrived. The SA Report which accompanied the Publication Local Plan details the SA was undertaken on all the reasonable alternatives. This is further elaborated in the SA note appended to the back of the Regulation 22 c statement. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. Lodge Farm will become the largest Main Rural Settlement in the Borough. The infrastructure identified in the IDP to support the Lodge Farm allocation is as agreed through engagement with service providers as necessary.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
485	D Waddington	NA	NA	DS10	Para 30 of National Policy states ' Encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.
485	D Waddington	NA	NA	DS10	NPPF required evidence base and sustainability assessment of the sites to be available as part of the Council's decision making process.		The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.

485	D Waddington	NA	NA	DS10	Question wisdom of plan and object to Lodge Farm Garden Village (DS10)	Suggest Lodge Farm is removed from the Plan	Comments noted- No change required
485	D Waddington	NA	NA	DS10	Suggest Lodge Farm is removed from the Plan. Fundamentally in an unsustainable location where travel will be predominantly by private car with very little public transport use. Contrary to the principle of a 'garden village'. In terms of landscape character, due to the flat nature of the site the proposed development would result in a major impact on the open character of the area. The development would be unable to mitigate the impacts within the short to medium term. The site has no previous use or merit to set it apart from other locations. The site lacks definition and would be open to infill and expansion.	Suggest Lodge Farm is removed from the Plan.	No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. It is acknowledged there will be loss of agricultural land however, this is the case for all of the proposed allocations as there is extremely limited brownfield capacity as demonstrated in the SHLAA. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
485	D Waddington	NA	NA	DS10	Para 17 details 12 core principles which should 'underpin both plan-making and decision-taking'. In particular, penultimate bullet point states that planning should 'actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable.		The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation.
485	D Waddington	NA	NA	DS10	Plan describes how Lodge Farm will be a sustainable location whilst protecting smaller rural villages, and yet the development will have a profound effect on Grandborough, Willoughby, Barby, Walcott and Dunchurch. Even as far away as Braunstone. The plan is not sustainable in terms of transport, infrastructure, noise and light pollution and will destroy local rural atmosphere. Local views of the impact of the plan are necessary to get a balanced perception of the implications.		No change required. The justification of Coventry City's unmet housing need is borne out of the work undertaken at the HMA level by all HMA authorities. The report to the Coventry, Warwickshire and South West Leicestershire Shadow Economic Prosperity Board in September which accompanied the Memorandum of Understanding details the research and cooperation between the six planning authorities with responsibility for planning for housing need, as well as Warwickshire County Council, that determined the level of unmet need from Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated

					<p>cannot meets its own need. Infrastructure plan is vague with number of uncosted proposals. Re: Policy DS10 - it is accepted there is a need to comply with NPPF and boost housing supply. The local plan acknowledges the significant supply of existing permissions/allocations however there is no analysis of why delivery of existing sites and infrastructure cannot be brought forward. Without this, Policy DS10 cannot be justified. No evidence that inclusion of DS10 will actually increase delivery rates in the plan period. A more focused delivery strategy would make better use of existing infrastructure.</p> <p>Re: STA - concerns over Dunchurch crossroads and its junction capacity / air quality issues. SW link road is welcomed however must hope it is realistic and doesn't disappear from plans if developers refuse to come up with funding. Understand that RBC has failed in its duty to cooperate with Daventry DC and Northamptonshire CC regarding the STA and extent of the RWA model used in STA.</p>		<p>Coventry and how this is distributed to the shire authorities. This is further reinforced by the Inspector of the Coventry City Local Plan accepting the evidence demonstrating the capacity of Coventry in meeting its own housing need. This approach and the MoU have also been accepted by the inspector of Warwick's local plan. The IDP is a live document and has been updated Modification LP54.116-140. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. DS8 enables the delivery of the Spine Road and other infrastructure requirements to ensure the comprehensive development of the allocation. DS8 will require sustainable transport measures therefore reducing the reliance on the private car. The</p>

485	D Waddington	NA	NA	DS10	Lodge Farm evidently does not accord with this paragraph due to its distance, particularly for walkers and cyclists to a main urban area. Public transport services could be increased for the site but would still be overly-reliant on private cars for journeys to work and leisure facilities.		WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
485	D Waddington	NA	NA	DS10	Allocation of Lodge Farm would be in contrast to the above statements as the site is not located adjacent to a main urban area and would not include additional employment land. Residents would therefore be required to travel throughout the sub region. For work. Although public transport services could be increased to serve the site, evidence around the UK weighs heavily on a high proportion of residents in rural areas relying on private cars to travel.		The Rugby Urban Area is unable to wholly accommodate the level of growth required. WCC Education and Highways, UHCW and CCG, and Highways England have all been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. Additional details will be finalised at the Planning Application stage.
485	D Waddington	NA	NA	DS10	Delivery of a SA after making decision to include Lodge Farm as a preferred option begs the question as to whether the evidence was made to fit the decision, especially when so much of the evidence base is missing.		The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.

493	Albert Ogle	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA3 objective as additional traffic will be created through Dunchurch which as AQMA, south to Daventry and through surrounding villages. Healthcare facilities are not within walkable distances and GP surgery proposed is not deliverable.		The Local Plan has been informed by an STA which identifies the strategic mitigations for the Plan. The STA identifies there will be a reduction in traffic through Dunchurch when the SW link road is in place and prior to this flows will be better with the interim measures in place. The healthcare facilities requirements for the site has been informed by the CCG.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA13 objective as the site contains ridge and furrow which forms part of the historic landscape linking it to Onley village which is a Scheduled Ancient Monument (SAM). Ridge and Furrow was a reasoning with a crematorium was refused in Willoughby. Potential for further undesignated assets to be identified. By adopting DS10 the policy will not conform with the NPPF as it forms part of the setting of the SAM.		No change required. The SA has been undertaken on a consistent basis and Historic England were consulted upon the assessment criteria contained within the document. Historic England's representation states that there is relatively limited direct impact on historic assets.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA1 objective as the cost of infrastructure will result in very little affordable housing. The cost of transport to access local centres will be greater to those related sites more closely to commercial areas.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA2 objective as it will take time to develop a green field site enabling a sufficient community to warrant a primary school or surgery facilities. During initial phases will be required to use existing local facilities that are overstretched. Residents will unlikely change their established use of the offsite facilities. There will also be cost to residents who do not have access to their own transport.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements. The IDP sets out the early delivery of infrastructure to support the site i.e. early delivery of the primary school.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA6 objective as it will be difficult to see how public transport infrastructure will be provided as it will only be used by people without their own transport (likely to live in affordable housing).		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements and further details of the public transport arrangements will be required at the submission of planning applications.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA8 objective as the site is remote from urban areas and cannot, conceivably, be considered to promote urban regeneration because residents will meet most of their requirements locally or via internet. For the weekly shop the development, if built, will bring more trade to Sainsbury at Dunchurch via the AQMA zone at Dunchurch lights or shops in Daventry where there is free parking.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The SW Spine Rd will help alleviate traffic through Dunchurch reducing traffic flows.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA9 objective as this location will lead to greater consumption of power and fuel than other more appropriate sites. It is a proven fact that night time air temperatures at Onley and Willoughby are often 2-3 degrees Centigrade lower than surrounding villages of Dunchurch Barby and Braunstone due to the effect of the surrounding hills. This will lead to Increased heating cost. Fuel costs will be higher than locations closer to Rugby or Coventry due to needs for car transport to work, bus transport for schoolchildren, shops and entertainment, deliveries etc.		No change required. The SA has been undertaken on a consistent basis and is considered to be a sound approach to the individual site assessments. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA4 objective as the high cost of infrastructure will result in negligible or no affordable housing. Remoteness of the site will reduce practicability for unemployed or lower income families to live there due to the lack of public transport and limited access to private transport to access services and leisure.		No change required. The SA has been undertaken on a consistent basis and is considered to be a sound approach to the individual site assessments.

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA7 objective as other locations for development adjacent to Rugby will have a more positive effect on SA7 than DS10. Traffic congestion into Rugby from DS10 would discourage residents from shopping and trading in the Town. Residents, as they currently do in surrounding villages, will choose the trading centres on the outskirts of Coventry, in Daventry and even Milton Keynes via the A45 thus depriving the town of revenue and increases the shopping miles by car		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required.
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA11 objective as the site will lead to a greater consumption of fuel due to it being colder than surrounding villages. Higher fuel costs than locations closer to Rugby or Coventry for residents accessing school, services and leisure facilities. Community services and facilities are limited and no effective delivery of services for the site.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required.

493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA17 objective as there is no evidence that the council has taken account of the NPPF core principle of the intrinsic character and beauty of the countryside for DS10. The Council have not taken account of the historic character and landscape in SA13. Site also has an ancient trackway which was used to transfer salt from Droitwich to Priors Marston to communities such as Hillmorton, Crick and Barby. Salt way passed through Onley and Woolscott probably leading to their evolution.	DS10 should be removed from the Local Plan, at least until the local planning authority has caused a landscape character assessment to be made and a comprehensive historic landscape assessment. For this proposed development site a landscape sensitivity assessment must be made taking into account the wider impact development of this site will have upon the historic environment of the surrounding area.	No change required. The SA has been undertaken on a consistent basis and Historic England were consulted upon the assessment criteria contained within the document. Historic England's representation states that there is relatively limited direct impact on historic assets. No change required.
493	Albert Ogle	NA	NA	DS10	SA12 objective referenced in that the site is located between the Rainsbrook and Willoughby brook both liable to extensive flooding which impacts upon villages of Grandborough, Willoughby, Saw bridge and surrounding areas. Impact upon existing properties has been substantial. Run off from additional housing will significantly increase flooding of these villages and the inclusion of SUDs would have little effect and will require significant maintenance long term.	Remove DS10 from the Plan at least until a full FRA is performed by the EA	No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The selection of the site has been informed by SFRA with the EA and LLFA have been consulted throughout the development of the Local Plan. The site is considered capable of meeting its policy requirements .

493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA12 objective as no flood risk assessment or mitigations is available and risks are unknown, particularly the impact on neighbouring villages. Current Afar based on info last updated in 2008 it does not take account of future risks due to climate change. Run off from the proposed housing site will be significant and will lead to increased flooding in Willoughby. SUDS will be difficult to engineer due to levels and there is no guarantee that it would be maintained long-term.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The selection of the site has been informed by SFRA with the EA and LLFA have been consulted throughout the development of the Local Plan. The site is considered capable of meeting its policy requirements .
493	Albert Ogle	NA	NA	DS10	Proposes revised scoring to SA14 objective as the STA is not adequate failing to assess traffic impact from the site with the model area not extending to it thus rat runs through surrounding villages and travel to Daventry not taken account of. Not been established that the proposed spine road will mitigate the impact of traffic on villages south of Dunchurch through to Daventry.		No change required. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA identifies strategic transport mitigations with further mitigations on a more local scale being identified through any subsequent planning application.

493	Albert Ogle	NA	NA	DS10	<p>Objection to Lodge Farm. Accept that there is a need to comply with the NPPF to boost the supply of housing. RBC have granted enough planning permission to satisfy allocation. Absence of assessment of why provision needs to be made on a greenfield site in a location outside of the development strategy to achieve compliance with the NPPF. The Plan acknowledges the significant supply of existing permissions/allocations and how this is expected to be delivered. It does not explain or provide analysis of why delivery of the existing allocation and infrastructure connected with it could not be brought forward. Without this the addition of DS10 cannot be justified. Further there is no evidence that including DS10 will actually increase delivery or delivery rate within the plan period. The site at Walsgrave Hill Farm has belatedly been removed from the plan. This allocation would have provided a more sustainable site which would meet the housing overflow from Coventry which Rugby agreed to meet. The decision to remove it is contrary to the argument that additional allocations are necessary or justified.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continues 5 year land supply throughout the plan period. The selection of the allocated sites were informed by the SHLAA, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan.</p>

505	Dawn Cotton	NA	NA	DS10	<p>The proposed development at Lodge Farm contravenes NPPF Paragraph 93-104. The area already experiences flooding, which has made roads impassable (pictures enclosed) and affects local residents and prison staff. Plan conflicts with Policy TH1 Traffic Management and Transport Improvements- public transport is limited, there is a high risk crash route, crossing the road to access the identified bus stops is problematic, and is not a sustainable location. Proposed development contravenes NPPF Paragraph 30 (traffic congestion). Barby and Onley Parish Council feel the Lodge Farm allocation is unnecessary owing to Rugby adopting a high housing figure.</p>		<p>DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. The SHMA has been produced consistent to the requirements of the NPPF and NPPG and has been found sound by the Inspectors of the Warwick and Coventry Local plans EIPs.</p>

531	Janet Clarke	NA	NA	DS10	<p>Council are proposing 12,700 to the south west of the town - can our roads cope with this much traffic. Site near Grandborough is often flooded - how will the water be drained and where too. Dunchurch is very busy with cars and lorries.</p>	Remove Policy DS10	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. The delivery of the South West spine road is a necessity infrastructure requirement to support the delivery of the Local Plan. There is nothing before the Council that would suggested that the road will not be delivered. Proposed Appendix 3 Infrastructure Delivery Plan and DS9 have been amended following consideration of this consultation response and the updated Strategic Transport Assessment (LP54.46 - 54.58 and LP54.120- 124). DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended.</p>

ID	Name	Organisation	Client	Policy Number	Summary of Representation	Changes to make plan legally compliant or sound	RBC Response
535	Heather McBreen	NA	NA	DS10	<p>DS10 is unsound due to information missing from the Transport Assessment. No assessment of the potential traffic impacts on Braunstone or Daventry has been conducted. RBC have failed to meet government standards of fairness in consultation. In March 2016 RBC was engaging Warwickshire County Council Highways about the potential impact of Lodge Farm yet it was a further 6 months before the public were consulted- RBC did not consult when the proposal was in its formative stage. There are numerous proposals in the plan where the Council has not given sufficient justification: hiding GL Hearn's algorithms for reasons of 'commercial confidentiality', not demonstrating why Coventry cannot meet its housing needs, proposing allocating 20,000 dwellings despite a projected need for 12,400, not considering the impact of the South West proposal in relation to the A4071/B4453 junction and failing to engage the public on the transport assessment. RBC launched the consultation before publishing all its evidence. RBC consulted on preferred options in Christmas 2015, the publication draft consultation was launched in July 2016 whilst a report on the earlier consultation was not published until September</p>	<p>Remove Policy DS10, publish missing information, engage the public in relation to the Transport Assessment and ensure WCC Highways conduct a realistic analysis, supply real information on infrastructure not "too be confirmed", hold a further consultation period on the local plan, consider and publish the response to the consultation, produce a publication Draft Two for formal consultation prior to submission to the Planning Inspectorate</p>	<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. The delivery of the South West spine road is a necessity to support the delivery of the Local Plan. There is nothing before the Council that would suggest that the road will not be delivered. The Council has not received a DTC objection from Daventry DC or Northampton CC. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption,</p>

					<p>2016. Proper weight was not given to the representations to the earlier consultation when the next stage was voted on in July 2016. RBC has failed to meet the standards of fairness set by public law in producing its Publication Draft.</p>		<p>junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan, which are contained within the modification LP54.123 - LP54.120. The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.</p>

550	Rosaline A Barfield	NA	NA	DS10	<p>transport.</p> <p>RBC has failed to involve local communities or obtain their support before DS10 was included in the plan contrary to NPPF Paragraph 52 confirmed by Grandborough Parish Councils August 2016 survey showing 87% of residents surveyed opposed Lodge Farm;</p>		<p>Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Relevant consultations consistent with the town and country planning regulation 2012 and the council adopted SCI have been carried out in relation to this policy. Comments noted- No change required.</p>

550	Rosaline Barfield	NA	NA	DS10	Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is needed when it is outside the development strategy and no evidence that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA2 with the reasoning covering the following: houses will not be suitable due to lack of public transport; the site will be a burden to existing services; site will necessitate the use of the private car, no certainty over the delivery of the GP and commercial space and there is no deliverable plans for Leisure and Culture.		No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.

					deployment; site will negatively impact the surrounding area and villages; site will destroy some farmsteads; site will not promote relationships with town areas and the site will cause a major impact on the existing characteristics; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry and site will have a negative impact on vulnerable wildlife and farmland bird populations.		
578	Benjamin Bramley	NA	NA	DS10	Comments objecting to the Sustainability scoring; Essay 5 is not neutral and has a negative impact; Essay 1 is heavily impacted on Essay 5.		The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA.

RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is needed when it is outside the development strategy and no evidence that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA11 and SA14 with the reasoning covering the following: Site will not be suitable due to lack of public transport; the site will necessitate the use of the private car to access jobs retail, services, leisure and cultural facilities impacting on congestion and air quality; lack of public transport; site will be a burden to existing services and additional traffic will impact walking and cycling and safety. STA is not sufficient failing to cover Lodge Farm area and potential impacts at the surrounding nearby settlements; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry; site will be a burden to existing services and additional traffic will impact walking and cycling and safety.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The site is considered capable of meeting its policy requirements.</p>

587	Kathleen Kirk	NA	NA	DS10	<p>The local plan is unsound as it does not directly deal with obligations under the MOU with Coventry unless it re-allocates the Walsgrave site and removes Lodge Farm. Sustainability appraisal evidence was not available at time of replacing Walsgrave site with Lodge Farm proposal. Plan proposes 12,700 dwellings to south of Rugby, can the sub-housing market area cope with the delivery of this. Increased delivery rates in plan are aspirational and if not delivered then plan will not have a 5 year housing land supply. Lodge Farm is an unsustainable location where travel will be predominantly by private car, site being remote to urban areas of Rugby and Coventry. The flat nature of the site means the development would have a huge impact on open character of the area; the site lacks definition or boundary and would attract ongoing infill and expansion - by contrast the Walsgrave site is well defined. 87% of respondents to Parish Council survey are against the proposal.</p>		<p>The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target. All sites submitted to the council through the SHLAA call for sites have been considered against the same SHLAA methodology to identify the most suitable, available and achievable, deliverable and developable. The SA has been undertaken in accordance with relevant regulations, consistent with guidance and best practice and it has applied a consistent approach to assessing reasonable alternative sites. Council officers utilised the SA of the spatial strategy options, the SA of all reasonable alternative sites, evidence gathered by the Council, the outcomes of consultation responses on earlier stages of the plan, and interpretation of national planning policy, to decide which sites should be included in the Publication Draft Local Plan and which should not. Once sites were selected for proposed allocation, these were then worked up as detailed policies in the Publication Draft Local Plan which were then subject to a further round of SA. The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated</p>

							<p>updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140. The Local Plan fulfil the requirements of the MoU and therefore the DtC.</p>
588	Lynn Squire	NA	NA	DS10	<p>Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA2, SA4, S12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at the surrounding nearby settlements; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will necessitate the use of the private car</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

613	Barbara Whittaker	NA	NA	DS10	<p>Concern about flooding with own land in Grandborough flooding already. The Lodge Farm A45 site also floods in the dip. Development would be better suited at Walsgrave closer to Coventry boundary. Hospital will also benefit from improved access. Also in favour of developing brownfield sites near Coventry rather than removing green fields which will be missed.</p>	<p>should not be built in the countryside but on brownfield sites</p>	<p>No change required. Discussions with developers/landowners of existing sites benefiting from planning permissions have taken place to inform a deliverable housing trajectory. These sites alone will not be sufficient to deliver the housing target and a continuous 5 year land supply throughout the plan period. Therefore further allocations are required. The selection of the allocated sites were informed by the SHLAA which assessed suitability and deliverability of greenfield and brownfield sites, and other relevant evidence, proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous flexible supply of housing to meet the housing target. Lodge Farm is located within Flood Zone 1. Any proposals for the site will need to ensure that flood risk is not increased further as per national policy and Local Plan policy SDC5/SDC6. The improvements to University Hospital is related to land within Coventry City Council access to which will be gained through residential allocation. Therefore the delivery of the Walsgrave site within Rugby has no direct influence on the hospital's improvements.</p>
614	Stephen Cotton	NA	NA	DS10	<p>Accept the need to comply with the NPPF to boost the supply of housing. RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply</p>

614	Stephen Cotton	NA	NA	DS10	<p>The plan is unsound as it will increase flood risk and impact the neighbouring localities, concreting over green fields will increase water collection, push the volume of water from the high water table creating a negative effect on the River Leam and Rainsbrook. The drinking water safeguard zone failing the drinking water protection objective as set by the Environment Agency</p>		<p>DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. All relevant service providers have been fully engaged in development of the Local Plan and infrastructure measures as contained within IDP. None have raised objections to the plan. Detail of infrastructure to be provided to support local plan growth is contained in policies and the IDP which is a live document and has been updated at modifications LP54.116-140.</p>

RBC already has sufficient planning permissions to largely satisfy need no analysis why existing allocations and infrastructure connected with it cannot be brought forward. No assessment why DS10 is need when it is outside the development strategy and that its inclusion would actually increase delivery or delivery rates within the plan period. Proposes revised SA scorings for SA2, SA4, S12 and SA14 with the reasoning covering the following: STA is not sufficient failing to cover Lodge Farm area and potential impacts at the surrounding nearby settlements; not been established that the spine road will mitigate the impact of traffic south of Dunchurch to Daventry; no flood risk assessment and consideration of surface water flooding at zone susceptible to flooding; site will not provide adequate affordable housing due to high infrastructure cost and houses will not be suitable due to lack of public transport; the site will necessitate the use of the private car to access services, leisure and cultural facilities; and there is no certainty over the delivery of onsite GP, commercial space or public transport.</p>		<p>No change required. Lodge farm, which will become a new main rural settlement, will ensure that the Local Plan has a portfolio of sites in size and location to help maintain a five year land supply throughout the course of the plan. Discussions with developers/landowners of existing planning permissions have taken place to inform deliverable housing trajectory. LUC have assessed comments (contained within the summary of consultation responses) made on the SA and consider that no alteration to their scorings is required. The STA June 2017 modelled area has been updated to cover a larger model area, updated travel to work assumption, junction counts and que surveys, to identify the strategic transport infrastructure to support the Local Plan. The Local Plan has been informed by an SFRA and with more detailed flooding assessment being required where necessary at the planning application stage. The site is considered capable of meeting its policy requirements.</p>

633	E Kirk	NA	NA	DS10	<p>Fundamentally development is in an unsuitable location where travel will be predominantly by private car with very little public transport use. Contrary to the principles of a 'garden village'. Site is entirely remote from both Rugby and Coventry main urban areas. Site lacks geographic definition and would be open to infill and expansion. Walsgrave site is very well defined with Coventry on one side and Ansty site to the other acting as a strong urbanising feature. On the South side, Coombe Abbey prevents further spill into green belt.</p>	Remove Lodge Farm DS10 from local plan.	<p>The STA June 2017 updated the September 2016 STA by increasing the modelled area so that it extends south to the of the A45 and into Daventry DC, it has incorporated updated travel to work assumption, junction counts and queue surveys, to identify the strategic transport infrastructure to support the Local Plan. The measures contained within the IDP and DS9 informed by the STA mitigate the impacts of the SW Rugby allocation. DS8 is almost entirely within flood zone 1, with an extremely small area of flood zone 2. The Local Plan is supported by a Flood Risk Assessment. The Local Lead Flood Authority will be a consultee at application stage and will require at this stage appropriate management of any surface flooding on the consistent with SDC5. No change recommended. The selection of sites as informed by the SHLAA, and other relevant evidence, for proposed allocation contained within the development strategy represents the most sustainable strategy and the housing allocations ensure a continuous supply of housing to meet the housing target.</p>
